RESEARCH CONTRIBUTION NO.	

ACKNOWLEDGMENT

The completion of this capstone project would not have been possible without the help and participation of individuals whose contributions are gratefully acknowledged and appreciated. The researchers would like to express their heartfelt gratitude to the following names:

To their Dearest Adviser, Mr. Merardo A. Camba Jr. for his guidance and motivation during the project development. His kind words and support helped strengthen us to make the project possible.

To their Research Coordinator, Mr. Jefferson L. Lerios for his patience and knowledge in guiding the researchers.

To the Panelists, Mr. Mike Phillip T. Ramos, Ms. Carolina R. Joval and Mr. Jhoco S. Milanes for sharing their feedback and expertise.

To Ashley, Mabel, Vanessa, Maria and Angelo, Specially Anita for helping them acting as a voice actor for the characters in the making of the animated video.

BSIT IV – A AMG, for bringing energy to everyone's spirit through hardships and accomplishments of the entire college years.

To Mr. Wilson B. Suyat and to the other instructors/professors of the College of Computer Studies and Laguna State Polytechnic University— Los Baños Campus for the knowledge and experience we gained in the duration of our studies.

The Researchers

DEDICATION

This capstone project is dedicated with heartfelt sincerity to their dear parents who have been a constant source of encouragement and strength.

To Mr. and Mrs. San Juan for their patience, faith, and guidance, which greatly contributed to the well-being of the researcher in completing this project.

To Mr. and Mrs. Crisostomo for their unwavering support, especially through their financial assistance, which greatly contributed to the success of this project.

To Mr. and Mrs. Cayabyab for their constant guidance and support, which served as the researcher's source of encouragement in completing this project.

To our loved ones Ms. Bettina Ashley R. Tulio**,** they would also like to extend the deepest gratitude to the brothers, sisters and relatives.

May it inspire the courage to stand, participate in civic life, and call for a government that listens to its people, serves with integrity, and upholds the welfare of the nation and future generations.

ABSTRACT

The study addressed the persistent underrepresentation and inherent challenges faced by women in Philippine public governance by developing an engaging and relatable 2D animated advocacy video, "ABANTE BABAE: A VIDEO ON WOMEN'S PARTICIPATION IN PUBLIC GOVERNANCE." The project utilized modern animation techniques, including Procreate Dreams and Blurrr, to create a compelling narrative centered on four diverse female characters, aiming to illustrate both political barriers and effective leadership capacity. The video was evaluated using an expanded Technology Acceptance Model (TAM) framework, administered to fifty female respondents, comprising barangay officials, student council members, and general students. The evaluation measured the video's effectiveness across various dimensions, including Perceived Usefulness, Perceived Ease of Understanding, Perceived Enjoyment, Aesthetic Quality, Attitude Toward Watching, and Behavioral Intention. Results showed consistently high user acceptability across all categories. The high scores in Aesthetic Quality and Perceived Enjoyment confirmed that the animation successfully transformed the serious topic into a pleasant and engaging experience, while the strong rating in Behavioral Intention validated the video's potential to drive positive advocacy. The researchers concluded that animation is a highly effective, modern medium for translating complex political discourse into an accessible and motivational tool, positioning "ABANTE BABAE" as a viable resource for promoting gender equality and inspiring actionable intent among diverse female demographics.

Keywords: *Animation, Advocacy, Women in Governance, Gender Equality, Technology Acceptance Model (TAM), Sustainable Development Goal 5 (SDG 5), Sustainable Development Goal 16 (SDG 16), 2D Animation.*

DEFINITION OF TERMS

Advocacy Video	A short film or video content produced with the specific intent of promoting a cause, changing public opinion, or influencing policy and behavior regarding a social or political issue.
Aesthetic Quality and Design Appeal	Refers to the visual attractiveness and artistic value of the animated video. In this study, it measures the respondents' satisfaction with the character designs, color palette, and overall animation style used in "ABANTE BABAE."
Attitude Toward Use (ATU)	Refers to the user's positive or negative feelings toward the technology. In this study, it specifically describes the respondents' emotional response—such as feeling inspired or interested—after watching the animated advocacy video.
Animation	A production technique that uses a rapid sequence of two-dimensional images or illustrations to create the illusion of motion.
Behavioral Intention to Use (BIU)	Refers to the measure of the likelihood that a person will employ the technology in the future. Operationally, it determines the respondents'

	willingness to recommend the video to others or use it as an educational tool for gender advocacy.
Governance	The process of decision-making and the process by which decisions are implemented (or not implemented) within political institutions.
Perceived Ease of Use (PEOU)	Refers to the degree to which a person believes that using a particular system would be free of effort. In this study, it is interpreted as Perceived Ease of Understanding, measuring how easily the respondents could follow the story, understand the dialogue, and comprehend the advocacy message.
Perceived Enjoyment (PE)	Refers to the extent to which using a specific system is perceived to be enjoyable, aside from any performance consequences. In this study, it evaluated how pleasant, entertaining, and engaging the experience of watching the "ABANTE BABAE" animation was for the viewers.
Perceived Usefulness (PU)	Refers to the degree to which a person believes that using a particular system would enhance their performance. In this study, it measures the

	respondents' perception of how effective the video is in raising awareness and deepening understanding of women's participation in governance.
Sustainable Development Goal 5	A global goal established by the United Nations aimed at achieving gender equality and empowering all women and girls by 2030. Key targets include ensuring women's full and effective participation and equal opportunities for leadership at all levels of decision-making.
Sustainable Development Goal 16	A globally agreed-upon objective to promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable, and inclusive institutions at all levels.
Technology Acceptance Model (TAM)	An information systems theory that models how users come to accept and use a technology. It posits that perceived usefulness and perceived ease of use determine the attitude toward using the technology, which, in turn, influences Behavioral Intention.

CHAPTER I

INTRODUCTION

Project Context

The consistent underrepresentation of women in public governance remains a critical issue in the Philippines, despite their active engagement as voters and members of the electorate. While the nation has made significant strides in gender equality, with policies and legal frameworks in place to promote women's rights, a persistent gap exists between legal mandates and actual political representation. This study aims to examine the multifaceted barriers that hinder women's full participation in leadership and decision-making roles.

Local and international studies reveal that the issue is not simply a matter of individual capability but is rooted in a combination of deeply ingrained socio-cultural norms, economic constraints, and institutional factors. These barriers often manifest as negative societal attitudes about women's capacity to lead, as well as limited financial resources and institutional support to aid women in running for and securing political office. In response, there is a growing global recognition of the need for targeted policies, such as capacity-building support and programs that challenge gender stereotypes, to create a more inclusive political environment.

A 2017 article in the Philippine Journal of Social Development (PJSD) by Camille Genevieve M. Salvador underscores the enduring challenges women face in overcoming patriarchal political systems and the lack of adequate support systems to promote their political engagement. The PJSD

research emphasizes the necessity of multifaceted policy measures to address both the systemic and sociocultural constraints that impede women's access to positions of authority in Philippine governance. Effectively addressing the underrepresentation of women in Philippine governance necessitates a comprehensive approach that tackles these structural, economic, and sociocultural barriers to cultivate a more representative and equitable political environment.

The project's central thesis was that effective governance is closely associated with the inclusion of women, as their participation brings unique perspective and addresses issues that disproportionately affect women and their communities. By advocating for policies that foster the economic and social empowerment of women, the project emphasizes that their increased involvement leads to more representative and responsive governance. In the end, this endeavor highlighted that enabling women to take on leadership is not only a matter of gender quality but a fundamental requirement for a thriving, democratic society.

Project Objectives

Generally, this project aimed to create a video that highlights women participation in public governance. Specifically, this endeavor intended to:

1. Explored the potential of women and challenges in public governance;
2. Developed an animated video that shows women's capacity and challenges in public governance participation;
3. Evaluated the produced video using the Technology Acceptance Model (TAM) to assess its potential to influence women's perceptions regarding political leadership.

Project Purpose

The project aimed to examine the underrepresentation of women in public governance in the Philippines and to highlight their capacity as nation-builders. Through an examination of the cultural, social, and institutional factors that hinder the representation of women in governance, the research hoped to identify why there are still relatively few women in leadership despite progress in gender equality.

The capstone project, which is a video production project, should be utilized as an advocacy and educational tool, highlighting real stories, evidence-based data, and empowering experiences that empower women to be active participants in public policy making and leadership.

The project is aligned to the United Nations Sustainable Development Goals, namely SDG 5: Gender Equality, which speaks to the importance of women's full and effective participation in public, economic, and political life, and SDG 16: Peace, Justice, and Strong Institutions, which seeks to ensure inclusive and participatory government at all levels. In moving these global goals forward, the project sought to contribute to creating a more just, equitable, and representative society.

Scope and Limitations of the Study

This project focused on women's participation in public governance in the Philippines. It sought to examine the leadership potential of women, emphasize the need to stimulate more women to play active roles in governance, and examine the causes of the low number of women with political and governmental appointments. The study looked into societal, cultural, and

institutional constraints limiting women's participation in leadership positions in the public sector.

A part of the capstone project would be a video that projected the results of the study in a creative and effective manner. The video sought to raise awareness, inspire action, and question current perceptions through the voices, experiences, and abilities of successful Filipino women and those who aim to join public governance.

The research was only in the context of the Philippines and might not completely depict the scenarios of women in government in other nations. The primary data collection were interviews, surveys, and secondary data in the form of articles, reports, and past research, which might be scoped and available only to a certain extent. The video output might also not account for the entire scope of the problem due to the limitations of time and resources. It concentrated on some key themes and stories instead of a general overview of everything about women's political participation.

The research also acknowledges its limitations, as it cannot fully account for the diverse regional, ethnic, and socioeconomic contexts that shape women’s experiences in government. These differences may influence access to leadership opportunities and perceptions of gender equality in ways beyond the scope of this study. Furthermore, while the video may raise awareness, its impact on public opinion or policy is likely to be limited without continued engagement, follow-up initiatives, and sustained advocacy to support long-term structural change.

CHAPTER II

THEORETICAL FRAMEWORK OF THE PROJECT

Review of Related Literature and Studies

The integral role of women in public governance constitutes a fundamental pillar of democratic development and societal advancement. Representing half of the global populace, women contribute indispensable perspectives, values, and leadership styles that complement those of men, fostering more balanced and inclusive decision-making processes within the political sphere. However, despite notable strides in gender equality across numerous sectors, the political arena remains characterized by a comparatively slow rate of progress towards equitable representation. On a global scale, the voices of women continue to be marginalized in policy formulation, and their access to leadership positions is frequently constrained by prevailing cultural norms, systemic impediments, and persistent prejudices.

The Inter-Parliamentary Union (IPU, 2023) indicates that women currently hold only 26.5% of parliamentary seats worldwide. This statistic reveals a significant disparity in comparison to their male counterparts, suggesting that genuine gender parity in political leadership remains a distant objective. Furthermore, data reported by UN Women (2023) reveals that women constitute a mere 10% of heads of state and 6% of heads of government globally. This underrepresentation underscores the structural and societal challenges that impede women's ascent to the highest echelons of political power.

A primary factor contributing to this inequality resides in deeply entrenched socio-cultural norms that historically ascribe traits of leadership, authority, and decision-making as inherently masculine. Many societies continue to adhere to traditional viewpoints that delineate women's roles within the domestic sphere, while leadership and politics are perceived as domains belonging to men. These norms are perpetuated within families, educational institutions, workplaces, and notably through media portrayals of leadership. From early childhood, girls often encounter fewer opportunities to cultivate confidence in leadership capacities, while boys are encouraged to exhibit assertiveness and ambition.

Krook and Childs (2010) have discussed the salient role of gender performance in politics as a deterrent for women considering candidacy for office. Female candidates are frequently evaluated not solely on their policy platforms or competencies but also on the degree to which their gender presentation aligns with societal expectations—being perceived as "strong yet not overly aggressive," "assertive yet remaining amenable." This double standard imposes additional pressures and discourages many qualified women from even contemplating entry into political races.

The media also exerts a critical influence in shaping public perceptions of female leaders. Bauer (2012) observed that female politicians are disproportionately subjected to media coverage that emphasizes their physical appearance, familial circumstances, or emotional expressions, rather than their policy agendas or leadership acumen. This form of biased reporting can

undermine women's authority and influence voter attitudes, contributing to the perception of women as less capable leaders.

Furthermore, financial inequality presents a substantial impediment. The World Economic Forum (2022) has revealed that women have approximately 20% less access to financial resources for political campaigns compared to men. Pursuing elected office often necessitates significant personal and financial backing, and in numerous instances, political parties prioritize investment in male candidates whom they perceive as exhibiting lower risk or greater electability. Women from socio-economically disadvantaged backgrounds face particular marginalization, often lacking the requisite resources or political networks to sustain a viable campaign.

Notwithstanding these challenges, various global and local initiatives have emerged with the aim of addressing this gender disparity. One promising strategy involves the strategic utilization of media and technology to cultivate awareness and reshape public perceptions. For instance, Ross and Carter (2011) underscored the importance of gender-sensitive media campaigns that effectively showcase women as competent leaders. These campaigns serve to challenge prevailing stereotypes and encourage both men and women to offer their support to female candidates.

Moreover, the art of storytelling through digital and visual mediums—such as animated videos, documentaries, and DVDs—has gained traction as a potent advocacy tool. Dunaway (2018) noted the efficacy of such media formats in conveying complex issues, including gender inequality, in a manner that is both engaging and accessible to a wider audience. Smith and Williams (2020)

further observed that visual storytelling enhances political interest and participation among young women by 35%, as it enables them to identify with relatable role models and comprehend the real-world implications of policy decisions.

In the context of the Philippines, the issue of gender representation in politics holds particular relevance. According to the Philippine Commission on Women (2022), women constitute only approximately 28% of elected positions in local government, a figure slightly below the global average. While the nation has witnessed two female presidents and several female senators, the pathway to political leadership remains fraught with obstacles, particularly at the grassroots level. Traditional gender roles, the pervasive influence of vote-buying practices, and established political dynasties create significant barriers for women—especially those from marginalized communities—seeking to achieve political breakthrough.

One notable endeavor to address this issue was the enactment of the Magna Carta of Women in the Philippines in 2009. This legislation mandates non-discriminatory practices and establishes avenues for women's participation across all levels of governance. However, consistent enforcement and widespread awareness remain challenges, particularly in rural areas where patriarchal norms are deeply entrenched. Numerous gender equality campaigns supported by non-governmental organizations (NGOs) and civil society groups have also been undertaken, but intensified efforts in the form of youth-targeted and grassroots-level campaigns are necessary to achieve tangible impact.

Internationally, organizations such as the United Nations Development Programme (UNDP, 2019) have found that targeted advocacy campaigns can yield a 20–25% increase in voter support for women candidates. These findings suggest that when communities are educated about the principles of gender equality and are presented with the tangible benefits of women's leadership, they exhibit a greater propensity to support female leaders. This underscores the imperative for innovative advocacy tools—particularly those possessing the capacity to connect emotionally and visually with diverse audiences.

It is within this context that the present study, entitled "Abante Babae: A Video on Women's Participation in Public Governance," is situated. It endeavors to contribute to this ongoing movement by producing an engaging animated advocacy video designed to promote awareness regarding the critical importance of women's participation in politics. Employing the Technology Acceptance Model (TAM) as an evaluative framework, the study intends to analyze the video's impact on viewers' perceptions and acceptance of the intended message. By foregrounding the narratives of empowered women leaders, the animation seeks to inspire action, particularly among younger demographics.

Synthesis

This study, "Abante Babae: A Video on Women's Participation in Public Governance", explored the various factors influencing women's involvement in political leadership. It synthesized existing research on the barriers women face in engaging in politics, such as gender biases, societal stereotypes, and institutional limitations that hinder their participation (Beaman et al., 2012).

These barriers, combined with the lack of support and political resources, create significant obstacles for women trying to enter governance roles. On the other hand, the study also examined the perceived benefits of women's political participation, including the positive impact on policy representation and societal change, which have been shown to lead to more inclusive governance (Swers, 2005).

The study highlighted the importance of awareness campaigns and media representation in reshaping public perception about women's capabilities in leadership roles. By providing women with access to education, political training, and media exposure, it becomes possible to break down existing stereotypes and encourage more women to pursue leadership positions (Duerst-Lahti, 1997). These efforts help create a more inclusive environment in which women are empowered to actively participate in shaping public policies.

In summary, this study synthesized the interconnected barriers and opportunities women face in political governance and emphasizes the critical role of awareness, education, and media representation in promoting gender equality in political spaces.

Relevance of the Study

The relevance of this study is significant in addressing the ongoing issue of gender inequality in political participation, particularly in public governance. Women's involvement in leadership roles is essential for creating inclusive and representative decision-making processes. Despite the progress made in some areas, women are still underrepresented in political positions, which limits the

diversity of perspectives in shaping policies that impact society as a whole. This study aimed to shed light on the barriers that prevent women from engaging in politics, such as societal stereotypes, lack of support, and limited access to resources, and explore ways to overcome these obstacles.

Through its focus on raising awareness and advocating for gender equality in political spaces, this research is highly relevant in promoting a more inclusive governance system. The use of a video as a tool to highlight the importance of women's political participation makes the study particularly impactful in reaching a broad audience, especially the younger generation, and inspiring them to take an active role in fostering a fairer and more equal political environment. This study also contributed to ongoing efforts to empower women, encouraging them to pursue leadership roles and become catalysts for change in their communities.

Ultimately, the study is relevant because it not only advocates for gender equality in governance but also seeks to create tangible change by encouraging both women and society to recognize and act on the importance of female representation in politics. It supports the broader global movement for gender equality and aims to help build a political system where all individuals, regardless of gender, have an equal opportunity to participate and lead. By raising awareness and promoting inclusive leadership, the study contributes to informed dialogue and policy discussions on women's political empowerment. It also serves as a foundation for future research and advocacy efforts focused on strengthening women's roles in decision-making processes

They practice small-scale, collective, and politicized filmmaking to resist prevailing media ideologies and impact social change for marginalized people.
Lavine, Seymour (2022)	Emancipation through Animation: A Model of Activism using Animated Film	The four main production, distribution, and exhibition practices in animated films facilitating activism are an emancipatory ethos, democratized production, propaganda/polemics, and a mobilizing ecosystem of strategies. Beliefs about the effectiveness of animation towards the achievement of its goals propel its recycling as a means of activism that results in an emancipatory media paradigm for animation in activism.

Conceptual Framework

The conceptual framework for this capstone, titled “Abante Babae: A Video on Women's Participation in Public Governance,” centers on the dynamic relationship between factors that either encourage or hinder women's active involvement in public governance. At the core of this framework are the independent variables that shape this reality: the negative factors include deeply entrenched barriers such as societal stereotypes, gender biases, and limiting cultural norms. Conversely, positive factors emphasize the perceived benefits of women's political involvement, highlighting its role in empowerment

and societal change, alongside their access to resources like education, political training, and support systems. These core inputs are channeled through crucial mediating factors, primarily targeted awareness and education campaigns designed to inform the public, and consistent media representation that normalizes women in leadership roles, both of which are essential for dismantling existing stereotypes.

These interconnected elements ultimately converge to influence the dependent variable: the tangible extent of women's participation in public governance, which is measured by their representation in leadership positions and visibility in decision-making processes. By examining the interplay between these barriers, benefits, mediating campaigns, and the broader environment, this framework provides a comprehensive foundation for understanding the complex forces at play and supports the overall thesis goal of advocating for gender equality in leadership.

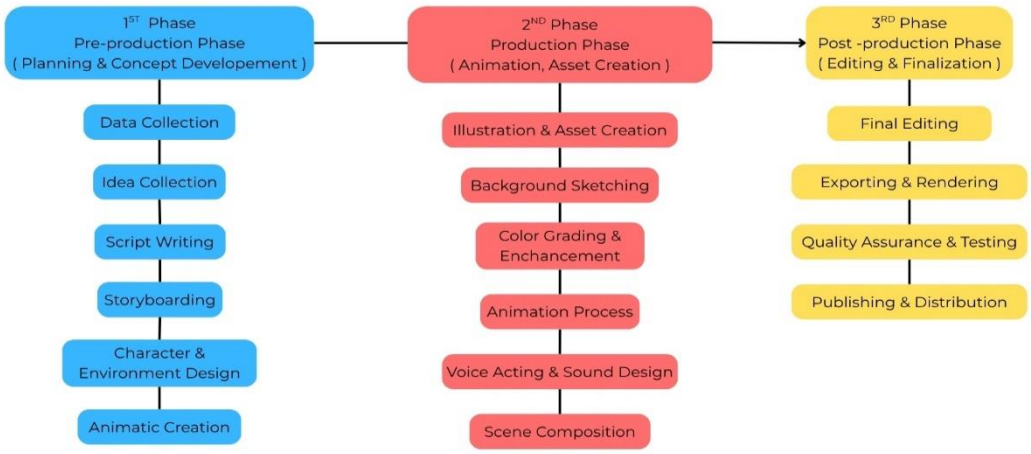

Figure 1. Conceptual Framework

CHAPTER III

METHODOLOGY

Project Design

The project strategically employed animation and digital storytelling to reshape audience perception regarding gender roles in leadership. By utilizing animation, the project deconstructed the often rigid and exclusionary "traditional leader" archetype, replacing it with a narrative that portrays women as high-impact decision-makers and essential contributors to community growth. This visual medium was intentionally chosen to bridge the gap between complex political discourse and public understanding, making the message accessible to a diverse demographic. Through purposeful character development and the depiction of women overcoming systemic barriers, the project facilitated a cognitive reframing for the viewer—moving gender bias from an abstract concept to a visible, addressable hurdle.

As a tool for social change, the project's advocacy impact is anchored in the legal framework of the Philippine Magna Carta of Women (Republic Act No. 9710). The design served to "localize" this policy, translating legislative mandates into a compelling visual format that advocates for substantive female participation in government service. By highlighting both the unique contributions and the structural challenges faced by women, the narrative structure aims to reduce implicit biases among voters and community members while fostering a culture of empathy and support. Ultimately, the project functioned as a catalyst for behavioral change, empowering female viewers to

recognize their own leadership potential while inspiring the broader public to champion gender equality within the spheres of public governance.

Project Development

The development of “Abante Babae: A Video on Women’s Participation in Public Governance” involved a systematic and research-based approach that combined creative storytelling with technical production. The process began with the conceptualization of the film’s theme, focusing on the representation of women in leadership and their vital roles in promoting inclusive governance.

Animation Development Model

To accurately present the lived experiences, challenges, and contributions of women in Philippine governance, advocacy film was produced through a systematic and well-defined animation pipeline. Each phase of the production process was designed to ensure that the final output delivers a precise, coherent, and impactful representation that effectively engages its intended audience.

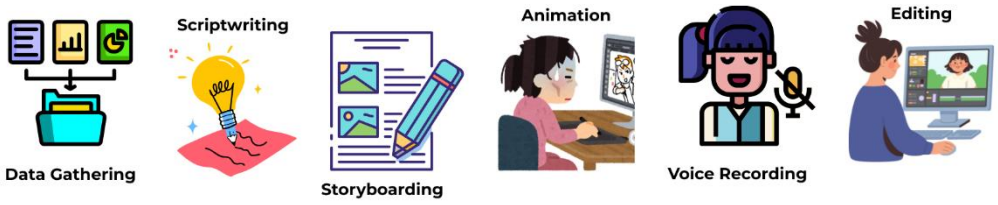

Figure 2. Animation Development Model

Data Gathering

Ensuring the accuracy and relevance of the film’s content begins with this crucial first phase. Data was gathered through interviews with women leaders, community representatives, and individuals knowledgeable about governance, along with credible online documentaries and published materials.

At this stage, the team clarified the study's objectives and thoroughly reviews all collected information to confirm its reliability and validity before integrating it into the project.

Designing

The Designing phase converts the documented concepts, themes, and narrative goals into definitive visual and auditory assets. This stage is critical for ensuring that the animated video, "ABANTE BABAE," effectively communicates its advocacy message to the target audience—Student Councils and other youth leaders—by establishing relatability and thematic consistency.

This phase encompasses the development of the following key components:

Character Design

In this phase, the researchers focused on designing characters that were visually engaging, representative of diverse leadership roles, and grounded in the Filipino context. The characters were digitally designed and finalized using iBis Paint X.

The core objective of the character design was to establish thematic relatability and representation for the audience. Since the video advocates for increased women's participation in governance, the characters needed to embody distinct, positive aspects of female leadership:

- Diversity of Roles: Characters were designed to visually represent women across different generations, socio-economic backgrounds, and professional domains.
- Emotional Connection: The clean, expressive 2D animation style was chosen to build a strong emotional connection with the viewers, allowing

them to easily empathize with the characters' challenges and celebrate their triumphs.

By developing visually consistent characters—Maria, Ashley, Grace, and Lola Consuelo—the learning aid ensures that the complex political themes are anchored by relatable, human figures, making the advocacy message more personal and memorable for the young leaders watching.

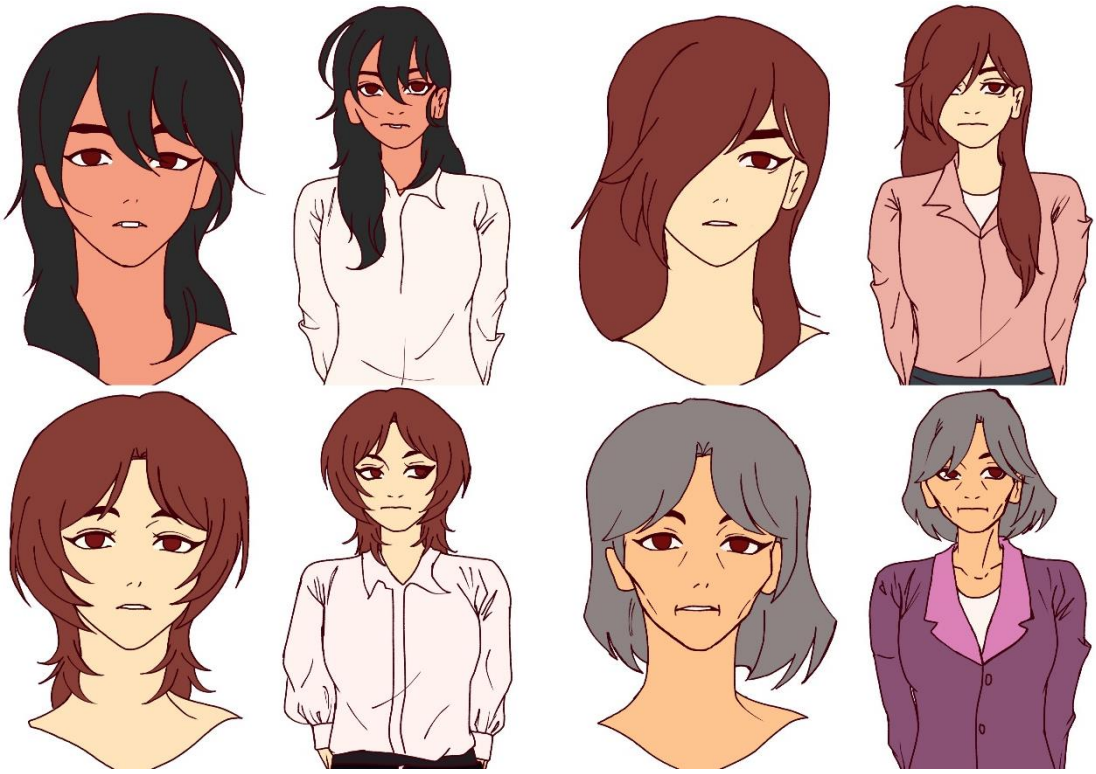

Figure 3. Sample Character Design

Script and Storyboard Development

The narrative and visual planning of the video were formalized during this stage:

- Scriptwriting: The final script was polished to ensure dialogue was clear, powerful, and directly aligned with the project's advocacy goals. Special attention was given to the dramatic pacing, particularly in key scenes, to maximize emotional impact and highlight the moments of female empowerment.

- Storyboard: A detailed storyboard was created, translating the final script into a sequence of visual frames. This served as the blueprint for the entire animation process, ensuring visual consistency in camera angles, character staging, and scene transitions, which is vital for maintaining narrative clarity and flow.

Figure 4. Sample Storyboard

Animation

The animation for the film was developed through a multi-software workflow integrating Blurrr and Procreate Dreams to ensure visual consistency, expressive motion, and high production quality. Procreate Dreams was utilized for the creation of character illustrations, background layouts, and initial motion sketches due to its intuitive timeline system and advanced drawing tools that support precise frame-by-frame animation. These assets were then enhanced in Blurrr, where additional motion effects, transitions, and environmental animations were applied to refine the overall visual flow. Blurrr's tools for motion smoothing and layered compositing allowed for more dynamic scene movement, such as camera pans, lighting effects, and subtle environmental interactions. By combining the strengths of both software platforms, the animation process achieved a polished and cohesive visual output aligned with the narrative and thematic direction of the film.

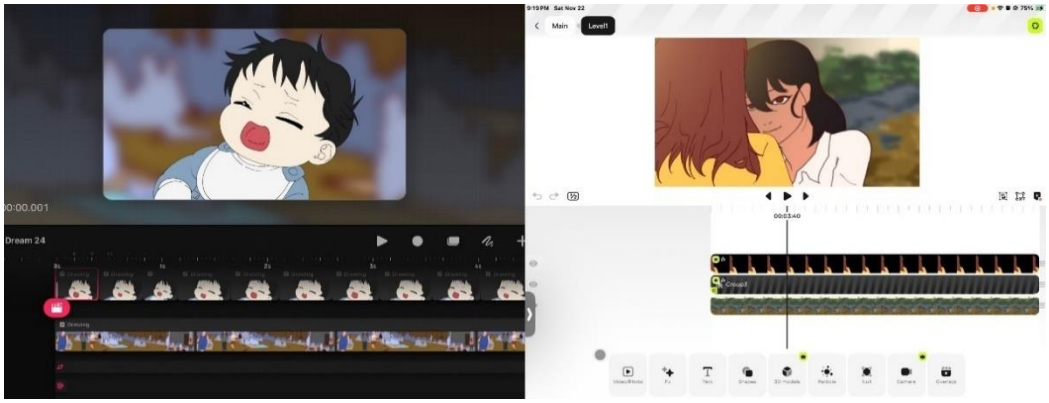

Figure 5. Sample Animation Process

Voice Recording

The voice lines for the film were recorded and submitted in a Google Drive. These recordings were then processed in Audacity, where background noise was removed, volume levels were adjusted, and unnecessary pauses were trimmed. This audio enhancement ensured that all dialogues and narration are clean, understandable, and well-synchronized with the animation.

Editing

The film was edited using Adobe Premiere Pro to perform precise timeline editing, audio synchronization, and visual enhancements, while CapCut PC was utilized for applying transitions, text, and supplementary effects, resulting in a cohesive and professionally refined final output.

Materials

Data

The data used in this project were obtained from a combination of primary and secondary sources to ensure the accuracy, relevance, and credibility of the film's content. Primary data were gathered through interviews with women leaders, these interviews provided firsthand insights on the challenges, contributions, and lived experiences of women in public office.

Secondary data were collected from published research studies, government reports, online documentaries, and statistical records from reputable institutions such as the Philippine Statistics Authority (PSA), the Philippine Institute for Development Studies (PIDS), and the Inter-Parliamentary Union (IPU). These sources include data acquired between 2020 and 2025, offering updated information on women's representation in national and local government positions. Together, these datasets guided the narrative direction, character development, and thematic emphasis of the advocacy film.

Software Specifications

IbisPaint X is a mobile digital drawing application used for creating initial sketches, character concepts, and background illustrations. Its variety of brushes, layers, and stabilizers supports clean and detailed artwork for the animation.

Procreate is a professional digital illustration software for iPad. It is used to develop high-quality character designs, backgrounds, and other visual elements. Its intuitive interface and advanced brush engine allow for precise and polished artwork creation.

Procreate Dreams is an animation-centered software used to produce simple motion sequences and short animated scenes. Its timeline tools, key framing features, and real-time previews help refine character movements before final editing.

Adobe Premiere Pro is a professional video-editing software used to compile all animated scenes, apply transitions, adjust timing, and integrate

audio. It serves as the primary tool for assembling and exporting the final animated film.

CapCut PC is an accessible video-editing application used for quick edits, applying effects, adding subtitles, and refining specific parts of the animation. It also enhances pacing, color grading, and overall visual flow. Additionally, it is useful for creating short promotional content and finalizing edits for distribution.

Audacity is an open-source audio recording and editing software used to produce high-quality sound. It allows for recording voiceovers, removing background noise, and adjusting sound levels. The software also supports basic audio effects to ensure clear and polished audio output.

Blurrr is a visual enhancement tool used to add blur effects, smooth transitions, and refine motion elements. It helps improve visual consistency and reduce distractions in scenes. This contributes to a cleaner and more professional appearance throughout the film.

YouScript is a scriptwriting tool used for drafting, editing, and organizing the project's script. It supports structured development of dialogue, narration, and scene descriptions. This ensures clarity, coherence, and effective storytelling during the production process.

Hardware Specifications

Describe all the hardware that will be used including names and other details. The laptop was used as the main workstation for creating the animated film, handling intensive task such as video editing,

rendering, and compositing. It supported animation software efficiently and allowed smooth management of large project files. This device played a crucial role in the overall production workflow.

Table 2. Hardware Specification of Laptop

Laptop (Camille)	
Processor	Intel(R) Core(TM) i3-7020U CPU
Memory	8.00 GB
GPU	INTEL HD GRPAHICS 620 AMD Radeon R7 M440
SSD	1TB
OS Version	Windows 11 Home Single Language

The first tablet device was used for reviewing animation drafts, storyboards, and edited scenes. Its display quality allowed accurate checking of motion, timing, and visual consistency. It was also useful for providing feedback during the editing process.

Table 3. Hardware Specification of Ipad 1

Ipad (Joshua)	
iPad OS	18.6.2
Model	iPad (10th generation)
Display	Liquid Retina display
Storage	256GB

The second tablet device was utilized for detailed frame inspection and quality control of animation outputs. It supported the evaluation of fine visual details, transitions, and color accuracy. This device contributed to improving the overall quality of the animated film.

Table 4. Hardware Specification of Ipad 2

Ipad (Sophia)	
iPad OS	17.7.10
Model	iPad Pro (10.5-inch)
Display	Retina display
Storage	512GB

The pen tablet was primarily used for digital illustration, frame-by-frame animation, and detailed asset creation. It enabled precise drawing and smooth control during intensive animation work. This tool significantly improved efficiency and accuracy in heavy editing and animation tasks.

Table 5. Hardware Specification of XP Pentab

Research Design

This study utilizes a descriptive–quantitative research design integrated with a multimedia production approach. The design enables the researchers to examine the challenges, perceptions, and experiences of women in public governance and translate these findings into an animated advocacy video. Quantitative data collected from interviews and secondary sources inform the development of the narrative, characters, and thematic direction of the film, while the descriptive component documents the current state of women's

participation in governance based on factual studies, reports, and statistical records.

Sampling Design

The study employed purposive sampling in selecting respondents to evaluate the acceptability and effectiveness of the animated advocacy video “Abante Babae.” A total of 50 female respondents (n=50) participated in the study, providing a sufficient basis for quantitative analysis. The respondents were intentionally chosen based on their exposure to leadership, governance, and community involvement to ensure relevant and informed responses.

The sample included women holding barangay positions such as elected officials and committee heads, members of student councils and student political organizations with leadership experience, and female students from the general student population who represent future constituents and potential leaders. This selection allowed the study to gather perspectives from individuals with different levels of political and social engagement.

Through this purposive approach, the study was able to assess how the advocacy video was received by a focused yet diverse audience. It also helped measure the potential of the video to influence awareness, attitudes, and support for women’s participation in governance across various groups.

Population of the Study

The population of the study is composed of individuals who can provide relevant insights into women’s participation in public governance. This includes selected women leaders, barangay officials, youth representatives, and adult community members from Laguna. These individuals were chosen because

they possess either direct experience in governance or sufficient awareness of the challenges affecting women leaders in their communities.

Data Collection Instrument

The primary data collection instrument used in this study was a structured survey questionnaire designed to evaluate the animated advocacy video using the Technology Acceptance Model (TAM). The questionnaire was developed to collect quantitative data on viewers' perceptions, attitudes, and acceptance of the video. It also aimed to measure the effectiveness of the animation as an educational and advocacy material that promotes women's participation in governance.

The questionnaire consisted of close-ended items measured using a five-point Likert scale, ranging from strongly disagree to strongly agree. The survey items were grouped according to key TAM constructs, including perceived usefulness, perceived ease of understanding, attitude toward the video, and behavioral intention to support women's participation in governance. This organization allowed for a clear and systematic evaluation of audience response to the advocacy message of the animated film.

To ensure the reliability of the data collection instrument, a pilot test was conducted prior to its final administration. Feedback from the pilot test was used to improve item clarity and structure. A reliability test using Cronbach's Alpha was then performed to measure the internal consistency of the questionnaire items. The results showed acceptable reliability values, indicating that the instrument consistently measured the intended constructs and was suitable for statistical analysis. This process helped minimize measurement errors and

enhanced the credibility of the collected data. Overall, the reliability testing strengthened the validity of the findings derived from the survey results.

Table 6. Likert Scale

Rating	Verbal Interpretation
4	Strongly Agree
3	Agree
2	Disagree
1	Strongly Disagree

Statistical Instrument of Data

The qualitative data gathered from the acceptability survey was first systematically organized and encoded in Microsoft Excel to facilitate data cleansing and preparation. Subsequently, the data was subjected to statistical analysis using the IBM Statistical Package for the Social Sciences (SPSS) software to generate the study's definitive findings.

To summarize the central tendencies of the participants' perceptions on the five-point Likert scale, the Median (M) was computed for each item. The median, as a non-parametric measure, was chosen to accurately reflect the average agreement level without being disproportionately influenced by extreme outlier scores, thus providing a robust measure of the typical respondent's view.

Crucially, to determine the internal consistency and reliability of the questionnaire, the Cronbach's Alpha Reliability Test was employed. This robust statistical test assessed whether the items grouped under each Technology Acceptance Model (TAM) factor—such as Perceived Usefulness and Perceived

Enjoyment—were measuring the same underlying construct. The calculated Alpha values were then used to ensure that the instrument consistently and accurately gauged the target constructs. The achieved acceptable reliability across all TAM categories served as the foundation for interpreting how effective, engaging, and user-friendly the “Abante Babae” animated video was perceived. This rigorous testing process proved the instrument appropriate for a valid and dependable assessment of the audience’s perceptions, thereby ensuring the integrity of the interpretation regarding the animation's overall impact.

Moreover, the use of established statistical tools and systematic data processing enhanced the accuracy and credibility of the findings. By applying appropriate analytical methods, the study ensured that conclusions drawn from the survey results were supported by reliable and well-organized data. This analytical approach strengthened the validity of the evaluation of the “Abante Babae” animated video and supported informed conclusions regarding its effectiveness as an advocacy and educational material.

Table 7. Reliability Test Results for Technology Acceptance Model

Categories	Cronbach’s Alpha	Verbal Interpretation
Perceived Usefulness (PU)	0.716	Acceptable
Perceived Ease of Use (PEOU)	0.700	Acceptable
Aesthetic Quality and Design Appeal	0.722	Acceptable
Perceived Enjoyment (PE)	0.756	Acceptable
Attitude Toward Use	0.701	Acceptable
Behavioral Intention to Use	0.716	Acceptable

***Legend**: above .90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unacceptabl*

CHAPTER IV

RESULTS AND DISCUSSION

This chapter presents the findings and analysis obtained from the development and evaluation of "ABANTE BABAE: A VIDEO ON WOMEN'S PARTICIPATION IN PUBLIC GOVERNANCE." The evaluation focused on assessing the video's effectiveness, message clarity, and motivational impact among student leaders. The primary target respondents for this evaluation were the members of various Student Councils and student political organizations within the university.

The results are concluded based on the project objectives, the animation development process, and the quantitative evaluation results. Key findings are interpreted using the Technology Acceptance Model (TAM), focusing on how the animated medium influences student leaders' perceptions and willingness to advocate for gender equality in leadership.

Results by Objectives of the Study

The project aimed to create an animated advocacy video that showcases women's capacity and addresses the challenges they face in public governance. was executed through a structured animation pipeline and rigorous evaluation.

1. Potential of women and challenges in public governance.

The findings confirm that this objective was successfully achieved through a comprehensive thematic analysis of existing literature and localized political contexts. The pre-production research highlighted that while women

possess inherent leadership traits—such as crisis resilience and holistic decision-making—they are often hindered by systemic barriers like gender stereotyping, resource scarcity, and the "double burden" of domestic and public duties.

These findings were effectively translated into the narrative structure of the video, where the potential of women was personified through distinct character archetypes: Maria demonstrated the capacity for grassroots mobilization and crisis response; Ashley represented the dynamism of youth activism as a precursor to governance; Grace illustrated technical competence in male-dominated fields like infrastructure; and Lola Consuelo embodied the vital role of women in social welfare and inclusive policy-making.

Consequently, the project successfully moved beyond theoretical exploration, converting the identified potentials and challenges into a relatable visual format. This confirms that women's contributions are not merely supplementary but essential to effective governance, thereby satisfying the objective of exploring and presenting the multifaceted nature of female leadership.

Figure 6. Conceptual Framework of Women's Participation and Advocacy

2. Animated video that shows women's capacity and challenges in public governance participation.

The objective of developing an animated advocacy video was successfully achieved through the systematic execution of a three-phase animation production pipeline, ensuring that the technical output directly supported the narrative goals. The Pre-production phase established the visual and narrative foundation of the project. This stage yielded the finalized character designs for Maria, Ashley, Grace, and Lola Consuelo, each visually coded to represent their specific governance sectors, alongside a comprehensive storyboard that mapped out the visual sequence of the narrative. This blueprint ensured that abstract concepts like "gender stereotyping" and "crisis management" were translated into concrete visual scenarios before animation began.

Following this, the Production phase focused on the technical creation of assets and motion. By utilizing industry-standard software such as iBis Paint X for digital illustration and Procreate Dreams for motion, the researchers successfully produced a series of 2D animated sequences. The result of this phase was a distinct visual style that balanced aesthetic appeal with clarity, allowing for fluid movement and expressive character acting—particularly in key scenes like the typhoon relief operation—which served as the primary visual evidence of women's resilience and managerial capacity.

Finally, the Post-production phase synthesized these visual elements into a cohesive viewing experience. This stage resulted in the integration of synchronized voice-overs to give the characters authentic voices, and the layering of sound effects and background music to heighten the emotional

impact of the storytelling. The culmination of these phases is the final output, "Abante Babae," a high-definition MP4 file that is technically robust, visually consistent, and fully compatible with various digital platforms for widespread distribution and educational projection.

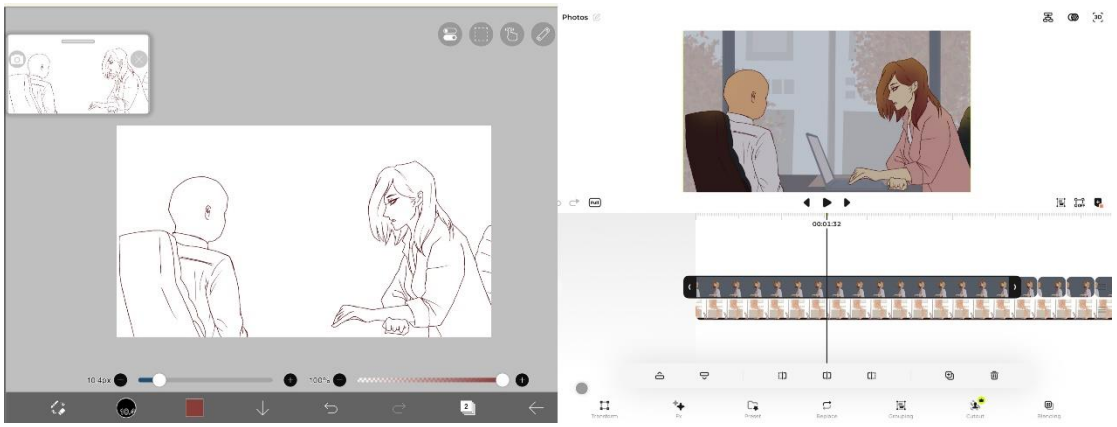

Figure 7. Animation Production Pipeline

3. Evaluation of the produced video using the Technology Acceptance Model (TAM) to assess its potential to influence student council members' perceptions regarding political leadership and advocacy.

The evaluation utilized the TAM framework, administered to fifty (N=50) members of Student Councils and related campus organizations. The results confirmed a high level of acceptance, indicating that the video is an effective and inspiring advocacy tool for young, active leaders.

Video Effectiveness Evaluation (Technology Acceptance Model)

This section presents the evaluation results across the core components of the TAM, namely Perceived Usefulness, Perceived Ease of Use, Aesthetic Quality and Design Appeal, Perceived Enjoyment, Attitude Toward Use, and Behavioral Intention to Use. The rating scale used is a 4-point Likert scale where 4=Strongly Agree and 1=Strongly Disagree. The findings support the TAM assumption that usefulness, ease of use, and experiential factors.

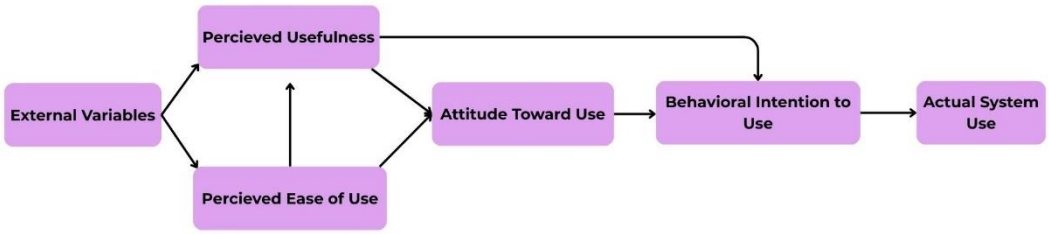

Figure 8. Technology Acceptance Model

Animated Content Effectiveness Evaluation

Table 8 presents the respondents' perceptions of the Perceived Usefulness of the animated film "Abante Babae". Results show that almost all statements received high mean scores ranging from 3.42 to 3.56, which fall under the interpretations "Strongly Agree" and "Agree". The highest mean score of 3.56 (SD = 0.53) indicates that viewers strongly agreed that the film deepened their understanding of the challenges and accomplishments of women in politics. This suggests that the animation effectively conveyed its message and supported learning.

Similarly, statements concerning the film's ability to deliver reliable information on women's political participation (M = 3.54; SD = 0.60) and the importance of women's representation and equality in leadership (M = 3.50; SD = 0.50) were also rated "Strongly Agree", showing that viewers found the film informative, relevant, and meaningful.

The lowest mean score of 3.42 (SD = 0.53), interpreted as "Agree", came from the statement describing the film's compelling visuals and emotional resonance. Although slightly lower, this still reflects a positive perception,

indicating that the visuals were engaging and contributed to the viewers' understanding of the film's themes.

The composite mean of 3.50 (SD = 0.53), interpreted as "Strongly Agree", implies that the respondents overwhelmingly perceived the animated film as useful, informative, and impactful. Overall, the findings demonstrate that *Abante Babae* successfully enhanced understanding, emphasized leadership themes, and encouraged support for women leaders and gender equality initiatives.

Table 8. Perceived Usefulness based on Respondents' Response

STATEMENTS	MEAN	SD	VERBAL INTERPRETATION
1. Watching the film deepened my understanding of the challenges and accomplishments of women in politics.	3.56	0.53	Strongly Agree
2. The film delivered reliable and relevant details on women's participation in government.	3.54	0.60	Strongly Agree
3. Its compelling visuals and emotional resonance make the film enjoyable and engaging.	3.42	0.53	Agree
4. The film effectively emphasized the importance of women's representation and equality in Leadership.	3.5	0.5	Strongly Agree
5. The film inspired me to be more supportive of women leaders and gender equality initiatives.	3.5	0.5	Strongly Agree
Composite Scores	**3.50**	**0.53**	**Strongly Agree**

***Legend**: 1.00-1.49 = Strongly Disagree, 1.50-2.49 = Disagree, 2.50-3.49 = Agree, 3.50-4.00 = Strongly Agree*

Table 9 presents the respondents assessment of the Perceived Ease of use of the animated film, "Abante Babae". The results show that all statements

received mean scores ranging from 3.14 to 3.40, all verbally interpreted as Agree, indicating that viewers generally found the film easy to access, follow, and use in different viewing contexts.

The highest mean score of 3.40 (SD = 0.66) was given to the statement that the film played smoothly and was accessible on different devices such as laptops and mobile phones.

Statements regarding the film's transitions, pacing, and timing (M = 3.38; SD = 0.52) and its usability in seminars or advocacy events (M = 3.38; SD = 0.56) were also rated Agree, showing that the viewers found the animation organized, appropriately paced, and practical for various educational or informational settings.

The composite mean of 3.32 (SD = 0.61), interpreted as *Agree*, reflects that the audience found the film accessible, user-friendly, and manageable to use across different platforms and environments. Overall, the results suggest that the film's technical presentation—its playback quality, pacing, audio-visual clarity, and ease of use—was satisfactory and contributed positively to the viewing experience. This indicates that technical factors did not hinder audience engagement or comprehension. The consistency in ratings also suggests a generally uniform viewing experience among respondents. As such, the film's technical design effectively supported its intended message and purpose.

Overall, the findings indicate that the film's technical quality played a supportive role in enhancing audience engagement rather than acting as a barrier.

Table 9. Perceived Ease of Use based on Respondents' Response

STATEMENTS	MEAN	SD	VERBAL INTERPRETATION
1. The film played smoothly and was accessible on different devices (e.g., laptop, phone).	3.40	0.66	Agree
2. The transitions, pacing, and timing of the film made it easy to follow the story.	3.38	0.52	Agree
3. The use of text, voice-over, and sound supported clear interpretation of the message.	3.14	0.63	Agree
4. There were no technical issues while viewing the film.	3.34	0.68	Agree
5. The film could be easily used in seminars, classrooms, or advocacy events without complex setup.	3.38	0.56	Agree
Composite Scores	**3.32**	**0.61**	**Agree**

Legend:*1.00-1.49 = Strongly Disagree, 1.50-2.49 = Disagree, 2.50-3.49 = Agree, 3.50-4.00 = Strongly Agree*

Table 10 presents the respondents' evaluation of the Aesthetic Quality and Design Appeal of the animated film "Abante Babae." The mean scores range from 3.32 to 3.34, all verbally interpreted as Agree, indicating that viewers positively perceived the visual and design elements of the animation.

The highest-rated statement is "The design, color, and motion are visually appealing" with a mean of 3.34 (SD = 0.58). This suggests that the audience found the film's overall visual presentation attractive, harmonious, and engaging. The use of color palettes, character movements, and scene compositions likely contributed to a compelling visual style that enhanced their viewing experience.

Three statements share a mean score of 3.32, all interpreted as Agree: (1) the animation's consistency in style and theme (SD = 0.67),

(2) the visuals enhancing rather than distracting from the message (SD = 0.50), and (3) the synchronization of sound, timing, and transitions (SD = 0.58).

These results indicate that the film maintained a cohesive artistic style throughout its scenes, allowing the audience to focus on the message without visual clutter or distractions. Additionally, the timing, transitions, and audio alignment were perceived as effective in supporting the narrative flow.

The composite mean of 3.32 (SD = 0.58), interpreted as Agree, reflects the viewers' overall positive evaluation of the animation's aesthetic elements. This suggests that the artistic quality of "Abante Babae"including its color choices, scene transitions, sound design, and visual consistency—contributed meaningfully to delivering its advocacy message.

Table 10. Aesthetic Quality and Design Appeal based on Respondents' Response

STATEMENTS	MEAN	SD	VERBAL INTERPRETATION
1. The design, color, and motion are visually appealing.	3.34	0.58	Agree
2. The transitions, pacing, and timing of the film made it easy to follow the story.	3.32	0.67	Agree
3. The use of text, voice-over, and sound supported clear interpretation of the message.	3.32	0.50	Agree
4. There were no technical issues while viewing the film.	3.32	0.58	Agree
5. The film could be easily used in seminars, classrooms, or advocacy events without complex setup.	3.38	0.56	Agree
Composite Scores	**3.32**	**0.58**	**Agree**

Legend: *1.00-1.49 = Strongly Disagree, 1.50-2.49 = Disagree, 2.50-3.49 = Agree, 3.50-4.00 = Strongly Agree*

Table 11 presents the respondents' assessment of the Perceived Enjoyment of the animated film "Abante Babae". The results show that all statements obtained mean scores ranging from 3.40 to 3.50, verbally interpreted as Agree to Strongly Agree, indicating that viewers generally found the film enjoyable, engaging, and emotionally stimulating.

The highest mean score of 3.50 (SD = 0.50) was given to the statement that the animation captures attention and maintains interest. This suggests that respondents were consistently focused throughout the viewing experience, likely due to the film's appealing visuals, dynamic movement, and effective scene flow.

Statements regarding the film's ability to evoke a positive emotional response—such as amusement, curiosity, or inspiration (M = 3.46, SD = 0.49)—and the content's level of engagement rather than monotony (M = 3.48, SD = 0.53) were also rated "Agree." These results indicate that viewers found the animation emotionally uplifting and stimulating, with content that sustained interest and prevented the viewing experience from becoming repetitive.

The statement with the lowest mean score, 3.40 (SD = 0.48)—that viewers are likely to recommend or rewatch the film—was still interpreted as *Agree*. Although slightly lower than the others, this score reflects that the film possesses replay value and is perceived as meaningful or enjoyable enough to be shared with others.

The composite mean score of 3.46 (SD = 0.50), interpreted as *Agree*, reflects the audience's overall positive perception of the film's enjoyability. These findings suggest that the film's emotional appeal, engaging content, and

sustained viewer interest contributed significantly to the viewers' overall enjoyment of "Abante Babae."

Table 11. Perceived Enjoyment (PE) based on Respondents' Response

STATEMENTS	MEAN	SD	VERBAL INTERPRETATION
1. The animation captures attention and maintains interest.	3.5	0.5	Strongly Agree
2. It evokes a positive emotional response (e.g., amusement, curiosity, inspiration).	3.46	0.49	Agree
3. The content feels engaging rather than monotonous.	3.48	0.53	Agree
4. Viewers are likely to recommend or rewatch it.	3.4	0.48	Agree
Composite Scores	**3.46**	**0.5**	**Agree**

Legend: *1.00-1.49 = Strongly Disagree, 1.50-2.49 = Disagree, 2.50-3.49 = Agree, 3.50-4.00 = Strongly Agree*

Table 12 presents the respondents' assessment of their Attitude Toward Use of the animated film "Abante Babae." The results show that all statements received mean scores ranging from 3.32 to 3.40, all verbally interpreted as Agree, indicating that viewers generally had a positive perception of the film's usefulness and its meaningful impact on their understanding and engagement.

The highest mean score of 3.40 (SD = 0.48) was given to the statement that watching the film was a pleasant and thought-provoking experience. This suggests that respondents found the film enjoyable while also stimulating reflection on its themes, highlighting its effectiveness in delivering content that is both engaging and intellectually meaningful.

Statements regarding the film's ability to make learning about gender equality and leadership more meaningful (M = 3.34, SD = 0.51) and its success in capturing and maintaining viewers' interest (M = 3.32, SD = 0.61) were also

rated Agree. These findings indicate that the animated film was perceived not only as informative but also as capable of sustaining attention, making it a valuable tool for advocacy, education, or awareness campaigns.

The composite mean score of 3.35 (SD = 0.53), interpreted as Agree, shows that respondents maintained a positive attitude toward using the film for learning and engagement. Overall, the results suggest that the emotional appeal, relevance of themes, and ability to sustain attention contributed to a favorable attitude toward the use of “Abante Babae” in educational and advocacy contexts.

Table 12. Attitude Toward Use based on Respondents’ Response

STATEMENTS	MEAN	SD	VERBAL INTERPRETATION
1. Watching the film was a pleasant and thought-provoking experience.	3.4	0.48	Agree
2. The film made learning about gender equality and leadership more meaningful.	3.34	0.51	Agree
3. The film successfully captured and maintained my interest.	3.32	0.61	Agree
Composite Scores	**3.35**	**0.53**	**Agree**

Legend: *1.00-1.49 = Strongly Disagree, 1.50-2.49 = Disagree, 2.50-3.49 = Agree, 3.50-4.00 = Strongly Agree*

Table 13 presents the respondents’ assessment of their Behavioral Intention to Use the animated film “Abante Babae”. The results show that all statements received mean scores ranging from 3.26 to 3.42, all verbally interpreted as Agree, indicating that viewers generally expressed a positive intention to use, recommend, or further engage with the film and its message.

The highest mean scores of 3.42 (SD = 0.60) and 3.42 (SD = 0.53) were given to the statements that the film contributed to the viewers’ understanding and appreciation of women’s role in government and that they would

recommend *Abante Babae* as an effective educational or advocacy material. These results suggest that respondents recognized the film's usefulness in promoting awareness and found it valuable for educational, informational, and advocacy-related purposes.

Another statement rated Agree was that the film helped respondents learn valuable insights, with a mean of 3.32 (SD = 0.64). This indicates that the animated film was viewed as informative and capable of enhancing viewers' knowledge regarding gender equality, leadership, and women's empowerment.

The lowest mean score of 3.26 (SD = 0.48)—that respondents were satisfied with the information and message delivered by the film—was still verbally interpreted as Agree. Although slightly lower, this score shows that viewers nonetheless perceived the film's message as clear, informative, and effectively communicated.

The composite mean score of 3.35 (SD = 0.56), interpreted as Agree, reflects that respondents hold a favorable intention to use or recommend the film in various contexts. Overall, the findings suggest that "Abante Babae" is viewed as a meaningful, informative, and impactful material that audience members are willing to utilize for learning or advocacy purposes.

The results indicate a strong likelihood that the film will be accepted and utilized beyond initial viewing. The favorable behavioral intention suggests that audiences not only appreciate the content but also recognized its relevance and potential value in educational and advocacy settings. This willingness to use or recommend Abante Babae implies that the film effectively resonated with

viewers, reinforcing its capacity to influence attitudes, promote awareness, and support its intended social message.

Table 13. Behavioral Intention to Use based on Respondents' Response

STATEMENTS	MEAN	SD	VERBAL INTERPRETATION
1. I learned valuable insights from watching the film.	3.32	0.64	Agree
2. I am satisfied with the information and message delivered by the film.	3.26	0.48	Agree
3. The film contributed to my understanding and appreciation of women's role in government.	3.42	0.60	Agree
4. I would recommend "Abante Babae" as an effective educational or advocacy material.	3.42	0.53	Agree
Composite Scores	**3.35**	**0.56**	**Agree**

Legend: *1.00-1.49 = Strongly Disagree, 1.50-2.49 = Disagree, 2.50-3.49 = Agree, 3.50-4.00 = Strongly Agree*

CHAPTER V

SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

This chapter provides a concise summary of the findings, presents the conclusive statements drawn from the evaluation, and offers recommendations for the project's dissemination and future development.

Summary

The project, "ABANTE BABAE: A VIDEO ABOUT WOMEN'S PUBLIC PARTICIPATION IN GOVERNANCE," successfully culminated in the development of an animated short film designed to serve as a compelling advocacy tool promoting gender equality and women's political leadership. The video development adhered strictly to a formalized animation pipeline, ensuring high production quality and rigorous thematic relevance to the project's goals. The evaluation phase involved a total of 50 female respondents, comprising a deliberately diverse sample of actively engaged individuals, specifically including women who hold positions in the barangay, members of student councils, and common students, ensuring a holistic perspective on the video's message.

The comprehensive evaluation utilized an expanded adaptation of the Technology Acceptance Model (TAM) as its core framework, yielding consistently positive results across all measured dimensions, which collectively validates the video's overall effectiveness and readiness for targeted distribution. The analysis began with Perceived Usefulness (PU), where respondents strongly agreed that the video was effective in emphasizing the critical importance of women in leadership roles, consequently deepening their

understanding of related political challenges. This strong cognitive impact was reinforced by the high ratings in Perceived Ease of Understanding (PEOU), confirming that the flow, pacing, and visual clarity of the animation were highly appropriate for communicating complex advocacy themes without simplifying the underlying political reality.

Furthermore, the integration of aesthetic measures provided significant insights. The high rating in Aesthetic Quality and Design Appeal validated the project's technical execution, demonstrating that the professional character art, visual design, and overall animation quality strongly contributed to its professional credibility as an advocacy resource. This visual appeal directly fed into Perceived Enjoyment, a finding that confirmed the animated medium successfully transformed the potentially serious or sensitive topic of governance into a pleasant and highly engaging viewing experience.

The positive cognitive and emotional responses led to high scores in Attitude Toward Use, where the audience reported the video as highly meaningful and inspiring, suggesting a strong emotional resonance with the characters and the overall message of female empowerment. Crucially, the Behavioral Intention to Use category, which is the strongest indicator of future action and advocacy, also yielded the highest ratings. This confirmed that respondents were highly satisfied with the final product and were demonstrably willing to recommend "ABANTE BABAE" as an effective educational or advocacy material within their respective communities and student organizations. The consistency of these high scores across cognitive, affective, and behavioral domains validates the video's ability to not only educate but also

to inspire measurable action, making it a viable and impactful tool for gender advocacy among women leaders and future constituents.

Conclusions

Based on the synthesis of the findings and the quantitative evaluation results, the following conclusions are established:

1. High Suitability Across Diverse Female Segments: The animated video, "ABANTE BABAE," is highly suitable and acceptable as an advocacy material for a diverse female audience. The high acceptance scores across all TAM dimensions confirm that the video's themes, visual appeal, and narrative structure successfully resonated with women possessing varying degrees of political engagement—from experienced barangay officials and student council leaders to general students.
2. Effective Medium for Communicating Complex Themes: Animation proves to be an exceptionally effective and engaging medium for discussing the complex and often sensitive topic of gender inequality in public governance. The visual storytelling, supported by the relatable characters, successfully made the issues comprehensible and motivational without relying solely on traditional political discourse, thereby maximizing message retention.
3. Demonstrated Actionable and Advocacy Intent: The high score in the Behavioral Intention category confirms that the video does not just inform; it is a catalyst for action. It possesses the strong potential to influence the political perceptions of women and inspire them to actively support, recommend, and seek female representation in leadership roles within their respective communities and institutions.

4. Achieved Project Objectives and Quality: All specific project objectives, from the thematic exploration of women's potential and challenges to the final comprehensive evaluation using the Technology Acceptance Model, were successfully attained. The resulting video is certified as a high-quality, well-accepted, and impactful advocacy product.

Recommendation

Guided by the consistently high acceptance ratings and the strong Behavioral Intention scores, the following recommendations are presented to maximize the reach, effectiveness, and sustainability of the "ABANTE BABAE" video as a political advocacy and educational tool:

1. Strategic Dissemination Across Key Sectors:

   University Integration: Formally endorse and present the video to the University Student Affairs Office (SAO) and the Supreme Student Council (SSC) for mandatory inclusion in their leadership training seminars, orientations for new students, and Gender and Development (GAD) related campus activities.

   Community Outreach: Recommend the video for use in Barangay Development Councils and Women's Sector meetings. The inclusion of the barangay official character makes it directly relevant for grassroots governance training and community organizing efforts.

2. Platform Optimization and Content Repurposing:

   The complete video should be hosted on stable platforms such as YouTube, official university channels, but for wider engagement, the content must be broken down and optimized for virality.

Short-Form Clips: Create specialized, short-form video clips under 60 seconds focusing on one character or a single political issue. These should be distributed on youth-centric platforms like TikTok and Instagram Reels to capture the attention of the general student body.

3. Development of Auxiliary Resources for Facilitation:

   A concise Facilitator's Guide should be developed alongside the video. This guide should contain suggested discussion questions, contextual notes on Philippine governance, and specific advocacy action points. This ensures that the video is utilized effectively by educators, workshop facilitators, and student council leaders to stimulate meaningful dialogue rather than being passively viewed.

4. Enhancing Accessibility and Language Inclusion:

   Future developers should explore the creation of subtitled or voice-over versions in major Philippine regional languages. This measure is crucial for reaching women in non-Tagalog speaking regions and increasing the video's national impact as a grassroots advocacy material.

5. Research and Impact Assessment:

   A Longitudinal Study is recommended to track the video's long-term influence. This study could be conducted after one to two semesters to assess whether exposure to the video correlates with an increase in female participation in campus elections, a greater interest in local governance among the student.

APPENDIX A

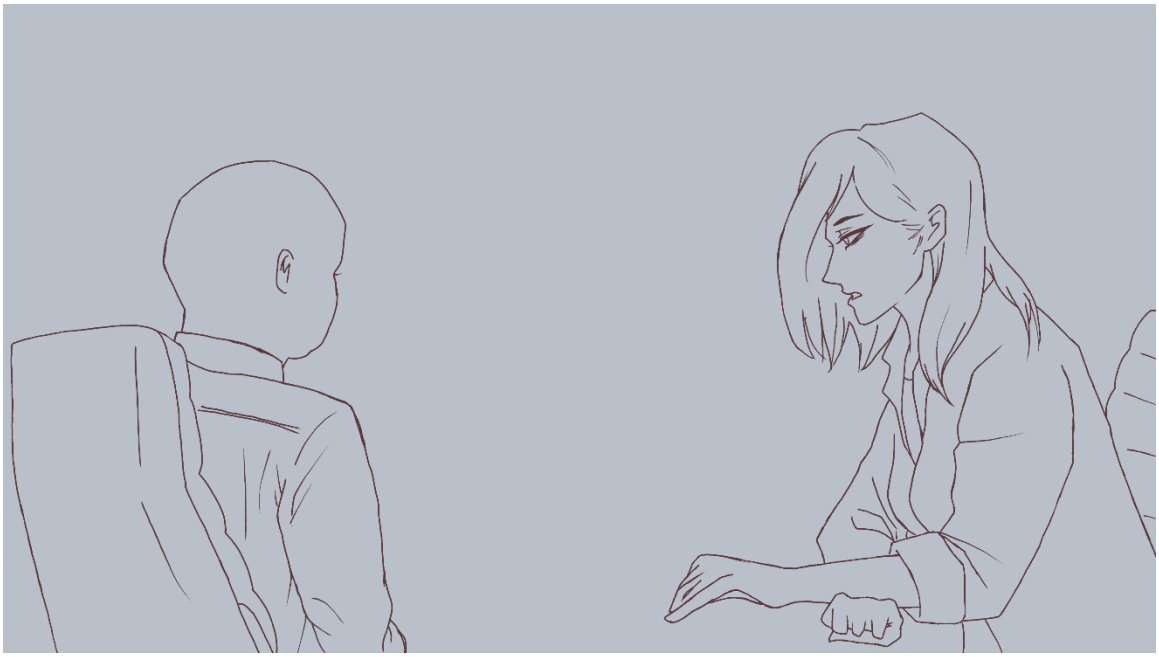

STORYBOARD

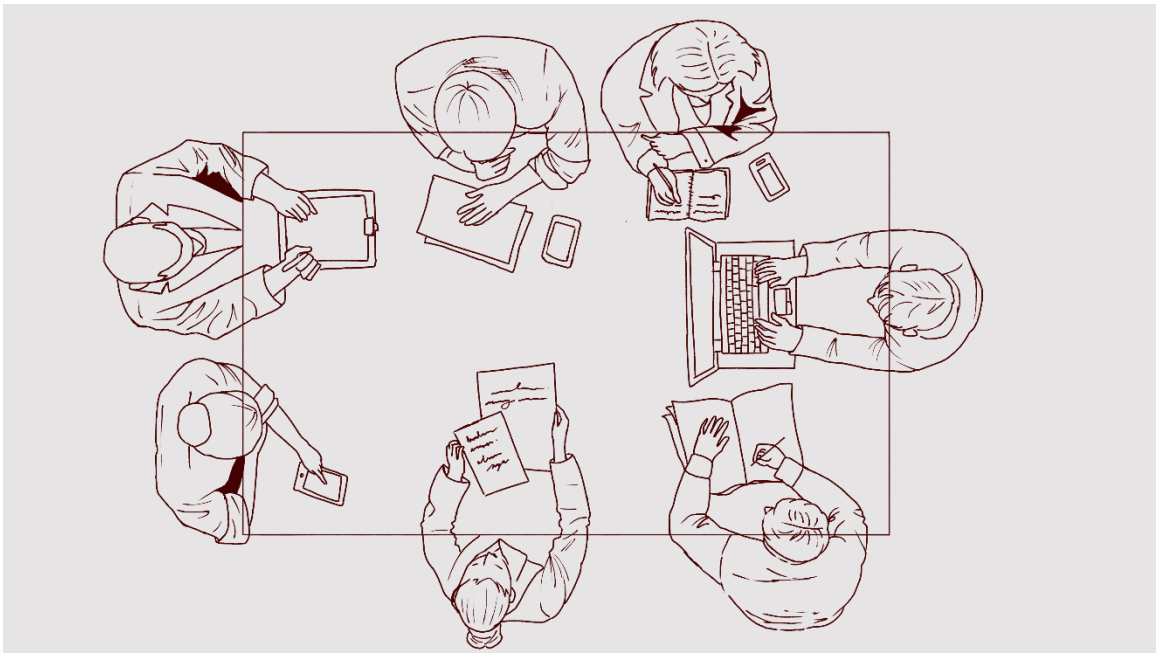

This scene represents Maria’s internalized struggle, emphasizing how women often endure injustice quietly before finding the courage to speak out.

This scene marks the turning point or rising action of the story. It symbolizes Ashley reclaiming her voice and confronting the system or audience that once silenced her.

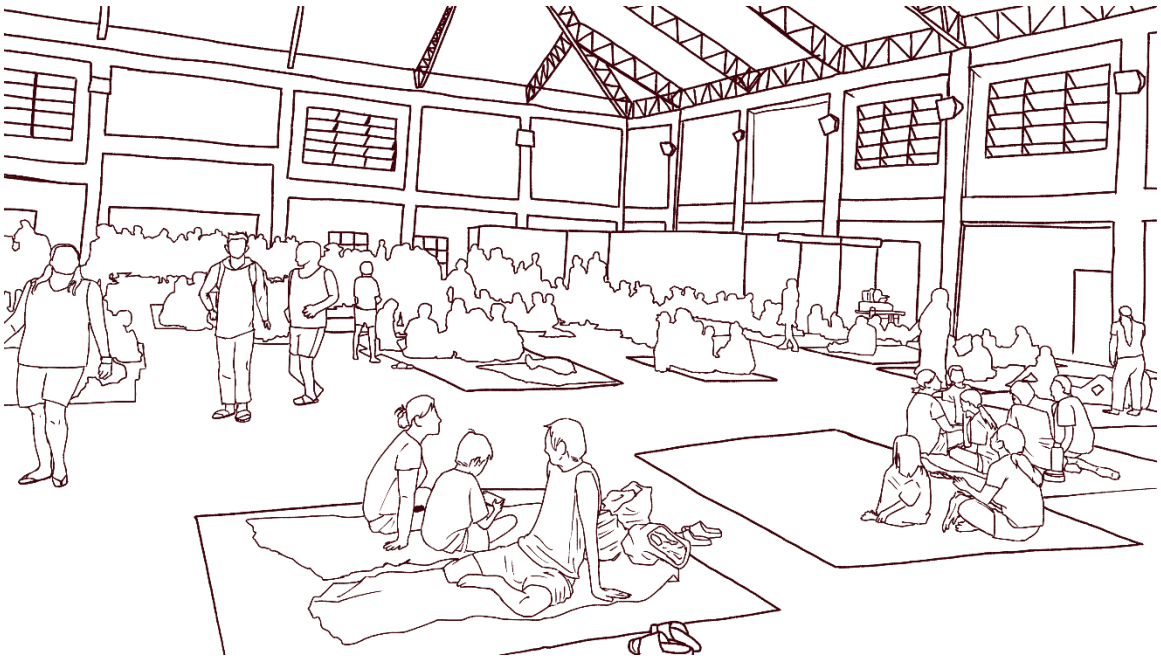

This scene reflects a moment where Grace is placed in a position of disadvantage, likely being questioned, judged, or dismissed. It visually conveys the reality many women face having to explain or defend themselves in systems where power is skewed against them.

It represents the moment when women's voices move beyond being "agenda items" and begin shaping outcomes.

This scene captures the reality of repeatedly explaining one's truth, reinforcing the theme that resilience is often forged in moments of emotional depletion.

This scene contextualizes the struggle of the social reality of the community. it illustrates the displacement, disaster, or systemic neglect disproportionately that affect them.

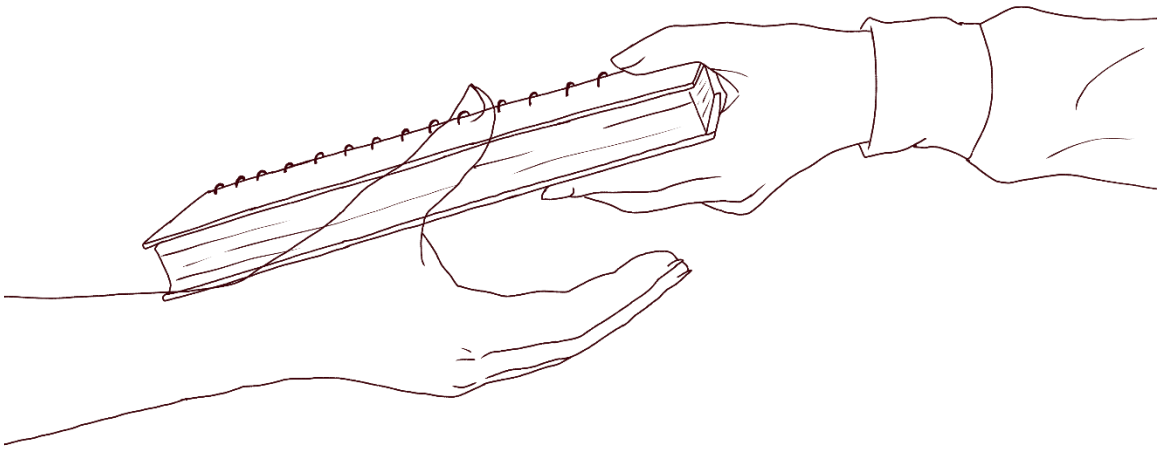

Grace is shown shouting and signaling for vehicles to move aside as heavy rain pours down. She urgently directs traffic so an ambulance can pass through. This scene represents women taking decisive action in times of crisis, even when their voices are often ignored.

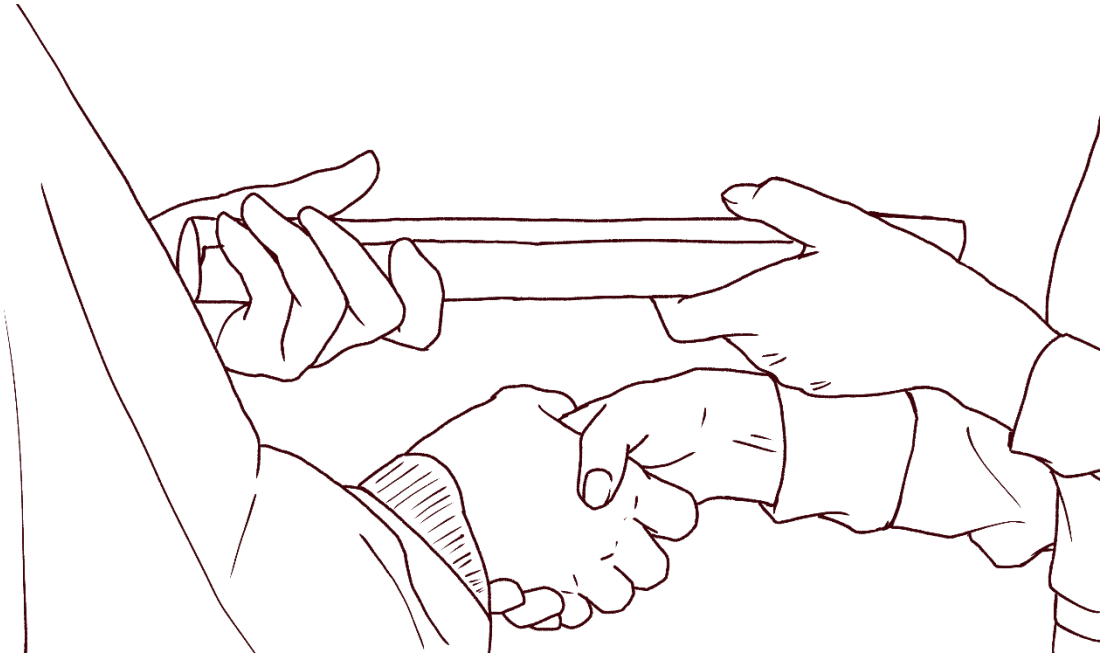

This frame represents women as steady leaders—bringing order, compassion, and unity during times of crisis.

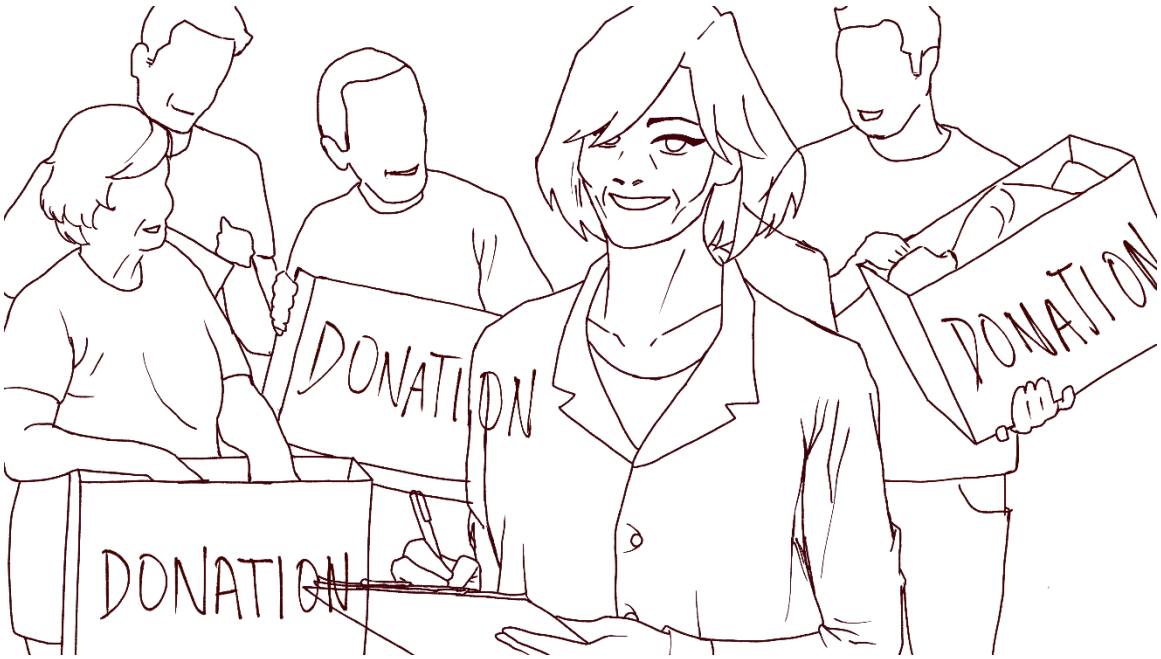

Community members work together to clear debris after the storm. This scene shows unity and collective action, where people begin rebuilding despite exhaustion and loss.

A hand gently passes notebooks to another. This symbolizes hope, education, and the passing on of responsibility to the next generation, reflecting how women empower others and invest in the future even after crisis.

Like Maria calming the evacuees or Grace directing traffic in the storm, this exchange represents action over words. No faces are shown, reinforcing the script's idea that leadership is not about recognition, but about showing up when it matters most.

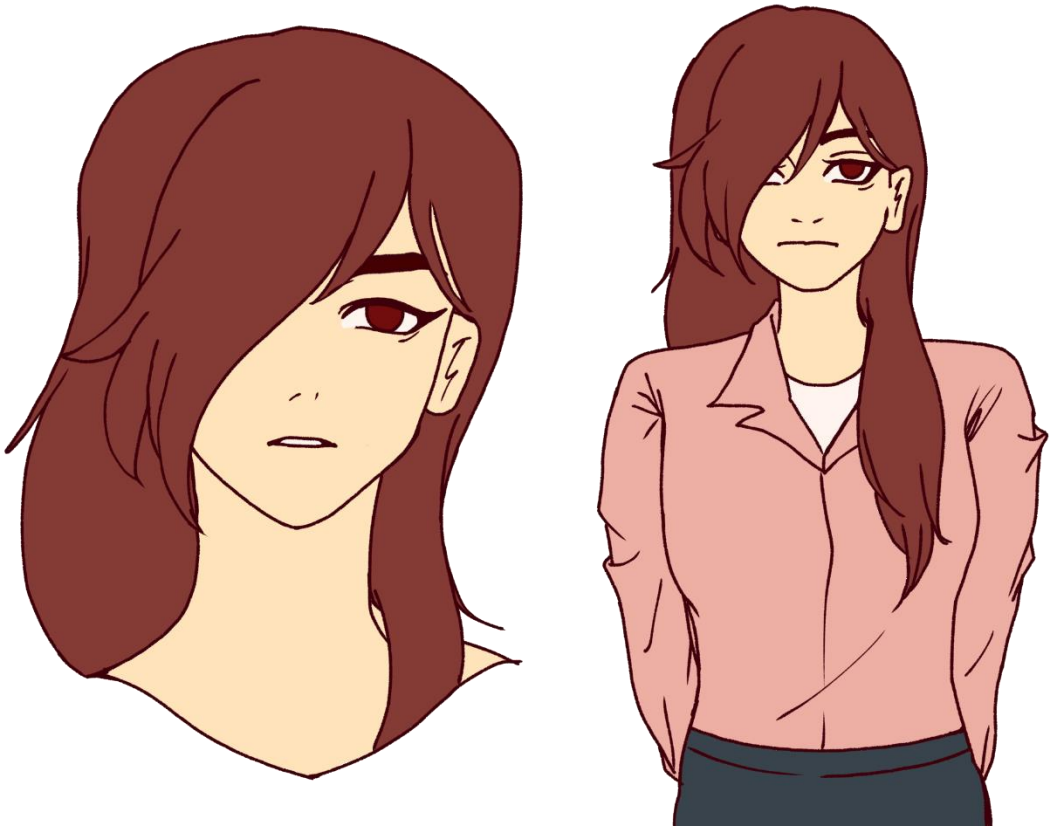

This image visually reinforces the script's message: when women lead with service, empathy, and courage, collective action follows and the entire community moves forward.

APPENDIX B

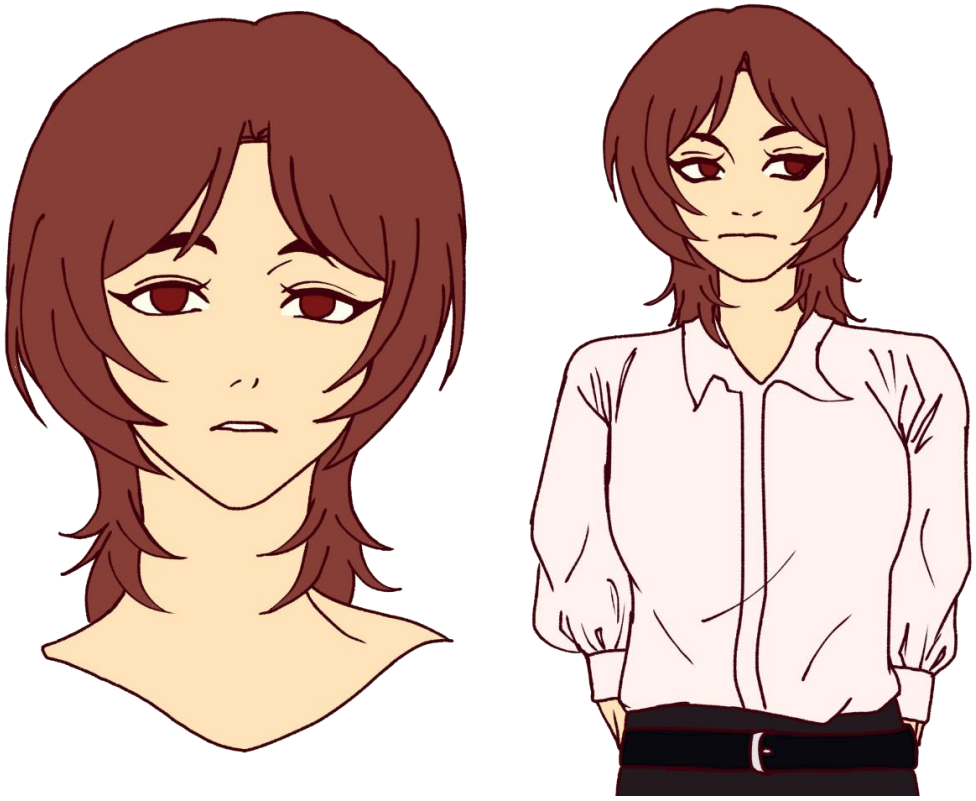

CHARACTER DESIGNS

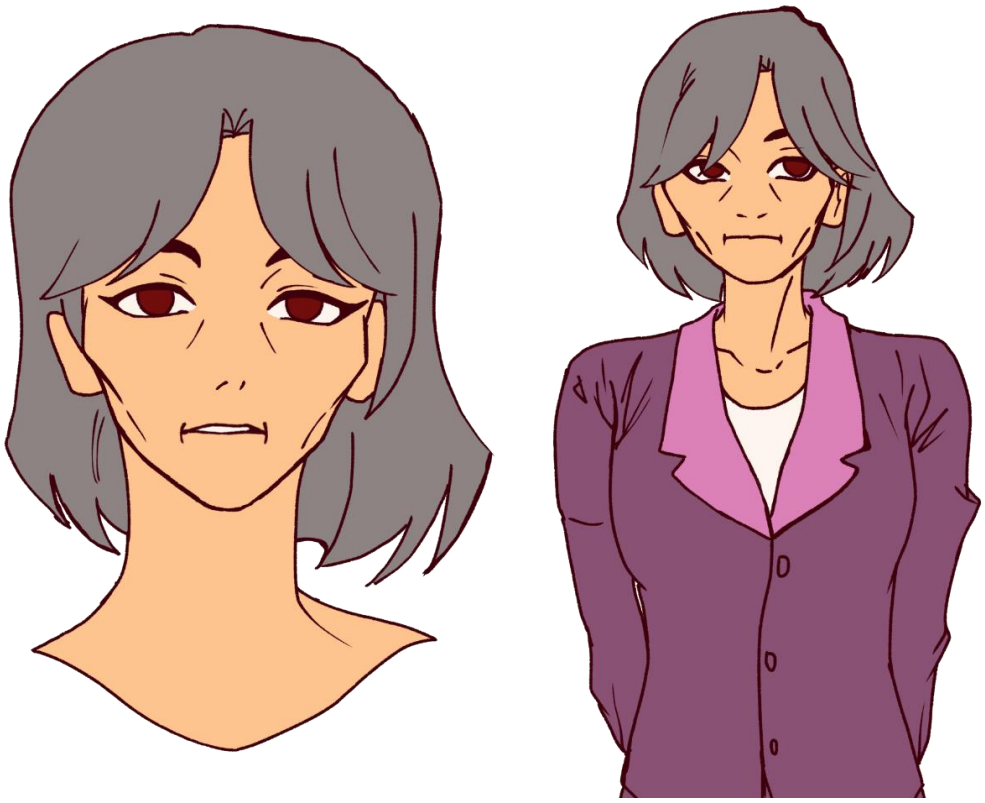

Ashley is 19 years old. She is a vocal but intelligent student leader. She represents the youth sector and their potential in governance. Learns to turn her quiet courage into real action during crisis.

Grace is a 28 years old civil engineer working in the LGU. She is practical, strategic, and passionate about infrastructure and disaster preparedness. Often underestimated in meetings, but proves her worth in emergencies.

Maria is a 35 years old barangay councilor candidate and community organizer. She is known for her strong voice and empathy. She also believes in unity and giving everyone in the community a chance to be heard.

Lola Consuelo is a 56 years old veteran community health volunteer. She advocates for healthcare rights of senior citizens. Wise, nurturing, and firm; carries the struggles of elders often ignored in society.

APPENDIX C

SCRIPT

ABANTE BABAE

INTRO:
SCENE 1

Projector turns on.

MONTAGE: Philippine flag

Narrator:
"Sa kasaysayan ng ating bayan, bihira ang kababaihan na nabigyan ng pagkakataong mamuno. Ngunit mula (labing siyam walumpu't anim) 1986, nagsimulang mabago ang tanawing pulitikal ng Pilipinas—nang isang babae ang naglakas-loob na harapin ang diktadura."

MONTAGE: Footage of EDSA People Power, Cory Aquino and her sign.

Narrator:
"Si María Corazón 'Cory' Aquino, ang unang babaeng naging Pangulo ng Pilipinas, ay naging simbolo ng demokrasya at tapang ng isang ina. Pinatunayan niyang ang pamumuno ay hindi lamang para sa iilan, kundi para sa buong sambayanan."

MONTAGE: Clip of Arroyo.

Narrator:

"Kasunod niya, si Gloria Macapagal-Arroyo—ang ikalawang babaeng Pangulo. Mula sa pagiging ekonomista, umakyat siya sa pinakamataas na posisyon ng bansa, pinamunuan ang Pilipinas sa gitna ng krisis at kontrobersiya."

MONTAGE: Clip of the “Iron Lady of Asia” Miriam Defensor Santiago.

Narrator:

"Sa Senado at Kongreso, nakilala rin ang matapang at matalinong si Miriam Defensor- Santiago na tinaguriang ‘Iron Lady of Asia’"

MONTAGE: Clip of Leni Robredo

Narrator:

"At kamakailan, si Maria Leonor ‘Leni’ Robredo—ang ikalawang babaeng Bise Presidente ng Pilipinas—ay nagbigay ng bagong mukha sa pamumuno. Kilala sa kanyang malasakit at serbisyo sa mga nasa laylayan, siya ay nagpaalala na ang tunay na lider ay naglilingkod, hindi pinaglilingkuran."

MONTAGE: Leni holding a Philippine flag.

NARRATOR:

"Mula kay Cory hanggang kay Leni, ang kwento ng kababaihan sa gobyerno ay kwento ng katapangan, talino, at malasakit. At habang dumarami ang babaeng pumapasok sa pulitika, mas maliwanag ang pag- asa ng isang bansang pantay at makatarungan."

FADE IN:

Projector turns off.

Applause.

(Four split collage showing the four women—MARIA, ASHLEY, GRACE, and LOLA CONSUELO—sit quietly, each holding their own story.)

FACILITATOR:
"Mula sa kasaysayan hanggang sa kasalukuyan, malinaw: kaya ng kababaihan. Pero sa araw-araw na laban, paulit-ulit pa rin silang hinahadlangan. Ngayon, pakinggan natin ang kwento ng ating mga kababaihan dito mismo sa ating komunidad."

(The camera lingers on the four women. Their journeys begin.)

SERIES OF SHOTS

SCENE 2 - MARIA
INT. BARANGGAY HALL - DAY

Councilor 1: Ronaldo Dela Paz
“Unahin natin ang bagong waiting shed sa plaza. Imporatante ‘yan para makita ng lahat ang proyekto”

Maria:
"Pero mas kailangan po ng feeding program. Gutom ang mga bata. Hindi ba’t dapat sila ang prioridad?"

COUNCILOR 2 (LAUGHING): ‘JIMBOY ESPADA’
"Maria, puro bata at kusina ang iniisip mo. Puro pambahay na bagay. Ibang level ang pulitika."

(Maria falls silent, but her eyes burn with determination.)

TRANSITION.

SCENE 3 - ASHLEY

INT. CLASSROOM - DAY

ASHLEY:
"Guys! sana suportahan niyo yung propose plan about mental health counseling at study spaces para sa ating mga student ha."

STUDENT (MOCKING):
"Ashley, babae ka lang at saka hindi ba, masyado kang malambot para sa ganyanc hindi ka papakinggan ng admin."

ANOTHER STUDENT:
“Bakit hindi mo na lang iwan sa mga lalaki ang pamumuno? Mas magaling sila”

(Ashley grips the microphone tightly, hurt but standing firm.)

ASHLEY:
“Hoy bakit? Lalaki lang ba ang kayang mamumuno, Kaya rin naman naming mga babae ah”

TRANSITION.

SCENE 4 – GRACE

INT. MUNICIPAL – DAY

GRACE:
"May sira na po ang tulay sa highway. Delikado kapag may bagyo. Dapat ayusin agad—kung hindi, maiiwan ang mga tao kapag kailangan ng mabilis na evacuation."

OLDER OFFICIAL (DISMISSING):
"Grace, huwag ka masyadong praning. Malakas ang tulay na ‘yan. At saka, ikaw? Babae ka. Ano alam mo sa kalsada at konstruksyon?"

Grace:
“Kung patuloy niyong Babalewalain, buhay ng mga tao ang nakataya. Ang kaligtasan ay hindi dapat ibinababa sa huling minuto.”

(SHE SITS, IGNORED, BUT CLEARLY RIGHT.)

TRANSITION.

SCENE 5 - LOLA CONSUELO

INT. MULTI PURPOSE HALL - DAY

LOLA CONSUELO:
"Mga anak, alam kong mahirap makabili o makakuha ng gamot halos lahat ay nasa kabilang bayan pa, hirap na hirap ang lahat lalo na ang mga nanay na walang pambili ng gamot, mga bata na hindi pa natuturukan ng bakuna. Kapag nagkasakit saan pa tayo tutungo? kung wala namang bukas na klinika e mga pribado naman ni hindi naman sapat para sa kakarampot na kinikita. Dapat na talagang magkaroon ng health center rito satin!"

BARRANGY OFFICIAL:
"Consuelo, may maliit na health post naman tayo. Hindi ba sapat na ‘yon? Kung magpupumilit ka, baka isipin ng iba na masyado kang ambisyosa."

LOLA CONSUELO:
"Sapat? Paano naging sapat kung may sanggol na namatay sa simpleng lagnat? Kung may buntis na naglalakad ng tatlong kilometro para lang makapagpatingin? Hindi pagiging ambisyosa ang kalusugan—ito ay karapatan!"

NARRATOR:
"Iba-iba man ang laban, iisa ang sugat: ang boses ng kababaihan ay binabaliwala. Ngunit sa oras ng pinakamalaking pagsubok, sila rin ang tatayo."

END FLASHBACK.

Visual: (Night. Heavy rains pound the barangay. Floodwaters rise. The electricity cuts out. People rush to the evacuation center—chaos everywhere.)

(Inside the evacuation center. Rain pounds the roof, children cry, people argue loudly about food and space. Maria, carrying a megaphone she borrowed from a barangay volunteer, raises her hand.)

SCENE 6

MARIA:
"Mga kapitbahay, sandali lang. Alam kong lahat tayo’y pagod at takot. Pero kung mag-aaway tayo, lalo lang tayong mahihirapan.
Makinig muna tayo sa isa’t isa."

(The noise softens. She steps down from the chair, moving closer to the people, her tone gentle.)

MARIA:
"Ganito—may mga bata na kailangan ng gatas, may matatanda na kailangan ng upuan. Sino sa inyo ang pwedeng mag-volunteer para dito?"

(Hands slowly go up. Some women offer to help with food. A group of young men nod and move toward the doors to secure them against the wind. Maria smiles faintly, relieved.)

ELDERLY WOMAN:
“Buti nandito ka, ija. Hindi ko alam kung paano kami kakalma”

MARIA:
“Hindi po ako mag-isa. Kapag nagkaisa tayo, mas malakas tayo kaysa sa bagyo”

(The crowd, once panicked, now works together. Maria looks around—seeing not herself as the hero, but the community rising as one.)

SCENE 7

(At one corner of the center. Kids cry, teenagers sit anxiously. Ashley is nervous too, but steadies herself. She speaks softly to her classmates.)

ASHLEY:
"Kung magpapanic tayo, baka mas lalo lang silang matatakot. Tumulong nalang tayo."

(She hands a flashlight to one teen, who uses it to guide elders. Others help pass water and blankets. Slowly, the younger kids calm down as they see the teens moving with purpose.)

PARENT:
"Salamat, hija. Malaking bagay ang ginagawa n'yo."

ASHLEY:
"Walang anuman po, willing naman pong tumulong ang lahat."

(The camera lingers on Ashley helping a small boy wrap in a blanket. Her quiet, steady leadership shows the power of youth in action.)

SCENE 8

(Outside the center. Traffic clogs the road as floodwaters rise. An ambulance is stuck, trying to reach the center. Grace rushes into the rain, directing tricycles and cars.)

GRACE:
"Emergency lane dito! Mga driver, pumarada muna sa gilid! Unahin ang ambulansya!"

(With her quick thinking, the ambulance finally gets through. Inside it is a wounded evacuee who urgently needs care. Her once-dismissed highway plan now saves lives in real time.)

Scene 9

(Inside the evacuation center. Seniors sit on mats, shivering. One elderly man clutches his chest, another coughs heavily. Panic ripples through the crowd. Consuelo, though visibly tired, pushes through.)

NARRATOR:
"Sa gitna ng unos, lumitaw

ang lakas ng kababaihan. Hindi sila tinabunan ng duda. Hindi sila pinigilan ng pangmamaliit. Sila ang naging ilaw, gabay, at lakas ng kanilang bayan."

MONTAGE: Baranggay after the storm (Mga daan na puno ng basura at putik)

(Community assembly the next day. Maria speaks in front of residents, not as a leader giving orders, but as one of them.)

MARIA:
"KAGABI, NAKITA NATIN KUNG ANONG KAYA NATING GAWIN KAPAG NAGKAISA TAYO. HINDI LANG ITO TUNGKOL SA BAGYO— KUNDI SA KUNG PAANO TAYO MAMUMUHAY ARAW-ARAW. SAMA-SAMA, WALANG MAIIWAN."

(THE PEOPLE CLAP, THIS TIME NOT JUST FOR HER, BUT FOR THE SPIRIT OF UNITY.)

SCENE 10

In a small corner, teens help clean debris. Ashley hands notebooks to her classmates, who smile at her shyly.

CLASSMATE:
“Ashley, ang galing mo kagabi. Ikaw ang nagsimula.”

ASHLEY:
"Ano ka ba, hindi lang naman ako. Lahat tayo magaling, kaya sa susunod ha, wag naman sana. Kung sakaling ma dumating na unos wag kayong matakot tumulong ha. Bata man o matanda may magagawa basta nagtutulungan"

(The camera shows kids and teens sweeping side by side with adults—a symbol of youth stepping into responsibility.)

SCENE 11

Grace hands out a sketched plan she drew overnight, showing safer emergency lanes and evacuation routes.

GRACE:
"Nakita natin ang nangyari kagabi—naipit ang ambulansya dahil sa trapik. Hindi na dapat ito maulit. May plano na ako para sa emergency lanes at mas ligtas na daan."

OFFICIAL:
"Ngayon, Grace, makikinig kami. Totoo ka pala- ang plano mo ay para sa lahat."

(She smiles, relieved but firm, her voice finally being valued.)

SCENE 12

(Barangay health station. Seniors line up as volunteers bring supplies. Consuelo, with a simple notebook, lists down their needs— maintenance meds, check-ups, shelter access.)

LOLA CONSUELO:
"Kagabi nakita natin: ang matatanda ang pinaka- naghihirap. Hindi puwedeng lagi silang huling isipin. Ngayon, gagawa tayo ng grupo— para siguraduhin na may gamot, may check-up, at may karamay ang bawat lolo at lola."

(The seniors applaud, some with tears in their eyes. She finally feels her lifelong advocacy is being heard.)

Wide shot: the four women— Maria, Ashley, Grace, and Lola Consuelo— stand together as the barangay begins to rebuild. Around them, people work side by side, inspired.

NARRATOR:
"MULA KAY CORY HANGGANG KAY LENI,
AT SA BAWAT BABAE NA TUMATAYO SA KABILA NG PAG - AALINLANGAN— ITO ANG KWENTO NG KABABAIHAN. HINDI SILA KAHINAAN, KUNDI LAKAS. HINDI SILA TAHIMIK, KUNDI HINDI SILA ANG TINIG NG BAYAN."

SCENE 13

VISUAL: DATA SHOWING

NARRATOR:
"Ang bawat babae sa ating lipunan ay patunay lang na sa gitna ng anumang unos, lumilitaw ang lakas ng kababaihan. Hindi sila tinabunan ng duda. Hindi

sila pinigilan ng
pangmamaliit. Sila ang
naging ilaw, gabay, at lakas
ng kanilang bayan."

VISUAL :(Visual of leni on one of her debates)

LENI:
"Yung number 1 ingredient din ng leadership
aside from character
Is you show up in the most difficult
Times. Pag hindi ka nagshow up in
The most difficult times,
hindi ka leader."

SCREEN TEXT:

"BABAE KA! HINDI BABAE LANG!"

Women in Governance

Technology Acceptance Model (TAM)

Sustainable Development Goal 5 (SDG 5)

Sustainable Development Goal 16 (SDG 16)

ABSTRACT

The study addressed the underrepresentation and challenges faced by women in Philippine public governance by developing the 2D animated advocacy video, "ABANTE BABAE." The project utilized modern animation techniques to craft a compelling narrative centered on four diverse female characters, illustrating both political barriers and effective leadership capacity. The video was evaluated using an expanded Technology Acceptance Model (TAM) framework, administered to fifty female respondents, including barangay officials, student council members, and general students. The evaluation measured the video's effectiveness across six dimensions, including Perceived Usefulness, Aesthetic Quality, and Behavioral Intention. Results showed consistently high user acceptability across all categories. Specifically, high scores in Aesthetic Quality and Perceived Enjoyment confirmed the animation successfully transformed a serious topic into an engaging experience. The strong rating for Behavioral Intention validated the video's potential to drive positive advocacy. Ultimately, the researchers concluded that animation is a highly effective medium for translating complex political discourse into an accessible and motivational tool, positioning "ABANTE BABAE" as a viable resource for promoting gender equality and inspiring actionable intent among diverse female demographics.

1. INTRODUCTION

The consistent underrepresentation of women in public governance remains a critical issue in the Philippines, despite their active engagement as voters and members of the electorate. While the nation has made significant strides in gender equality, with policies and legal frameworks in place to promote women's rights, a persistent gap exists between legal mandates and actual political representation. This study aims to examine the multifaceted barriers that hinder women's full participation in leadership and decision-making roles.

Local and international studies reveal that the issue is not simply a matter of individual capability but is rooted in a combination of deeply ingrained socio-cultural norms, economic constraints, and institutional factors. These barriers often manifest as negative societal attitudes about women's capacity to lead, as well as limited financial resources and institutional support to aid women in running for and securing political office. In response, there is a growing global recognition of the need for targeted policies, such as capacity-building support and programs that challenge gender stereotypes, to create a more inclusive political environment.

A 2017 article in the Philippine Journal of Social Development (PJSD) by Camille Genevieve M. Salvador underscores the enduring challenges women face in overcoming patriarchal political systems and the lack of adequate support systems to promote their political engagement. The PJSD research emphasizes the necessity of multifaceted policy measures to address both the systemic and sociocultural constraints that impede women's access to positions of authority in Philippine governance. Effectively addressing the underrepresentation of women in Philippine governance necessitates a comprehensive approach that tackles these structural, economic, and sociocultural barriers to cultivate a more representative and equitable political environment.

The project's central thesis is that effective governance is closely associated with the inclusion of women, as their participation brings unique perspective and addresses issues that disproportionately affect women and their communities. By advocating for policies that foster the economic and social empowerment of women, the project emphasizes that their increased involvement leads to more representative and responsive governance. In the end, this endeavor highlights that enabling women to take on leadership is not only a matter of gender quality but a fundamental requirement for a thriving, democratic society.

Project Objectives

Generally, this project aims to create a video that highlights women participation in public governance. Specifically, this endeavor intends to:

4. Explore the potential of women and challenges in public governance;

5. Develop an animated video that shows women's capacity and challenges in public governance participation;

6. Evaluate the produced video using the Technology Acceptance Model (TAM) to assess its potential to influence

women's perceptions regarding political leadership.

2. RELATED LITERATURE

The integral role of women in public governance constitutes a fundamental pillar of democratic development and societal advancement. Representing half of the global populace, women contribute indispensable perspectives, values, and leadership styles that complement those of men, fostering more balanced and inclusive decision-making processes within the political sphere. However, despite notable strides in gender equality across numerous sectors, the political arena remains characterized by a comparatively slow rate of progress towards equitable representation. On a global scale, the voices of women continue to be marginalized in policy formulation, and their access to leadership positions is frequently constrained by prevailing cultural norms, systemic impediments, and persistent prejudices.

The Inter-Parliamentary Union (IPU, 2023) indicates that women currently hold only 26.5% of parliamentary seats worldwide. This statistic reveals a significant disparity in comparison to their male counterparts, suggesting that genuine gender parity in political leadership remains a distant objective. Furthermore, data reported by UN Women (2023) reveals that women constitute a mere 10% of heads of state and 6% of heads of government globally. This underrepresentation underscores the structural and societal challenges that impede women's ascent to the highest echelons of political power.

A primary factor contributing to this inequality resides in deeply entrenched socio-cultural norms that historically ascribe traits of leadership, authority, and decision-making as inherently masculine. Many societies continue to adhere to traditional viewpoints that delineate women's roles within the domestic sphere, while leadership and politics are perceived as domains belonging to men. These norms are perpetuated within families, educational institutions, workplaces, and notably through media portrayals of leadership. From early childhood, girls often encounter fewer opportunities to cultivate confidence in leadership capacities, while boys are encouraged to exhibit assertiveness and ambition.

Krook and Childs (2010) have discussed the salient role of gender performance in politics as a deterrent for women considering candidacy for office. Female candidates are frequently evaluated not solely on their policy platforms or competencies but also on the degree to which their gender presentation aligns with societal expectations—being perceived as "strong yet not overly aggressive," "assertive yet remaining amenable." This double standard imposes additional pressures and discourages many qualified women from even contemplating entry into political races.

The media also exerts a critical influence in shaping public perceptions of female leaders. Bauer (2012) observed that female politicians are disproportionately subjected to media coverage that emphasizes their physical appearance, familial circumstances, or emotional expressions, rather than their policy agendas or leadership acumen. This form of biased reporting can undermine women’s authority and influence voter attitudes, contributing to

the perception of women as less capable leaders.

Furthermore, financial inequality presents a substantial impediment. The World Economic Forum (2022) has revealed that women have approximately 20% less access to financial resources for political campaigns compared to men. Pursuing elected office often necessitates significant personal and financial backing, and in numerous instances, political parties prioritize investment in male candidates whom they perceive as exhibiting lower risk or greater electability. Women from socio-economically disadvantaged backgrounds face particular marginalization, often lacking the requisite resources or political networks to sustain a viable campaign.

Notwithstanding these challenges, various global and local initiatives have emerged with the aim of addressing this gender disparity. One promising strategy involves the strategic utilization of media and technology to cultivate awareness and reshape public perceptions. For instance, Ross and Carter (2011) underscored the importance of gender-sensitive media campaigns that effectively showcase women as competent leaders. These campaigns serve to challenge prevailing stereotypes and encourage both men and women to offer their support to female candidates.

Moreover, the art of storytelling through digital and visual mediums—such as animated videos, documentaries, and DVDs—has gained traction as a potent advocacy tool. Dunaway (2018) noted the efficacy of such media formats in conveying complex issues, including gender inequality, in a manner that is both engaging and accessible to a wider audience. Smith and Williams (2020) further observed that visual storytelling enhances political interest and participation among young women by 35%, as it enables them to identify with relatable role models and comprehend the real-world implications of policy decisions.

In the context of the Philippines, the issue of gender representation in politics holds particular relevance. According to the Philippine Commission on Women (2022), women constitute only approximately 28% of elected positions in local government, a figure slightly below the global average. While the nation has witnessed two female presidents and several female senators, the pathway to political leadership remains fraught with obstacles, particularly at the grassroots level. Traditional gender roles, the pervasive influence of vote-buying practices, and established political dynasties create significant barriers for women—especially those from marginalized communities—seeking to achieve political breakthrough.

One notable endeavor to address this issue was the enactment of the Magna Carta of Women in the Philippines in 2009. This legislation mandates non-discriminatory practices and establishes avenues for women's participation across all levels of governance. However, consistent enforcement and widespread awareness remain challenges, particularly in rural areas where patriarchal norms are deeply entrenched. Numerous gender equality campaigns supported by non-governmental organizations (NGOs) and civil society groups have also been undertaken, but intensified efforts in the form of youth-

targeted and grassroots-level campaigns are necessary to achieve tangible impact.

Internationally, organizations such as the United Nations Development Programme (UNDP, 2019) have found that targeted advocacy campaigns can yield a 20–25% increase in voter support for women candidates. These findings suggest that when communities are educated about the principles of gender equality and are presented with the tangible benefits of women's leadership, they exhibit a greater propensity to support female leaders. This underscores the imperative for innovative advocacy tools—particularly those possessing the capacity to connect emotionally and visually with diverse audiences.

It is within this context that the present study, entitled "Abante Babae: A Video on Women's Participation in Public Governance," is situated. It endeavors to contribute to this ongoing movement by producing an engaging animated advocacy video designed to promote awareness regarding the critical importance of women's participation in politics. Employing the Technology Acceptance Model (TAM) as an evaluative framework, the study intends to analyze the video's impact on viewers' perceptions and acceptance of the intended message. By foregrounding the narratives of empowered women leaders, the animation seeks to inspire action, particularly among younger demographics.

Conceptual Framework

The conceptual framework for this capstone, titled "Abante Babae: A Video on Women's Participation in Public Governance", centers on the dynamic relationship between several factors that either encourage or hinder women's active involvement in public governance. At the core of this framework are the independent variables, which include barriers to women's participation. These barriers consist of societal stereotypes, gender biases, and cultural norms that discourage or limit women's engagement in politics. Another key independent variable is the perceived benefits of women's political involvement, which emphasizes how political participation can empower women, influence policymaking, and contribute to broader societal change. Additionally, the access to resources—such as education, political training, and support systems—plays a crucial role in shaping women's ability to participate in governance.

Mediating these factors are awareness and education campaigns, which aim to inform both women and the general public about the importance of female representation in politics. These campaigns can shift societal views and break down stereotypes that limit women's participation. Media and representation also serve as vital mediating factors, as the portrayal of women in leadership roles across various media platforms significantly impacts public perception and women's willingness to engage in governance.

Ultimately, these factors converge to influence the dependent variable, which is the extent of women's participation in public governance. This can be measured through women's representation in leadership positions, the number of women actively involved in political processes, and the visibility of women in decision-making roles. The framework also accounts for contextual factors such as the political climate,

which refers to the openness of the political system to gender equality, and the cultural norms that define and sometimes limit women's roles in public life. By examining these interconnected elements, the research aims to explore how various forces interact to shape the involvement of women in public governance, ultimately supporting the thesis goal of advocating for gender equality in leadership.

This framework presents a comprehensive view of the complex factors influencing women's political engagement and provides a foundation for understanding the barriers and opportunities in promoting their active participation in governance.

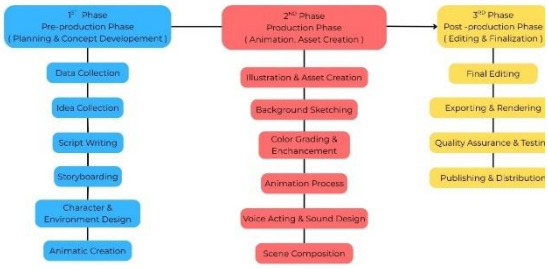

Figure 1. Conceptual Framework

3. METHODOLOGY

Project Design

The project titled "Abante Babae: A Video about Women's Participation in Governance" is an animated short film designed to promote awareness and appreciation of women's roles in leadership and decision-making within the context of governance. This project aims to serve as an educational and advocacy medium that emphasizes the importance of gender equality, empowerment, and active participation of women in political and community affairs. Furthermore, this project aligns with the advocacy for women's empowerment as stated in the Philippine Magna Carta of Women (Republic Act No. 9710), which promotes the equal participation of women in all sectors of society, including government service. By combining art, narrative, and social awareness, the film aims to inspire viewers to recognize the significance of women's leadership and contribute to the ongoing discourse on gender equality in governance.

Project Development

The development of "Abante Babae: A Video on Women's Participation in Public Governance" involved a systematic and research-based approach that combined creative storytelling with technical production. The process began with the conceptualization of the film's theme, focusing on the representation of women in leadership and their vital roles in promoting inclusive governance.

Animation Development Model

To accurately present the lived experiences, challenges, and contributions of women in Philippine governance, advocacy film will be produced through a systematic and well-defined animation pipeline. Each phase of the production process is designed to ensure that the final output delivers a precise, coherent, and impactful representation that effectively engages its intended audience.

Figure 2. Animation Development Model

Data Gathering

Ensuring the accuracy and relevance of the film's content begins with this crucial first phase. Data is gathered through interviews with women leaders, community representatives, and individuals knowledgeable about governance, along with credible online documentaries and published materials. At this stage, the team clarifies the study's objectives and thoroughly reviews all collected information to confirm its reliability and validity before integrating it into the project.

Designing

The Designing phase converts the documented concepts, themes, and narrative goals into definitive visual and auditory assets. This stage is critical for ensuring that the animated video, "ABANTE BABAE," effectively communicates its advocacy message to the target audience—Student Councils and other youth leaders—by establishing relatability and thematic consistency.

This phase encompasses the development of the following key components:

Character Design

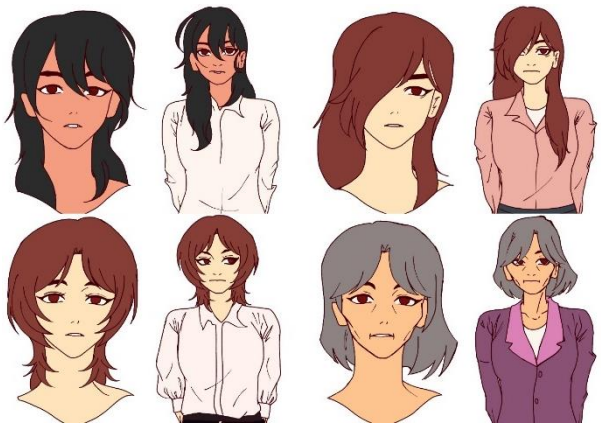

In this phase, the researchers focused on designing characters that were visually engaging, representative of diverse leadership roles, and grounded in the Filipino context. The characters were digitally designed and finalized using iBis Paint X.

The core objective of the character design was to establish thematic relatability and representation for the audience. Since the video advocates for increased women's participation in governance, the characters needed to embody distinct, positive aspects of female leadership:

- Diversity of Roles: Characters were designed to visually represent women across different generations, socio-economic backgrounds, and professional domains.
- Emotional Connection: The clean, expressive 2D animation style was chosen to build a strong emotional connection with the viewers, allowing them to easily empathize with the characters' challenges and celebrate their triumphs.

By developing visually consistent characters—Maria, Ashley, Grace, and Lola Consuelo—the learning aid ensures that the complex political themes are anchored by relatable, human figures, making the advocacy message more personal and memorable for the young leaders watching.

Figure 3. Sample Character Design

Script and Storyboard Development

The narrative and visual planning of the video were formalized during this stage:

- Scriptwriting: The final script was polished to ensure dialogue was clear, powerful, and directly aligned with the project's advocacy goals. Special attention was given to the dramatic pacing, particularly in key scenes, to

maximize emotional impact and highlight the moments of female empowerment.

- Storyboard: A detailed storyboard was created, translating the final script into a sequence of visual frames. This served as the blueprint for the entire animation process, ensuring visual consistency in camera angles, character staging, and scene transitions, which is vital for maintaining narrative clarity and flow.

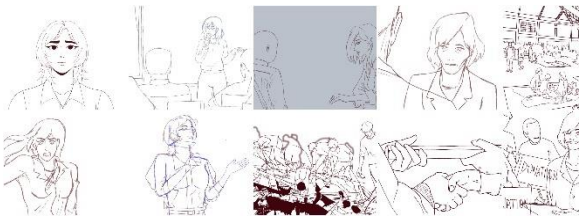

Figure 4. Sample Storyboard

Animation

The animation for the film was developed through a multi-software workflow integrating Blurrr and Procreate Dreams to ensure visual consistency, expressive motion, and high production quality. Procreate Dreams was utilized for the creation of character illustrations, background layouts, and initial motion sketches due to its intuitive timeline system and advanced drawing tools that support precise frame-by-frame animation. These assets were then enhanced in Blurr, where additional motion effects, transitions, and environmental animations were applied to refine the overall visual flow. Blurr's tools for motion smoothing and layered compositing allowed for more dynamic scene movement, such as camera pans, lighting effects, and subtle environmental interactions. By combining the strengths of both software platforms, the animation process achieved a polished and cohesive visual output aligned with the narrative and thematic direction of the film.

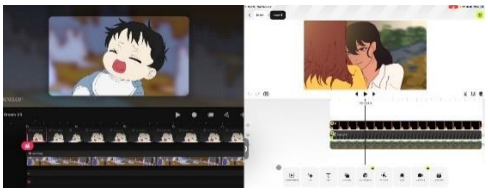

Figure 5. Sample Animation Process

Voice Recording

The voice lines for the film were recorded and submitted in a Google Drive. These recordings were then processed in Audacity, where background noise was removed, volume levels were adjusted, and unnecessary pauses were trimmed. This audio enhancement ensured that all dialogues and narration are clean, understandable, and well-synchronized with the animation.

Editing

The film was edited using Adobe Premiere Pro to perform precise timeline editing, audio synchronization, and visual enhancements, while CapCut PC was utilized for applying transitions, text, and supplementary effects, resulting in a cohesive and professionally refined final output.

Materials

Data

The data used in this project were obtained from a combination of primary and secondary sources to ensure the accuracy, relevance, and credibility of the film's content. Primary data were gathered through interviews with women leaders, these interviews provided firsthand insights on the challenges, contributions, and lived experiences of women in public office. Secondary data were collected from published research

studies, government reports, online documentaries, and statistical records from reputable institutions such as the Philippine Statistics Authority (PSA), the Philippine Institute for Development Studies (PIDS), and the Inter-Parliamentary Union (IPU). These sources include data acquired between 2020 and 2025, offering updated information on women's representation in national and local government positions. Together, these datasets guided the narrative direction, character development, and thematic emphasis of the advocacy film.

Software Specifications

IbisPaint X is a mobile digital drawing application used for creating initial sketches, character concepts, and background illustrations. Its variety of brushes, layers, and stabilizers supports clean and detailed artwork for the animation.

Procreate is a professional digital illustration software for iPad. It is used to develop high-quality character designs, backgrounds, and other visual elements. Its intuitive interface and advanced brush engine allow for precise and polished artwork creation.

Procreate Dreams is an animation-centered software used to produce simple motion sequences and short animated scenes. Its timeline tools, key framing features, and real-time previews help refine character movements before final editing.

Adobe Premiere Pro is a professional video-editing software used to compile all animated scenes, apply transitions, adjust timing, and integrate audio. It serves as the primary tool for assembling and exporting the final animated film.

CapCut PC is an accessible video-editing application used for quick edits, applying effects, adding subtitles, and refining specific parts of the animation. It is also helpful in enhancing pacing, color grading, and creating promotional content.

Audacity is an open-source audio recording and editing software. It is used to record voiceovers, remove background noise, adjust sound levels, and edit audio effects, ensuring clear and polished sound quality.

Blurrr is a tool used for adding blur effects, smoothing visuals, and enhancing transitions. It helps refine visual components to maintain a clean and consistent appearance throughout the film.

YouScript is a scriptwriting tool used for drafting, editing, and organizing the project's script. It supports the development of dialogue, narration, and scene descriptions, ensuring coherent storytelling during production.

Research Design

This study utilizes a quantitative research design integrated with a multimedia production approach. The design enables the researchers to examine the challenges, perceptions, and experiences of women in public governance and translate these findings into an animated advocacy video. Quantitative data collected from interviews and secondary sources inform the development of the narrative, characters, and thematic direction of the film, while the descriptive component documents the current state of women's participation in governance based on factual studies, reports, and statistical records.

Sampling Design

In evaluating the acceptability and effectiveness of the animated advocacy video, "ABANTE BABAE," the researchers gathered quantitative data from a total of fifty female respondents. This sample size provided a substantial basis for statistical analysis. The respondents were selected based on their varying degrees of involvement and exposure to leadership and community issues, ensuring a multifaceted perspective on the video's message. Specifically, the sample group was composed of women who hold positions in the barangay such as elected officials and committee heads, members of student councils and student political organizations who possess leadership experience, and female students from the general student population who can be representing future constituents and potential leaders. This approach aimed to capture how the video resonated across different levels of political and social

engagement, directly measuring its potential to influence a diverse yet focused audience towards the promotion of women's participation in governance.

Population of the Study

The population of the study is composed of individuals who can provide relevant insights into women's participation in public governance. This includes selected women leaders, barangay officials, youth representatives, and adult community members from the local area. These individuals were chosen because they possess either direct experience in governance or sufficient awareness of the challenges affecting women leaders in their communities.

Data Collection Instrument

The primary data collection instrument used in this study is a structured survey questionnaire developed to evaluate the animated advocacy video using the Technology Acceptance Model (TAM)**.** The questionnaire is designed to measure viewers' perceptions, attitudes, and acceptance of the animation, as well as its effectiveness as an educational and advocacy material.

Rating	Verbal Interpretation
4	Strongly Agree
3	Agree
2	Disagree
1	Strongly Disagree

Table 5. Likert Scale

Statistical Instrument of Data

The data gathered was organized and encoded in Microsoft Excel, then analyzed using IBM SPSS to generate the study's findings. The median (M) was computed for each item to summarize the central tendencies of the participants' responses. To determine the consistency and reliability of the questionnaire, Cronbach's Alpha Reliability Test was employed. This test assessed whether the items under each Technology Acceptance Model (TAM) factor were internally consistent and measured the same construct. The results served as the basis for interpreting how effective, engaging, and user-friendly the "Abante Babae" animated video was. With all TAM categories reflecting acceptable reliability, the instrument proved appropriate for evaluating the audience's perceptions, making the interpretations valid and dependable in assessing the overall impact of the animation.

Table 6. Reliability Test Results for Technology Acceptance Model

Categories	Cronbach's Alpha	Verbal Interpretation
Perceived Usefulness (PU)	**0.716**	**Acceptable**
Perceived Ease of Use (PEOU)	**0.700**	**Acceptable**
Aesthetic Quality and Design Appeal	**0.722**	**Acceptable**
Perceived Enjoyment (PE)	**0.756**	**Acceptable**
Attitude Toward Use	**0.701**	**Acceptable**
Behavioral Intention to Use	**0.716**	**Acceptable**

Legend: above .90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-

0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unacceptable

4. RESULtS AND DISCUSSIONS

This chapter presents the findings and analysis obtained from the development and evaluation of "ABANTE BABAE: A VIDEO ON WOMEN'S PARTICIPATION IN PUBLIC GOVERNANCE." The evaluation focused on assessing the video's effectiveness, message clarity, and motivational impact among student leaders. The primary target respondents for this evaluation were the members of various Student Councils and student political organizations within the university.

The results are concluded based on the project objectives, the animation development process, and the quantitative evaluation results. Key findings are interpreted using the Technology Acceptance Model (TAM), focusing on how the animated medium influences student leaders' perceptions and willingness to advocate for gender equality in leadership.

Results by Objectives of the Study

The project aimed to create an animated advocacy video that showcases women's capacity and addresses the challenges they face in public governance. was executed through a structured animation pipeline and rigorous evaluation.

1. Explore the potential of women and challenges in public governance.

The researchers conducted thematic research and script analysis to capture the nuances of women's leadership, focusing on challenges such as gender stereotypes, resource scarcity, and the double burden of public and domestic work. The narrative highlighted the potential of women through the characters: Maria for local leadership, Ashley for youth/student activism, Grace for technical fields, and Lola Consuelo for social welfare, ensuring the content was reflective of real-world governance issues relevant to future leaders.

Figure 6. Conceptual Framework of Women's Paritcipation and Advocacy

2. Develop an animated video that shows women's capacity and challenges in public governance participation.

The final output, "Abante Babae," is an animated short film produced using industry-standard tools. The narrative was designed with key scenes—such as Maria's crisis management during a typhoon and Ashley's activism—to serve as case studies demonstrating effective leadership qualities often attributed to women. The video was successfully rendered in standard formats suitable for digital distribution and projection during student leadership seminars.

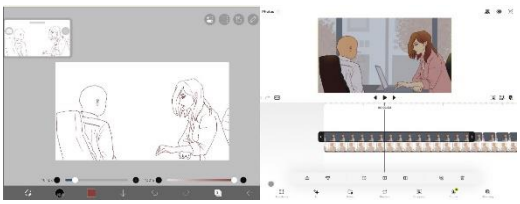

Figure 7. Animation Production Pipeline

3. Evaluate the produced video using the Technology Acceptance Model (TAM) to assess its potential to influence student council members' perceptions regarding political leadership and advocacy.

The evaluation utilized the TAM framework, administered to fifty members of Student Councils and related campus organizations. The results confirmed a high level of acceptance, indicating that the video is an effective and inspiring advocacy tool for young, active leaders.

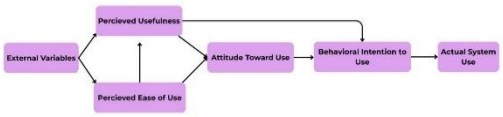

Figure 8. Technology Acceptance Model

Video Effectiveness Evaluation (Technology Acceptance Model)

This section presents the evaluation results across the core components of the TAM, namely Perceived Usefulness, Perceived Ease of Use, Aesthetic Quality and Design Appeal, Perceived Enjoyment, Attitude Toward Use, and Behavioral Intention to Use. The rating scale used is a 4-point Likert scale where 4=Strongly Agree and 1=Strongly Disagree.

Animated Content Effectiveness Evaluation

Table 7 presents the respondents' perceptions of the Perceived Usefulness of the animated film "Abante Babae". Results show that almost all statements received high mean scores ranging from 3.42 to 3.56, which fall under the interpretations "Strongly Agree" and "Agree". The highest mean score of 3.56 (SD = 0.53) indicates that viewers strongly agreed that the film deepened their understanding of the challenges and accomplishments of women in politics. This suggests that the animation effectively conveyed its message and supported learning.

Similarly, statements concerning the film's ability to deliver reliable information on women's political participation (M = 3.54; SD = 0.60) and the importance of women's representation and equality in leadership (M = 3.50; SD = 0.50) were also rated "Strongly Agree", showing that viewers found the film informative, relevant, and meaningful.

The lowest mean score of 3.42 (SD = 0.53), interpreted as "Agree", came from the statement describing the film's compelling visuals and emotional resonance. Although slightly lower, this still reflects a positive perception, indicating that the visuals were engaging and contributed to the viewers' understanding of the film's themes.

The composite mean of 3.50 (SD = 0.53), interpreted as "Strongly Agree", implies that the respondents overwhelmingly perceived the animated film as useful, informative, and impactful. Overall, the findings demonstrate that "Abante Babae" successfully enhanced understanding, emphasized leadership themes, and encouraged support for women leaders and gender equality initiatives.

Table 7. Perceived Usefulness based on Respondents' Response

STATEMENTS	MEAN	SD	Verbal Interpretation
Watching the film	3.56	0.53	Strongly Agree

deepened my understanding of the challenges and accomplishments of women in politics.			
The film delivered reliable and relevant details on women's participation in government.	3.54	0.60	Strongly Agree
Its compelling visuals and emotional resonance make the film enjoyable and engaging.	3.42	0.53	Agree
The film effectively emphasized the importance of women's representation and equality in Leadership.	3.5	0.5	Strongly Agree
Composite Scores	**3.50**	**0.53**	**Strongly Agree**

Legend: above .90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unacceptable

Table 8 presents the respondents' assessment of the Perceived Ease of Use of the animated film, "Abante Babae". The results show that all statements received mean scores ranging from 3.14 to 3.40, all verbally interpreted as Agree, indicating that viewers generally found the film easy to access, follow, and use in different viewing contexts.

The highest mean score of 3.40 (SD = 0.66) was given to the statement that the film played smoothly and was accessible on different devices such as laptops and mobile phones.

Statements regarding the film's transitions, pacing, and timing (M = 3.38; SD = 0.52) and its usability in seminars or advocacy events (M = 3.38; SD = 0.56) were also rated Agree, showing that the viewers found the animation organized, appropriately paced, and practical for various educational or informational settings.

The composite mean of 3.32 (SD = 0.61), interpreted as Agree, reflects that the audience found the film accessible, user-friendly, and manageable to use across different platforms and environments. Overall, the results suggest that the film's technical presentation—its playback quality, pacing, audio-visual clarity, and ease of use—was satisfactory and contributed positively to the viewing experience.

Table 8. Perceived Ease of Use based on Respondents' Response

STATEMENTS	MEAN	SD	Verbal Interpretation
The film played smoothly	3.40	0.66	Agree

and was accessible on different devices (e.g., laptop, phone.)			
The transitions, pacing, and timing of the film made it easy to follow the story.	3.38	0.52	Agree
The use of text, voice-over and sound supported clear interpretation of the message.	3.14	0.63	Agree
There were no technical issues while viewing the film.	3.34	0.68	Agree
The film could be easily used in seminars, classrooms or advocacy events without complex setup.	3.38	0.56	Agree
Composite Scores	**3.32**	**0.61**	**Agree**

Legend: above .90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unacceptable

Table 9 presents the respondents' evaluation of the Aesthetic Quality and Design Appeal of the animated film "Abante Babae." The mean scores range from 3.32 to 3.34, all verbally interpreted as Agree, indicating that viewers positively perceived the visual and design elements of the animation.

The highest-rated statement is "The design, color, and motion are visually appealing" with a mean of 3.34 (SD = 0.58). This suggests that the audience found the film's overall visual presentation attractive, harmonious, and engaging. The use of color palettes, character movements, and scene compositions likely contributed to a compelling visual style that enhanced their viewing experience.

Three statements share a mean score of 3.32, all interpreted as Agree: (1) the animation's consistency in style and theme (SD=0.67), (2) the visuals enhancing rather than distracting from the message (SD = 0.50), and (3) the synchronization of sound, timing, and transitions (SD = 0.58).

These results indicate that the film maintained a cohesive artistic style throughout its scenes, allowing the audience to focus on the message without visual clutter or distractions. Additionally, the timing, transitions, and audio alignment were perceived as effective in supporting the narrative flow.

The composite mean of 3.32 (SD = 0.58), interpreted as Agree, reflects the viewers' overall positive evaluation of the animation's aesthetic elements. This suggests that the artistic quality of "Abante Babae"—including its color choices, scene transitions, sound design, and visual consistency—contributed

meaningfully to delivering its advocacy message.

Table 9. Aesthetic Quality and Design Appeal based on Respondents' Response

STATEMENTS	MEAN	SD	Verbal Interpretation
The design, color, and motion are visually appealing.	3.34	0.58	Agree
The animation maintains consistency in style and theme.	3.32	0.67	Agree
Visuals enhance rather than distract from the message.	3.32	0.50	Agree
Sounds, timing and transitions are synchronized effectively.	3.32	0.58	Agree
Composite Scores	**3.32**	**0.58**	**Agree**

Legend: above .90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unacceptable

Table 10 presents the respondents' assessment of the Perceived Enjoyment of the animated film "Abante Babae". The results show that all statements obtained mean scores ranging from 3.40 to 3.50, verbally interpreted as Agree to Strongly Agree, indicating that viewers generally found the film enjoyable, engaging, and emotionally stimulating.

The highest mean score of 3.50 (SD = 0.50) was given to the statement that the animation captures attention and maintains interest. This suggests that respondents were consistently focused throughout the viewing experience, likely due to the film's appealing visuals, dynamic movement, and effective scene flow.

Statements regarding the film's ability to evoke a positive emotional response—such as amusement, curiosity, or inspiration (M = 3.46, SD = 0.49)—and the content's level of engagement rather than monotony (M = 3.48, SD = 0.53) were also rated "Agree." These results indicate that viewers found the animation emotionally uplifting and stimulating, with content that sustained interest and prevented the viewing experience from becoming repetitive.

The statement with the lowest mean score, 3.40 (SD = 0.48)—that viewers are likely to recommend or rewatch the film—was still interpreted as *Agree*. Although slightly lower than the others, this score reflects that the film possesses replay value and is perceived as meaningful or enjoyable enough to be shared with others.

The composite mean score of 3.46 (SD = 0.50), interpreted as *Agree*, reflects the audience's overall positive perception of the film's enjoyability. These findings suggest that the film's emotional appeal, engaging content, and sustained viewer interest contributed significantly to the viewers' overall enjoyment of "Abante Babae."

Table 10. Perceived Enjoyment (PE) based on Respondents' Response

STATEMENTS	MEAN	SD	Verbal Interpretation
The animation captures attention and maintains interest.	3.5	0.5	Strongly Agree
It evokes a positive emotional response (e.g., amusement, curiosity, inspiration.)	3.46	0.49	Agree
The content feels engaging rather than monotous.	3.48	0.53	Agree
Sounds, timing and transitions are synchronized effectively.	3.4	0.48	Agree
Composite Scores	**3.46**	**0.5**	**Agree**

Legend: above .90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unacceptable

Table 11 presents the respondents' assessment of their Attitude Toward Use of the animated film "Abante Babae." The results show that all statements received mean scores ranging from 3.32 to 3.40, all verbally interpreted as Agree, indicating that viewers generally had a positive perception of the film's usefulness and its meaningful impact on their understanding and engagement.

The highest mean score of 3.40 (SD = 0.48) was given to the statement that watching the film was a pleasant and thought-provoking experience. This suggests that respondents found the film enjoyable while also stimulating reflection on its themes, highlighting its effectiveness in delivering content that is both engaging and intellectually meaningful.

Statements regarding the film's ability to make learning about gender equality and leadership more meaningful (M = 3.34, SD = 0.51) and its success in capturing and maintaining viewers' interest (M = 3.32, SD = 0.61) were also rated Agree. These findings indicate that the animated film was perceived not only as informative but also as capable of sustaining attention, making it a valuable tool for advocacy, education, or awareness campaigns.

The composite mean score of 3.35 (SD = 0.53), interpreted as Agree, shows that respondents maintained a positive attitude toward using the film for learning and engagement. Overall, the results suggest that the emotional appeal, relevance of themes, and ability to sustain attention contributed to a favorable attitude toward the use of "Abante Babae" in educational and advocacy contexts.

Table 11. Attitude Toward Use based on Respondents' Response

STATEMENTS	MEAN	SD	Verbal Interpretation

Watching the film was a pleasant and thought-provoking experience.	3.4	0.48	Agree
The film made learning about gender equality and leadership more meaningful.	3.34	0.51	Agree
The film successfully captured and maintained my interest.	3.32	0.61	Agree
Composite Scores	**3.35**	**0.53**	**Agree**

Legend: above .90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unacceptable

Table 12 presents the respondents' assessment of their Behavioral Intention to Use the animated film "Abante Babae". The results show that all statements received mean scores ranging from 3.26 to 3.42, all verbally interpreted as Agree, indicating that viewers generally expressed a positive intention to use, recommend, or further engage with the film and its message.

The highest mean scores of 3.42 (SD = 0.60) and 3.42 (SD = 0.53) were given to the statements that the film contributed to the viewers' understanding and appreciation of women's role in government and that they would recommend *Abante Babae* as an effective educational or advocacy material. These results suggest that respondents recognized the film's usefulness in promoting awareness and found it valuable for educational, informational, and advocacy-related purposes.

Another statement rated Agree was that the film helped respondents learn valuable insights, with a mean of 3.32 (SD = 0.64). This indicates that the animated film was viewed as informative and capable of enhancing viewers' knowledge regarding gender equality, leadership, and women's empowerment.

The lowest mean score of 3.26 (SD = 0.48)—that respondents were satisfied with the information and message delivered by the film—was still verbally interpreted as Agree. Although slightly lower, this score shows that viewers nonetheless perceived the film's message as clear, informative, and effectively communicated.

The composite mean score of 3.35 (SD = 0.56), interpreted as Agree, reflects that respondents hold a favorable intention to use or recommend the film in various contexts. Overall, the findings suggest that "Abante Babae" is viewed as a meaningful, informative, and impactful material that audience members are willing to utilize for learning or advocacy purposes.

Table 14. Behavioral Intention to Use based on Respondents' Response

STATEMENTS	MEAN	SD	Verbal Interpretation

5. SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

This chapter provides a concise summary of the findings, presents the conclusive statements drawn from the evaluation, and offers recommendations for the project's dissemination and future development.

Summary

The project, "ABANTE BABAE: A VIDEO ABOUT WOMEN'S PUBLIC PARTICIPATION IN GOVERNANCE," successfully culminated in the development of an animated short film designed to serve as a compelling advocacy tool promoting gender equality and women's political leadership. The video development adhered strictly to a formalized animation pipeline, ensuring high production quality and rigorous thematic relevance to the project's goals. The evaluation phase involved a total of 50 female respondents, comprising a deliberately diverse sample of actively engaged individuals, specifically including women who hold positions in the barangay, members of student councils, and common students, ensuring a holistic perspective on the video's message.

The comprehensive evaluation utilized an expanded adaptation of the Technology Acceptance Model (TAM) as its core framework, yielding consistently positive results across all measured dimensions, which collectively validates the video's overall effectiveness and readiness for targeted distribution. The analysis began with Perceived Usefulness (PU), where respondents strongly agreed that the video was effective in emphasizing the critical importance of women in leadership roles, consequently deepening their understanding of related political challenges. This strong cognitive impact was reinforced by the high ratings in Perceived Ease of Understanding (PEOU), confirming that the flow, pacing, and visual clarity of the animation were highly appropriate for communicating complex advocacy themes without simplifying the underlying political reality.

Furthermore, the integration of aesthetic measures provided significant insights. The high rating in Aesthetic Quality and Design Appeal validated the project's technical execution, demonstrating that the professional character art, visual design, and overall animation quality strongly contributed to its professional credibility as an advocacy resource. This visual appeal directly fed into Perceived Enjoyment, a finding that confirmed the animated medium successfully transformed the potentially serious or sensitive topic of governance into a pleasant and highly engaging viewing experience.

The positive cognitive and emotional responses led to high scores in Attitude Toward Use, where the audience reported the video as highly meaningful and inspiring, suggesting a strong emotional resonance with the characters and the overall message of female empowerment. Crucially, the Behavioral Intention to Use category, which is the strongest indicator of future action and advocacy, also yielded the highest ratings. This confirmed that respondents were highly satisfied with the final product and were demonstrably willing to recommend "ABANTE BABAE" as an effective educational or advocacy material within their respective communities and student organizations. The consistency of these high scores across cognitive, affective, and behavioral domains validates the video's ability to not only educate but also to inspire measurable action, making it a viable and impactful tool for gender advocacy among women leaders and future constituents.

Conclusions

Based on the synthesis of the findings and the quantitative evaluation results, the following conclusions are established:

1. High Suitability Across Diverse Female Segments: The animated video, "ABANTE BABAE," is highly suitable and acceptable as an advocacy material for a diverse female audience. The high acceptance scores across all TAM dimensions confirm that the video's themes, visual appeal, and narrative structure successfully resonated with women possessing varying degrees of political engagement—from experienced barangay officials and student council leaders to general students.

2. Effective Medium for Communicating Complex Themes: Animation proves to be an exceptionally effective and engaging medium for discussing the complex and often sensitive topic of gender inequality in public governance. The visual storytelling, supported by the relatable characters, successfully made the issues comprehensible and motivational without relying solely on traditional political discourse, thereby maximizing message retention.

3. Demonstrated Actionable and Advocacy Intent: The high score in the Behavioral Intention category confirms that the video does not just inform; it is a catalyst for action. It possesses the strong potential to influence the political perceptions of women and inspire them to actively support, recommend, and seek female representation in leadership roles within their respective communities and institutions.

4. Achieved Project Objectives and Quality: All specific project objectives, from the thematic exploration of women's potential and challenges to the final

comprehensive evaluation using the Technology Acceptance Model, were successfully attained. The resulting video is certified as a high-quality, well-accepted, and impactful advocacy product.

Recommendation

Guided by the consistently high acceptance ratings and the strong Behavioral Intention scores, the following recommendations are presented to maximize the reach, effectiveness, and sustainability of the "ABANTE BABAE" video as a political advocacy and educational tool:

Strategic Dissemination Across Key Sectors:

University Integration: Formally endorse and present the video to the University Student Affairs Office (SAO) and the Supreme Student Council (SSC) for mandatory inclusion in their leadership training seminars, orientations for new students, and Gender and Development (GAD) related campus activities.

Community Outreach: Recommend the video for use in Barangay Development Councils and Women's Sector meetings. The inclusion of the barangay official character makes it directly relevant for grassroots governance training and community organizing efforts.

Platform Optimization and Content Repurposing:

The complete video should be hosted on stable platforms such as YouTube, official university channels, but for wider engagement, the content must be broken down and optimized for virality.

Short-Form Clips: Create specialized, short-form video clips under 60 seconds focusing on one character or a single political issue. These should be distributed on youth-centric platforms like TikTok and Instagram Reels to capture the attention of the general student body.

Development of Auxiliary Resources for Facilitation:

A concise Facilitator's Guide should be developed alongside the video. This guide should contain suggested discussion questions, contextual notes on Philippine governance, and specific advocacy action points. This ensures that the video is utilized effectively by educators, workshop facilitators, and student council leaders to stimulate meaningful dialogue rather than being passively viewed.

Enhancing Accessibility and Language Inclusion:

Future developers should explore the creation of subtitled or voice-over versions in major Philippine regional languages. This measure is crucial for reaching women in non-Tagalog speaking regions and increasing the video's national impact as a grassroots advocacy material.

Research and Impact Assessment:

A Longitudinal Study is recommended to track the video's long-term influence. This study could be conducted after one to two semesters to assess whether exposure to the video correlates with an increase in female participation in campus elections, a greater interest in local governance among the student population, or the inclusion of more gender-focused topics in student-led campaigns.

Survey Questionnaire

ABANTE BABAE: A VIDEO ON WOMEN'S PARTICIPATION IN PUBLIC GOVERNANCE

Good Day! We are 4th year students, currently pursuing a Bachelor of Science in Information Technology specializing in **Animation and Motion Graphics**.

As part of our academic endeavors, we have developed a **video animation** adhering to the standards of visual storytelling and effectiveness.

To assess the **effectiveness** and **engagement** of our video animation, we have devised a set of evaluation statements. Your responses, rated on a scale from **1 (Strongly Disagree)** to **4 (Strongly Agree)**, will help us evaluate key aspects of our project, including its **content, visual appeal, message, and overall viewing experience**.

* Indicates required question

Instruction: Evaluate the video animation's effectiveness by selecting a rating from **1 (Strongly Disagree)** to **4 (Strongly Agree)** for each criterion provided (e.g., Clarity of Message, Visual Appeal, Technical Performance).

1. **NAME (optional):**

2. **1. Perceived Usefulness (PU)** *

Assesses how relevant and impactful the film is in promoting awareness about women's participation in governance.

Mark only one oval per row.

	1	2	3	4
1. Ang panonood ng bidyo ay nagpalalim ng aking pag-unawa sa mga hamon at tagumpay ng kababaihan sa pulitika. (Watching the film deepened my understanding of the challenges and accomplishments of women in politics.)	◯	◯	◯	◯
2. Ang likhang ito ay naghatid ng mapagkakatiwalaan at kaugnay na mga				

detalye tungkol sa pakikilahok ng kababaihan sa pamahalaan. (The film delivered reliable and relevant details on women's participation in government.)				
3. Ang nakakaakit na mga biswal at damdamin nito ay ginagawang kasiya-siya at nakaka-engganyo ang dokumentaryo. (Its compelling visuals and emotional resonance make the film enjoyable and engaging.)				
4. Matagumpay na binigyang-diin ng materyal na ito ang kahalagahan ng representasyon at pagkakapantay-pantay ng kababaihan sa pamumuno. (The film effectively emphasized the importance of women's representation and equality in leadership)				
5. Ang bidyong ito ay nagbigay-inspirasyon sa akin na maging mas matulungin sa mga kababaihang lider at sa mga inisyatibo para sa pagkakapantay-pantay ng kasarian. (The film inspired me to be more supportive of women leaders and gender equality initiatives.)				

3. **2. Perceived Ease of Use (PEOU)** *

Measures the smoothness, accessibility, and clarity of viewing experience.

Mark only one oval per row.

	1	2	3	4
1. Ang bidyo ay maayos na gumana at naa-access sa iba't ibang gadyet (halimbawa, laptop, telepono). (The film played smoothly and was accessible on different devices (e.g., laptop, phone).)	◯	◯	◯	◯
2. Ang mga transisyon, pagkakahanay, at tiyempo ng bidyo ay nagpadali upang masundan ang kuwento. (The transitions, pacing, and timing of the film made it easy to follow the story.)	◯	◯	◯	◯
3. Ang paggamit ng teksto, voice-over (salaysay sa boses), at tunog ay sumuporta sa malinaw na interpretasyon ng mensahe. (The use of text, voice-over, and sound supported clear interpretation of the message.)	◯	◯	◯	◯
4. Walang teknikal na isyu habang pinapanood ang bidyo. (There were no technical issues while viewing the film.)	◯	◯	◯	◯
5. Ang bidyo ay madaling magamit sa mga seminar, silid-aralan, o mga kaganapan sa adbokasiya nang walang kumplikadong setup (paghahanda). (The film could be easily used in seminars, classrooms, or advocacy events without complex setup.)	◯	◯	◯	◯

4. **3. Aesthetic Quality and Design Appeal** *

Evaluates the film's visuals, consistency and audio quality.

Mark only one oval per row.

	1	2	3	4
1. Ang disenyo, kulay, at galaw (motion) ay nakakaakit sa paningin (visually appealing). (The design, color, and motion are visually appealing.)	◯	◯	◯	◯
2. Ang animation ay nagpapanatili ng pagiging konsistent sa istilo at tema. (The animation maintains consistency in style and theme.)	◯	◯	◯	◯
3. Ang mga biswal ay nagpapahusay sa mensahe, sa halip na nakakaabala. (Visuals enhance rather than distract from the message.)	◯	◯	◯	◯
4. Ang tunog, tiyempo (timing), at transisyon ay epektibong naisabay (synchronized). (Sound, timing and transitions are synchronized effectively.)	◯	◯	◯	◯

5. **4. Perceived Enjoyment (PE)** *

Measures how engaging and emotionally moving the film is.

Mark only one oval per row.

	1	2	3	4
1. Ang animation ay nakakakuha ng atensyon at nagpapanatili ng interes. (The animation captures attention and maintains interest.)	◯	◯	◯	◯
2. Nagpapalitaw ito ng positibong emosyonal na tugon (halimbawa: pagkalibang, pagkamausisa, inspirasyon). (It evokes a positive emotional response (e.g., amusement, curiosity, inspiration).)	◯	◯	◯	◯
3. Ang nilalaman ay nakaka-engganyo (engaging) sa halip na nakababagot (monotonous). (The content feels engaging rather than monotonous.)	◯	◯	◯	◯
4. Malamang na irekomenda o ulitin itong panoorin ng mga manonood. (Viewers are likely to recommend or rewatch it.)	◯	◯	◯	◯

6. **5. Attitude Toward Use** *

Assesses audience perception of the film's value and influence.

Mark only one oval per row.

	1	2	3	4
1. Ang panonood ng bidyo ay isang kaaya-aya at nakakapagpa-isip na karanasan. (Watching the film was a pleasant and thought-provoking experience.)	◯	◯	◯	◯
2. Ang bidyo ay nagpaganda at nagparamdam ng mas may kabuluhan sa pag-aaral tungkol sa pagkakapantay-pantay ng kasarian at pamumuno. (The film made learning about gender equality and leadership more meaningful.)	◯	◯	◯	◯
3. Matagumpay na nakuha at napana-tili ng bidyo ang aking interes. (The film successfully captured and maintained my interest.)	◯	◯	◯	◯

7. **6. Behavioral Intention to Use** *

Assesses willingness to recommend or use the film for advocacy or education.

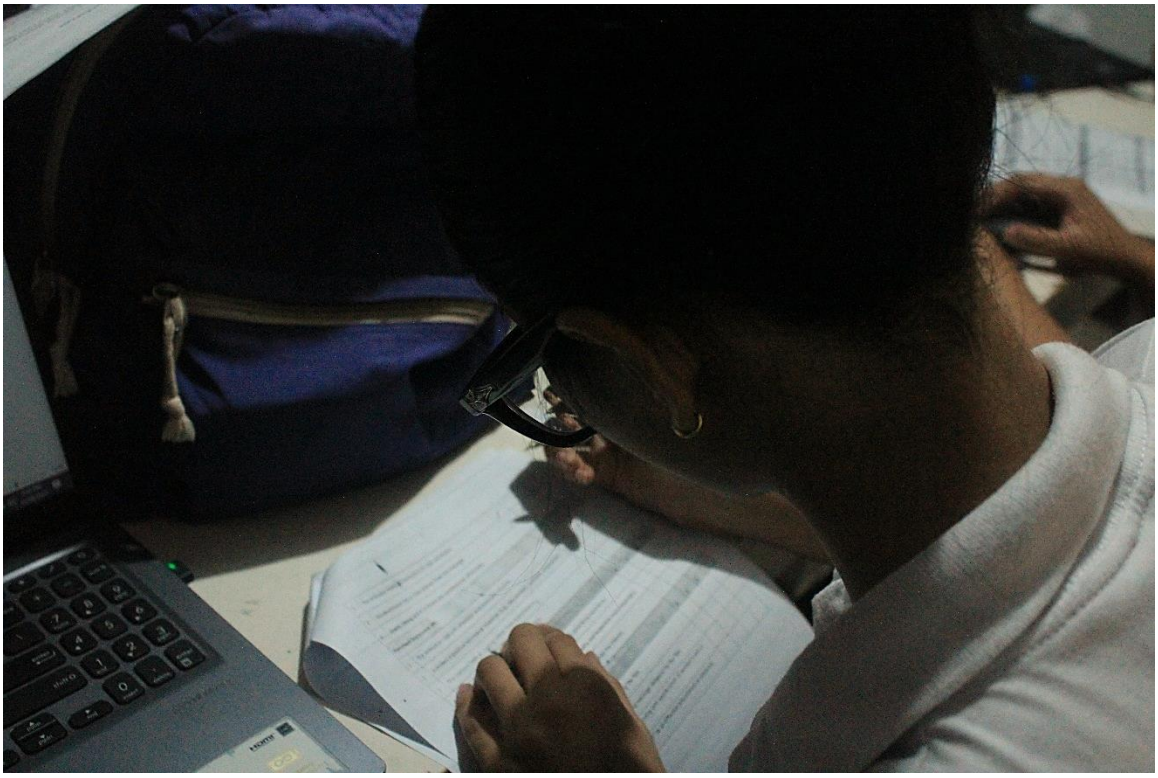

Mark only one oval per row.

	1	2	3	4
1. Marami akong natutunang mahahalagang kaalaman mula sa panonood ng bidyo. (I learned valuable insights from watching the film.)	◯	◯	◯	◯
2. Ako ay nasisiyahan sa impormasyon at mensaheng inihandog ng bidyo. (I am satisfied with the information and message delivered by the film.)	◯	◯	◯	◯
3. Ang bidyo ay nakatulong upang mas maunawaan at mapahalagahan ko ang papel ng kababaihan sa pamahalaan. (The film contributed to my understanding and appreciation of women's role in government.)	◯	◯	◯	◯
4. Aking irerekomenda ang "Abante Babae" bilang isang epektibong materyal para sa edukasyon o adbokasiya. (I would recommend "Abante Babae" as an effective educational or advocacy material.)	◯	◯	◯	◯
