RESEARCH CONTRIBUTION NO.	

ACKNOWLEDGEMENT

The researchers would like to express deepest gratitude to the Lord God for granting the strength, guidance, and wisdom throughout the completion of this study.

To the **Associate Dean, Loyd S. Echalar**, sincere appreciation is expressed for his encouragement, patience, and commitment to academic excellence, which provided inspiration and direction throughout the research process. To the **Research Coordinator, Prof. Jefferson L. Lerios**, the researchers convey their gratitude for his insightful advice, clear guidance, and constant encouragement, which were invaluable during the conduct of this study.

To the **Research Adviser, Prof. Sherwin B. Sapin**, heartfelt thanks are given for his unwavering support, expert guidance, and patience, which significantly contributed to the development and completion of this research. To the panelists, **Ms. Carolina R. Joval, Mr. Alejandro V. Matute Jr., and Ms. Jocelyn O. Padallan**, the researchers extend sincere appreciation for their constructive feedback, time, and valuable recommendations, which greatly enhanced the quality of this study.

Lastly, to the Laguna Police Provincial Office and Bay Municipal Municipal Station for their coordination. To the friends and family, special thanks are given for their moral support, understanding, and encouragement, which provided motivation and strength throughout the research process.

THE RESEARCHERS

DEDICATION

The researchers give thanks to God Almighty, whose never-failing guidance, wisdom, and protection strengthened us throughout this journey. His Grace helped us for making this research study successful. Glory to God!

The researchers would like to thank the parents for their endless encouragement and support. Your love kept us inspired to keep moving forward, even during the most challenging days.

To the researchers' friends, a special thank you for their moral support, understanding, and constant motivation, which greatly helped us reach this milestone. The researchers are truly grateful for every word of encouragement and reminder to persevere throughout the completion of this study.

Finally, the researchers extend heartfelt thanks to the respected faculty members, whose guidance, knowledge, and mentorship provided a strong foundation and enabled the researchers to pursue this study with confidence and purpose.

ABSTRACT

This study focuses on the development of a 2D animated short film titled Baited to create public awareness about the rising cases of online gambling. Due to the ease of access to betting platforms, low-income earners become more vulnerable to financial problems, emotional stress and family conflicts. To address the issue, the researchers combined personal experiences and interviews to make the storyline of how online gambling addiction progresses and some of its effects and consequences. The animation was produced in the industry-standard software following a complete pipeline from the script to the final composition. The Technology Acceptance Model (TAM) was applied to ascertain the perception of the animation's clarity and usefulness by the viewer. The results revealed high levels of acceptance, as the film was able to pass on the intended message concerning the risks and consequences associated with online gambling. The findings show that 2D animation is a powerful tool for communicating social issues to people. It also serves as an instrument for promoting responsible decision-making and actions in the digital era. The overall mean rating for the Technology Acceptance Model was 3.49 with a verbal interpretation of "Strongly Agree."

Keywords: *Online Gambling, Baited, Risks and Consequences*

DEFINITION OF TERMS

2D Animation	2D animation, which involves creating motion within a two-dimensional space. This style works on a flat xy-plane and relies on visual movement to express emotions and communicate stories. As one of the most traditional animation techniques, 2D animation has long been used across cartoons, films, advertisements, and digital media.
Awareness Campaign	An awareness campaign is an intentional process intended to inform, raise a level of consciousness and educate an audience about a particular social problem. In this research, the awareness campaign is an effort created through a 2D animated short film to raise awareness of the triggers, dangers and effects of internet gambling intended to use animation as a facilitation for understanding and responsible choices to deter gambling addiction through lifelike scenarios expressed simply and appropriately.
Animation	An animation is a movie, scene, or sequence that gives the impression of movement by showing a series of still images, such as drawings or computer-generated visuals, that change slightly from frame to frame.
Addiction	Refers to the state where an individual finds himself or herself having a strong dependency on certain activities or behaviors. This results in the loss of self-control as the individual continues with the behavior despite the negative impacts. Addiction is shown in the movie through the character's online

	gambling activities.
Adobe Photoshop	Photoshop is primarily used for editing and retouching drawings and has become an essential tool for graphic designers, photographers, and digital artists. It allows users to manipulate digital images and create complex
Adobe Animate	Allows users to create interactive 2D animations, motion graphics, and engaging web-based experiences. The software supports vector graphics and enables the integration of various media types.
Audacity	A free and open-source audio editing software used for recording, enhancing, and mixing voiceover narrations and sound effects. It is utilized in this project to refine ambient sounds and narration for the virtual tour.
CapCut	A user-friendly editing tool used in the early stages of video compilation.
Shotcut	Shotcut is free, open-source, cross-platform video editing software that supports a wide variety of audio and video formats. It allows for native timeline editing without the need for import, and it includes features for transforming, compositing, and color grading footage. Shotcut also offers various audio tools, video transitions, and filters, making it a versatile choice for video editing on Windows.
Technology Acceptance Model (TAM)	A model used to measure how users accept and respond to technology. The 11 effectiveness of the 2D animation as an awareness tool.

CHAPTER 1

INTRODUCTION

Project Context

In today's digital world where technology keeps making life easier but also brings new problems, one with biggest issues is the rise of online gambling, because people can now join different gambling activities like online casinos, sports betting, and poker using their phones and computers, which leading to about 1.6 billion people worldwide participating in some form of gambling and is $153 billion in market value for clarity in revenue by 2030 (Statista, 2023). The convenience and availability of online platforms encourage more people, especially young adults, to gamble casually at first, but many end up developing gambling problems without even noticing it. Studies have shown that game designs, like fast rewards, near-misses, and the illusion of control, make online gambling more addictive compared to traditional gambling (Gainsbury, Abarbanel, & Blaszczynski, 2019).

In the Philippines, online gambling has become even more common because of economic struggles, the rise of social media influence, and advertisements that show gambling as an easy way to make quick money, even though the reality is that many gamblers end up losing more than they win (Müller, Scharkow, & Wölfling, 2020). The Philippine Amusement and Gaming Corporation (PAGCOR) is responsible for regulating and overseeing gambling operations in the Philippines and issues licenses to online gambling sites, but despite these regulations, around 40% of adult Filipinos reportedly engage in online gambling activities, often through unlicensed platforms that

are easy to access through mobile phones (PAGCOR, 2022). Financial problems, social pressure, and targeted online ads make it hard for many Filipinos to resist gambling, especially when it is promoted as a solution to poverty or a quick path to success. The harmful effects of gambling addiction are not only financial, like losing savings and going into debt, but also emotional, as many gamblers suffer from anxiety, depression, and damaged relationships with family and friends (Blaszczynski & Nower, 2019).

Studies also show that addicted gamblers are more likely to experience social isolation and feelings of hopelessness, which make recovery even harder if there is no support system. Gambling addiction has been related to problems like poor academic performance, job loss, and, in some cases, engagement in crimes just to sustain gambling habits (American Psychological Association, 2019). Because of this, it is important to raise awareness, especially among the youth, about the risks of online gambling (American Psychological Association, 2019).

The COVID 19 pandemic greatly contributed to the rise of online gambling because during the lockdowns, many people lost their jobs, experienced financial hardships, and had more free time while staying at home, and because of boredom, stress, anxiety, and the urgent need for quick money, individuals, especially young adults and low-income workers, turned to online gambling as an escape from daily pressures to their problems or to find alternative sources of entertainment, and since physical casinos, betting shops, and other recreational venues were closed due to health restrictions, people increasingly discovered digital gambling platforms that were easy to access anytime through mobile phones and computers.

Based on a study by Håkansson (2021), approximately 36% of regular gamblers reported an increase in their gambling activities during the pandemic, while 17% tried new forms of online gambling that they had not previously engaged in. Which clearly shows that the pandemic not only encouraged existing gamblers to bet more but also pushed others to explore riskier forms of gambling online, and this drastic shift can be explained by the unique situation during COVID-19 when people were socially isolated, emotionally vulnerable, and financially unstable, creating the perfect environment for risky behaviors like online gambling to grow unchecked, and because online gambling platforms are designed with fast reward cycles, attractive bonuses, and the illusion of easy money, many individuals fell deeper into gambling habits without realizing the long-term consequences such as debt accumulation, emotional distress, and mental health problems, making the pandemic not just a health crisis but also a trigger for behavioral issues that will likely continue affecting people even after the pandemic has ended (Håkansson, 2021).

With the rapid growth of online gambling in today's digital age, it is increasingly seen as a significant public health issue, impacting millions of people worldwide (Håkansson, 2021).Young adults, who are heavily exposed to technology, online advertisements, and social media, are especially at risk of harm from online gambling, often attracted by the thrill of quick rewards and the illusion of easy financial success. Although some governments have introduced regulations and support services, many individuals remain unaware of the psychological, financial, and social consequences associated with excessive gambling behaviors. Because online gambling platforms are

specifically designed to be highly engaging and addictive, and because gambling is frequently portrayed positively in popular media, there is a strong need for more effective educational strategies. Creative approaches such as storytelling through 2D animation can provide a powerful and relatable way to communicate these risks, especially to younger audiences who are the most active consumers of digital content (Green & Jenkins, 2014).

Given these risks, it is crucial to raise awareness and educate individuals about the dangers and negative effects of online gambling. "Baited: A 2D Animated Short Film on Online Gambling" aims to address this issue by using animation as a creative tool to inform people, especially young adults, about the harmful consequences of excessive gambling, even before addiction begins. Through compelling and emotional storytelling, this project will show the psychological pressures, financial struggles, and social problems that individuals may face when they engage in online gambling, emphasizing the importance of making careful and responsible decisions. By using animation, the project hopes to reach a wide audience, promote a better understanding of the risks of gambling, and inspire individuals to avoid developing unhealthy gambling habits that could lead to bigger problems in the future.

Project Objectives

Developing a 2D animated short film that raises awareness about online gambling and its possible risks and consequences.

1: To collect and analyze relevant information on the causes, effects, and social impact of online gambling.

2: To develop a 2D animated video that clearly and creatively presents issues related to online gambling.

3: To evaluate the animation's effectiveness using the Technology Acceptance Model (TAM).

Project Purpose

The project aims to raise awareness among people about the risks and consequences of online gambling and to provide them with knowledge that would help them make responsible choices before online gambling habits can harm their lives. This project contributes to Sustainable Development Goal 1, as gambling addiction can cause financial ruin and increase poverty levels, especially affecting individuals and their families who already struggle with limited resources. It also supports Sustainable Development Goal 3 because gambling addiction can harm a person's emotional health, that leads to stress, anxiety, and depression. Additionally, this project aligns with Sustainable Development Goal 4 since gambling problems can affect students by causing them to neglect their studies or even drop out of school. Moreover, it relates to Sustainable Development Goal 8. While online gambling creates jobs, it can also lead to financial instability and exploitation of workers in unregulated sectors. Finally, the project addresses Sustainable Development Goal 16 because online gambling is often linked to illegal activities such as fraud, money laundering, and scams. Some unregulated gambling websites are created in areas with weak law enforcement, becoming centers for criminal activities. Cybercriminals use these platforms to launder money, evade taxes, and exploit vulnerable individuals.

Games and Amusements Board. By educating people about the risks of internet gambling, particularly about illegal and unregulated platforms, the project assisted the Games and Amusements Board (GAB). GAB is responsible for overseeing and controlling gaming operations, including online gambling, and ensuring that operators adhere to legal requirements. "Baited: A 2D Animated Short Film on Online Gambling" would help GAB's efforts to encourage responsible gaming by educating the public about the risks of online gambling. By urging users to only use regulated and licensed gambling sites, the animation can also aid in the prevention of uncontrolled gambling.

Though the project is designed to educate and encourage responsible behavior online, it is not an immediate intervention or counseling resource for those who are addicted to gambling. The animation was directed mainly at creating awareness and may not address all types of gambling or all individual experiences. Moreover, its efficacy in creating behavioral change was also contingent upon external variables like personal interpretation, environmental factors, and access to support systems.

Cybercrime Division of the NBI. The NBI Cybercrime Division targets the investigation and prosecution of cybercrimes, such as illegal online gambling operations. The animation assisted NBI in its efforts by raising public awareness on the increasing issue of online gambling and the illegalities surrounding unregulated sites. By providing public education on the risks of online gambling and information on how to identify and report illegal operations, the project aims to support the NBI in strengthening the prevention and response to cybercrime.

PNP Anti-Cybercrime Group. The PNP Anti Cybercrime Group is concerned with investigating various cybercrimes, such as online gambling. “Baited: A 2D Animated Short Film on Online Gambling” assisted the group by informing the public of the dangers of online gambling, as well as the risks of illegal online gambling operations. The project enhanced the group's current work towards increasing awareness and educating people on reporting illegal gambling activity and sites. By covering both the psychological consequences of uncontrolled gambling and the legal consequences of engaging in illegal gambling, the animation can enable audiences to make informed choices and notify authorities of crimes pertaining to online gambling.

Students. This 2D animation project titled “Baited: A 2D Animated Short Film on Online Gambling” aims to spread awareness and a better understanding of the causes and effects of online gambling among students. This short animation film was beneficial to all students, as the proposed animation film may raise awareness for them and avoid what should be avoided, and what needs to be done.

Community. By promoting responsible online behavior and increasing awareness of the risks and consequences of online gambling, this 2D animated film will benefit the community. The project helped in creating a society that is more aware as individuals had the capacity to make informed choices concerning their lives by learning about the challenges associated with online gambling.

As viewers engage with animation and share its message with their families and peers, they become advocates for responsible online habits,

helping to prevent excessive gambling and support those who may be struggling. Through this awareness, the community can work together to create a safer digital environment and encourage individuals to seek healthier alternatives to online gambling.

Future Researchers. Future researchers benefited from this 2D animated video as it serves as a valuable reference for studies related to online gambling, digital awareness, and mental health. This project provides insights into the causes, effects, and preventive measures of online gambling, which can be useful for further academic and social research.

By analyzing the animation's content, effectiveness, and impact, future researchers can build upon the findings, explore new perspectives, and propose improved solutions. Additionally, this project may inspire future studies on behavioral patterns, online safety, and community-based intervention strategies, contributing to a more comprehensive understanding of the issue.

Scope and Limitations of the Study

The research aims to conceptualize, develop, and produce a 2D animated short film titled "Baited: A 2D Animated Short Film on Online Gambling." This animation seeks to raise awareness about the causes, consequences, and preventive measures of online gambling, particularly targeting students, parents, and the general community. The film follows a set of realistic, everyday situations that many people can relate to, showing how online gambling can slowly become a problem without being noticed at first. Instead of exaggerating events, the story focuses on small moments and

choices that build over time, helping viewers recognize early warning signs such as spending more time online, hiding behavior from friends or family, or feeling stressed and restless when not gambling. Along the way, the film also shows that help is available and that reaching out is possible, whether through talking to someone you trust, finding support services, or taking steps toward healthier habits.

Created to feel honest and approachable rather than preachy, the animation balances storytelling with education, keeping viewers engaged while delivering an important message. The film runs for about 20 minutes and shared through online spaces like social media and video-sharing platforms, making it easy to reach a wide audience and start conversations about online gambling and its impact.

CHAPTER 2

REVIEW OF RELATED LITERATURE, STUDIES, AND SYSTEM

This following chapter delves into the rise of online gambling, the ease with which people are drawn into the world of cyber gambling and the psychological and behavioral implications that may arise. The study also looks into existing laws and regulations, especially how they aim to protect users and ensure fairness in the industry. In addition, it highlights the role of 2D animation as an effective tool for raising awareness about the risks and consequences of online gambling and promoting responsible gaming behavior. This approach allows complex issues to be presented in a visually engaging and easily understandable manner, making the message more impactful for young audiences.

The Growth of Online Gambling

Online gambling can also be referred to as interactive or remote gambling. Online gambling encompasses different types of gambling activities which can be done using internet-enabled devices such as computers, mobile phones, and digital televisions. Enabled by technological advancements, increased Internet accessibility, and the widespread use of connected devices, this form of gambling represents a mode of delivery rather than a distinct gambling activity (Gainsbury, 2015).

The increase in online gaming isn't related to just numbers. It reflects shifts in how people play, advances in technology, and an ongoing drive to create engaging digital experiences. Also looking at the industry’s growth, one

thing becomes clear: online gambling shows no signs of slowing down. (Macintyre, 2015-2025). Online gambling platforms have made gambling a routine activity for many people, which has sparked concerns about its possible risks. Advertising and promotional strategies play a key role in shaping gambling habits and making them seem like a normal part of everyday life. (Perez, Krotter, Diego, 2024). Technology has always had its part in the development of gambling behaviors, as its use continues to provide opportunities for new markets. Among the sectors growing at a very fast rate is online gambling. The role of these technologies should not be readily accepted, especially in cases where potential concerns could lie based on information known in offline problems of gambling (Griffiths & Parke, 2002).

Online Gambling Addiction

Internet gambling is the fastest-growing form of gambling and is reshaping how people participate in it. Its high accessibility, engaging interfaces, and the ease of spending money have raised concerns that it could contribute to higher rates of problem gambling. (Gainsbury, 2015). Gambling behavior varies along a continuum from the very low-risk, occasional recreational, or social gambling to at-risk gambling, and in more severe cases, to problem, pathological, compulsive, or disordered gambling (Floros, 2018). The terms ‘problem’ and ‘pathological’ gambling are often used interchangeably, but the term ‘problem gambling’ describes an intermediate or sub-clinical form of the disorder (Lorains, Cowlishaw, & Thomas, 2011). In essence, gambling disorder constitutes a behavioral addiction characterized by persistent and recurrent problematic gambling behavior that leads to clinically significant deterioration or distress, including social functioning

problems, financial problems or even comorbidity with mental and physical illnesses (American Psychiatric Association, 2013). Along with every other culture and society since the beginning of time, gambling has been one of the most widespread leisure activities, and that continues. For many people, gambling is an enjoyable activity that has no repercussions in their lives, while, on the other side, gambling may lead to addiction for others.

Psychological and Behavioral Effects

Gambling can take a serious toll on personal relationships, make decision-making more challenging, and create a general sense of chaos in daily life due to emotional instability. Feelings of guilt and shame often emerge when individuals realize the negative effects of gambling on their finances, relationships, and overall well-being. (Ivanova, 2024). The psychological effects of online gambling sites might be severe, given that their immersive and anonymous nature has been found to cause harmful psychological effects on users.

Gambling is a complex activity that can be anything from a recreational activity to pathological gambling, a serious psychological condition that is categorized as an impulse-control disorder. While a smaller percentage of people develop compulsive gambling behaviors that can cause serious distress, including anxiety and depression, as well as strained social and familial ties, others may gamble recreationally without suffering negative consequences. Certain criteria, such as an obsession with gambling and a loss of control over betting behaviors, are necessary for the diagnosis of pathological gambling. (Knapp, (2024). First, in line with gambling theory, it

was found that individuals' online gambling increases with any increase in cumulative net gain or cumulative net loss. Second, it was revealed that a recent loss decreases online gambling and a recent gain increases online gambling, as the availability heuristic would predict. Third, in congruence with the literature on repeated behavior, regular use and extended use were found to moderate the relationship between current and subsequent gambling. Taken together, the present study contributes to the elucidation of how people respond differentially to immediate and cumulative outcomes and how regular use and extended use foster routine behavior in the context of online gambling. In general, our results imply that the three perspectives, i.e., gambling theory, the availability heuristic, and repeated behavior should be combined to understand online gambling, which in essence is a series of risk-taking attempts with the potential of eventually becoming routine behavior. (Ma, Hyun Kim, Kim, 2014). Gambling behavior can be placed at various points on a continuum that ranges from occasional, recreational, non-problematic or social gambling to at-risk gambling and then finally to problem, pathological, compulsive or disordered gambling. Floros, 2018. Whereas the terms problem and pathological gambling are sometimes used interchangeably, the term problem gambling describes an intermediate or subclinical form of the disorder. (Lorains, Cowlishaw, & Thomas, 2011).

Why is online gambling addictive?

Gamblers often have mental and genetic predispositions to excessive gambling, which may bring about extreme alterations in the chemical signal dispatching functions of the brain. The factors have the potential to initiate the fall into addiction for a gambler. Many weeks, months, and even years are

required to reverse the harmful factors, which cause the brain to become conditioned to increasingly receive to stimulate its reward circuits to the extent that the brain rewires its mental circuits to an extreme level. (Hughes, 2016).

The strategies for effective engagement with the user are used for their maximum benefit in online gambling. The factors such as the provision of exciting rewards, attractive graphics, and exciting sounds have the potential to stimulate the reward circuits of the brain to secrete dopamine and bring feelings of pleasure. Dopamine further reinforces the behavior and causes the brain to become addicted. (Legarda, 2025).

At the root of gambling addiction is the notion of intermittent reinforcement. This is where the reinforcement or reward is provided on an intermittent basis. The unpredictability of winning or losing in gambling games is one of the main drivers that keep people coming for more. The fact that one is not sure of every outcome of every gamble offered is one of the main components that drive addiction to this activity. This is one of the main components of gambling addiction. This is because every gamble one makes is not predictable. (Rose). One of the reasons why people are so hooked on gambling is the experience of betting. Betting gives you a sense of excitement that comes with an adrenaline rush that people become so hooked on. This act of betting sometimes serves as a motivation to continue betting with hopes of attaining that elusive big win (Young, 2024).

Gambling, besides drug addiction or even shopping, can be considered an addiction once it has reached a level where its use is compulsive and out of control. The addiction comes from two distinct pathways in our brain; these are liking and wanting. Liking is the natural pleasure of indulging in eating

chocolate biscuits. Wanting is when we want something, such as when we spot a package of chocolate biscuits in a supermarket. Wanting is motivational; that is, wanting makes people want things and do them. In short, addiction is simply viewed as changing how people react when they are around rewards (Twumasi, Shergill, 2020).

Legal and Regulatory Framework

Philippine regulations require players to be at least 21 years old to participate in casino gaming. Online platforms regulated by PAGCOR must enforce age verification measures. Unlicensed and foreign platforms may be laxer, exposing minors to gambling. An inclusive regulatory framework aims to put into effect regulations that are beneficial as well as protective for the interests of the government, the industry, and the gambler (Cabot, 2007). The factors covered in the regulatory framework and the focus areas show considerable variations between different regulatory regimes (Basham and White, 2002). These differences shall specifically be elaborated on in the succeeding sections.

In matters relating to government protection, this involves regulations like or including the same ones given to financial institutions, which entail strict record-keeping as well as protection for players. In general, this set of regulations can help ensure that the government gets all taxes, as well as help prevent sites from engaging in money laundering as proceeds for criminal activities or deeds. Another important role in this regard, which helps in the protection of the industry, is the promotion of the interests of the industry in ensuring potential players know that the outcome is fair, honest,

and that they will receive payment for winnings in the event of obtaining them. Certainly, players' cheating would undermine the image of the whole sector. Another role is identifying cheating players. Player protection can take place at various levels, which include responsible gambling, the prevention of problem gambling, fair and honest gambling, the restriction of access to minors, as well as the preservation of the customer's privacy (Cabot, 2007). Regulating bodies also play an important role in supervising online casinos (Amadala, 2024). The authors of the IGPA apparently envision a complete ban on Internet gambling. Those who favor a complete prohibition on Internet gambling cite several concerns in support of their position:(1) protecting minors from the dangers of underage gambling; (2) preventing fraud; and (3) preventing gambling addiction.11 In addition, state governments want to preserve the tax revenue derived from legalized forms of gambling.12 As this Article will discuss, however, the IGPA likely will fail to eradicate Internet gambling and therefore will do nothing to further these policy goals. Rather than prohibiting Internet gambling, private sector regulation or government regulation may be a more effective means to achieve the stated policy goals (Loscalzo, 2000).

Issues related to gambling in the Philippines

In February 2025, Philippine officials launched a raid in Pasay City, Manila, arresting more than 400 suspects, mostly from China and Vietnam. The suspects were reportedly behind illegal online gambling, cryptocurrency fraud, and other scams. The operation reflects the ongoing struggle against illegal online gambling operations despite the efforts of governments to suppress them. The Philippine gaming sector is expected to post a record

revenue of more than 350 billion pesos (some $6.03 billion) in 2024, fueled mostly by electronic gaming growth. This is even though all licenses of offshore gaming operators (POGOs) are due to be withdrawn from business by the government by year-end amid fears of linked crime like human trafficking and fraud.

Investigations have revealed disturbing practices within some online gambling operations. For instance, a facility in Manila, previously operating as a Philippine Offshore Gaming Operator, was found to be a front for large-scale cybercrime activities. Workers, trafficked primarily from China and Vietnam, were coerced into running online scams under inhumane conditions, facing severe punishments for failing to meet quotas.

It was in September 2024 that Philippine Senator Risa Hontiveros posited the possibility that former mayor Alice Guo, who had been charged with encouraging offshore betting in Bamban, could have been spying for China. This is a case that illustrates the complicated dynamics between domestic governance, foreign relations, and the gaming industry. From April 2021 to January 2022, 34 cockfighting fans, or sabungeros, went missing in Luzon. Their disappearance has caused a lot of concern regarding the safety and regulation of e-sabong (online cockfighting) operations in the Philippines.

In May 2023, the National Privacy Commission determined that unlawful transactions across numerous GCash accounts were caused by phishing attacks. Attackers leveraged vulnerabilities on online gambling websites like "Philwin" and "tapwin1.com" and caused economic losses to customers. The Resorts World Manila attack in June 2017 is a stark reminder

of the possible personal and public safety threats posed by gambling addiction. A gunman, allegedly weighed down by gambling-related debt, launched an attack that claimed several lives and injuries, calling for complete support systems for people with gambling addiction.

Using 2D Animation for Awareness Campaigns

The project aims to conduct a study on the foundational aspects of adolescent development in relation to the impact of social media on their growth. It also involves creating a 2D animated narrative that depicts the effects of social media usage on adolescent development and analyzing the effectiveness of a 2D animated advertising campaign in promoting awareness and understanding of this issue (Nazley, Effendy, Jayakumar, Mohd Herrow, 2024).

Animation isn’t just about creating entertaining stories for movies or TV shows. It’s a powerful tool for communicating complex ideas and promoting social change. With an ever-growing digital landscape, social activists, NGOs, and even governments are employing animation to raise awareness, inspire action, and educate the public on a variety of social issues, ranging from environmental conservation to human rights (V. C. G., 2024).

To do so, use 2D animation, which is perfect for telling stories and building emotional connections. Characters embodying your brand values can humanize your business. For example, you can use 2D characters in advertising campaigns to create long-lasting relationships with your audience (Goh, 2024). The 2d animated awareness advertising aims to raise awareness of issues and topics, especially related to community health and

safety, to change or modify the community behavior positively (EI-Aasy, 2022). The high mortality rate caused by depression indicates the low level of public awareness of mental health disorders. The author has chosen this problem in an attempt to let the public be more aware of and concerned about depression by producing a 2D animated video. (Deli, 2022).

Synthesis and Relevance of the Study

The increasing prevalence of online gambling worldwide has raised significant concerns due to its negative impact on individuals and society. Online gambling is linked to various psychological, financial, and social problems, which are further exacerbated by the accessibility and convenience of online platforms. The ease of gambling through digital means increases the risk of falling into harmful gambling habits, especially among young adults and individuals from low-income backgrounds who may see gambling as a way to improve their financial situation but often end up facing repeated losses instead. This study explores the effects of online gambling on mental health, financial stability, and personal relationships. Research suggests that excessive gambling can lead to heightened stress, anxiety, and emotional distress. Financially, it is associated with job loss, rising debt, and economic hardship, affecting not only the gambler but also their families. Additionally, uncontrolled gambling can result in conflicts, loss of trust, and strained relationships due to financial instability and emotional struggles. Educational animations have been recognized as an effective tool in raising awareness and promoting responsible gambling behavior. Wohl et al. (2013) conducted a study on the impact of animation-based education in preventing gambling-related issues. Their findings indicate that individuals who watched an

educational animation about slot machine mechanics and responsible gambling were more likely to adhere to financial limits compared to those who did not. This suggests that animation can be a valuable tool in correcting misconceptions and reducing risky gambling behaviors. This study is relevant as it aims to deepen the understanding of how online gambling affects people across different countries and cultures. By examining the reasons behind excessive gambling and its consequences, this research seeks to develop effective prevention strategies, intervention programs, and policy recommendations.

Literature Matrix

The table below summarizes key research studies and their relevance to the project:

Table 1. Literature Matrix

Author(s) & Year	Title of Study	Objective/Purpose	Findings/Result	Relevance to the Study
Doe & Smith (2020)	The Raise of online gambling	To examine the factors contributing to the growth of online gambling	Found that accessibility and anonymity increase gambling addiction risk	Support the study's premise on the danger of online gambling
Johnson (2021)	Psychological Effects of Gambling	To explore the impact of gambling on mental health	Identified increased stress, anxiety, and financial struggles among gamblers	Provides background on gambling addiction's psychological effects
Lee & Kim (2019)	Regulation of Online Gambling	To analyze the effectiveness of gambling	Found that strong regulations help mitigate	Relevant for discussing policy

		regulations	gambling addiction	interventions
Hing et al. (2020)	Socioeconomic effects of gambling addiction	Leads to lying, trust issues, and family breakdown	The study found that gambling addiction causes trust issues, lying, and family breakdowns, which helps shape character interactions in the animation	Helps develop character interactions in the film
Williams et al. (2022)	Animation as an Educational Tool	To assess the effectiveness of 2D animation in awareness campaigns	Concluded that animated content enhances message retention	Supports the study's use of 2D animation for raising awareness
Roberts & Green (2018)	Financial Consequences of Gambling Addiction	To examine the economic effects of gambling addiction	Found that many gamblers experience severe financial instability	Highlights the financial dangers of gambling
Patel (2023)	Gambling and Youth	To study the prevalence of gambling among young people	Revealed a rising trend of online gambling among teenagers	Strengthens the study's argument for awareness campaigns targeting youth
Taylor (2019)	Digital Addiction and Behavior	To analyze behavioral changes due to online activities	Showed that compulsive digital behaviors mimic substance addiction patterns.	Provides insight into gambling addiction mechanisms
Mayer	Educational	Animated	online	Supports the

(2020)	media effectiveness	storytelling simplifies complex messages.	gambling risks, making complex issues understand.	use of animation for raising awareness.
Gonzalez & Rivera (2020)	Social Consequences of Online Gambling	To explore the social effects of online gambling addiction	Found increased isolation and strained relationships among addicted gamblers.	Highlights the broader impact of gambling addiction

CONCEPTUAL FRAMEWORK

Figure 1 illustrates an overview of the planned process behind the making of the 2D animated short film for online gambling awareness. The overview is practical and systematic for the study's production process from start to finish and reflects a seamless activity flow and component interrelationship to understand what's involved in making the animation. The overview is separated into four main sections that comprise data collection, animation development, final output, and evaluation and feedback. These components serve to produce the 2D animated short film by compartmentalizing tasks/stages that naturally occur within the process from beginning to end. The more compartmentalized they are, the easier it is to stay on track for a final product with a predetermined intent. This intentional overview between stages safeguards, focusing on the combined study's literary and aesthetic efforts to create a purposeful animated approach to a pressing need for gambling awareness. Thus, this overview supports the creation and assessment of this study beyond what's involved in making the animated short film.

In the Data Gathering stage, the team will identify major issues related to online gambling, particularly those that affect the youth. This stage will also involve

collecting relevant Information and determining the most effective animation styles and storytelling techniques to use.

The Animation Development phase is where the creative process comes to life. This includes writing the script, developing the storyline, designing characters and environments, and putting together the animation with voiceovers. All the research and planning come together to shape a meaningful and visually engaging film.

The Final Output is the finished 2D animated film. It is crafted to inform and educate viewers about the risks and negative effects of online gambling. This serves as the main product of the study and the core of its advocacy efforts.

Finally, the Evaluation & Feedback stage focuses on how the audience responds to the animation. Through viewer feedback and reactions, the team assesses whether the film successfully raises awareness and encourages a change in attitude or behavior regarding online gambling.

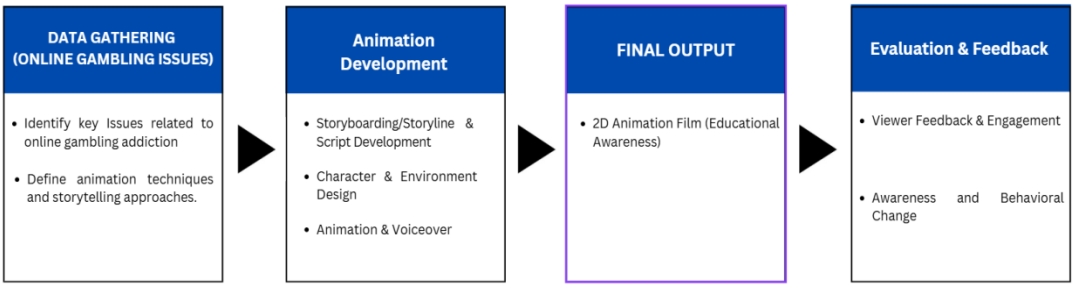

Figure 1. Conceptual framework of the Study

CHAPTER 3

METHODOLOGY

Project Design

The goal of this project is to raise awareness and educate the residents of Paciano Rizal Bay, Laguna, about the risks and consequences of online gambling. Through the development of a 2D animation film, the project aims to illustrate and explain the psychological, financial, and social impacts of excessive gambling. The film provided informative content by integrating compelling stories, relatable characters, and engaging visuals to effectively communicate the risks and consequences of online gambling. The animation served as an engaging and easily accessible educational resource that not only raises awareness but also promotes responsible gaming practices and healthier lifestyle choices. Furthermore, the project aims to foster positive behavioral changes by depicting real-life situations and highlighting effective strategies to prevent excessive gambling. The project involves key stages such as data collection, scriptwriting, character and background design, storyboarding, layout, animation, voice recording, sound production, editing, and video composition. These steps ensured the production of an impactful and well-structured educational film that can be used for advocacy, awareness campaigns, and educational programs.

Animation Development Model

The figure 2 below presents the development model used for creating “Baited: A 2D Short Film Animated on Online Gambling”. This model

organizes the production into three main phases: Pre-Production, Production, and Post-Production. Pre-Production involves Data Gathering, Script Writing, Character and Background Design, and Storyboarding. Production includes the Layout and Animation process. Post-Production covers Voice Over, Sound Design, Editing, and Video Composition. This model provides a clear structure for developing animated short films.

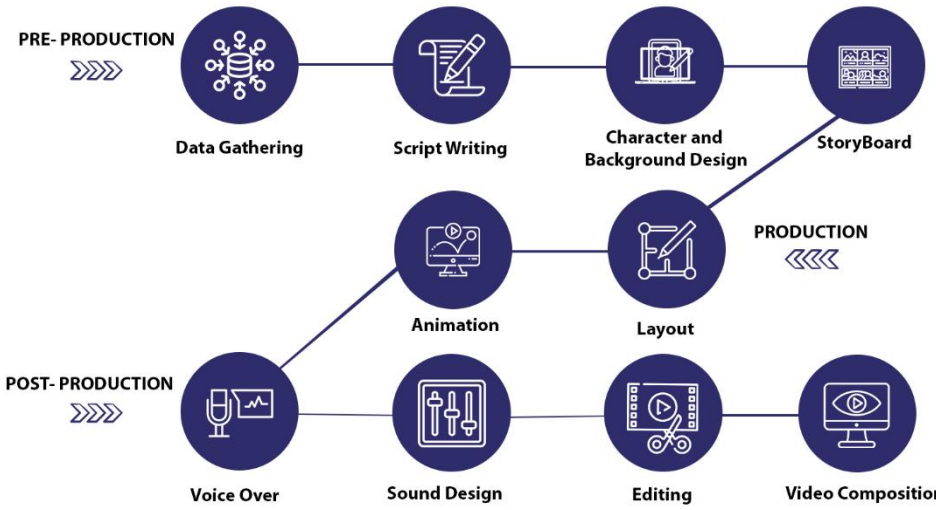

Figure 2. Animation Development Model

Data Collection

Random individuals with relevant experience, who are willing to share their stories, interviewed in Paciano Rizal, Bay, Laguna. To gather information to produce a 2D animated film, real-life personal experiences related to online gambling collected. These stories served as references and inspiration for the development of the film's storyline. In addition to the interviews, research on online gambling conducted to gather further information to improve the story. After collecting and analyzing the data, meaningful content selected to create a realistic, emotional, and relatable animation. Furthermore, websites

showcasing 2D animations explored to gather ideas, study different styles and techniques, and ensure the uniqueness of our animation, avoiding similarities with existing works and previously published projects.

Script Writing

The story was developed around a minimum wage earner who becomes addicted to online gambling. The script highlights how influences from social media, streamers, advertisements, and peer pressure can lead individuals, especially those facing financial struggles, to gamble in the hope of quick money.

Character and Background Design

The film follows the main character's daily life, depicting his humble beginnings, descent into addiction, and eventual redemption. As the character's emotional state changes, the background and environment also shift from warm and lively to dark, empty, and cold, then slowly return to a hopeful atmosphere during recovery.

Storyboard

The animation was mapped out with an actual storyboard showing the entire narrative of the film, with each scene designed to represent the specific state of mind, action, and life situation of the character to convey a logical response to what was occurring. This way, the audience could pay more attention to the fine emotional details through visual parameters to gauge the effectiveness of such a gradual change.

Thus, the storyboard was an excellent way to anticipate an organized narrative for clarity and ideal visual communication for emotional subtleties and general support.

Here’s a scenario: Jethro wakes up late. He quickly slaps the alarm clock. He is a janitor. Beside him, his wife Alice is still sleeping while holding their daughter. As Jethro hurries to get dressed for work, the TV is on. Some news catches his attention. It’s about a man who got addicted to online gambling. The man borrowed a lot of money and was left by his family because of his addiction. On his way to his job, he sees his two friends, Archie and Jaydy, happily holding their phones, celebrating their winnings from playing online gambling games. Jethro doesn’t show any interest, as he’s not into gambling, so he just continues his way to work. Until one day, something bothers in his mind.

Conflict scenario, after his shift as a janitor, during his break time, Jethro checks his phone and comes across several ads and promotions related to online gambling games in his newsfeed. After work, Jethro is walking home. He just got his salary and bought some food to bring home. When he arrives, his wife Alice is waiting for him. She asks for his salary, but when she sees it’s a small amount, she gets angry. They start arguing because his earnings are not enough. Another day, on his way to work, he sees Archie with a new motorcycle that he won from playing online gambling. Archie invites Jethro to try the game too.

The Rising action scenario is later that day, after work, Jethro decides to give it a try, hoping he might win something just like Archie. Surprisingly, he

wins repeatedly over the next few days. A week passes; Jethro begins to lose more often. Worried and frustrated, he talks to Archie and Jaydy about the game, asking why he keeps losing every time he plays. After he talked to them, Jethro still couldn’t accept losing and kept playing, hoping his luck would finally change. Eventually, he starts neglecting his job because of the game. As time passes, Jethro begins losing in the games. He ends up losing his job, his savings, and even starts selling household items just to keep playing. He begins to borrow money as well.

In the climax scenario, as Jethro becomes more addicted to online gambling, he also starts neglecting his family. Even though his wife Alice tries to talk some sense into him, he still can't stop playing. Eventually, his family leaves him.

In the ending scene, with nothing left, Jethro finally realizes he had become addicted to online gambling. Archie and Jaydy hear about what happened when Jethro’s family left him, and his life fell apart due to gambling. They feel guilty, especially because they were the ones who encouraged him to try the game. Jethro reflects on the happy memories he had with his family eating together, leaving home as one. Overcome with regret, he breaks down. Archie apologizes to Jethro after learning about the damage caused. Jethro also asks for forgiveness from his family and promises that he will never play online gambling again.

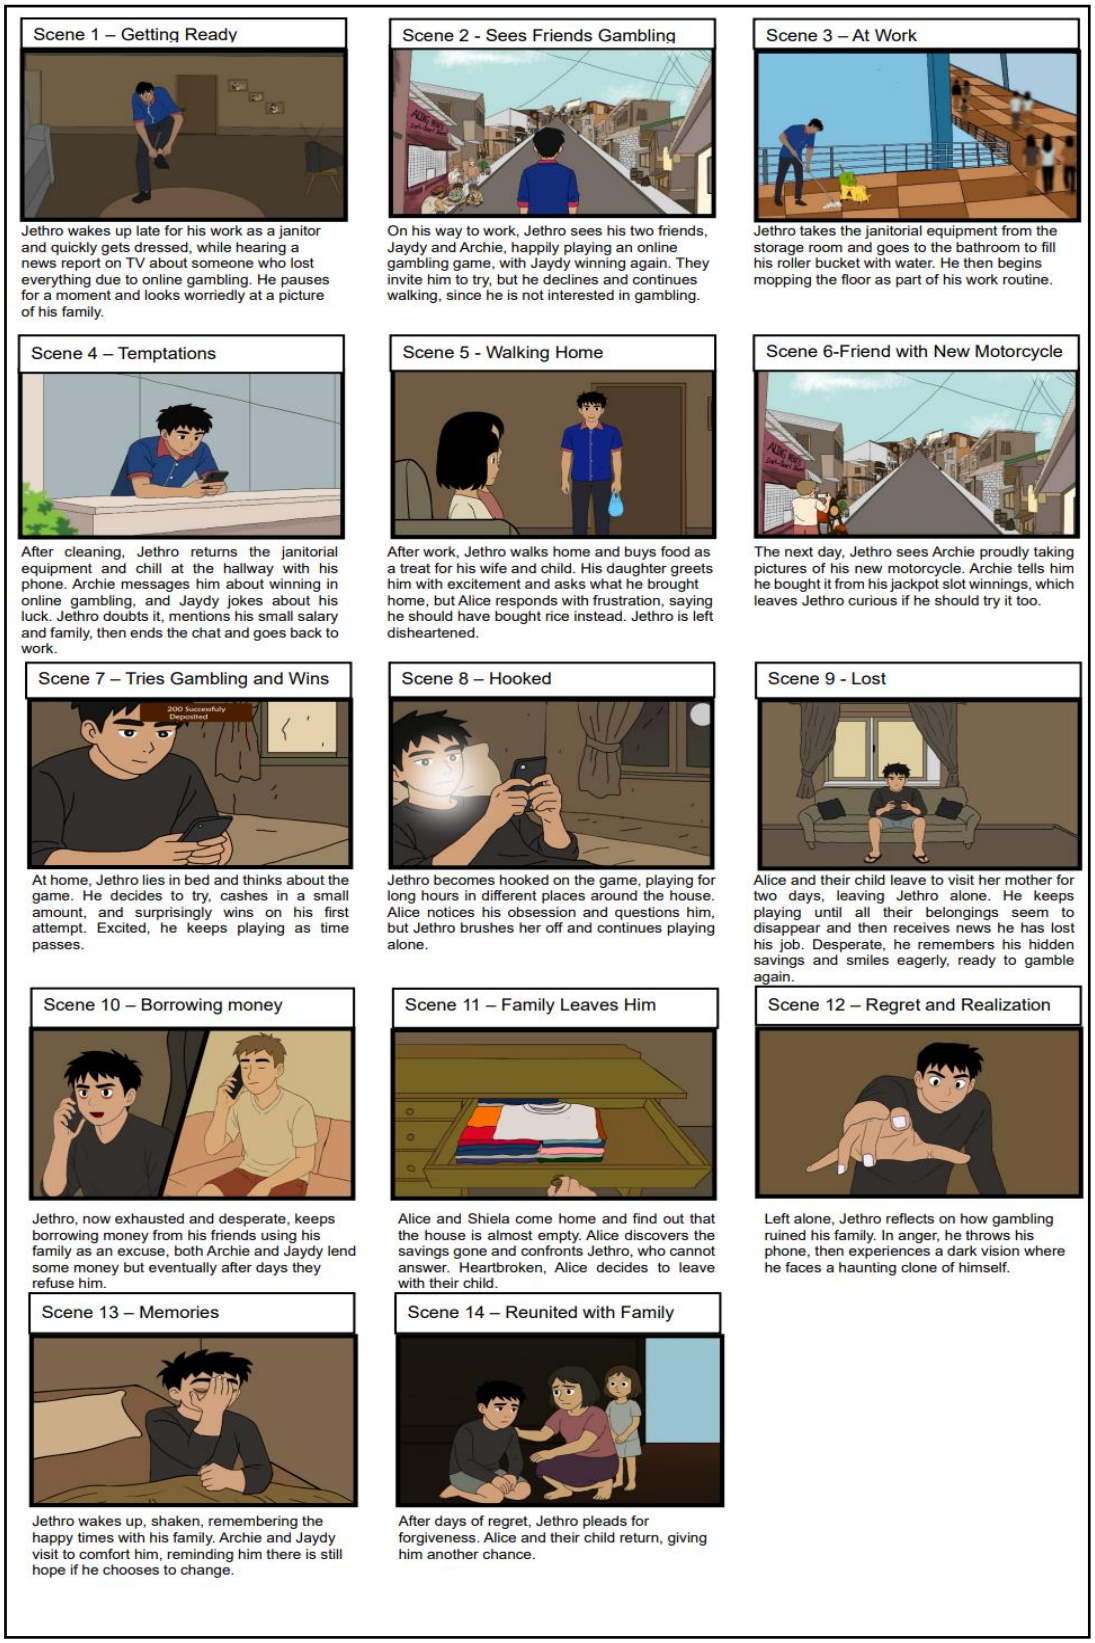

Figure 3. Storyboard

Layout

In the layout stage, researchers began setting up each scene by deciding where the characters and objects should be placed on screen. This step helped researchers visualize how everything looked once the animation is complete. Researchers determined the best camera angles and positioning to match the flow of the story. Having a clear layout served as a guide for movements and timing. It would be like preparing a blueprint for each scene, ensuring everything is organized and ready before bringing it to life.

Animation

The animation stage was the phase where the researchers' projects **came** to life. Using the layout and storyboard as references, researchers animated the characters to move and express emotions that match the voice-over and storyline. Researchers focus on small details like hand movements, facial expressions, and lip syncing to make each scene more believable. Animating each scene required time and patience; this process would be essential in ensuring the characters authentically convey emotions. This approach helped the researchers engage viewers effectively, particularly in illustrating the emotional impact of online gambling. Ultimately, the animation would not only depict movement but also tell a compelling story through action.

Voice Over

Sound design played an important role in setting the mood and supporting the emotions shown in the researchers' animation. Researchers carefully selected sound effects and background music that matched each scene. Each sound was chosen to strengthen the storytelling and help the

audience feel what the characters were going through, especially in scenes related to stress, tension, or the impact of online gambling. The researchers also made sure that the sounds were not too loud or distracting, so they blended well with the voiceover and visuals. By adding the right sounds at the right moments, researchers were able to make the animation more immersive, engaging, and emotionally effective for the viewers.

Sound Design

Sound design played an important role in setting the mood and supporting the emotions portrayed in the researchers' animation. The researchers carefully selected sound effects and background music that match each scene. Each sound was chosen to strengthen the storytelling and help the audience feel what the characters were going through, especially in scenes related to stress, tension, or the impact of online gambling. The researchers made sure that the sounds are not too loud or distracting, so they blend well with the voiceover and visuals. By adding the right sounds at the right moments, researchers aim to make the animation more immersive, engaging, and emotionally effective for the viewers.

Editing

The editing phase focused on organizing and refining the animation. In this step, researchers arranged the scenes according to the story flow and adjust the timing of each sequence. They also synchronized the voice-overs with the characters' lip movements and actions, ensuring that everything matches properly. Basic transitions, cuts, and visual adjustments applied to make the animation smooth and easy to follow. The researchers reviewed the

entire video to spot and correct any errors, such as mismatched audio, missing frames, or unnecessary pauses. This process helped improve the overall quality and storytelling of the animation.

Video Composition

Video composition was the final step, where all visual and audio elements brought together into one complete and polished video file. This included layering the final animation, voice over, sound effects, background music, visual effects, and transitions into single timeline. The researchers made final adjustments to color, lighting, and screen layout. After reviewing and rendering the final output, they ensured that the video is ready for presentation and suitable for public viewing. This stage give the animation a quality visual, highlighting the core message of the project.

Technology Acceptance Model

The Technology Acceptance Model (TAM) is recognized as a theoretical framework used to assess how users come to accept and use a particular technology. At its core, TAM suggests that two primary factors, perceived usefulness and perceived ease of use, play significant roles in shaping an individual’s attitude toward a system, which in turn influences their intention to use it and ultimately leads to actual usage behavior. In the context of multimedia and digital content, TAM is especially relevant for evaluating how audiences respond to technological tools used for education and awareness. The model helps determine whether a digital intervention such as an animation, application, or platform is seen as effective and user-friendly enough to be adopted by its intended audience. Feedback from viewers will

be gathered using surveys and guided interviews to assess how well the animation met these criteria. This Information informed us of the creative and technical decisions during the film's development, ensuring the content was both meaningful and easy to follow. Insights drawn from the audience also leaded to adjustments and refinements, improving the clarity and overall impact of the film. By applying TAM in this research, the goal is to gain deeper insight into how the audience perceives the content in terms of clarity, impact, and relevance. It allows the study to go beyond mere content evaluation by considering the user's psychological and behavioral responses. This perspective is crucial in understanding whether digital tools are not only informative but also capable of encouraging reflection, discussion, and possible behavior change. The model served as a practical tool for aligning the film with the learning needs and preferences of its viewers, thus enhancing its potential to raise awareness and promote understanding.

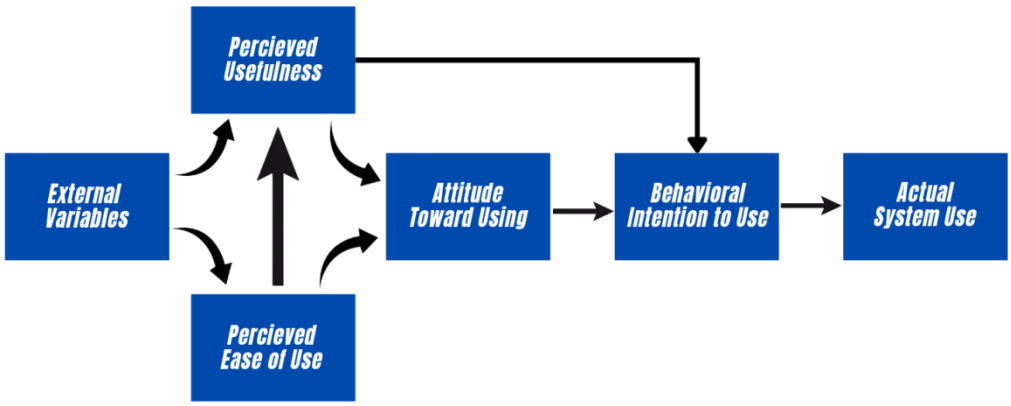

Figure 4. Technology Acceptance Model

Population of the Study

The study included is regular and irregular workers who are currently engaged in online gambling, whether casually or regularly. These participants provided valuable insights based on their personal experiences, which serve as a reference for the creation of a 2D animated video aimed at promoting awareness about online gambling.

Statistical Treatment of Data

Descriptive statistics are used in this study to analyze and interpret the data collected from the respondents. The responses are carefully recorded and organized into a Microsoft Excel spreadsheet for easier processing. The Mean (M) is computed to determine the average level of responses. These statistical tools provide a clear understanding of the participants' perceptions and help assess the overall effectiveness of the 2D animated video in achieving its educational objectives.

Cronbach's Alpha Reliability Test Result

To check if the questionnaire used in this study was consistent and dependable, a reliability test was conducted using a tool called Cronbach's Alpha. The test yielded an overall score of 0.713, which is considered acceptable for reliability. This result shows that the questions on the instrument are interconnected and consistently measure the same concept. The overall score is 0.713, it can be posited that the instrument is stable and consistent in measuring what it intends to measure.

Table 2. Reliability Test Results for Technology Acceptance Model

Categories	Cronbach's Alpha	Verbal interpretation
Perceived Usefulness	.744	Good
Perceived Ease of Use	.700	Acceptable
Aesthetic Quality and Design Appeal	.619	Questionable
Perceived Enjoyment	.800	Good
Attitude	.814	Good
Behavior	.600	Questionable
Composite	.713	Acceptable

Legend: above 0.90 = Excellent, 0.80-0.89 = Good, 0.70-0.79 = Acceptable, 0.60-0.69 = Questionable, 0.50-0.59 = Poor, below 0.50 = Unnaceptable

Project Testing and Evaluation

To evaluate the effectiveness and acceptability of the 2D animated video, a closed-ended questionnaire was administered to 30 respondents, including both regular and irregular workers, as well as 3 members of the Philippine National Police. The questionnaire is based on the Technology Acceptance Model (TAM) and assesses four key categories: Perceived Usefulness, Perceived Ease of Use, Attitude, and Behavior. Every statement will be measured using a 4-point scale: 1 = Strongly Disagree, 2 = Disagree, 3 = Agree, 4 = Strongly Agree. The responses are recorded in a Microsoft Excel spreadsheet and analyzed using descriptive statistics. The Mean (M)

was computed to determine the overall acceptability and consistency of the responses. Additionally, qualitative feedback was gathered to provide deeper insights into the strengths of the animated video and identify specific areas for improvement. This comprehensive evaluation ensured that the project meets its intended educational objectives and resonates well with its target audience.

MATERIALS

Software Specification

The software specification outlines the software features utilized in this project development. The main software is Adobe Animate 2023 for animation of the film; Adobe Photoshop 2025 for construction and design; Shotcut, whereas for additional animation, adding effects and putting all the scene together in one Animation Film. Together, these software tools support the complete workflow from design and animation to final editing and production.

Shotcut

Professional and beginner editors alike can create high quality video projects with Shotcut, an open-source editing software that offers a flexible and user-friendly interface. This software offers support for multiple video formats and provides essential tools for trimming, color grading, transitions, and audio enhancement. The project utilized Shotcut’s timeline editing, keyframing, effects and filter features to arrange scenes smoothly and highlight key moments in the animation. Its efficiency and accessibility make it an excellent tool for refining video sequences and achieving a polished final output.

Adobe Photoshop 2025

The characters and background art for the animation film was crafted using this software. Photoshop contains a lot of filters and adjustment controls for accurate color correction, editing of images, and creative effects. The project utilized Photoshop features to add detail to character physical features, texture to the background and scenery.

Adobe Animate 2023

Adobe animate features a timeline-based interface with keyframes and layers, enabling designers to create smooth frame-by-frame animations or utilize tweens for shape and motion modifications. The software also accommodates audio synchronization. This software used to animate the movements of the characters and the motion of the backgrounds in the 2D Animation Film.

Audacity

Artists record and edit their work with Audacity, which is a free and open-source program. The software used to record the character voices in the 2D animation film, and voice acting was script-based and synchronized with the animation so that there would be a smoother transition in the video composition. The user-friendly interface of Audacity makes it accessible to beginners but has professional features as well. Besides that, the researcher would also add non-copyrighted songs and produce sound effects like footsteps and water to add another layer and make the overall audio production of the video more realistic.

Capcut

Capcut provides an intuitive and dynamic for editing videos with creativity and precision. It offers a tool, including transitions, effects, text animations like subtitles making it ideal for producing engaging visually appealing projects. It includes an interface for allowing easy alterations to be made to individual frames, embedding them into the larger context as needed.

Hardware Specifications

Table 3 indicates the animation can be a possible task that is required to complete this project. On a bare minimum requirement of just RAM of 16 GB, SSD of 1000TB and Pen support is enough device for animation making by using XXPEN Black Deco 01 V3 with 5080 LPI Resolution.

Table 3. Hardware Specifications.

Hardware	Specifications
Processor	AMD Ryzen 5 3400G
Ram	16 GB
Graphics Processing Unit	AMD Radeon Rx 580 2048SP 8GB
SSD	1000 TB
Tablet	XPPEN Black Deco 01 V3 Drawing Tablet
OS Version	Windows 11
System Type	64-bit operating system, x64-based processor

Data Collection Instrument

A Closed-end questionnaire is utilized in creating the environment for animated film. Respondents will answer each item using a 4-point Likert scale: Strongly Disagree = 1, Disagree = 2, Agree = 3, or Strongly Agree = 4. The questionnaire focuses on key areas such as participation in online gambling, its psychological and financial impacts, and its effects on their overall well-being. This instrument enabled the researchers to effectively analyze the influence of online gambling on the respondents' lifestyle and decision making. The expected completion time for the questionnaire ranged from 10 to 20 minutes. Once the target number of responses has been collected, the data systematically analyzed and interpreted to inform the film's storyline and support the study's objectives.

The film was evaluated using a standardized questionnaire based on the Technology Acceptance Model (TAM), which includes perceived usefulness, ease of use, and attitude toward using. The questionnaire used the following grading system: Strongly Disagree = 1, Disagree = 2, Agree = 3, or Strongly Agree = 4. This measured how useful, easy to use, and acceptable the 2D animated film is to the viewers.

Table 4. Likert Scale

Rating	VERBAL INTERPRETATION
4	Strongly Agree
3	Agree
2	Disagree
1	Strongly Disagree

CHAPTER 4

RESULTS AND DISCUSSION

In this chapter, the study's findings are reviewed and explored in relation to the project's objectives. The results show how the 2D animated short film effectively portrayed the causes, effects, and social impact of online gambling. The film illustrated the causes through the main character's exposure to online ads, encouragement from friends, and financial struggles as a minimum-wage worker. These scenes showed how social media, peer pressure, and money issues can lead someone to gamble. The effects were shown as the character lost his savings, sold his belongings, and experienced declining work performance and strained family relationships. His reactions highlighted guilt, frustration, and loss of control caused by gambling. The social impact appeared in how his addiction affected his wife, daughter, and friends, showing that the consequences extend beyond the individual. Through these scenes, the animation aimed to raise awareness about online gambling. The findings come from evaluating the film using the Technology Acceptance Model (TAM), based on the study's objectives.

Results by Objectives

The main goal of this research was to produce a 2D animated short film that would inform and engage its audience about the realities of online gambling. This goal was achieved through careful research, creative planning, and the application of digital animation techniques, resulting in a film that was both meaningful and educational.

Characters

Characters of the Story

(a) Jethro is the main character of the story. He works as a janitor and is shown as a family man who wants to provide for his wife and daughter despite earning only a small salary. At first, he is dedicated and responsible, but later he becomes involved in online gambling. His desire for easy money causes him to make poor decisions that lead to financial struggles and the loss of his family's trust. Jethro's role shows the negative effects of addiction and the importance of prioritizing one's responsibilities. (b) Alice is the wife of Jethro. She is a caring and protective mother who always puts her family first. She often reminds Jethro to think about their needs and becomes disappointed when he chooses gambling over their well-being. When the situation gets worse, she decides to leave with their daughter for their safety. Alice represents the strength of a mother who chooses what is best for her child, even if it means making painful decisions. (c) Shiela is the daughter of Jethro and Alice. She is an innocent child who looks forward to the simple things, such as the pasalubong her father brings home. Even though she is young, she experiences the consequences of her father's actions. Her character represents the voice of children who are silently affected when their family faces problems. She serves as a reminder that the real victims of wrong decisions are often the children. (d) Archie is one of Jethro's close friends. He introduces online gambling to Jethro and encourages him to try it. At first, he is proud of winning, but later he regrets pushing Jethro into it when he sees how badly it affected his life. Archie shows how friends can influence someone's choices, but also how they can support them in times of difficulty.

(e) Jaydy is another friend of Jethro. Like Archie, he also convinces Jethro to gamble and even lends him money when he is in need. In the later part of the story, Jaydy becomes more concerned and advises Jethro to stop. His character reflects how friends can either worsen a problem or help someone recover from it.

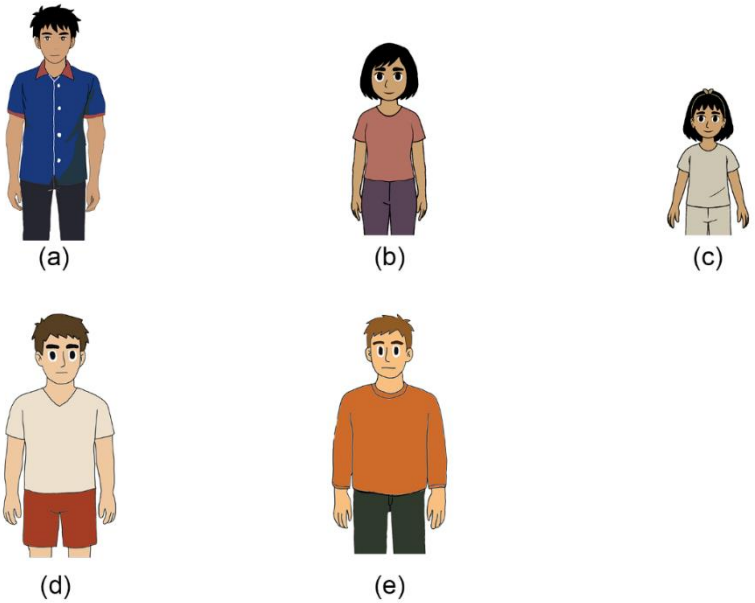

Figure 5. Characters

Collected and Analyzed information on causes, effects, and social impact in 2D animated short film Baited

Table 5 discusses how the 2D animated short film Baited presents the causes, effects, and social impacts of online gambling. It shows that peer influence, exposure to online gambling advertisements, and financial pressure gradually led the main character to develop a gambling addiction. As the addiction worsened, it affected his work, finances, and relationships, leading to serious personal and family problems. Overall, the discussion highlights how online gambling negatively impacts not only the individual but also the people around him.

Table 5. Gathered & Analyzed information on Causes, Effects and Social impacts depicted on 2D Animation film.

Causes	Effects	Social Impact
Seeing friends win online Gambling	Becomes curious and decides to try gambling	Influence or peers
Exposure to online gambling ads on social media	Increased temptation to gamble	Wrong idea about easy money
Financial pressure due to low Income	Feels stressed and looks for quick income	Family tension
Winning during the first gambling attempts	Becomes confident and continue gambling	False sense of control
Gambling repeatedly despite Losses	Develops gambling addiction	Loss of self – control
Focus on gambling instead of work	Loses his job	Financial Instability
Selling household belongings	Suffers deeper financial loss	Family hardship
Borrowing money to continue Gambling	Falls deeper into debt	Broken trust
Family leaves because of gambling	Feels regret and emotional pain	Broken family

Highlights Story Scene

Highlights Scene of the Story; (a) After hearing many times about the winnings of his friend, Jethro finally decides to try online gambling. Hoping that it could be a way to earn extra money, he plays and experiences his first win. (b) Excited by the idea of getting easy money, Jethro continues playing day after day. At first, he still enjoys some wins, but soon turns into losses, and he keeps convincing himself that if he plays more, he will be able to get back what he has lost. (c) As Jethro becomes more addicted, he begins to sell their household belongings and spends all their savings just to continue

playing. The once lively and complete home slowly becomes empty, showing how much they have already lost because of his gambling. (d) When Alice and their daughter Shiela return home, they are shocked to see that many of their belongings are gone. Alice confronts Jethro, but he remains silent, which only shows his guilt. Filled with frustration and disappointment, Alice makes the decision to leave together with Shiela. (e) Left on his own, Jethro begins to feel deep regret. He realizes that online gambling has not only used up all their money but has also destroyed the love and trust of his family. Feeling the pain of losing them, he admits to himself that he wants to stop and change. (f) Later on, Jethro is visited by his friends Archie and Jaydy, who also feel sorry for convincing him to try online gambling. They encourage him to stand up again and make a fresh start. With their support, Jethro gains the courage to ask forgiveness from Alice and Shiela, and he promises to change his ways.

Figure 6. Highlights Story Scene

Content and Presentation Analysis

Table 6 presents a content analysis of the 2D animated short film Baited, identifying key categories such as financial consequences, emotional struggles, family conflict, legal and ethical issues, and help-seeking behaviors shown throughout the story. It highlights how these situations appear at specific points in the animation, emphasizing the progression and impact of online gambling on the main character's life. The table demonstrates that the film consistently portrays the negative consequences of gambling while also showing moments of awareness. Additionally, it underscores the gradual realization of the protagonist's problems and their struggle to seek help. This analysis helps viewers understand the complexities of the character's journey and the broader implications of gambling addiction.

Table 6. Content classification – themes based in the animation

Category	Definition / Inclusion	Instances in Film	Total Instances	Timestamp
Financial Consequences	Depts, loss of savings, selling belongings, Financial instability.	Salary not enough; losing money in gambling; selling house Items; borrowing money	4	3:04, 7:29, 9:01,9:55
Emotional	Stress, Anxiety, guilt, Breakdown, regret	Jethro stressed after repeated losses; emotional breakdown; Regret after family leaves	3	7:29, 13:03, 16:59
Interpersonal/ Family conflict	Arguments, family separation, strained Relationship	Argument with Alice about salary; family leaves	2	4:35, 12:38
Legal/ Ethical issues	News report	News about a gambling addict; unregulated online gambling ads on phone	2	1:16,3:13
Prevention/ Help – seeking	Seeking help, support from others corrective actions	Friends help Jethro recover; Jethro apologizes and decides to stop gambling	3	15:09,16:57 17:22

TAM Evaluation Results

Perceived Usefulness

As shown in Table 7 that the respondents found the 2D animated short film “Baited” is very useful in raising awareness about online gambling. It was easy to see how gambling can affect a person’s life and how dangerous it can be. The animation also helped viewers to make responsible decisions by ensuring that they think critically. All respondents agreed that the message was delivered adequately and that the video was a useful educational tool. The findings support the conclusion that “Baited” effectively fulfilled its purpose of informing, educating and ensuring that viewers took appropriate action regarding on online gambling.

Table 7. Perceived Usefulness according to the Respondent’s Response.

STATEMENTS	MEAN	STANDARD DEVIATION	VERBAL INTERPRETATION
1.The film showed the possible risks of online gambling.	3.57	0.50	Strongly Agree
2.The film “BAITED” made it easier to learn about gambling’s negative effects.	3.60	0.50	Strongly Agree
3.The content promotes awareness and responsible decision-making.	3.63	0.49	Strongly Agree

Perceived Ease of Use

As shown in Table 8, 3.67 is the total composite mean that the results show that the participants were able to easily follow and understand the 2D animated short film “Baited.” They said that the storyline was clear, the pace of the story was appropriate, and the message was delivered directly. The use of simple language ensured that the audience could easily grasp the information, while the animation style enhanced relatability. The findings suggest that the awareness film was well designed and presented in a way that made it easy for the target audience to understand the message.

Perceived Enjoyment

As shown in Table 10, with 3.61 total results show that, even though the 2D animated short film "Baited" addressed a serious topic, such as online gambling, the respondents truly enjoyed watching it and found it to be both meaningful and entertaining. Their interest caught their attention, and the viewing experience was captivated by the animation's inventiveness, storytelling, and emotional delivery. Most respondents also stated that they would suggest the movie to others because they thought it was entertaining and educational. Overall, the results point to the animation's ability to successfully convey its message about the risks of internet gambling while simultaneously providing viewers with a positive and entertaining experience.

Behavior

As shown in Table 12 that the findings indicate that upon viewing the 2D animated short film "Baited," the respondents exhibited positive behavioral changes, becoming more cautious about online gambling and aware of its potential consequences with strongly agree interpretation and 3.53 composite mean. Additionally, it urged them to stay away from websites that promote online gambling and to exercise greater caution before participating in such activities. The film also inspired them to support campaigns that raise awareness of the risks associated with online gambling and to spread its message to others. All things considered, the animation was successful in persuading the audience to behave sensibly and choose wisely when it came to gambling.

PNP Evaluation Results

Perceived Usefulness

As shown in Table 13, with a 3.20 composite mean and agree interpretation, the expert respondent ranked the “BAITED” label as highly useful and effective in communicating the potential risks of online gambling. The film was praised for the way it simplifies complex issues and presented them in an easy-to-understand manner, making the audience think and be responsible. PNP noted that the coherent plot and narrative structure ensured that the educational message was delivered to the audiences because they could easily follow and comprehend the storyline concerning gambling addiction.

Table 13. Perceived Usefulness based on the PNP Responses

STATEMENTS	MEAN	VERBAL INTERPRETATION
1.The film showed the possible risks of online gambling.	3.33	Strongly Agree
2.The film “BAITED” made it easier to learn about gambling’s negative effects.	3	Agree
3.The content promotes awareness and responsible decision-making.	3	Agree
4.The film delivered its message effectively.	3.33	Strongly Agree
5.The film served as an effective educational tool.	3.33	Strongly Agree
Composite Mean	3.20	Agree

Legend 1.00 -1.75= Strongly Disagree, 1.76 – 2.50= Disagree, 2.51 – 3.25=Agree, 3.26 – 4.00= Strongly Agree

Perceived Ease of Use

Table 14 shows that, computed with a 3.40 composite mean and strongly agree interpretation that are based on the PNP respondent's evaluation of perceived ease of use, "BAITED" did a very good job of conveying its message clearly. The PNP noted that the film's simple, yet engaging content organization made its message against online gambling easy for viewers to understand. Its logical progression, attractive presentation, and smooth pacing enhanced the viewing experience and effectively supported the message's delivery. The plot was also structured to hold the reader's interest and ensure that each scene contributed to the overall understanding of the issue. This suggests that "BAITED" functions as an informational and educational tool, successfully and clearly communicating its message to viewers.

Aesthetic Quality and Design Appeal

Table 15 shows the PNP's evaluation of the 2D animated short film "BAITED" in terms of its visual appeal and artistic quality got a 3.47 composite mean. PNP agreed that the film's art significantly enhanced its message. They highlighted how the color scheme and smooth animation helped convey the film's emotional tone and the seriousness of internet gambling. The visual design caught the viewer's attention while effectively communicating the film's theme. PNP also noted that the animation went beyond basic entertainment, using creativity to raise awareness.

Table 15. Aesthetic Quality and Design Appeal based on to the PNP Responses

STATEMENTS	MEAN	VERBAL INTERPRETATION
1.The animation looks creative and well-made, which makes the film enjoyable to watch.	4	Strongly Agree
2.The colors and visuals used in the film are eye-catching and make the story more interesting.	3.67	Strongly Agree
3.The design of the characters and scenes helps me understand the message of the film better.	3.33	Strongly Agree
4. The animation's smooth movements and visual effects make the film more engaging.	3	Agree
5. The aesthetic quality and artistic presentation of the film enhance its impact and message to the audience.	3.33	Strongly Agree

Legend 1.00 -1.75= Strongly Disagree, 1.76 – 2.50= Disagree, 2.51 – 3.25=Agree, 3.26 – 4.00= Strongly Agree

Perceived Enjoyment

As shown in Table 16, PNP respondents found the 2D animated short film “BAITED” very entertaining and engaging, with a total mean of 3.47. Despite addressing the serious issue of online gambling addiction, the film successfully balanced education and entertainment through the use of humor, emotion, and creative visuals. These findings indicate that *“BAITED”* effectively delivered its message in an engaging and informative manner, demonstrating the potential of animation as a tool for social awareness.

Table 16. Perceived Enjoyment based on the PNP Responses

1. I enjoyed watching “BAITED.”	3.33	Strongly Agree
2. The film kept my attention of its scenes and storytelling.	3.33	Strongly Agree
3. I felt entertained while watching the film, even though it discussed a serious topic.	3.67	Strongly Agree
4. The humor, creativity, or emotions shown in the animation made it enjoyable to watch.	3.33	Strongly Agree
5. I would recommend this animated film to others because I found it enjoyable and meaningful.	3.67	Strongly Agree
Composite Mean	3.47	Strongly Agree

Legend 1= Strongly Disagree, 2= Disagree, 3=Agree, 4= Strongly Agree

Attitude

As seen in Table 17, the respondents showed that the 2D-animated short film “BAITED” affects attitudes toward using animation for social education and awareness with a 3.80 composite mean. Respondents strongly agreed that the film was able to pass the intended message of the risks of online gambling on students. Critics lauded its clear and relatable approach to the issue of bullying in schools and singled out the film’s creative visuals for praise. The respondents were highly contented with the film’s story and how well it integrated with the creative aspects. “BAITED” has the potential to raise awareness of social problems by blending art and education, which means that digital storytellers can use their work for social change.

Table 17. Attitude based on the PNP Responses

STATEMENTS	MEAN	VERBAL INTERPRETATION
1. The film effectively showed social issues.	4	Strongly Agree
2. 2D animation is a good way to educate	3.67	Strongly Agree

5. The film is valuable for awareness.	4	Strongly Agree
Composite Mean	3.80	Strongly Agree

Legend 1= Strongly Disagree, 2= Disagree, 3=Agree, 4= Strongly Agree

Behavior

As shown in Table 18, with the composite mean of 3.67 and interpreted as Strongly Agree, the PNP respondents' evaluation had a strong effect on viewers' behavioral intentions to engage in online gambling. The film motivated the audience to be more careful and responsible in real life and digital interactions. Additionally, the "BAITED" campaign aimed to bridge the gap between awareness and action by urging people to apply the lessons learned from the film in real-life situations. The method by which the film affects behavior and promotes the acquisition of empowering knowledge is the most effective. "BAITED" enhanced the audience's responsibility to make informed decisions regarding harmful practices.

CHAPTER 5

SUMMARY, CONCLUSIONS, AND RECOMMENDATIONS

Summary of Findings

In this chapter, we summarize the key findings of our project “Baited: A 2D Animated Short Film on Online Gambling” which was aimed at creating an animated short film to raise awareness about the negative effects, risks and consequences of online gambling. To complete the capstone project, the researchers created characters and storyline to develop a 2D animation to present the film “Baited”. The study was able to achieve its objective by producing a 20 minutes 2D animation film. The project was based on the Technology Acceptance Model (TAM) that evaluated the animation on Perceived of Usefulness, Perceived of Ease of Use, Aesthetic and Design Appeal, Perceived Enjoyment, Attitude and Behavior to obtain useful understandings for further development.

The findings indicate that the project achieved its goal of raising awareness and encouraging responsible behavior among viewers. The animation video development process involved the following stages: data gathering, script writing, character designing and background setup, storyboarding, layout designing, animating the characters and backgrounds, voice recording, sound design, editing and composition of the final video. Each step was essential in ensuring the final product was a captivating and coherent short film that successfully conveyed the intended message to the audience. They also appreciated the creativity, visuals and storytelling in the film because it was both informative and entertaining.

Conclusion

In summary, the developed capstone project “Baited: A 2D Animated Short Film on Online Gambling” successfully achieved its objectives using 2D animation as creative tool. The developed 2D animated short film supported by 33 respondents demonstrated the project’s potential to effectively raise awareness about the risks and consequences of online gambling. In part of developmental procedure, the project is evaluated to determine if they provide the necessary function for objectives.

1. To Collect and Analyze Information about the causes, effects and social impact of online gambling.

The researchers were able to collect and analyze information on the causes, effects and social impacts of online gambling. The study established that online gambling poses serious psychological, financial and social risks to young adults and low-income individuals. It also provided the basis for the “Baited” film and campaign.

2. Creating a character and background in a 2D animation to present the issues of online gambling.

The short film “Baited” to transform the real-life issues into a visual story. Using 2D animation, the animation attempted to demonstrate how online gambling can have a significant impact on people’s lives. The development process demonstrated the potential of 2D animation as an impactful tool for education and social awareness.

3. Evaluate the 2D animation using Technology Acceptance Model (TAM).

Using the Technology Acceptance Model, the animation was proven effective and acceptable to its viewers. Respondents found the film useful, easy to understand, and engaging. The results indicated that the animation was successful in raising awareness and positively influencing viewers' attitudes and behaviors toward responsible online actions.

Recommendations

To refine the knowledge and awareness levels regarding online gambling, the following recommendations were formulated based on study findings and animation evaluation:

1. Utilize the 2D animated film as an educational tool to effectively support and raise awareness on issues related to online gambling.

2. Utilize Capcut as a tool for video editing.

3. Encourage future researchers to create similar 2D animated film and use this film as a reference to deepen understanding and strengthen awareness campaigns.

APPENDIX A

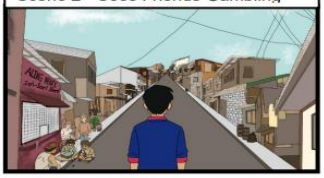

STORYBOARD

Scene 1 – Getting Ready

Jethro wakes up late for his work as a janitor and quickly gets dressed, while hearing a news report on TV about someone who lost everything due to online gambling. He pauses for a moment and looks worriedly at a picture of his family.

Scene 2 - Sees Friends Gambling

On his way to work, Jethro sees his two friends, Jaydy and Archie, happily playing an online gambling game, with Jaydy winning again. They invite him to try, but he declines and continues walking, since he is not interested in gambling.

Scene 3 – At Work

Jethro takes the janitorial equipment from the storage room and goes to the bathroom to fill his roller bucket with water. He then begins mopping the floor as part of his work routine.

Scene 4 – Temptations

After cleaning, Jethro returns the janitorial equipment and chill at the hallway with his phone. Archie messages him about winning in online gambling, and Jaydy jokes about his luck. Jethro doubts it, mentions his small salary and family, then ends the chat and goes back to work.

Scene 5 - Walking Home

After work, Jethro walks home and buys food as a treat for his wife and child. His daughter greets him with excitement and asks what he brought home, but Alice responds with frustration, saying he should have bought rice instead. Jethro is left disheartened.

Scene 6-Friend with New Motorcycle

The next day, Jethro sees Archie proudly taking pictures of his new motorcycle. Archie tells him he bought it from his jackpot slot winnings, which leaves Jethro curious if he should try it too.

Scene 7 – Tries Gambling and Wins

At home, Jethro lies in bed and thinks about the game. He decides to try, cashes in a small amount, and surprisingly wins on his first attempt. Excited, he keeps playing as time passes.

Scene 8 – Hooked

Jethro becomes hooked on the game, playing for long hours in different places around the house. Alice notices his obsession and questions him, but Jethro brushes her off and continues playing alone.

Scene 9 - Lost

Alice and their child leave to visit her mother for two days, leaving Jethro alone. He keeps playing until all their belongings seem to disappear and then receives news he has lost his job. Desperate, he remembers his hidden savings and smiles eagerly, ready to gamble again.

Scene 10 – Borrowing money

Jethro, now exhausted and desperate, keeps borrowing money from his friends using his family as an excuse, both Archie and Jaydy lend some money but eventually after days they refuse him.

Scene 11 – Family Leaves Him

Alice and Shiela come home and find out that the house is almost empty. Alice discovers the savings gone and confronts Jethro, who cannot answer. Heartbroken, Alice decides to leave with their child.

Scene 12 – Regret and Realization

Left alone, Jethro reflects on how gambling ruined his family. In anger, he throws his phone, then experiences a dark vision where he faces a haunting clone of himself.

Scene 13 – Memories

Jethro wakes up, shaken, remembering the happy times with his family. Archie and Jaydy visit to comfort him, reminding him there is still hope if he chooses to change.

Scene 14 – Reunited with Family

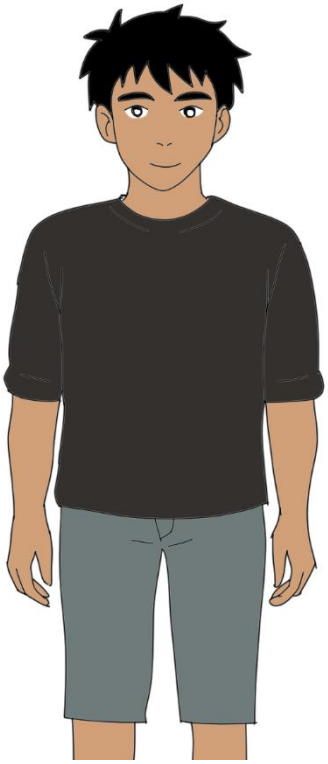

After days of regret, Jethro pleads for forgiveness. Alice and their child return, giving him another chance.

Montage Clips: Ipakikita rito ang clips ng kasalukuyang kalagayan at pamumuhay ng ibang mga mamayang Pilipino.

Scene 1:

---Maingay ang paligid sa bandang labas ng bahay na may kasamang tunog ng alarm.

---Magigising si Jethro dahil sa alarm at papatayin nya, at magugulat sya sa oras dahil malalate na sya.

---Nag sasapatos sya at bigla Nyang narinig sa tv yung balita….. at biglang napatingin sa mga litrato nila ng pamilya nya.

Scene 2:

---Naglalakad papasok sa Trabaho si Jethro ng Makita niya ang kaniyang dalawang kaibigan na si Archie at Jaydy

---Tumaas ng kamay Si Jaydy

Jaydy: Pareng Jeth! Ikaw pala yan.

Jethro: Aga nyong mag saya dyan ah, ano ba yan?

Archie: Pano etong si Jaydy ang lakas ng swerte nanalo na naman dito sa online gambling na nilalaro nya yung jackpot slot (name ng laro).

Jaydy: Pare subukan mo to baka maswerte ka rin! hahaha

Jethro: Nako pass ako dyan pre! Baka maubos lang pera ko, sige na pasok na ko.

---Nakatayo si jethro sa harap ng gate ng pinag tatrabahuhan nya papasok.

Scene 3:

---Nakatayo si Jethro sa harap ng pinto at bubuksan ang pinto.

---Ipapakita ang loob ng isang janitor room na puro kagamitan.

---Sa labas ng janitor room, ilalagay muna ni Jetrho ang gamit sa tabi at Isasara ang pinto.

---Naglalakad si Jethro patungong Banyo.

---Lalagyan ng tubig ni Jethro yung roller bucket.

---Nag mamop si Jethro ng Sahig.

Scene 4

---Naglalakad si Jethro pabalik sa Janitor Room pagkatapos niya mag linis

--- “3 oras ang lumipas”

--- Lilingon siya sa may orasan at sasabihin sa isip

Jethro: Makapag pahinga na muna

--- Ibababalik nya yung roller at mop sa Janitor Room.

--- Nakatambay sa hallway si Jethro kung saan siya nag tatrabaho

--- Habang nag fb si Jethro nag pop up ang message ni Archie sa kanilang group chat.

Archie: Panalo na naman!

Jaydy: Eh? Ang swerte mo naman! Balato!

Jethro: Legit ba Talaga yan? Ang swerte mo naman. Pero ang tanong nawiwithdraw ba agad yun o puro paasa? Madami na rin akong narinig na hindi makapag cashout.

Archie: Oo naman pre subok ko na to! Subukan mo na kasi wala naman masamang sumubok e hehehe.

Jethro: Sigurado ka ha? Real talk pre ang liit kasi ng sweldo dito sa pag tatrabaho ko bilang Janitor e.

Jaydy: Oo nga tapos may binubuhay ka pa na mag ina mo.

Jethro: Kaya nga e! hays oh sya pano balik na ko dito.

Scene 5

--- Ipapakita ang Background ng pinag tatrabuhan ni Jethro.

--- Naglalakad si jethro pauwi

Jethro (sa isip): makabili muna ng ihaw pasalubong sa mag ina ko.

Jethro: Kuya! pabili nga limang isaw.

--- Nasa tapat na sya ng bahay, bubuksan nya na yung pinto

--- Nag iintay yung mag ina nya dun sa salas na nanonood ng tv.

Anak: Papa! Anong pasalubong po?

Jethro: Meron akoooong, Isaaaawwwww

Anak: Yeheeey

Alice: Bakit ngayon ka lang? Wala ka na ba ibang dala? Sana bigas nalang binili mo

Jethro! Paano tayo nan? Anong kakainin natin ngayon nan?

--- Ipapakita ang mukha ni Jethro na dismayado.

Scene 6

"Sumunod na araw"

---Naglalakad si Jethro papasok sa Trabaho ng Makita niya si Archie na may pinagkaka abalahan.

--- Ipapakita si archie pinipicturan niya yung motor niya

Jethro: Uy pre kaninong motor yan?

Archie: Sakin haha

Jethro: Pano? San galing?

Archie: Dun sa jackpot slot dun sa sinasabi ko sayo, inipon ko lang tas hindi ko nga akalain na makakabili ako nito haha

Jethro: Ay ganun ba, ang swerte mo naman totoo nga pala talaga no, Oh sya sige tuloy na ako.

--- Naglilinis si Jethro sa kanyang trabaho

Jethro sa isip nya: Mananalo din kaya ako pag sumubok ako nun….. hay bala na tapusin ko na muna tong trabaho ko.

Black background with text "Si jethro ay umuwi agad sa bahay"

Scene 7

Black Background with text "Agad ring umuwi si Jethro galing trabaho"

--- Nagbibihis si Jethro

---Nag seselpon si Jethro habang nakahiga sa kama

---Napapa isip si Jethro kung susubukan niya rin ba na maglaro.

--Mag gagawa sya ng account bago sumubok at mag cacash in na galing sa gcash niya.

---Sa unang subok niya ay Nananalo agad si Jethro

Scene 8

--- Ilang oras na ang lumipas ay patuloy pa rin sa paglalaro si Jethro

Alice: Jethro wala ka bang pasok ngayon?

Jethro: Wala naka day off ako ngayon

Alice: Talaga lang ha, Ano ba yang ginagawa mo dyan? Kagabi ka pa panay Selpon Jethro: Ah wala may nilalaro lang.

--- Lalakad si Jethro papunta sa kwarto para walang istorbo.

--- Patuloy pa rin sa paglalaro si jethro

Scene 9

--- Nakabihis si Alice at ang anak nilang si Shiela

Alice: Ikaw na muna ang bahala dito sa bahay, bibisita lang kami sa lola ni Shiela ng 2 araw.

Jethro: Ah sige.

--- Naglalaro pa rin si Jethro

--- Siya ay natatalo na sa kanyang nilalaro.

--- Unti unting nawawala ang mga kagamitan sa kanilang tahanan.

--- Problemado ang mukha ni Jethro dahil sa pagkakatalo niya.

--- Habang nagiisip sya kung pano siya makakabawi sa kanyang pagkatalo, Nag text sa kanya ang kaniyang boss at hinahanap na sya sa trabaho.

--Habang siya ay Nag iisip makikita niya ang kanilang alkansya at nagpaplano na kuhanin ang laman nito at ang mukha niya ay sabik na sabik na ulit maglaro.

Scene 10

--- Kitang kita na sa mukha ni Jethro ang pagkapuyat niya dahil unti unti na itonng na aadik sa paglalaro.

--- Dumating na sa punto na nangutang siya sa tropa niya.

Jethro: Archie baka pede munang umutang, pang gastos lang sa pamilya ko, nawalan kasi ako ng trabaho, ibabalik ko din agad.

Archie: o sige pre pasensya na ayan lang kaya

Jethro: okay na to salamat!

--- Matapos mapa utang ay naglaro na ulit si Jethro ngunit bigo pa rin na Manalo.

“Sumunod na araw”

--- Uutang siya sa kaibigan niya na si Jaydy

Jethro: Jaydy baka pede naman umutang kahit mag kano ipang gagastos ko lang sa mag ina ko, balik ko din agad promise.

Jaydy: okay na ba 200?

Jethro: Oo.. Oo okay na yan salamat.

--- Naglaro na ulit si Jethro.

--- Ngunit natalo ulit sya at susubukan niya ulit umutang kay jaydy at archie.

Jethro: Archie, baka pede ulit umutang wala pa kasi ako makitang trabaho e.

Archie: Pre naman di ba kakautang mo lang, pasensya na wala na akong ipapautang sayo, kelangan ko rin ng sapat na pera.

Jethro: Sige na pre kahit magkano lang.

Archie: Wala talaga sige na.

Jethro: Jaydy, baka pedeng umutang ulit kahit maliit na halaga.

Jaydy: nako wala na akong ipapautang sayo, tsaka kakautang mo lang nung nakaraan e, wala na talaga.

Scene 11

--- Papsok ng pinto ang mag ina at nagulat

Alice: oh, anong nangyari dito? hoyy jethro nasaan ang mga kagamitan dito sa bahay?

tas hindi iimek si jethro

Alice: hoy jethro kinakausap ka ah! hindi mo ba ako naririnig?

--- Pumunta si alice sa cabinet at sinilip ang alkansya pero wala ng laman.

Shiela: tay nasaan na po ang ating tv? manonood na po ako ng paborito kong cartoon e.

--- Papasok si Alice, dala yung alkansya

Alice: ano jethro bakit hindi ka makasagot? puro sugal na lang ang inaatupag mo. Wag mong sabihin na ibinenta mo ang mga gamit dito sa bahay pati ang ipon na pera para lang sa sugal na yan? hoyy Jethro kapag kinakausap ka sumagot ka.

--- Problemado ang muka ni jethro na pinag papawisan

--- Sumagot si jethro

Jethro: Hindi ko alam

Alice: osige kung ganan lang din naman ang madadatnan namin ng anak mo rito sa pamamahay na ito mas mabuti pang bumalik na lang kami kina nanay sa Bicol, magpasensyahan tayo jethro magsama kayo ng sugal mo, tara na anak lumayas na tayo dito mukang hindi naman na tayo kayang buhayin ng tatay mo.

Jethro: Wag alice!

--- Patuloy na umalis ang mag ina at isinara ang pinto na tila ba nagdadabog at nagagalit kay Jethro.

Scene 12

--- Habang natutulog si Jethro siya ay nagising.

--- Bubuksan ni Jethro ang pinto ng kwarto.

--- Makikita niya na walang tao sa kanilang bahay sa sofa at hapag kainan

--- Uupo siya sa kanilang hapag kainan at magcecellphone at siya ay makakaramdam ng inis at galit dahil sa sugal nasira ang pamilya niya.

Jethro (sa isip nya lang mag sasalita): Dahil sa larong to sa pag susugal ko nasira pamilya ko.

Jethro (sisigaw): AYOKO NA!

--- Ibabato niya ang kanyang cellphone

--- Makikita niya na nag biblink ang screen ng kanyang phone at ng ito ay kanyang pupulutin may biglang humila sa kanya.

--- Pinag mamasdan ni Jethro ang kanyang paligid.

--- Nang si Jethro ay tumingin ng diretso may nakita siyang nakatayo sa malayo.

--- Unti unting naglakad si Jethro palapit sa kaniyang nakita.

--- Pinatong NI Jethro ang kamay sa balikat ng kanyang nakikita na tao para iharap kung sino ang tao na nakatayo, at lakinmg gulat niya na pagharap nito ay nakita niya ang kanyang sarili.

--- Napa upo siya sa sahig at napa atras sa gulat.

--- At habang siya ay nakatingin sa kanyang sarili napansin niya na ang mata neto ay tila ban a hyhypnotize.

--- Biglang magigising at mapapabangon at mapapasigaw si Jethro.

Scene 13

--- Pagkatapos nya magulat at naisip nyang panaginip lang ay dun na siya nalungkot

--- Pagtapos ay lalabas sya sa kwarto at makikita na ang paligid niya ay walang tao at walang kalaman laman na mga gamit.

--- Nakaramdam ng lungkot si Jethro dahil na iisip niya ang kanyang mag ina at kanilang mga masasayang pinagsamahan.

--- Habang siya ay naka upo sa upuan at nagsisisi na ay may biglang kakatok sa kanilang pintuan.

--- Hindi niya ito pinapansin dahil sa labis na pagkalungkot

--- Patuloy pa rin ang pagkatok at ng may magsalita.

Archie: Jethro nanjan kaba, Jethro

--- Binuksan na ni Archie ang pintuan kasama si Jaydy

Jethro: " o mga pare napadalaw kayo sensya na wala pa ako pambayad sa utang ko sa inyo"

Jaydy: Jethro nabalitaan ko ng yari sayo wag mo na muna isipin yung mga utang mo ang mahalaga makamusta ka namin. nakakain ka pa ba? kamusta ka na ba?

Archie: "Sana pala di nanamin tinuro sayo kung pano maglaro yan na naging dahilan kung bakit nasira buhay mo pasensya talaga pare.

Jethro: "Wala pre sira na buhay ko pre pati pamilya ko iniwan nako dahil na rin sa kapabayaan ko, napaka walang kwenta kong ama inuna ko pa sarili kong kaligayahan kesa sa mag ina ko.

Jaydy: hayaan mo pare hindi pa naman dito nagtatapos ang buhay mo laban lang at magbago na gaganda ulit buhay mo basta tiwala lang sa may taas.

Archie: alam mo pare hindi naman lahat swerte sa sugal na yan kaya kung ako sayo tulad nga ng sabi ni jaydy magbago na at iwanan na ang makamundong bagay na yan na sumira sa pamilya mo hayaan mo bilang kumpare namin sa abot ng makakaya namin tutulungan ka namin makahanap ulit ng trabaho ng sa ganon makabawi ka ulit sa hamon ng buhay at

mabayaran mo lahat ng mga dapat mo bayaran basta laban lang at mawawalan ng pag asa.

Jethro: alam niyo pare maraming salamat sa inyo ha dahil sa inyo lalo akong ginagahan na magbago at magpursige pa lalo para sa aking pamilya dahil gustong gusto ko na makabawi sa lahat ng pagkakamali ko sa kanila kaya maraming salamat talaga mga pare sa pag unawa sa kalagayan ko.

Jaydy: osya pare mauna na kami dumaan lang talaga kami para icheck ka.

Archie: sige na pare mauna na kami.

Kinabuksan.. (text)

--- Nagtext si Jethro kay Alice “Alice mag usap naman tayo, pinag sisisihan ko na ng nalululong akong sa online sugal hindi ko akalain na aabot dito, Alice pag handa ka na mag usap tayo miss na miss ko na kayo ni Shiela.

--- Nakita ni alice yung message edi clip nya to na binabasa yung message ni jethro

Scene 14

--- Lumipas ng 3 araw may kumatok sa pinto ni jethro, habang nakahiga si Jethro maykumatok sa kanilang pintuan.

--- Paglapit ni Jethro sa pintuan at pagbukas niya ay nakita niya ang kaniyang mag ina, at siya ay napa luhod.

Jethro: Alice……. Alice sana patawarin mo na ako, hindi na ulit mangyayare yon, tinigil ko na at pinag sisihan ko na nalulong ako sa online sugal, hinde ko maakala na sa pag tagal ng panahon ng hindi ko kayo nakikita e kakayanin ko, Sana patawarin mo na ako.

Alice: Jethro, kami din, mahirap isipin na hindi ka namin nakakasama lalo na ang iyong anak, sana wag mo ng uulitin yon. Magiging mapag pasalamat na rin ako kung anong maibibigay mo alam ko namang nag papakahirap ka lang para samin

--- Yumakap si Jethro sa anak niya, at ganun din si alice na sumunod sa yakap.

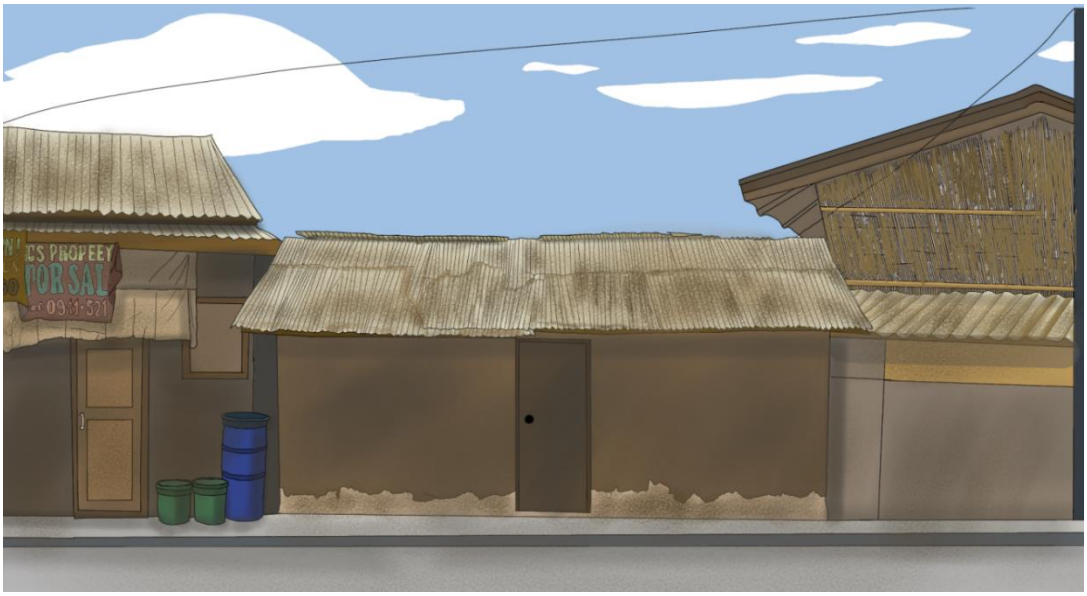

--- May lalabas na Text

“Sa hirap ng panahon ngayon hindi sugal ang solusyon”

“Ikaw, kaya mo bang masira pamilya mo ng dahil sa sugal”

SURVEY QUESTIONNAIRE

Dear Respondent,

We are students from the Laguna State Polytechnic University – Los Baños Campus, College of Computer Studies. As part of our capstone study entitled “Baited: A 2D Animated Short Film on Online Gambling,” we are conducting a survey to evaluate the film using the Technology Acceptance Model (TAM). Your feedback will greatly help us in evaluating the acceptability and effectiveness of our short film. Please indicate your level of agreement with each statement by checking the number that best reflects your opinion. All information you provide will be treated with strict confidentiality and will be used only for academic research purposes. Your cooperation and support are highly appreciated.

Charles C. Exconde, Franz Daryl B. Sabarias and Timotie John E. Punzalan

Name of Respondent: _____

Sex: ☐ Male ☐ Female

Please check the box that matches your current employment status:

☐ Regularly Employed ☐ Irregularly Employed ☐ PNP/Police

PERCEIVED USEFULNESS				
Indicator	4 – Strongly Agree	3 – Agree	2 – Disagree	1 – Strongly Disagree
1.The film showed the possible risks of online gambling.	Clearly presented and emphasized risks.	Showed risks fairly well.	Mentioned risks but not clear.	Did not show risks at all.
2.The film “BAITED” made it easier to learn about gambling’s negative effects.	Greatly increased understanding of gambling harm.	Helped understanding moderately.	Slightly helped understanding.	Did not help understanding.
3.The content promotes awareness and responsible decision-making.	Effectively encourages awareness and responsibility.	Encourages awareness to some extent.	Minimal encouragement shown.	No awareness or responsibility promoted.
4.The film delivered its	Message was strong, clear,	Message was clear but could	Message was somewhat	Message was confusing or

message effectively.	and impactful.	improve.	unclear.	weak.
5.The film served as an effective educational tool.	Excellent tool for education and awareness.	Good educational value.	Limited educational value.	No educational value.

PERCEIVED EASE OF USE				
Indicator	4 – Strongly Agree	3 – Agree	2 – Disagree	1 – Strongly Disagree
1.The storyline was clear and easy to follow.	Very clear and logical flow.	Mostly clear, minor confusion.	Hard to follow at times.	Very confusing storyline.
2.The language was simple and understandable.	Easy and natural language.	Understandable with few difficult words.	Somewhat hard to understand.	Hard to understand or technical.
3.The animation style made the message easier to grasp.	Animation clearly supported learning.	Animation somewhat supported learning.	Animation was distracting.	Animation confused the message.
4.The pacing made it easier to absorb the story.	Smooth and well-paced.	Mostly well-paced.	A bit too fast or slow.	Very hard to follow pacing.
5.The message was delivered clearly and directly.	Very direct and easy to understand.	Generally clear message.	Message was vague in parts.	Message was unclear.

AESTHETIC QUALITY AND DESIGN APPEAL				
Indicator	4 – Strongly Agree	3 – Agree	2 – Disagree	1 - Strongly Disagree
1. The animation looks creative and well-made, which makes the film enjoyable to watch.	The animation is highly creative, detailed, and visually appealing, making the film very enjoyable.	The animation is good and enjoyable but could use minor improvements.	The animation lacks creativity, so its appeal has limits.	The animation appears to be made poorly. It does not give pleasure.
2. The colors and visuals used in the film are eye-catching and make the story more	The color scheme and visuals perfectly enhance the story and attract attention.	The visuals are appealing and support the story well.	The visuals are used without consistency or are boring.	The pictures don't make the story better or help it.

interesting.				
3. The design of the characters and scenes helps me understand the message of the film better.	Character and scene design clearly strengthen the film's message and emotions.	Designs help communicate the message.	Not much clarity is given from basic designs.	Designs detract from or delay the message.
4. The animation's smooth movements and visual effects make the film more engaging.	Movements and effects are very fluid and captivating throughout the film.	Mostly smooth animation and effective effects.	Some scenes can feel like they are not consistent or fluid.	Badly implemented movements and effects can be distracting.
5. The aesthetic quality and artistic presentation of the film enhance its impact and message to the audience.	The artistic presentation strongly amplifies the film's message and emotional impact.	The presentation supports the film's purpose well.	The presentation does not add meaning within the film.	Its aesthetic presentation ultimately weakens the film's message.

PERCEIVED ENJOYMENT				
Indicator	4 – Strongly Agree	3 – Agree	2 – Disagree	1 – Strongly Disagree
1. I enjoyed watching "BAITED."	Very enjoyable and engaging.	Enjoyable overall.	Somewhat boring.	Not enjoyable.
2. The film kept my attention of its scenes and storytelling.	Highly entertaining.	Moderately engaging.	Slightly engaging.	Not entertaining.
3. I felt entertained while watching the film, even though it discussed a serious topic.	Captivated me completely.	Kept me interested.	Occasionally lost focus.	Did not capture attention.
4. The humor, creativity, or emotions shown in the animation made it	Strong emotional connection.	Some emotional connection.	Weak emotional link.	No emotional connection.

enjoyable to watch.				
5. I would recommend this animated film to others because I found it enjoyable and meaningful.	Learning was fun and interesting.	Mostly enjoyable learning.	Somewhat dull learning.	Learning was not enjoyable.

ATTITUDE				
Indicator	4 – Strongly Agree	3 – Agree	2 – Disagree	1 – Strongly Disagree
1.The film effectively showed social issues.	Clearly showed relevant issues.	Showed issues well.	Somewhat unclear issues.	Did not show issues.
2. 2D animation is a good way to educate.	Very effective educational tool.	Good educational tool.	Average educational tool.	Not educational.
3.I am satisfied with the message delivery.	Very satisfied and impressed.	Satisfied overall.	Somewhat dissatisfied.	Not satisfied.
4.The story made social issues easier to understand.	Made complex issues simple.	Somewhat helped understanding.	Little understanding gained.	No help in understanding.
5.The film is valuable for awareness.	Highly valuable for awareness.	Moderately valuable.	Slightly valuable.	Not valuable.

BEHAVIOR				
Indicator	4 – Strongly Agree	3 – Agree	2 – Disagree	1 – Strongly Disagree
1. I became more cautious about gambling.	Strongly more cautious.	Somewhat more cautious.	Slightly cautious.	No change.
2. Motivates me to share message with others.	Actively motivated to share.	Somewhat motivated.	Rarely motivated.	Not motivated.

3. I will avoid gambling apps/sites.	Fully avoid gambling sites.	Often avoid them.	Sometimes avoid them.	No change.
4. Inspired me to think carefully about gambling.	Deeply inspired to reflect.	Some reflection.	Minimal reflection.	Not inspired.
5. I intend to support awareness campaigns.	Fully intend to participate.	Likely to participate.	Unsure.	No intention.

Abstract – This study focuses on the development of a 2D animated short film titled Baited to create public awareness about the rising cases of online gambling. Due to the ease of access to betting platforms, low-income earners become more vulnerable to financial problems, emotional stress and family conflicts. To address the issue, the researchers combined personal experiences and interviews to make the storyline of how online gambling addiction progresses and some of its effects and consequences. The animation was produced in the industry-standard software following a complete pipeline from the script to the final composition. The Technology Acceptance Model (TAM) was applied to ascertain the perception of the animation's clarity and usefulness by the viewer. The results revealed high levels of acceptance, as the film was able to pass on the intended message concerning the risks and consequences associated with online gambling. The findings show that 2D animation is a powerful tool for communicating social issues to people. It also serves as an instrument of promoting responsible decision-making and actions in the digital era. The overall mean rating for the Technology Acceptance Model was 3.49 with an interpretation of "Strongly Agree."

Keywords – Online Gambling, Baited, Risks and Consequences

I. INTRODUCTION

A. Project Context

In today's digital world, online gambling has become increasingly accessible through mobile phones and computers, allowing individuals to participate in activities such as online casinos and sports betting with ease. While many users begin gambling for entertainment, the convenience and constant availability of online platforms often lead to excessive participation without immediate harmful gambling behaviors before they develop into addiction.

The convenience and availability of online platforms encourage more people, especially young adults, to gamble casually at first. Features such as fast reward systems, near-miss outcomes, and the illusion of control make online gambling more engaging and addictive than traditional gambling, particularly for young adults who are more active online.

In the Philippines, the growth of online gambling is influenced by economic challenges, social media exposure, and advertisements that promote gambling as a quick source of income. Despite the presence of regulatory bodies, many individuals continue to access unlicensed gambling platforms because they are easy to use and widely promoted online. Financial pressure and social influence make gambling appealing, especially when it is presented as a way to escape poverty, even though many gamblers experience greater financial losses over time. [20]

The negative effects of online gambling extend beyond financial problems. Individuals struggling with gambling addiction often experience anxiety, depression, and strained relationships with family and friends. [5] These issues may lead to social isolation, poor academic or work performance, and in some cases, involvement in illegal activities to support gambling habits. The COVID-19 pandemic further intensified these risks, as lockdowns, job losses, and emotional stress pushed more people toward online gambling as a form of escape or alternative entertainment. [14]

As online gambling continues to expand, it is increasingly recognized as a serious public health concern. Many individuals remain unaware of its long-term psychological, financial, and social consequences, highlighting the need for effective awareness strategies. In response, Baited: A 2D Animated Short Film on Online Gambling was developed to educate viewers, particularly young adults, about the risks of excessive gambling. Through storytelling and visual animation, the project aims to promote responsible decision – making and prevent highlights the role of 2D animation as an

tool for raising awareness about the risks and consequences of online gambling and promoting responsible gaming behavior.

B. Project Objectives

Developing a 2D animated short film that raises awareness about online gambling of its possible risks and consequences.

1: To gather and analyze relevant information on the causes, effects, and social impact of online gambling.

2: To develop a 2D animated video that clearly and creatively presents issues related to online gambling.

3: To evaluate the animation's effectiveness using the Technology Acceptance Model (TAM).

C. Project Purpose

The project aims to raise awareness about the risks and consequences of online gambling by equipping individuals with knowledge that encourages responsible decision-making before gambling habits cause serious harm. It contributes to SDG 1 No Poverty by addressing how gambling addiction can lead to financial loss and worsen poverty, particularly among families with limited resources, and supports SDG 3 Good Health and Well-Being by highlighting the mental and emotional effects of gambling such as stress, anxiety, and depression. The project also aligns with SDG 4 Quality Education, as gambling problems can negatively affect students' academic performance and lead to school dropout, and with SDG 8 Decent Work and Economic Growth by recognizing that while online gambling may generate employment, unregulated platforms can result in financial instability and worker exploitation. Furthermore, it supports SDG 16 Peace, Justice, and Strong Institutions by addressing the connection between online gambling and illegal activities such as fraud, money laundering, and scams, emphasizing the need for stronger regulations and law enforcement to prevent criminal misuse of online gambling platforms.

II. REVIEW OF RELATED LITERATURE

This chapter delves into the rise of online gambling, how easily people are lured into the world of online gambling and the psychological and behavioral effects it may cause. The study also looks into existing laws and regulations, effective especially how they aim to protect users and ensure fairness in industry.

The Growth of Online Gambling

Internet gambling (a term largely interchangeable with interactive remote and online gambling) refers to the range of wagering and gaming activities offered through Internet-enabled devices, including computers, mobile and smart phones, tablets and digital television. This mode of gambling facilitated by technological advances, increased Internet availability and ownership of Internet-enabled devices, is not a separate type of gambling activity [7].

Online Gambling Addiction

Gambling behaviour can be located at different points on a continuum ranging from occasional, recreational, nonproblematic or social gambling to at-risk gambling and then to problem, pathological, compulsive or disordered gambling. The terms 'problem' and 'pathological' gambling are often used interchangeably, but the terms 'problem gambling' describes an intermediate or sub-clinical form of the disorder.

Psychological and Behavioral Effects

First, consistent with gambling theory, individuals' online gambling was found to increase with any increase in cumulative net gain or cumulative net loss. Second, as the availability heuristic prescribes, a recent loss reduced online gambling, whereas a recent gain increased it. Third, consistent with the literature on repeated behavior, regular use and extended use moderates the relationship between current and subsequent gambling. Taken together, the present study clarifies how people react differently to immediate and cumulative outcomes and how regular use and extended use facilitate routine behavior in the context of online gambling. In general, our findings suggest that the three perspectives, i.e., gambling theory, the availability heuristic, and repeated behavior, should be considered to understand online gambling, which is in essence a series of risk-taking attempts with the potential of eventually becoming routine behavior [18].

Composition. This model provides a clear structure for developing animated short films.

A. CONCEPTUAL FRAMEWORK

Figure 1 illustrates the conceptual framework for developing a 2D animated short film aimed at raising awareness about online gambling. The process consists of four main stages: data gathering, animation development, final output, and evaluation and feedback. Data gathering focuses on identifying key issues related to online gambling and determining appropriate storytelling and animation approaches, while animation development covers scriptwriting, design, and production. The final output is the completed animated film intended to educate viewers about the risks of online gambling, and the evaluation and feedback stage assesses audience responses to determine the film's effectiveness in raising awareness and influencing attitudes or behavior.

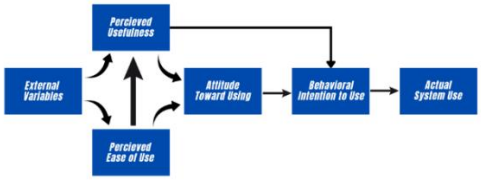

Figure 1. Conceptual Framework

III. Methodology

A. Project Design

The goal of this project is to raise awareness and educate the residents of Paciano Rizal Bay Laguna about the risk and consequences of online gambling. The film will provide informative content by integrating compelling stories, relatable characters, and engaging visuals to effectively communicate the risks and consequences of online gambling. The project involves key stages such as data collection, scriptwriting, character and background design, storyboarding, layout, animation, voice recording, sound production, editing, and video composition.

B. Animation Development Model

The figure below presents the development model used for creating "Baited: A 2D Short Film Animated on Online Gambling". This model organizes the production into three main phases: Pre-Production, Production, and PostProduction. Pre-Production involves Data Gathering, Script Writing, Character and Background Design, and Storyboarding. Production includes the Layout and Animation process. Post-Production covers Voice Over, Sound Design, Editing, and Video

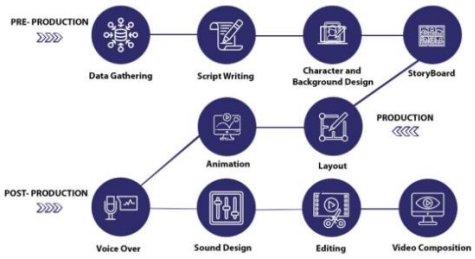

Figure 2. Animation Development Model

C. Data Collection

Random individuals with relevant experience, who are willing to share their stories, will be interviewed in Paciano Rizal, Bay, Laguna. To gather information to produce 2D animated films, real-life personal experiences related to online gambling will be collected. After collecting and analyzing the data, meaningful content will be selected to create a realistic, emotional, and relatable animation. Furthermore, websites showcasing 2D animations will be explored to gather ideas and ensure the uniqueness of our animation, avoiding similarities with existing works.

D. Script Writing

The story was developed around a minimum wage earner employee who becomes addicted to online gambling. The script highlights how influences from social media, streamers, advertisements, and peer pressure can lead individuals, especially those facing financial struggles, to gamble in the hope of quick money.

E. Character and Background Design

We created to reflect a realistic portrayal of the main character's daily life, showing his humble beginnings, descent into addiction, and eventual redemption. As the character's emotional state changes, the background and environment also shift from warm and lively to dark, empty, and cold, then slowly returning to a hopeful atmosphere during recovery.

F. Storyboard

The animation was mapped out visually, including scenes where the character discovers online gambling, becomes obsessed, loses everything, and ultimately seeks help. Each frame was planned to evoke emotional impact and
tell the story clearly and effectively.

Figure 3. Storyboard

H. Technology Acceptance Model

This information will inform us of the creative and technical decisions during the film's development, ensuring the content was both meaningful and easy to follow. Insights will be drawn from the audience will also lead to adjustments and refinements, improving the clarity and overall impact of the film. The model served as a practical tool for aligning the film with the learning needs and preferences of its viewers, thus enhancing its potential to raise awareness and promote understanding.

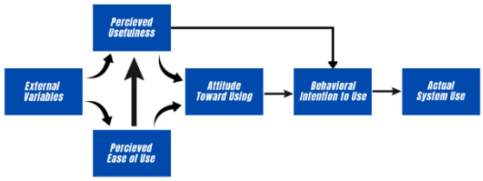

Figure 4. Technology Acceptance Model

I. Population of the Study

The study included is regular and irregular workers who are currentlyengaged in online gambling, whether casually or regularly. These participants provided valuable insights based on their personal experiences, which serve as a reference for the creation of a 2D animated video aimed at promoting awareness about online gambling.

J. Statistical Treatment of Data

Descriptive statistics are used in this study to analyze and interpret the data collected from the respondents. The responses are carefully recorded and organized into a Microsoft Excel spreadsheet for easier processing. The Mean (M) is computed to determine the average level of responses.

K. Cronbach's Alpha Reliability Test Result

The overall score is 0.713, it can be posited that the instrument is stable and consistent in measuring what it intends to measure. This means that the questionnaire can be used to collect data because it supports the study's analysis and findings.

Categories	Cronbach's Alpha	Verbal interpretation
Perceived Usefulness	.744	Good
Perceived Ease of Use	.700	Acceptable
Aesthetic Quality and Design Appeal	.619	Questionable
Perceived Enjoyment	.800	Good
Attitude	.814	Good
Behavior	.600	Questionable
Composite	.713	Acceptable

Figure 5. Reliability Test Results for Technology Acceptance Model

IV. RESULTS AND DISCUSSION

In this chapter, the study's findings are presented and discussed in relation to the project's objectives. The results show how the 2D animated short film effectively portrayed the causes, effects, and social impact of online gambling. The film illustrated the causes through the main character's exposure to online ads, encouragement from friends, and financial struggles as a minimum-wage worker. These scenes showed how social media, peer pressure, and money issues can lead someone to gamble.

A. Results by Objectives

The main goal of this research was to produce a 2D animated short film that would inform and engage its audience about the realities of online gambling. This goal was achieved through careful research, creative planning, and the application of digital animation techniques, resulting in a film that was both meaningful and educational.

B. Respondents Response

the table indicates that all categories received high mean scores with a Strongly Agree

Verbal interpretation, showing a very positive response to the audience. The results suggest that the animated film was easy to understand, visually appealing, enjoyable, and effective in raising awareness and encouraging positive attitudes and behaviors toward online gambling.

CATEGORY	MEAN	Verbal Interpretation
Perceived Usefulness	3.53	Strongly Agree
Perceived Ease of use	3.67	Strongly Agree
Aesthetic Quality and Design Appeal	3.54	Strongly Agree
Perceived Enjoyment	3.61	Strongly Agree
Attitude	3.69	Strongly Agree
Behavior	3.53	Strongly Agree

Figure 6. Respondents Responses Totals

C. PNP Response

The table shows that most categories received high mean scores, with Strongly Agree interpretations for ease of use, design appeal, enjoyment, attitude, and behavior, while Perceived Usefulness scored slightly lower at Agree. Overall, this indicates that the animated film was engaging, visually appealing, and effective in influencing attitudes and behaviors toward online gambling.

CATEGORY	MEAN	Verbal Interpretation
Perceived Usefulness	3.20	Agree
Perceived Ease of use	3.40	Strongly Agree
Aesthetic Quality and Design Appeal	3.47	Strongly Agree
Perceived Enjoyment	3.47	Strongly Agree
Attitude	3.80	Strongly Agree
Behavior	3.67	Strongly Agree

Figure 7. PNP Response Totals

V. SUMMARY, CONCLUSIONS, AND RECOMMENDATIONS

A. Summary of Findings

In this chapter, we summarize the key findings of our project “Baited: A 2D Animated Short Film on Online Gambling” which was aimed at creating an animated short film to raise awareness about the negative effects, risks and consequences of online gambling.

The findings indicate that the project achieved its goal of raising awareness and encouraging responsible behavior among viewers. The animation video development process involved the following stages: data gathering, script writing, character designing and background setup, storyboarding, layout designing, animating the characters and backgrounds, voice recording, sound design, editing and composition of the final video.

B. Conclusion

In summary, the developed capstone project “Baited: A 2D Animated Short Film on Online Gambling” successfully achieved its objectives using 2D animation as creative tool. The developed 2D animated short film supported by
33 respondents demonstrated the project’s potential to effectively raise awareness about the risks and consequences of online gambling. In part of developmental procedure, the project is evaluated to determine if they provide the necessary function for objectives.
