RESEARCH CONTRIBUTION NO.	

ACKNOWLEDGEMENT

The researchers would like to express their sincere gratitude to everyone whose help, advice, and inspiration enabled them to finish this study. Their priceless assistance was crucial to the accomplishment of this study.

The researchers first and foremost thank the Almighty God for His constant protection, strength, wisdom, and blessings. Throughout the entire academic process, the researchers were supported by his heavenly guidance.

The institution and its committed faculty are also acknowledged by the researchers for providing a learning environment that enhanced their knowledge and allowed them to pursue this study with direction and purpose.

Sincere gratitude is given to Mr. Merardo A. Camba, Jr., their research adviser, whose patient mentoring, wise recommendations, and expert advice significantly influenced the creation and improvement of this study. His knowledge and unwavering support were essential to the study's quality and clarity.

The researchers also thank Dr. Jefferson L. Lerios, their research coordinator, and Dr. Rowan N. Elomina, Ms. Carolina R. Joval, and Mr. Jhoco S. Millanes, the panelists, for their time, careful analysis, and insightful comments. The overall quality of the research was greatly strengthened and enhanced by their meticulous review and expert insights.

Finally, the researchers would like to express their sincere gratitude to Colegio de Los Baños and the seventh-grade students who took part in the

study. Their collaboration, careful analysis, and sincere interest in the animation produced insightful observations that substantially enhanced the study. Their assistance was crucial to the accomplishment of this thesis.

THE RESEARCHERS

DEDICATED

To the families and friends

For their unwavering support, encouragement, and understanding throughout the entire duration of this project. Their presence kept them motivated even during the most challenging moments.

To the professors and adviser

For their guidance, expertise, and patience in helping them shape this study. The insights strengthened the work and inspired them to aim higher.

To future researchers

May this study serve as a foundation and motivation to continue raising awareness, improving interventions, and expanding research on online safety and child protection.

To the victims of OSAEC

This project is dedicated to their courage and strength. May this work contribute in some way toward creating safer spaces for all children and preventing further harm.

To those experiencing sexual abuse

The researchers hope that this project encourages more people to speak up, report abuse, and support those who need help.

ABSTRACT

According to reports, grooming, manipulation, and the use of cutting-edge technologies to exploit minors are commonplace in the Philippines, which is still one of the nations most impacted by Online Sexual Abuse and Exploitation of Children (OSAEC). The project "Alingawngaw: A Campaign Awareness Video on Online Child Exploitation" was created in response to this growing concern in order to educate kids and teenagers about the dangers of online interactions, with a focus on how predators gain victims' trust, manipulate them, and cause long-term psychological trauma. The study concentrated on creating a 2D animated campaign video that depicted online grooming, assessing its efficacy using the Technology Acceptance Model (TAM), and confirming that it complied with UNICEF and ISO child-friendly and trauma-informed standards. Using Procreate for illustrations, Procreate Dreams for animation, and CapCut for video editing, the production process adhered to the conventional stages of pre-production, production, and post-production. Students in Grade 7 assessed the finished video to determine its overall impact, usefulness, and clarity. The results showed that the video complied with child-safe content guidelines, successfully raised awareness of online grooming strategies, and was deemed interesting and simple to understand based on TAM criteria. Overall, the project showed how 2D animation can be used as an approachable and powerful teaching tool to empower young audiences against OSAEC and promote digital safety.

Keywords: *Anti-Online Sexual Abuse and Exploitation of Children (OSAEC), Child Sexual Abuse or Exploitation Materials (CSAEM), Awareness, Animation and Motion Graphics, Technology Acceptance Model*

DEFINITION OF TERMS

Age of Sexual Consent	The legally defined age at which an individual can consent to sexual activity, protecting minors from exploitation. In the Philippines, it was raised from 12 to 16, though De Guzman (2022) notes that broader protective measures are still needed.
Anti-Online Sexual Abuse and Exploitation of Children (OSAEC)	officially known as Republic Act No. 11930 (2022), is a Philippine law aimed at preventing and penalizing online sexual abuse and exploitation of children. It imposes stricter sanctions on offenses involving child sexual abuse material (CSAM) and requires internet service providers to assist in identifying and removing such content. The law promotes inter-agency cooperation to ensure a safer digital environment and to hold offenders accountable.
Artificial Intelligence	The act of abusing a child for sexual purposes through manipulation, coercion, or deception, often for the benefit of a third party. It includes online abuse, trafficking, and the creation of sexually explicit materials. The rise of digital technologies has increased its occurrence, calling for stronger protective measures (Montemayor, 2024).
Child or Minor	Any individual under the age of 18, as defined by the United Nations Convention on the Rights of the Child (UNCRC). Recognized as rights-holders entitled to protection, care, and development, children are particularly vulnerable to abuse and exploitation, especially in digital environments (IJM, 2025).

Child Ponography	Content depicting sexually explicit activities involving a minor, real or simulated, emphasizing its abusive nature. A surge in CSAM during the COVID-19 pandemic raised concerns over monitoring and legal safeguards (Dąbrowska, 2021).
Child Protection	A framework of actions aimed at preventing and responding to abuse, exploitation, neglect, and violence against children. In the digital age, it includes ensuring online safety for children. The SaferKidsPH (2020) report emphasizes the importance of community involvement, parental guidance, and education in creating a safer online environment for Filipino children.
Domestic Violence	A pattern of abusive behavior in a household or relationship, involving physical, emotional, or economic harm. It creates fear and instability, posing serious risks to a child's well-being, whether as a victim or witness (UNICEF, 2022)
Exploitation	The act of taking unfair advantage of an individual, often involving vulnerability or power imbalance. In digital contexts, it refers to the manipulation of children online for sexual, financial, or personal gain. Technology can both facilitate and help prevent such abuse, highlighting the need for stronger online safety measures (UNICEF, 2021).
Human Rights	An international legal agreement adopted by the United Nations in 1989 that sets universal standards to protect the rights, dignity, and well-being of children. It requires signatory states to implement measures that prevent abuse, neglect, exploitation, and violence against children. The CRC remains central to global child protection efforts (Muhammad & Tummala, 2021).

Trauma	Severe emotional and psychological distress caused by harmful experiences. In online exploitation, trauma may lead to long-term mental health issues like anxiety and depression, often persisting into adulthood, especially when compounded by stigma (UNICEF, BONYAN 2024).
Visual Storytelling	The use of images, videos, and animations to convey a message in an engaging and informative way. In environmental awareness, 2D animation simplifies complex issues, like textile waste, by depicting their lifecycle and impact. As Rahman (2023) notes, this method creates emotional connections, making topics more relatable and driving action for sustainability.
2D Animation Video	The use of 2D animated visuals and multimedia to simplify complex concepts and engage learners. It enhances retention, caters to different learning styles, and effectively captures attention, as noted by Wickramasinghe (2020).

CHAPTER I

INTRODUCTION

Project Context

The Philippines currently holds the alarming position of being the second highest in the world in terms of reported cases of online sexual abuse and exploitation of children (OSAEC). This troubling statistic, reported by the Cybercrime Investigation and Coordinating Center (2023), highlights the urgent need to address and combat the growing prevalence of OSAEC in the country.

Over 300 million children under the age of 18 have been affected by online child sexual exploitation and abuse in the past year a staggering figure that underscores the urgency of addressing this global crisis. This alarming estimate highlights the widespread nature of the threat and reinforces the importance of proactive education, awareness, and prevention efforts, especially through digital platforms like campaign videos. (Stanfield, 2024).

According to context from GMA News (2025), nearly 500,000 Filipino children were victimized by online sexual abuse in 2022, with many cases involving the use of advanced technology and AI to manipulate photos and videos. Additional concern is raised in a report from the Philippine News Agency (PNA, 2024), where Senator Hontiveros urged a deeper investigation into chat platforms commonly used for child grooming. Meanwhile, guidance from the Department of Justice (Politiko, 2025) emphasized that even AI-generated or digitally altered child exploitation content is considered illegal under Republic Act 11930. In support of these efforts, the private sector has strengthened its measures, as Philstar (2024) reported that Globe Telecom

has begun blocking AI-generated child sexual abuse materials to help combat online child exploitation.

Online child exploitation has become a pressing issue in the digital age, with the Philippines emerging as a significant hotspot for such activities. The country has been identified as a central hub for the production of child sexual abuse materials, with alarming statistics highlighting the severity of the problem (Tarroja et al., 2019).

According to a study by the International Justice Mission (2025), it is estimated that 1 in every 100 Filipino children were trafficked to produce new child sexual exploitation material in 2022. Furthermore, data from the Department of Justice's Office of Cybercrime reveals a staggering increase in cyber tips related to child sexual abuse materials, rising from 579,006 in 2018 to over 1,000,000 in 2020 stated by SaferKidsPH. The digital landscape, while opening doors for communication and learning, has also created new avenues for perpetrators to target vulnerable children.

The impact of online sexual abuse and exploitation on children is profound, leading to severe physical, emotional, and psychological consequences. In one of the most alarming reports from IJM (2025). Filipino children as young as two years old were rescued from cybersex trafficking, a stark reminder of the terrifying reality many children face. This abuse often takes place in the child’s own home, facilitated by family members and livestreamed for paying offenders overseas.

Victim-survivors of child sexual abuse face a wide range of effects, including anxiety, depression, eating disorders, sleep disruptions, dissociation, PTSD, and personality disorders. Physically, survivors may experience

chronic pain, gastrointestinal, gynecological, or reproductive health issues, as well as cardiopulmonary problems. The psychological toll extends to the child's development, affecting their sexual functioning, relationships, and ability to form secure attachments. Understanding these impacts requires a comprehensive view of the survivor's experiences, acknowledging the factors such as age, relationship to the abuser, and responses to disclosure (Vera-Gray, 2023).

Recognizing the urgency of the issue, the Department of Social Welfare and Development (DSWD) has partnered with organizations such as IJM to enhance protective mechanisms for children at risk. The Department of Justice (DOJ) has also reinforced its commitment through renewed collaboration with IJM, supporting victim rescue and case prosecutions. In a landmark case, the DOJ and the National Bureau of Investigation (NBI) secured a conviction in an OSAEC-related case, showcasing the government's increasing efforts to bring justice to victims and hold perpetrators accountable in 2024.

To strengthen the country's legal response, the Philippine government enacted Republic Act No. 11930, also known as the Anti-Online Sexual Abuse and Exploitation of Children (OSAEC) and Anti-Child Sexual Abuse or Exploitation Materials (CSAEM) Act. The law reinforces the legal framework against online exploitation, while the recent amendment raising the age of sexual consent from 12 to 16 demonstrates a commitment to greater child protection, though enforcement challenges remain (De Guzman, 2022).

Technological advancements and growing internet accessibility have further complicated the situation. Lower internet subscription fees and faster

data transfer rates have contributed to rising online activity, which unfortunately includes illegal activities involving child abuse (UNICEF, 2021). According to the World Bank, South Asia's digital economy is expanding rapidly, with 43% of the population using the internet as of 2021 reaching 53% in the Philippines. As internet penetration increases, so too does the risk of online exploitation.

At the international level, the rights of children are protected under the United Nations Convention on the Rights of the Child (UNCRC), which obligates states to uphold these rights for all children within their jurisdiction, regardless of citizenship or legal status (Netkova & Mustafa, 2021).

The Sustainable Development Goals (SDGs), particularly SDG 8.7, have played a vital role in guiding global efforts to eliminate child trafficking and exploitation by calling for the eradication of forced labor, modern slavery, and human trafficking. However, societal norms continue to influence the local definition of acceptable child work. A study conducted in Sierra Leone offers insight into how communities differentiate between child work, labor, and trafficking distinctions that carry meaningful implications for creating culturally informed programs (Gleason & Cockayne, 2018). These findings are reflective of the broader shift in international focus since the early 2000s, from general child labor concerns toward targeted strategies combating trafficking and exploitation.

The emerging use of artificial intelligence (AI) in child sexual abuse and exploitation materials (CSAEM) presents a new and alarming challenge. While no cases have yet been reported in the Philippines, AI-generated CSAEM are already widespread in countries like the UK. These materials are

created by tech-savvy perpetrators who exploit advanced software to generate abusive content without physically harming children. The Council for the Welfare of Children (CWC) has raised concerns over the use of AI in online exploitation and called for heightened awareness, responsible internet usage, and training for adults, including parents and educators, to safeguard children online.

The Philippines continues to combat online sexual abuse and exploitation of children (OSAEC). In 2022, nearly half a million Filipino children were trafficked via live streaming, often by their own relatives. The Philippine National Police (PNP) recorded over 17,600 child rights violations in 2023, with a significant portion involving online abuse. The government has enacted the OSAEC and CSAEM Act to strengthen legal protection against these crimes, including those involving AI-generated content. Additionally, efforts from companies like PLDT and Smart have led to the blocking of millions of harmful websites. On Safer Internet Day, global organizations like ChildFund Alliance highlighted the importance of protecting children online and ensuring they are educated as responsible digital citizens. This growing threat has led to stronger legal frameworks and increased efforts to safeguard children from online exploitation. The CWC urges continued vigilance and cooperation to protect children from these dangers. (PNS, 2024)

Overall, while the Philippine government, NGOs, and international bodies are making strides in the fight against online child exploitation, persistent challenges remain. There is a critical need for stronger awareness campaigns that educate communities, empower children, and encourage collective action to prevent these crimes before they occur. This project aims

to contribute to that movement through the creation of a campaign video that not only informs but also inspires change.

Project Objectives

Generally, this project aims to develop a campaign video on online child exploitation, focusing on online grooming. Specifically, this study aims to:

1. Develop a 2D animated video that shows the strategies predators use to gain trust and manipulate children online.
2. Evaluate the campaign awareness video using the Technology Acceptance Model (TAM) to assess its efficiency and effectiveness in raising awareness, engaging viewers, and inspiring action.
3. Align the 2D animated video with ISO 26000 child-rights principles and UNICEF child-friendly standards.

Significance of the study

The significance of this study lies in its proactive approach to addressing the critical issue of online child exploitation through the innovative and accessible medium of a child-friendly 2D animated video. By focusing on Grade 7 students, such as those at Colegio de Los Baños (CDLB), the research ensures that protective information is age-appropriate and resonates deeply with its primary audience. This direct engagement empowers children and teenagers to recognize the multifaceted risks of the digital world and grasp fundamental safety measures through an easily digestible, visually engaging format. Ultimately, "Alingawngaw" serves as a vital tool in preventing victimization by transforming complex safety protocols into actionable knowledge.

Beyond its direct impact on youth, the study highlights the efficacy of digital storytelling as an educational instrument. Traditional methods of instruction often fail to capture the attention of younger generations, but this animated campaign provides a compelling and memorable learning experience that raises awareness of evolving online threats. Furthermore, the video serves as an invaluable resource for educators, parents, and school personnel. By simplifying sensitive topics and providing a practical visual aid, "Alingawngaw" facilitates difficult but necessary dialogues about digital safety, strengthening the capacity of guardians to protect children in an increasingly connected society.

On a broader scale, this research contributes significantly to national and international child protection efforts by advocating for a preventative model of digital literacy. By equipping young individuals with the tools for self-protection and fostering a culture of digital vigilance, the study strengthens the collective understanding of how creative media can be used to address pressing societal challenges. "Alingawngaw" is therefore more than a creative project; it is a critical educational intervention that leverages accessible technology to make a tangible contribution to the safety, well-being, and digital security of the youth.

Project Purpose

The purpose of this project is to produce a campaign video that raises awareness among children and teenagers about the risks of online interactions, emphasizing that not everyone online can be trusted. The video focuses on how predators manipulate and groom children, potentially leading to trauma, and educates viewers on recognizing early warning signs of Online

Sexual Abuse and Exploitation of Children (OSAEC). It also encourages preventive actions, such as being cautious with personal information, avoiding oversharing online, and seeking support from trusted adults, schools, and community partners to protect themselves and respond effectively to potential threats.

Scope and Limitation

This study aimed to develop a 13-minute animated video to raise awareness about online child exploitation by illustrating how predators manipulate children and how victims can overcome the trauma caused by such experiences. Targeting children and teenagers, the video featured seven characters and realistic scenarios to enhance relatability and understanding. Its effectiveness was evaluated through feedback from Grade 7 students, which may not have fully represented a wider audience. The study was limited to awareness-raising and providing guidance rather than offering direct intervention or long-term solutions.

CHAPTER II

THEORETICAL FRAMEWORK OF THE PROJECT

REVIEW OF RELATED LITERATURE

Laws and Policies on Child Protection

This project aims to align with several Sustainable Development Goals (SDGs), particularly those that promote child protection, education, gender equality, and social justice. This project seeks to support SDG 16: Peace, Justice, and Strong Institutions, specifically Target 16.2, which focuses on ending abuse, exploitation, trafficking, and all forms of violence against children. By raising awareness about online sexual abuse and exploitation of children (OSAEC) and Anti-Child Sexual Abuse or Exploitation Materials (CSAEM), the video intends to contribute to the prevention of digital crimes and the promotion of child safety.

The campaign also plans to support SDG 4: Quality Education by educating children and parents about online risks, children's rights, and protective strategies, thereby empowering them to make safer, more informed decisions in the digital space. In addition, it will address SDG 5: Gender Equality, particularly Target 5.2, by highlighting how girls are disproportionately affected by online exploitation and advocating for the elimination of gender-based violence and abuse.

Furthermore, the project aligns with SDG 9: Industry, Innovation, and Infrastructure by promoting the responsible and ethical use of digital platforms, encouraging social responsibility in the digital age. Lastly, the campaign will reflect the goals of SDG 1: No Poverty, recognizing poverty as a root cause of

child exploitation and aiming to raise awareness about its impact on children's vulnerability (United Nations, n.d.).

Republic Act No. 11930, otherwise known as the Anti-Online Sexual Abuse and Exploitation of Children (OSAEC) Act of 2022, constitutes a significant advancement in Philippine legislation concerning child protection in the digital sphere. This law repealed specific provisions of the Cybercrime Prevention Act of 2012, particularly those related to the ambiguous definition of cybersex a matter that had been the focus of sustained critique and advocacy by the Foundation for Media Alternatives (2019). By narrowing the scope of criminal liability, the legislation ensures that the penalization of online sexual abuse is properly confined to exploitative acts involving children and does not encompass consensual sexual activity or expression between adults. This legal refinement upholds essential human rights principles, including privacy and freedom of expression, while strengthening safeguards against child exploitation online.

Online child exploitation remains a pressing issue in the Philippines, as emphasized by several studies and reports. (ECPAT International, 2022), in their study Disrupting Harm: Online Child Sexual Exploitation and Abuse in the Philippines, identified poverty, low digital literacy, and lack of adult supervision as major contributing factors. Their mixed-methods research underscores the crucial role of strong legal frameworks and education programs in protecting children online. Building on this (UNICEF, 2021), through a literature review titled The Role of Digital Technology in the Sexual Abuse and Exploitation of Children, highlighted how technology can both

facilitate and prevent abuse. The report calls for comprehensive online safety education and greater accountability from tech industries.

Complementing these findings from SaferKidsPH (2020), in their publication Keeping Filipino Children Safe Online, emphasized the importance of community and parental involvement in promoting online safety. Their campaign-based data support the use of multi-platform awareness strategies to encourage education and effective reporting mechanisms. To strengthen these initiatives, the Inter-Agency Council Against Trafficking (2021) developed the National Plan of Action Against Trafficking in Persons, a strategic policy review advocating for coordinated efforts among government bodies and NGOs. Collectively, these sources underline the multifaceted approach required through education, legislation, technology, and community collaboration to combat the online sexual abuse and exploitation of children in the Philippines.

Every child is a human being entitled to justice, freedom, and the opportunity to grow and develop, regardless of their nationality, race, religion, or skin color. These fundamental rights are upheld by the United Nations Universal Declaration of Human Rights. Children are often regarded as a nation's most valuable asset and, as such, deserve protection from all forms of harm. However, in reality, many children still fall victim to exploitation. One of the gravest forms of child exploitation is child marriage (Muhammad & Tummala, 2021).

The Philippines has made significant efforts to combat online sexual abuse and exploitation of children (OSAEC), with various campaigns, laws, and initiatives focused on raising awareness and providing support. One such

initiative is the UNODC's "Beware the Share" campaign (2024), which aims to educate children, parents, and government agencies across Southeast Asia about the dangers of sharing sexualized content online, with a particular focus on the rise of OSAEC cases in countries like the Philippines. The campaign, funded by Canada and the Netherlands, utilizes interactive content to engage youth and educate them on legal consequences.

Similarly, the SaferKidsPH campaign, launched in 2019 by an Australian Government-led consortium, targets online sexual exploitation in the Philippines. Supported by UNICEF, Save the Children, and The Asia Foundation, this initiative promotes awareness, child-sensitive investigations, and strengthens child protection systems over the next six years. It also emphasizes the importance of cross-sector collaboration in preventing OSAEC. In addition, youth-led efforts are making an impact, such as in Davao, where student organizations like ACAD, organized by Save the Children Philippines, advocate for stronger laws, including the passage of the Anti-OSAEC-CSAEM Law (Republic Act 11930). This law aims to enhance child protection against online sexual abuse and exploitation and holds perpetrators accountable. Save the Children (2024) also runs programs to raise awareness and create safer digital spaces for children.

The International Justice Mission (IJM) has partnered with platforms like TikTok to launch the #Report2Protect campaign (2023), which educates the public on reporting child trafficking for sexual exploitation. IJM’s efforts have led to the rescue of over 1,000 victims and the conviction of hundreds of offenders. A troubling statistic revealed by a 2023 IJM-UN Rights Lab study

showed that nearly half a million Filipino children were trafficked to produce child sexual exploitation materials (CSEM) in 2022. The study emphasized the urgent need for stronger global actions to prevent trafficking, with foreign demand driving much of the abuse. Additionally, a report highlighted the difficulties faced by authorities in effectively implementing laws due to inadequate resources and infrastructure (IJM, 2023). On a legal front, the Philippine government made advancements in 2023 by passing Republic Act 11930, which addresses online sexual abuse and exploitation and mandates stronger enforcement mechanisms. However, the survey revealed that 20% of Filipino children aged 12–17 were victims of online sexual abuse and exploitation in the past year, underscoring the ongoing challenges in combating OSAEC. Despite existing frameworks, more resources, training, and attention are needed to effectively tackle this issue.

These campaigns, laws, and studies reflect the growing awareness of OSAEC in the Philippines and the need for continued vigilance, collaboration, and comprehensive action to protect children from online exploitation.

Social and Economic Context of Exploitation

The prevalence of Online Sexual Abuse and Exploitation of Children (OSAEC) has been increasing at an alarming rate in the Philippines in recent years. A Scale of Harm study conducted by the International Justice Mission (2022) estimated that nearly 500,000 children were trafficked for the production of new child sexual exploitation materials equivalent to approximately one in every 100 Filipino children. The onset of the COVID-19 pandemic further intensified children’s vulnerability to various forms of abuse

and exploitation, both nationally and globally. In 2021 alone, 20% of internet-using children aged 12 to 17 reported experiencing severe forms of online sexual abuse and exploitation. These included being coerced into sexual acts, having their sexual images shared without consent, or being forced to engage in sexual activities in exchange for money or material goods. In proportion to the population, this represents an estimated two million children affected by these forms of harm within a single year (ECPAT et al., 2022). Extensive literature has documented the profound and long-term impacts of childhood sexual victimization on survivors' physical health, mental well-being, social relationships, economic stability, and interpersonal functioning (Castelo-Branco et al., 2022; Henkhaus, 2022). Among these adverse consequences, trauma has been consistently identified as a central and enduring effect of sexual abuse and exploitation experienced during childhood (Amanda L. et al., 2022; Rohini et al., 2022).

During the first half of 2023, 22.4% of the population, or 25.24 million Filipinos, were estimated to be living below the poverty line, making poverty a persistent developmental issue in the country (Philippine Statistics Authority, 2023). The Philippines' high levels of poverty are caused by a soaring national debt, widespread corruption, and government waste, all of which are made worse by the nation's rapidly expanding population.

The COVID-19 pandemic has notably influenced the prevalence and victimization of children in online sexual exploitation in the Philippines. In response to the health crisis, the government implemented strict community quarantines and stay-at-home measures. These restrictions, coupled with

increased emotional vulnerability, economic instability, and prolonged unsupervised online activity among children, contributed to a broader socio-economic crisis. This situation further intensified the pre-existing inequalities faced by vulnerable children, thereby heightening their exposure to risks such as online sexual exploitation, trafficking, abuse, and commercial sexual exploitation (UNICEF 2021).

Exploitation in Digital Age

The issue of child exploitation, both online and offline, is a serious concern, particularly in the context of children engaging in commercial activities, such as influencer marketing and criminal exploitation. Advances in information technology have led to the rise of "kid influencers" as part of influencer marketing, posing risks to children's development and rights. While children are legally unable to make fully informed decisions about their involvement in these commercial activities, the exploitation of their energy and labor can have detrimental effects on their emotional and physical well-being. To protect children's rights and ensure their well-being, it is crucial to adhere to legal frameworks such as the United Nations Convention on the Rights of the Child (CRC), ratified by Indonesia in 1990, which emphasizes the protection of children from violence and exploitation (Rafsanjani, 2022).

Several studies examine the risk factors and dynamics of child exploitation. For instance, a systematic review and meta-analysis by (Laird et al. 2020) identified key risk factors for child sexual exploitation, such as sexual risk behaviors, exposure to pornography, trauma, and childhood sexual abuse. These factors highlight the vulnerability of children to exploitation,

emphasizing the need for targeted interventions. Similarly, (Barlow et al. 2022) argue that a more integrated approach to safeguarding, which combines perpetrator motivation and environmental factors, is necessary to address child criminal exploitation (CCE). In the case of children involved in both the child protection and youth justice systems, (Baidawi et al. 2020) found that placement instability and poor mental health contribute to increased vulnerability to exploitation, calling for stronger policies to address these issues.

Moreover, societal demand for child exploitation material is growing, with (Hunn et al. 2020) exploring the role of "opportunistic offenders" who may not fully grasp the criminality or harmfulness of viewing such material. These offenders' attitudes are crucial for understanding and preventing the onset of exploitation. A critical area of concern is early marriage, where children are often deprived of their rights by parents who are motivated by economic interests or religious beliefs. (Sopyan et al. 2023) highlight the trend of early marriages between children and foreign nationals in Indonesia, stressing the need for government intervention to protect children from this form of exploitation.

The CRC has been instrumental in advancing child protection globally; however, sexual abuse and exploitation remain persistent issues. (Simon et al. 2020) discuss the evolving nature of child sexual abuse and exploitation, particularly online, where children are at risk even when physically alone. Despite the adoption of the CRC, gaps remain in monitoring and reporting its implementation. In response to the growing challenges of trafficking and

exploitation, (Chang et al. 2022) emphasize the need for pediatricians and healthcare professionals to understand the broader socio-political factors that contribute to vulnerability, such as capitalism, racism, and classism. They advocate for a more holistic approach to prevention, including better training for professionals and more effective interventions. To get an idea of the extent of the phenomenon, a simple search using the keyword porn will yield thousands of sites offering imagery of sexual nature (Elshenraki, 2020).

The Philippine National AI Roadmap seeks to position the country as an ASEAN-wide center of excellence for AI. For the Philippine government, technology Developments are the answer, not the problem according to OpenGov Asia (2021). Even so, there are only a few instances of AI-generated CSAM at the moment, but this number is anticipated. to expand rapidly and draw attention to fresh, intricate concerns regarding the sufficiency of current laws both domestically and internationally to prosecute these offenses (Ratner, 2021). In fact, the possibility of When that kind of crime is prosecuted, sensitive issues are raised regarding whether such content is unlawful and what options victims may have for redress (Sullivan, 2024).

Forming friendships online has become common among young people today. However, building connections with strangers on the internet can expose them to the dangers of online grooming. This refers to a technology-driven method where an adult predator gains the trust of a young and vulnerable individual with the intent of sexually abusing or exploiting them. Unlike in the past, when such actions required close physical presence, the internet now enables predators to deeply involve themselves in a child’s life

by staying in constant contact across various digital platforms (Chiu & Quayle, 2022).

Child pornography as a term began to undergo critical reassessment following the initial wave of the Internet revolution in the early 2000s. In more recent years, there has been a marked shift toward the adoption of more precise and appropriate terminology, particularly within international and non-governmental reports as well as academic literature. The preferred terms now widely used include child sexual exploitation material (CSEM) and child sexual abuse material (CSAM). It is therefore considered unfortunate that a foundational document such as the United Nations Convention on the Rights of the Child (UNCRC) still employs the outdated term pornographic performances, as seen in Article 34. This discrepancy highlights the gap between contemporary understanding of the issue and the language used in a treaty drafted in 1989. Scholarly and institutional sources such as (Dąbrowska 2021) and (Gannon et al. 2023), which use the term CSAM, and (Drejer et al. 2024), which refers to CSEM reflect this evolution in terminology, with all examples dating from the 2020s and aligning with current standards in child protection discourse. Artificial intelligence remains a rapidly advancing technology, yet public awareness of its potential dangers is still limited, particularly across different countries. At present, industrialized nations are at the forefront of AI development, resulting in the concentration of its use among a select few whether for legitimate innovation or illicit activities. In the Philippines, the Philippine National Police's Center for the Protection of Women and Children reported that, as of January 31, 2024, there have been no recorded cases involving AI-generated child sexual abuse material.

However, with emerging reports suggesting the potential use of AI in child sexual exploitation in other countries, the Philippines is taking proactive steps to prepare for similar developments (Montemayor, 2024). As the technology continues to evolve, Philippine authorities are working to strengthen regulatory frameworks and enhance law enforcement training to address emerging threats. It is imperative for all stakeholders to remain vigilant and take preventive measures to ensure that AI is not misused, especially in safeguarding vulnerable populations from exploitation. In conclusion, existing studies emphasize the urgent need for a strong and united response to online sexual abuse and exploitation of children (OSAEC) in the Philippines. Although there have been important steps forward through laws, awareness campaigns, and community programs, challenges such as weak enforcement, lack of education, and poverty continue to put children at risk. Addressing these issues requires ongoing collaboration between the government, organizations, communities, and families. Through this project, we aim to help raise awareness and promote safer online spaces for children, contributing to the broader fight against child exploitation.

2D Animation

In the evolving 21st-century knowledge economy, students are expected to grasp multifaceted ideas to develop intellectual competence. (Wickramasinghe 2020) emphasizes that 2D animation enhances the learning experience by simplifying complex academic content and delivering it in a visually engaging manner. Through an experimental study involving 180 business management undergraduates, the research compared traditional

slide-based teaching with animated instructional videos. Thematic analysis revealed that students taught with 2D animations showed increased engagement and better comprehension, highlighting the tool's effectiveness in online learning settings.

Similarly, (Rahman 2023) explored the use of animated storytelling to educate the public on the environmental damage caused by textile waste. The study developed 2D animated short films detailing the life cycle of textiles and the resulting ecological harm. Evaluations through surveys and focus groups revealed a significant improvement in viewers' understanding and inclination toward more sustainable consumption habits. This suggests that animation can serve as an impactful medium for environmental education and behavioral change.(Nazley et al. 2024) focused on the psychological and developmental impact of social media on adolescents. Their project combined qualitative data from interviews and surveys with the development of a 2D animated narrative illustrating common issues teens face, such as sleep deprivation and low self-esteem. The animation aimed to raise awareness of these effects and promote healthier digital habits. Findings suggested that animated campaigns could effectively communicate serious topics to younger audiences.

Further supported the role of animation in awareness-building by examining its use in environmental advocacy. The research highlighted how various animation forms like 2D, 3D, and stop-motion implify complex messages, create emotional engagement, and improve knowledge retention. When paired with gamification techniques, these tools were shown to motivate audience participation and foster sustainable behavior, indicating

their potential as educational and advocacy instruments (Karmakar et al. 2024).

Lastly, El-Aasy 2022) examined the effectiveness of 2D animated advertisements on Facebook using Adobe Animate. The study tackled the lack of compelling animated content on social media platforms, especially those that go beyond survivor stories to present innovative awareness messages. Through an experimental model and statistical analysis via questionnaires, the study found that 2D animated ads significantly influenced public awareness and behavior. It concluded that such advertisements can play a vital role in public education and social responsibility when implemented creatively and strategically.

Synthesis and Relevance of the Study

Child exploitation continues to be a significant global issue, particularly in the context of the digital era, where the prevalence of Online Sexual Abuse and Exploitation of Children (OSAEC) and Child Sexual Abuse and Exploitation Materials (CSAEM) has increased dramatically. Data collected from a local social worker in Barangay Anos, Los Baños Laguna in conjunction with findings from international literature and reports, illuminates the multifaceted causes and pervasive nature of online child exploitation.

In addition to qualitative data derived from interviews, the researchers engaged in a thematic analysis of several documentaries and video content centered on online child exploitation. The thematic analysis revealed recurring patterns, with a notable emphasis on the involvement of family members, including relatives of the victims, as perpetrators of online exploitation. These

critical insights contributed to the formulation of the storyboard and script for the campaign video, which was under development at the time of the study.

A central theme emerging from both the interview and documentary analysis is the widespread lack of awareness among children and their guardians regarding the risks associated with digital exploitation. The local social worker highlighted the troubling fact that many children do not recognize their own exploitation, particularly when innocuous-seeming activities, such as dancing or singing, are recorded and shared online without proper understanding or consent. This observation is consistent with global findings from organizations such as UNICEF and ECLT (2025), which emphasize that limited educational initiatives and inadequate comprehension of children's rights and online risks are key factors contributing to children’s susceptibility to exploitation.

Moreover, poverty emerged as a principal determinant in the proliferation of child exploitation. The interviewee and global sources (ILO, 2011; UNICEF, 2020) corroborated that families facing economic hardship may, often unknowingly, involve their children in exploitative online activities as a means of financial survival. These findings are further supported by international studies, which assert that financial distress often forces families to rely on the income generated by their children, thereby perpetuating cycles of exploitation and abuse. These issues are particularly exacerbated in disaster-affected or conflict zones, where displacement and the lack of stable educational or legal frameworks place children at heightened risk of exploitation (BCN, 2023).

The recurring theme across broader reports is the systemic and deeply rooted crisis of online child sexual exploitation (OCSE) in the Philippines, fueled by poverty, technological misuse, and familial betrayal. At the core of the problem is economic desperation: poverty drives families sometimes even the children's own parents to commodify their children by selling explicit content online to foreign buyers. Financial need overpowers familial bonds, leading to a heartbreaking reality where 74% of perpetrators are relatives or close acquaintances. Technology, while offering connection and opportunity, has also been weaponized; platforms like Facebook and Telegram are increasingly used for trafficking activities, often unregulated and unchecked. The rise of artificial intelligence (AI) further complicates detection efforts by enabling the creation of fake but disturbingly realistic child abuse material.

The COVID-19 pandemic and subsequent lockdowns exacerbated these problems, increasing internet usage and leaving vulnerable families with even fewer resources, thus amplifying exploitation. As a result, the Philippines now ranks second globally in reported cases of OCSE, according to the International Justice Mission (IJM) and the Department of Information and Communications Technology (DICT). Despite some successful rescue operations and international collaborations, the overwhelming scale of the issue highlights the urgent need for stronger policies, better enforcement, technological safeguards, and global cooperation. Ultimately, this crisis is not merely a law enforcement issue it is a humanitarian, economic, and moral emergency that demands deep, systemic change.

The psychological and emotional consequences of online exploitation were another critical aspect raised in the interview. The social worker noted

that involvement in online exploitative activities could profoundly damage a child's mental health, emotional stability, and sense of self-worth. Common outcomes of such exploitation included trauma, anxiety, and depression, alongside a pervasive fear of judgment and social stigma. This fear often led children to conceal their experiences from their caregivers, teachers, or other trusted adults, further intensifying their isolation and vulnerability. These findings aligned with existing literature, which indicated that children exposed to labor exploitation or online abuse frequently suffered from long-term psychological distress that extended into adolescence and adulthood, affecting their relationships, academic performance, and overall well-being (UNICEF; BONYAN, 2024). Furthermore, children in these circumstances were also at risk of physical and verbal abuse, particularly when exploitation occurred in unsafe, unregulated, or concealed environments where protective supervision was absent.

In terms of local interventions, the interviewee outlined several community-based strategies that had been implemented to address these concerns. These initiatives included the distribution of educational materials to families and schools, direct interventions by social workers and barangay officials, and the promotion of child-centered activities designed to reduce excessive screen time while fostering healthy social interaction and emotional development. In addition, community orientations and informal discussions were conducted to help parents better understand digital risks and recognize early warning signs of online exploitation. Such initiatives aimed not only to prevent exploitation but also to create safe and supportive spaces where children could express themselves, build trust with adults, and seek help

without fear of stigma or punishment. These grassroots efforts resonated strongly with global literature, which emphasized the importance of multi-sectoral collaboration, enhanced community education, and the strengthening of government and non-government programs as essential components of a comprehensive response to child exploitation (ECLT, 2025; Bonyan Organization, 2024). However, it was acknowledged that many of these programs, particularly at the local level, remained in the early stages of development and had yet to achieve broad coverage, long-term sustainability, and consistent effectiveness across communities.

Finally, both the interview data and the academic literature underscored the urgent need to enhance public awareness of children's rights and the support systems available to them. The local social worker emphasized the importance of educating both children and their parents about their rights, the potential dangers of online environments, and the appropriate channels for reporting abuse and seeking assistance. This perspective was echoed in global reports, which suggested that widespread and culturally sensitive awareness campaigns, improved access to quality education, stricter and more consistent law enforcement, and the development of robust family- and community-based support systems were critical in addressing and ultimately eradicating child exploitation. Together, these findings highlighted the necessity of a holistic and sustained approach one that integrates prevention, protection, and recovery measures to effectively safeguard children in the digital age and ensure their long-term well-being.

Literature Matrix

Table 1. Literature Matrix

Author	Title	Year	Method / Key Findings
ECLT	Why Does Child Labour Happen? Here Are Some of the Root Causes	2025	Poverty and harmful social norms drive child labor; community-based solutions are needed.
Better Care Network	Child Exploitation	2025	Child trafficking targets vulnerable children; prevention requires birth registration, education, and safe reintegration.
CPD Online (Louise Woffindin)	The Psychological Impact of Criminal Exploitation on Young Victims	2025	Exploitation causes severe psychological harm including trauma, anxiety, depression, and PTSD.
Knipschild, Covers & Bicanic	From Digital Harm to Recovery: A Multidisciplinary Framework for First Aid after Online Sexual Abuse	2025	Proposes a victim-centered framework for safety, medical care, content removal, and psychological support.
Walker Epps, S.	Opinion: Predators are getting bolder. Here's what we can do to protect children	2025	Highlights CSAM and sextortion risks; emphasizes early safety education and community action.
Nazley et al.	Social media's impact on adolescents through 2D animation	2024	Qualitative findings show animated narratives effectively raise mental health awareness among adolescents.
Karmakar et al.	Animation and gamification for environmental awareness	2024	Review shows animation and gamification emotionally engage audiences and support behavior change.
Bonyan Organization	What is Child Labor?	2024	Hazardous child labor is rising globally, worsened by COVID-19, especially in Africa.
Montemayor, T.	Filipinos cautioned vs. AI-generated child sexual exploitation materials	2024	AI increases CSAM risks, requiring proactive legal and technological regulation.
AFP (Australian Federal Police)	Six children removed from harm in the Philippines following international investigation	2024	International AFP–PNP collaboration led to child rescues from online exploitation.

Dulawan & Bance	Trauma and Related Psychological Outcomes of Adult Survivors of OSAEC in the Philippines	2024	Adult survivors suffer long-term mental health effects and require specialized intervention.
International Justice Mission Philippines	Aftercare of OSEC Survivors: Why Trauma-Informed Care Matters	2024	Trauma-informed care is essential to prevent retraumatization and support recovery.
Rahman	2D animation for raising awareness on textile pollution	2023	Animation combined with surveys increased awareness and sustainable consumption intent.
Save the Children Philippines	Students Actively Campaign Against Online Sexual Abuse and Exploitation of Children	2023	Youth-led advocacy empowered students and supported the passage of RA 11930.
IJM	1 in 100 Children Sexually Exploited in Livestreams	2023	Nearly 500,000 Filipino children trafficked for livestreamed CSEM, most under 12.
ECPAT, INTERPOL, UNICEF	Protecting children in the Philippines from online sexual exploitation and abuse	2023	Despite laws, 20% of teens experience OCSEA-related harm.
Bureau of International Labor Affairs	Child Labor and Forced Labor Reports	2023	New OCSEA coordination centers exist, but law enforcement gaps remain.
IJM	Four Convicted in Philippines for Online Sexual Exploitation of Children	2023	Court convictions show progress; over 1,000 victims rescued nationwide.
Sopyan	Child Exploitation by Parents in Early Marriage	2023	Poverty drives early marriage; stricter regulation and education recommended.
UNICEF	What is Child Labour?	2023	160 million children are in labor globally; urgent protection of education and rights needed.
March, S.	Inside the global task force fighting child sex abuse in the Philippines	2023	International task forces collaborate with PH police to combat online exploitation.
UNICEF	Addressing Technology-Facilitated Child Sexual Exploitation and Abuse in the Face of COVID-19	2023	COVID-19 increased online exploitation risks and altered abuse patterns.
El-Aasy	Use of Adobe Animate for 2D awareness ads on Facebook	2022	Experimental surveys show 2D animation boosts community awareness and action.

ECPAT International	Disrupting Harm: Online Child Sexual Exploitation and Abuse in the Philippines	2022	Poverty, low digital literacy, and poor supervision are major risk factors.
Rafsanjani, J.	Legal Protection of Kid Influencers from Child Exploitation	2022	Kid influencers face exploitation risks; stronger legal protections are needed.
Barlow et al.	Circles of Analysis: A Systemic Model of Child Criminal Exploitation	2022	Child exploitation requires integrated, multi-sector protection strategies.
Chang et al.	Child Trafficking and Exploitation: Historical Roots, Preventive Policies, and the Pediatrician's Role	2022	Pediatricians play a key role in trafficking prevention despite systemic barriers.
Chiu & Quayle	Understanding online grooming	2022	Grooming manipulates trust and emotions to exploit adolescents.
IACAT	National Plan of Action Against Trafficking in Persons	2022	Five-year national plan strengthens prevention and response mechanisms.
ECPAT, INTERPOL, UNICEF Innocenti	Disrupting Harm: End Violence Against Children	2022	Describes patterns and prevalence of technology-facilitated child sexual abuse.
UNICEF	The Role of Digital Technology in the Sexual Abuse and Exploitation of Children	2021	Technology both enables abuse and offers prevention opportunities.
IACAT	National Plan of Action Against Trafficking in Persons	2021	Government–NGO collaboration enhances anti-exploitation efforts.
IJM	TikTok launch campaign to drive community reporting vs. OSEC	2021	Social media campaigns increased reporting and awareness of OSEC.
Benavente et al.	Commercial Sexual Exploitation of Children and Adolescents in Europe	2021	Europe lacks sufficient CSEC research and training frameworks.
ILO	(No title)	2021	Child labor persists due to poverty and education barriers.
Simon et al.	Thirty Years of the Convention on the Rights of the Child	2021	CRC progress is slow due to weak monitoring and enforcement.
Dąbrowska, A.	Rethinking Terminology in Child Protection Discourse	2021	Recommends replacing outdated terms with “CSAM.”

UNICEF	Ending online child sexual exploitation and abuse	2021	Community education and stronger laws reduce exploitation risks.
Muhammad & Tummala	Progress in child protection 30 years after the CRC	2021	Protection gaps persist due to weak policy enforcement.
Aditya & Waddington	Legal Protection Against Child Marriage in Indonesia	2021	Enforcement of anti-child marriage laws remains inconsistent.
Gleason & Cockayne	Official development assistance and SDG target 8.7	2021	Funding gaps hinder global anti-exploitation efforts.
ECPAT International	Disrupting Harm: Online Child Sexual Exploitation and Abuse in the Philippines	2021	Confirms high exploitation rates linked to poverty and digital illiteracy.
Wickramasinghe	Use of 2D animation in higher education	2020	Experimental method shows 2D animation improves engagement and comprehension.
SaferKidsPH	Keeping Filipino Children Safe Online	2020	Community and parental involvement are critical for online child safety.
Hunn et al.	Why Internet Users' Perceptions of Viewing CSEM Matter	2020	Many users lack awareness that viewing CSEM is a crime.
Laird et al.	Demographic and Psychosocial Factors Associated with CSE	2020	Trauma and risky behaviors are major exploitation risk factors.
Elshenraki, H. N.	Combating the exploitation of children in cyberspace	2020	Online exploitation requires legal, technological, and social collaboration.
UNICEF	New campaign SaferKidsPH	2019	National campaign highlighted widespread OSAEC cases.
Republic of the Philippines	Anti-Online Sexual Abuse and Exploitation of Children Act (RA 11930)	2019	Establishes stronger legal measures against OSAEC.
Foundation for Media Alternatives	Cybercrime and Human Rights	2019	Examines human rights concerns in the Cybercrime Prevention Act.
Netkova & Mustafa	International legal standards in combating child online sexual abuse	2018	Stresses the need for unified international child protection laws.

Conceptual Framework

The figure below presented the conceptual framework that guided the development of the digital awareness campaign, Alingawngaw, focused on online child exploitation, specifically grooming. The process began with gathering information through interviews, online news and documentaries, and scholarly articles obtained from the internet, which served as credible sources for developing storytelling strategies and techniques. It then progressed to the creative phase, which involved the design of storylines, script drafting, character and scenario development, and the integration of visual sequences with synchronized voice-over to produce cohesive and engaging material. The result of these efforts was a completed 2D short film on OSAEC, thoroughly refined and made ready for viewing. This framework supported the project's goal of raising awareness, educating children and parents, and encouraging community action to prevent online child exploitation.

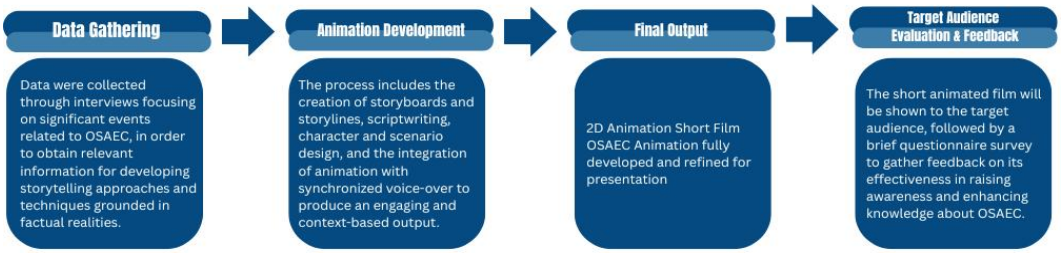

Figure 1. The Conceptual Framework

CHAPTER III

METHODOLOGY

This chapter presents the research methodologies used in the study. It includes the project design, sampling design, population of the study, data gathering, instrument used, and the data analysis technique. The study aims to collect information about online child exploitation to guide the development of a proposed campaign awareness video.

Project Development

The development of the campaign video followed three main stages. In the pre-production stage, the researchers reviewed literature on OSAEC, created the storyline, wrote the script, and produced the storyboard using Procreate. During the production stage, characters and scenes were illustrated in Procreate and animated using Procreate Dreams, while CapCut was used to compile the footage, add audio, and finalize the video. In the post-production stage, revisions were made to improve clarity, visuals, and pacing. The completed 2D animated video was then evaluated by Grade 7 students to assess its effectiveness in raising awareness about online grooming and overcoming trauma caused by online child exploitation.

Project Design

The creation of an animated film about Online Child Exploitation begins with gathering relevant articles, documentaries, and videos to ensure that the content is accurate and aligned with real cases. Using these references, the researchers developed a clear storyline and a linear narrative featuring seven characters. Visual designs, character illustrations, and storyboards were created using Procreate, while the animation was produced in Procreate

Dreams. Finally, CapCut was used to edit, arrange, and finalize the animated scenes into a complete campaign film.

Animation Development Model

This figure illustrates the Animation Development Model used for creating a 2D animated short film. It outlines the step-by-step process, starting from gathering information, drawing characters, and writing the story (Pre-Production), followed by animation and layout work (Production), and finally voice recording, sound editing, and publishing (Post-Production). This model provides a clear and organized workflow for producing an animated short film.

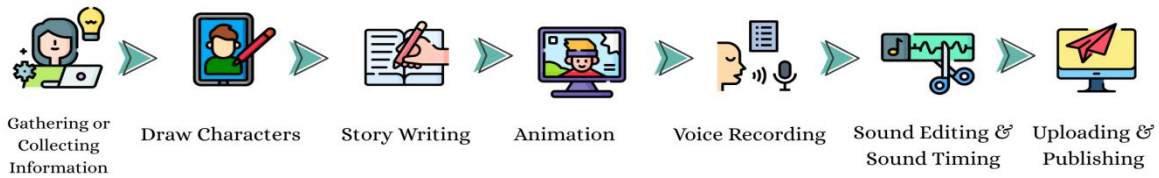

Figure 2. Animation Development Model

Data Collection Instrument

The study used two instruments to gather data. First, an interview guide with open-ended questions was conducted to collect in-depth information on OSAEC and CSAEM, including victimization patterns, challenges in addressing the issue, and existing programs by the DSWD. Second, a TAM-based questionnaire was administered to Grade 7 students after viewing the 2D animated campaign video. This instrument measured Perceived Usefulness, Perceived Ease of Use, Aesthetic Quality, and Behavioral Intention to Use, providing data on the video's effectiveness, clarity, engagement, and educational impact.

Statistical Treatment of Data

The Likert scale was used to measure the TAM constructs in this study, such as perceived usefulness, ease of use, attitude, and intention to use. Each item was rated from 1 (Very Low) to 5 (Very High). After getting the mean score for each TAM variable, the values were interpreted using the score ranges in the table. Higher mean scores indicate a higher level of acceptance of the campaign video or animation based on TAM. This helps determine whether the material is effective, easy to understand, and likely to influence behavior or intention.

Table 2. Likert Scale

Scale	Range of Scores	Verbal Interpretation
Very High	4.50 - 5.00	Very High
High	3.50 - 4.49	High
Moderate	2.50 - 3.49	Moderate
Low	1.50 - 2.49	Low
Very Low	1.00 - 1.49	Very Low

Respondents of the Study

TAM served as a theoretical lens for analyzing how individuals responded to technological and media-based interventions. In this study, it was utilized to evaluate the effectiveness of an animated awareness campaign addressing the risks of online child exploitation. The model provided a comprehensive structure for assessing how participants interpreted the material in terms of its clarity, relevance, and capacity to encourage behavioral change.

A total of thirty (30) respondents participated in the evaluation. These participants, composed of students who actively used digital platforms, provided insights that were gathered through a structured survey designed to capture their perceptions of the animation's design, message delivery, and potential impact on awareness-building. The assessment was organized around seven core dimensions of TAM: Perceived Usefulness, Perceived Ease of Use, Attitude, Behavioral Intention, Perceived Cost, Intention to Adopt, and Social Influence. Together, these categories provided a multidimensional understanding of how audiences engaged with the material.

For instance, the dimension of Perceived Usefulness reflected whether viewers believed the video increased their knowledge and equipped them with strategies to safeguard children, while Social Influence revealed how acceptance of the campaign was shaped by peers, family, or community attitudes.

Responses were measured using a 5-point Likert scale, allowing participants to indicate their level of agreement with carefully crafted statements related to the animation's quality, accessibility, and overall impact. This approach ensured that results were quantifiable and systematically comparable, strengthening the validity of the analysis.

Table 3. Likert Scale

Respondents	**Number of Respondents**
High School Students	30
Total	30

Figure 3 presents the TAM, which explains how users adopt technology. External variables influence users' perceived usefulness and perceived ease of use. These perceptions affect the user's attitude toward using the system, which then influences their behavioral intention to use it. A stronger intention leads to actual system use.

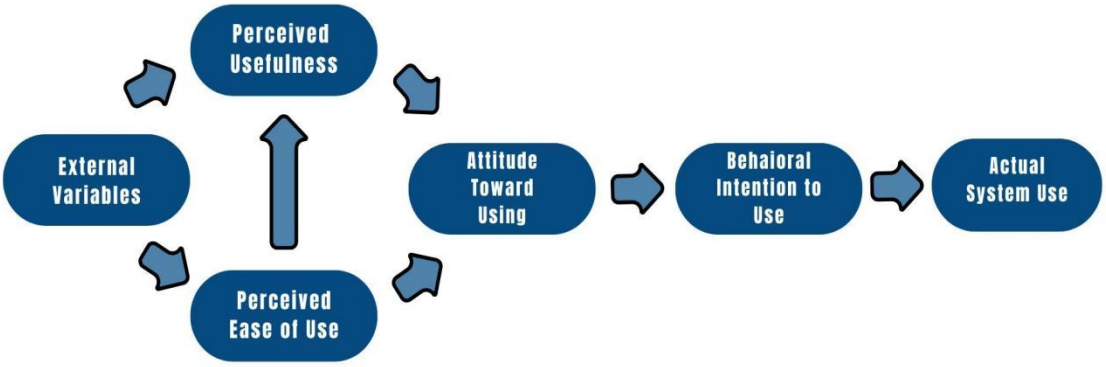

Figure 3. Technology Acceptance Model

The reliability analysis using Cronbach's Alpha demonstrated that all constructs based on the TAM exhibited acceptable to excellent internal consistency. Perceived Usefulness (α = 0.719) and Behavioral Intention to Use (α = 0.760) showed high reliability, while Perceived Ease of Use (α = 0.838), Aesthetic Quality (α = 0.830), and Perceived Enjoyment (α = 0.844) demonstrated very high reliability. Attitude Toward Use recorded the highest score (α = 0.871), also indicating very high reliability based on the set scale. Since all alpha values exceeded the 0.70 threshold, the TAM-based questionnaire is considered highly reliable and appropriate for further statistical analyses within the study.

Table 4. Cronbach's Alpha

VARIABLE	CRONBACH'S ALPHA	INTERPRETATION
Perceived Usefulness (PU)	0.719	High
Perceived Ease of Use (PEOU)	0.838	Very High
Aesthetic Quality (AQ)	0.830	Very High
Perceived Enjoyment (PE)	0.844	Very High
Attitude Toward Use (ATU)	0.871	Very High
Behavioral Intention to Use (BIU)	0.760	High
Overall Score	0.810	Very High

≥ 0.90 = Excellent, 0.80–0.89 = Very High, 0.70–0.79 = High, 0.60–0.69 = Moderate, < 0.60 = Poor

Sampling Design

This study used a purposive sampling design, selecting respondents who fit the criteria needed to evaluate the campaign video. Grade 7 students were chosen because they represent the age group most vulnerable to online risks and are the primary audience of the animated film. The sample was limited to one class or section, depending on availability, to gather focused and relevant feedback that would help assess the video's clarity, message delivery, and overall effectiveness in raising awareness about online child exploitation.

Population of the Study

The population of this study consisted of Grade 7 students from a selected school in Los Baños, Laguna. They were chosen as the primary respondents because the campaign video was designed to raise awareness among young adolescents about online child exploitation, how predators approached children, and how these experiences could lead to trauma.

Parents remained secondary beneficiaries, but the evaluation and feedback for the video focused on Grade 7 students as the main audience.

Data Analysis

This study used a qualitative approach to analyze data gathered from an interview and several real-life documentaries and videos related to online child exploitation. Thematic analysis was used to identify recurring ideas, patterns, and insights from these materials. The results of this analysis helped the researchers develop a storyboard and script for the future campaign awareness video. These creative outputs aim to reflect real issues and promote awareness and prevention of online child exploitation.

Gathering Information and References

Information gathering was a vital component in the development of an effective advocacy campaign. References, which included articles, papers, documentaries, and news reports, helped ensure the accuracy of the data obtained from the interview used by the researchers. The goal of this study was to raise awareness among youth about the risks and realities of online child exploitation. It also aimed to educate the public on available preventive measures, reporting mechanisms, and the importance of protecting youth in the digital world.

Draw Characters

Character creation is then carried out with careful attention to detail. Figures are deliberately designed to embody themes of safety, vulnerability, and empowerment while avoiding harmful stereotypes. Visual attributes such as clothing, gestures, and expressions are chosen to reflect the intended

message and to connect meaningfully with the target audience, whether they are children, parents, or educators.

Story Writing

A structured storyline conveys both the risks of online child exploitation and the importance of preventive measures. This stage balances clarity and emotional engagement, ensuring that the message is strong yet appropriate for diverse audiences. The narrative functions not only as a medium of information but also as a tool for building empathy and encouraging proactive responses.

Animation

Animation production transforms static designs into dynamic visuals. Motion, timing, and visual emphasis are used strategically to create impact and sustain audience attention. Through animation, complex and abstract concepts surrounding online exploitation are communicated in a way that is both accessible and memorable.

Voice Recording

Enriches the project by adding tone, emotion, and relatability to the content. Appropriate delivery helps reinforce the seriousness of the topic while making the material engaging and understandable. This is complemented by sound editing and synchronization, where music, dialogue, and sound effects are refined to strengthen atmosphere and coherence. Proper sound design ensures that the auditory experience supports, rather than distracts from, the educational message.

Sound Editing & Sound Timing

This stage involves refining dialogue, narration, music, and sound effects to achieve clarity and coherence, ensuring that each auditory element aligns with the intended emotional tone. Careful synchronization between sound and visuals strengthens the audience's immersion, guiding their focus toward key moments in the narrative. Properly executed sound design not only heightens engagement but also reinforces the seriousness of the subject matter, allowing sensitive issues such as online child exploitation to be communicated with greater effectiveness and resonance.

Uploading and Publishing

Strategic distribution ensures that the animation reaches audiences most in need of awareness, including communities, schools, and advocacy networks. By making the material widely accessible, the project fulfills its goal of raising awareness, promoting vigilance, and contributing to collective action against online child exploitation.

a. Materials

Refers to the collection of resources, tools, and references required in the animation workflow. These may include both tangible and digital components that provide the technical and creative support necessary to carry out each stage of production efficiently.

b. Scriptwriting

Defined as the process of formulating the storyline of an animation, covering dialogue, narration, and scene directions. It functions as the narrative backbone that ensures consistency in plot development while guiding both the creative and technical aspects of production.

c. Sketches

Considered as initial visual studies that illustrate early concepts of characters, backgrounds, and key sequences. These drawings serve as planning instruments that allow experimentation and refinement before proceeding to full-scale animation.

d. Sound-Production

Encompasses the creation and integration of auditory elements such as voice recordings, sound effects, and music. By enhancing mood, rhythm, and emotion, this stage ensures that the animation resonates with its intended audience and complements the visual narrative.

e. Post-Production

Pertains to the finalization phase where all visual and audio components are merged into a polished whole. Editing, synchronization, compositing, and rendering are carried out to achieve a professional-quality animated output ready for presentation or distribution.

Script

Habang ang mga bata ay nag lalaro ng takbuhan sa kalsada, si Leila ay tahimik at nakangiting nag dodrawing sa isang tabi.

Yanna:Hi, Leilaaa, tara sali ka saamin!

Leila: Pass muna me, tingnan mo o nag dodrawing ako di ba?

Yanna: bahala ka nga jan, hmp!

Natatawang bumalik si Leila sa pagdodrawing. At bumalik naman ang kaibigan niya sa paglalaro.

Kinagabihan habang nakahiga si Leila sa kama niya ay may nag add sa kanya na anime ang profile at ang pangalan nito ay Jake, binuksan niya ang profile ng nag add at namangha siya sa mga drawing nito. Maya maya pa ay tinanggap niya ito bilang friend sa fb. Wala pang ilang minuto ay nag chat agad ito sa kanya.

Jake: Hi

“Ang ganda ng mga drawing mo”

“Ako nga pala si Jake, 15 years old”

Leila: Hello

“Ang gaganda rin kaya ng drawing mo”

“Pareho tayo 15 years old din ako”

Jake: Pede ba tayo maging friends?

“Wala kasi akong friends”

“Pero secret lang natin ha, nahihiya kasi ako”

Leila: Hala

“Bat naman wala kang friends?”

“Sige na friends na tayo”

Jake: Mahiyain nga kasi ako hehe

Umaga na at nag aalmusal na si Leila pero nakatutok parin siya sa cellphone niya, habang ang Mama niya na si Jena ay nagkakape sa harap niya.

Jena: Anak, kumain ka muna bago mag cellphone, itatago ko yan sige.

Mabilis na tinago ni Leila ang cellphone niya at mabilis na kumain. Napatingin naman si Jena sa balita sa TV.

Reporter: “Patuloy ang pagtaas ng kaso ng online sexual exploitation ng mga bata sa bansa. Maraming insidente ang nagsisimula lamang sa simpleng pakikipag-chat sa internet, ngunit nauuwi sa mas malalang pang-aabuso.” “Ayon sa National Center for Missing & Exploited Children o NCMEC, nakatanggap sila ng mahigit pitong libong ulat sa loob lamang ng dalawang taon kaugnay ng maling paggamit ng Generative Artificial Intelligence o GAI. Sa pamamagitan ng teknolohiyang ito, nagagawa ng ilang indibidwal ang pekeng larawan at video ng mga bata na ginagamit para sa panlilinlang, pangha-harass, at pang-aabuso. Hindi lamang ito banta sa kaligtasan ng mga bata, kundi nagdudulot din ng matinding trauma at emosyonal na pinsala sa kanila at sa kanilang pamilya.”

“Dahil dito, nananawagan ang mga eksperto sa publiko na maging mapanuri at responsable sa paggamit ng internet. Huwag makisangkot, iwasan ang pagbabahagi ng kahina-hinalang nilalaman, at agad i-report sa mga otoridad upang maprotektahan ang kabataan laban sa panganib ng maling paggamit ng teknolohiya.”

Jena: Ayan, kaya wag kang puro cellphone jan ha.

Hapon na at kausap agad ni Leila si Jake sa chat kahit kakauwi palang nya galing sa school.

Jake: Hi Good Morning.

Leila: Hello, good morning din

"May mga bago akong drawing"

"Pakita ko sayo mamaya"

Jake: Sige irerate ko

Leila: Dapat honest rate ha.

Jake: Alam mo masaya ka kausap.

"Ganito pala feeling ng may friend"

Leila: Haha.

"Ako madami akong friend"

"Gusto mo ipakilala kita sa kanila?"

Jake: Nako wag na

"Ok na sakin isang kaibigan"

"Pati di ba sabi ko sayo secret lang natin ito?"

Leila: Ikaw bahala

"Masaya pamandin pag madami kang friends"

Jake: "Ok na ako sa isang kabigan"

Jake: Kita kaya tayo minsan??

"tas drawing tayo?"

"Secret lang natin yun ha"

"sige ka magagalit ako pag sinabi mo sa iba"

Leila: baka magalit sakin si mama eh

Jake: Luh 15 ka na kaya, malaki ka na

Leila: Di pa naman kita pati ganon kakilala

"Next time nalang ha?"

Jake: Hmm

"Wait lang"

"May ipapakita ako sayo"

Sent a photo

Nanlaki ang mga mata ni Leila, wala siyang sinesend na picture kay Jake pero mahilig siya mag post ng picture niya sa facebook.

Jake: Wag mo sasabihin sa mama mo ha?

" Ipopost ko talaga to"

"Sige na kita na tayo"

"Friend naman na tayo eh"

"reply naman oh"

"pag di ka nag reply eedit pa kong marami"

"Leila kita na tayo pls..."

"Pumayag ka na pls..."

"Di talaga nag rereply, ipopost ko talaga to."

"Huy"

"Leila di ako nagbibiro"

"Bahala ka popost ko na to"

"Sige ka ikaw din."

Ibinaba niya ang cellphone niya sa kama at humagulgol. Ilang oras din umiyak si Leila hanggang sa tawagin siya ng Mama niya.

Jena: Anak kakain na

Sigaw ni Jena mula sa labas ng kwarto ni Leila ngunit nagtaka si Jena ng di sumagot si Leila. Kaya naisipan niyang pumasok sa loob ng kwarto. Naabutan niyang nakadapa si Leila sa kama at umiiyak.

Jena: Anak ko, bakit? May problema ba?

Hindi sumasagot si Leila at tuloy lang sa pag iyak. Napatingin si Jena sa cellphone ni Leila na tunog ng tunog kaya kinuha niya ito at binuksan.

Jena: Jusko anak ano ito.

Leila: Mama akala ko mabait siya huhuhuhu

Jena: Irereport natin ito anak, wag ka mag alala.

“Wag kang matakot sa kaniya”

“Andito lang ako nak”

Kinabukasan sa Police Station ay kinausap ni Jena ang isang pulis. At ipinakita ang pag uusap ni Leila at Jake.

Jena: Ayan po lahat ng mga sinabi niya sa anak ko at mga picture na inedit niya!

Pulis: Buti po ay nalaman niyo agad

“Ganito po may plano po ako, kung okay lang sa inyo Maam?”

Jena: Ano po ba ang plano niyo?

Pulis: Ichat niyo po siya gamit ang account ng anak niyo at kunware ay kayo po si Leila. Sabihin niyo na payag kayong makipag kita sa kaniya. Basta't wag niyang ikakalat ang mga litrato ni Leila na edited.

"Wag po kayong mag alala kasama niyo po ako, hindi po kayo mapapahamak sa plano na ito."

Sinunod ni Jena ang plano ng pulis at nag panggap siyang si Leila para mahuli ang mapang abusong kausap ng anak niya.

“slr”

“Sige na nga payag na ako, kita tayo bukas”

“Basta wag mo ipopost ang mga picture na yan”

Jake: Ayon

“Kala ko kinalimutan mo na ako eh”

Kinaumagahan.

Jake: Andito ako sa may nagtitinda ng ice cream.

"San ka?"

"Lilibre kita."

Napatingin sila sa Lalaking naka sumbrero at papunta ito sa nag titinda ng ice cream.

Leila: Mama baka magalit sya

Jena: Anak wag kang matakot makukulong na ang taong yan.

Maya maya pa ay nilapitan na ng mga pulis ang lalaki at confirmed na si Jake ito. Makalipas ang ilang araw. Simula nung mahuli ang nang abuso kay Leila ay madalas siyang na-attend sa seminar sa Barangay tungkol sa OSAEC.

Social Worker: “Mga kabataan, makinig kayo. Sa panahon ngayon, hindi lahat ng tao sa internet ay totoo sa sinasabi nila. Huwag basta-basta magtiwala, lalo na sa mga taong hindi niyo kilala. Kahit pa magpanggap silang mabait o parang kaibigan, tandaan puwedeng ginagamit lang nila ito para linlangin kayo at makuha ang inyong tiwala.”

“Kung may magpadala sa inyo ng mensaheng kahina-hinala, humihingi ng litrato o video, o nagpaparamdam ng hindi maganda agad na i-block at i-report. Huwag ding i-share ang inyong personal na impormasyon gaya ng address, school,o contact number. Gamitin ang social media nang may pag-iingat: i-set sa private ang inyong account at piliin kung sino lang ang makakakita sa mga post ninyo.”

“At kung sakaling may magbanta, manakot, o gumamit ng inyong litrato o video para i-blackmail kayo huwag matakot at huwag itago sa sarili. Ang pinakamahalaga ay magsabi agad sa magulang, guro, o sa taong

pinagkakatiwalaan ninyo. Tandaan ninyo: wala kayong kasalanan. Ang mali ay nasa taong nananakit at nang-aabuso.”

“May mga organisasyon na handang tumulong tulad ng PNP Women and Children Protection Center, DSWD, at mga NGO gaya ng SaferKidsPH at Child Rights Network. Maaari ring tumawag sa 1343 Actionline Against Human Trafficking o sa Bantay Bata 163 kung kailangan ninyo ng tulong.”

“Para naman sa mga nakaranas na ng ganitong pang-aabuso tandaan, may pag-asa at may mga taong handang makinig. Hindi madali ang paghilom, pero puwedeng magsimula sa paglapit sa counselor, social worker, o sa mga support group na tumutulong sa mga survivor ng OSAEC. Dahan-dahan, matutulungan kang bumalik ang tiwala sa sarili at maramdaman ulit ang kapayapaan.”

“Huwag kalilimutan: hindi kayo nag-iisa. May mga magulang, guro, social worker, at buong komunidad na handang kumampi at magprotekta sa inyo. Ang inyong kaligtasan at kinabukasan ay napakahalaga kaya maging maingat, mapanuri, at laging tandaan na may karapatan kayong maging ligtas, marinig, at mapangalagaan.”

Characters Design

It is an artistic and systematic process that involves developing a figure's appearance, personality, and identity to effectively communicate their role within a narrative or project. This process goes beyond simple illustration, requiring thoughtful consideration of physical traits, clothing, gestures, expressions, color palettes, and symbolic elements that reveal the character's background, emotions, and motivations. Through this method, abstract ideas and written descriptions are transformed into concrete and relatable representations that audiences can easily understand. In studies addressing online child exploitation, such an approach becomes significant in portraying sensitive issues with clarity and responsibility, ensuring that visual outputs raise awareness without causing further harm or misrepresentation.

Leila is a shy and creative 15-year-old girl who finds comfort in drawing and expressing herself through art. She prefers spending time alone, quietly sketching in her room, rather than playing outside or socializing with others. Because she is innocent, trusting, and very active on social media, she becomes especially vulnerable to online grooming. In the story, Leila unknowingly befriends an online predator who slowly gains her trust through constant attention and emotional manipulation. What begins as a harmless online friendship eventually turns into a dangerous situation, leading to

manipulation and blackmail. Her experience highlights how easily minors can be targeted and exploited in digital spaces, especially when they lack awareness and guidance about online safety.

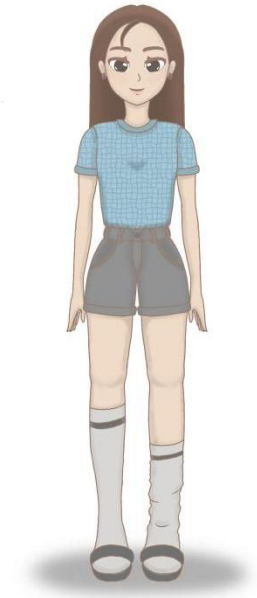

Figure 4. Character Leila

Yanna is Leila's cheerful, outgoing, and supportive friend who represents a typical teenage peer relationship. Unlike Leila, she is more social and expressive, often encouraging her friend to open up and enjoy simple moments of friendship. Her presence provides a clear contrast to Leila's introverted personality, highlighting their different ways of coping and connecting with others. Through Yanna's interactions with Leila, the story emphasizes that even children who have friends and support systems are not immune to online manipulation and exploitation.

Figure 5. Character Yanna (Leila's Friend)

Jena is a caring, attentive, and protective mother who shares a close emotional bond with her daughter. She tries her best to guide and support Leila while respecting her independence, reflecting the real challenges parents face in balancing trust and supervision in today's highly digital world. Despite her efforts, the story shows how difficult it can be for parents to fully monitor their children's online activities, especially as social media becomes more private and accessible. When the abuse is finally discovered, Jena becomes the key figure who steps in with strength and compassion. She comforts Leila, reassures her that she is not at fault, and takes decisive action by reporting the incident to the authorities, emphasizing the importance of parental involvement, protection, and accountability in addressing online abuse.

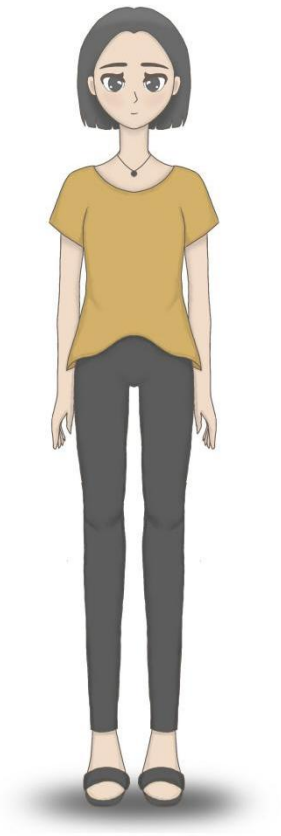

Figure 6. Character Jena (Leila’s Mother)

Jake is the antagonist of the story who disguises himself as a 15-year-old boy with interests similar to Leila’s in order to gain her trust. Behind the fake profile, he is actually an adult predator who uses stolen photos and edited images to appear convincing and harmless. He begins with friendly, casual conversations, offering attention, praise, and emotional support to slowly build a sense of connection. Over time, he manipulates Leila’s emotions, encourages secrecy, and isolates her from people she trusts. Eventually, he uses fear and blackmail to control and intimidate her. Jake’s character clearly represents the common tactics used in online grooming and exploitation, showing how predators deliberately deceive, manipulate, and prey on minors in digital spaces.

Figure 7. Character Jake (The Predator)

The Reporter, Police Officer, and Social Worker collectively represent the institutional support system that surrounds cases of Online Sexual Abuse and Exploitation of Children (OSAEC) in the story. The Reporter delivers factual information and public awareness, grounding the narrative in real-world issues and emphasizing the increasing dangers of online exploitation faced by children today. The Police Officer symbolizes the role of law enforcement in protecting minors, supporting Jena, and taking immediate, coordinated action to investigate and stop the predator. Meanwhile, the Social Worker provides guidance, education, and emotional reassurance to Leila and her family, highlighting the importance of recovery, community support, and responsible internet use. Together, these characters reinforce the message

that OSAEC is a serious and real issue that requires the cooperation of multiple sectors working together to protect children and ensure their safety.

Figure 8. TV Reporter, Police Officer and Social Worker

STORYBOARD

The storyboard of Alingawngaw visualizes a narrative that reflects the documented patterns of Online Sexual Abuse and Exploitation of Children (OSAEC) in the Philippines. As shown in various reports by IJM, UNICEF, and the PNP-WCPC, many OSAEC cases begin with online grooming through social media similar to how Leila is approached by a stranger in Scenes 2–4. The inclusion of AI-generated blackmail represents emerging digital risks highlighted in recent news articles, where manipulated images are increasingly used to coerce minors. Scenes 5 and 6 show the importance of parental involvement and immediate reporting, which aligns with studies emphasizing early intervention as a key protective factor. The depiction of police action mirrors real rescue operations carried out by the PNP-WCPC

and DSWD in actual OSAEC cases. Finally, Scenes 7 and 8 highlight barangay-level awareness programs and support systems, consistent with recommendations from SaferKidsPH and UNICEF for community-based prevention and recovery. Overall, the storyboard aims to raise awareness by portraying a realistic, research-informed sequence of events surrounding OSAEC.

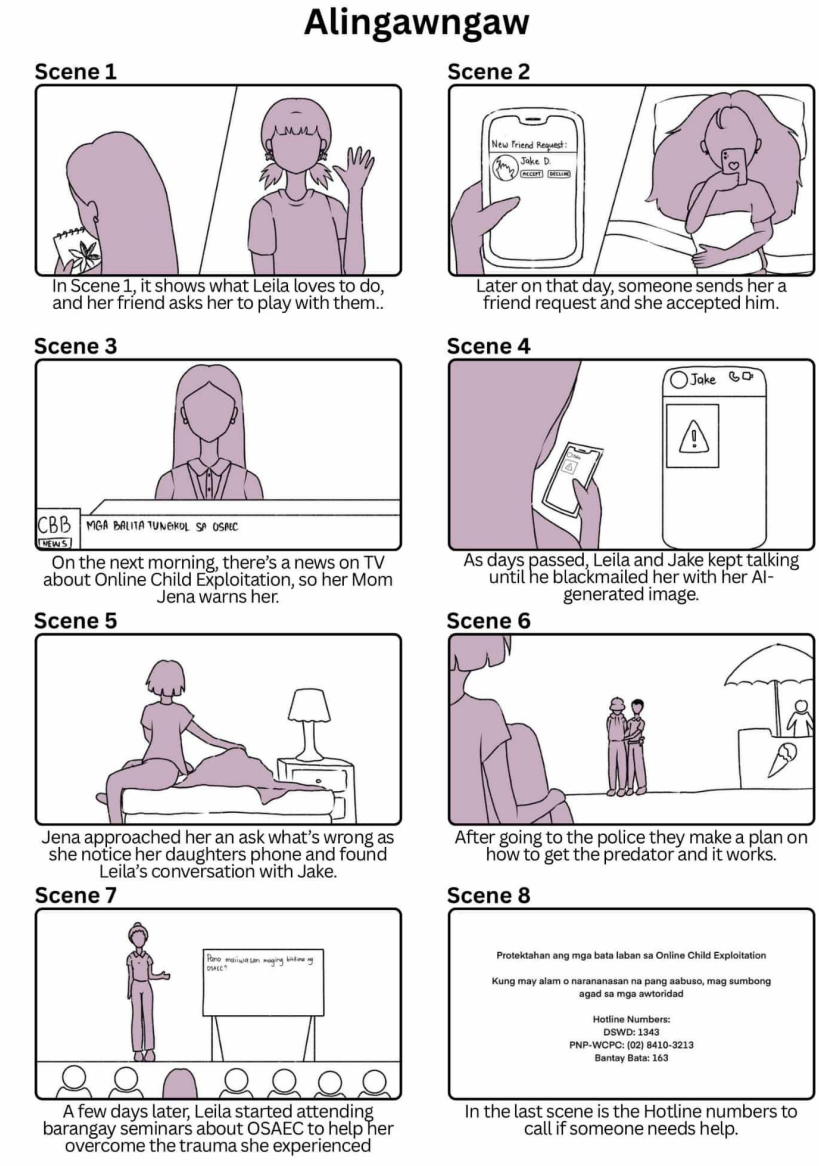

Figure 9. Storyboard

Software

A collection of digital programs and instructions that enables computers to execute processes necessary for animation, functioning as the primary platform through which creative concepts are designed, developed, and transformed into complete visual productions.

Procreate

A creative application for iOS and iPadOS that provides comprehensive tools for digital drawing, painting, and animation, widely utilized in visual arts and multimedia production for its efficiency, flexibility, and professional-quality output.

Procreate Dreams

Designed to support the entire creative workflow, offering integrated tools for drawing, motion graphics, visual effects, audio synchronization, and real-time editing, with the purpose of streamlining animation production from concept development to final output.

Capcut

Video editing application that provides tools for trimming, layering, transitions, effects, and audio synchronization. It is commonly used in multimedia and animation projects because of its accessibility and user-friendly interface.

Photoshop

A professional image editing and design software that also supports animation through frame-by-frame and timeline-based tools. It allows artists to create detailed visual elements, backgrounds, and character animations. Photoshop is widely used in animation production for enhancing graphics,

compositing scenes, and adding visual effects, making it an essential tool for digital artists and animators.

Character Animator

An animation software that brings 2D characters to life using motion capture and real-time facial tracking. It allows creators to animate characters quickly and naturally, making it ideal for interactive and live animation projects.

TextingStory

An application used to create chat-style videos that simulate text message conversations. It is often used in animation and storytelling projects to present dialogues creatively and engage viewers in a unique, conversational format.

Audacity

A free, open-source audio editing software used to record, edit, and mix sounds. It is commonly used in animation for voiceovers, sound effects, and background music production.

Hardware Specification

The specified hardware configuration demonstrates a well-rounded and efficient setup suitable for both productivity and everyday use. It comprises a performance-oriented laptop, a versatile pen tablet for creative tasks, and a dependable smartphone with expandable storage capabilities. This combination of devices provides the necessary functionality, flexibility, and mobility essential for handling various technical and creative tasks effectively.

CHAPTER IV

RESULTS AND CONCLUSION

This chapter presents the results of the study and summarizes the conclusions drawn from the evaluation of the project *“Alingawngaw: A Campaign Awareness Video on Online Child Exploitation.”* The findings are organized according to the specific objectives of the study.

RESULTS BY OBJECTIVES

Developed 2D film to raise awareness on Online Child Exploitation

The animated video effectively raised awareness about online child exploitation by presenting a clear sequence of events that showed how grooming begins, escalates, and can be stopped through timely reporting. The story opens with Leila (a) enjoying her hobby of drawing, establishing her innocence and interests. This is followed by Jake sending a friend request (b) and quickly introducing himself (c), using friendliness and sympathy claiming he has no friends to gain Leila’s trust (d). A TV report about online exploitation (e) appears early in the story as a warning sign, reinforcing the educational aspect of the video. As the grooming escalates, Jake pressures Leila to meet in person (f) and later blackmails her with edited photos (g), showing viewers how predators use manipulation and coercion.

The later scenes highlight the emotional and safety responses to online exploitation. Leila experiences fear and trauma (h), which raises awareness about the psychological impact on victims. Her mother discovers the situation (i), leading them to report the case to the police (j). Working together, her mother pretends to be Leila (k), resulting in the predator’s arrest (l). Finally, Leila attends community seminars (m) to recover and learn more about

protection. These scenes collectively demonstrate the full cycle of grooming from trust-building to manipulation, reporting, and healing thereby achieving the objective of educating viewers about online child exploitation and the importance of responding quickly and safely.

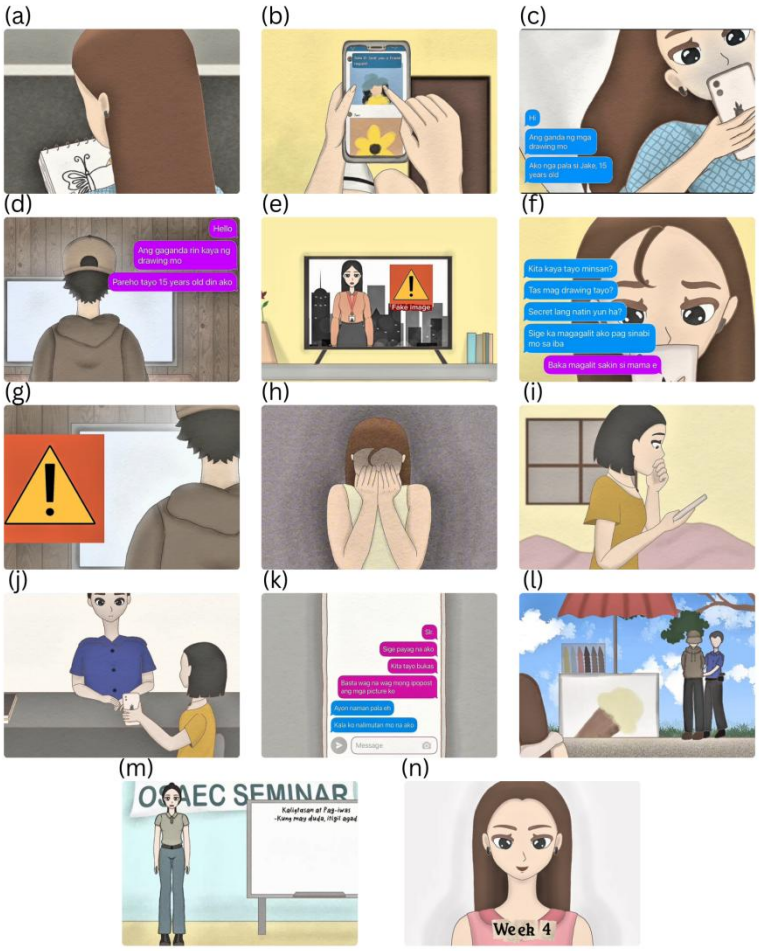

Figure 10. Scenes

Evaluated the video using TAM

TAM was used to measure the video's effectiveness in terms of clarity, usefulness, engagement, and enjoyment. Respondents rated the video positively, noting it was easy to understand, informative, and emotionally impactful. Open-ended feedback highlighted that the animation encouraged viewers to be cautious online and sparked discussions about safety with peers and family, confirming its effectiveness in achieving learning outcomes.

RESPONDENT'S RESPONSE

Table 7 presents the respondents' evaluation of the perceived usefulness of the animation. The results show consistently Very High levels of agreement, indicating that the animation was highly effective in delivering informative and meaningful content related to online child exploitation. Respondents agreed that the film increased their awareness of the issue (4.7) and provided accurate and relevant information about how children are exploited online (4.6). These ratings highlight the animation's ability to communicate important facts clearly and effectively. The highest rating, 4.9, shows strong agreement that the film offered valuable knowledge that can help prevent online abuse, demonstrating its practical impact on viewers' understanding of child safety. Similarly, the film's strong emphasis on the importance of protecting children's digital safety received a rating of 4.86, reinforcing its effectiveness as an educational tool. Lastly, respondents rated 4.7 for how the film influenced their perspective on reporting and addressing online abuse, suggesting that it not only informed viewers but also encouraged proactive attitudes toward child protection. Overall, the data

emphasizes the animation's strong usefulness in raising awareness, enhancing understanding, and promoting safety-related actions.

Table 7. Perceived Usefulness based on the Respondent's Response

Perceived Usefulness (PU)	Mean	SD	Interpretation
Watching the film increased my awareness about online child exploitation.	4.7	0.53	Very High
The film presented accurate and relevant information about how children are exploited online	4.6	0.56	Very High
The film effectively emphasized the importance of protecting children's digital safety.	4.86	0.34	Very High
The film provided valuable knowledge that can help prevent online abuse.	4.9	0.40	Very High
The film influenced my perspective on reporting and preventing online child exploitation.	4.7	0.65	Very High
Composite Mean	4.7	0.49	Very High

1 Very Low, 2 = Low, 3 = Moderate, 4 = Agree, 5 = Very High

Table 8 presents the respondents' evaluation of the film's perceived ease of use. The results reveal overall High to Very High levels of agreement, indicating that the film was generally accessible, smooth to use, and easy to understand across different viewing conditions. Respondents agreed that the film played smoothly and was easy to watch on various devices, as reflected in the mean score of 4.5. They also noted that the animation style, pacing, and narration contributed to the film's clarity, earning a mean of 4.46, which indicates that the presentation elements enhanced the viewing experience. The use of visuals and sound was also rated very highly (4.6), suggesting that these elements effectively communicated the seriousness of the issue. In addition, respondents found the film easy to access without requiring complicated setup or registration (4.63), emphasizing its convenience as an educational tool. Lastly, the high rating of 4.66 shows that viewers

experienced no technical issues while watching the film. Overall, the results highlight that the film is user-friendly, accessible, and presented in a way that supports clear understanding of the topic.

Table 8. Perceived Ease of Use based on the Respondent's Response

Perceived Ease of Use (PEOU)	**Mean**	**SD**	**Interpretation**
The film played smoothy and was easy to watch across different devices (e.g., laptop, phone).	4.5	0.62	Very High
The animation style pacing, and narration made the message easy to understand.	4.46	0.73	High
The use of visuals and sound helped convey the seriousness of the issue clearly.	4.6	0.67	Very High
The film was easy to access and required no complicated setup or registration.	4.63	0.55	Very High
There were no technical issues encountered while watching the film.	4.66	0.71	Very High
Composite Mean	4.57	0.65	Very High

1 Very Low, 2 = Low, 3 = Moderate, 4 = High, 5 = Very High

Table 9 presents the respondents' assessment of the film's aesthetic quality. The overall results reflect High to Very High levels of agreement, indicating that the visual and artistic elements of the film were well-received and contributed positively to the viewing experience. Respondents agreed that the animation featured visually appealing graphics and design, as shown by the mean score of 4.46, suggesting that the film's visual presentation enhanced its overall impact. The color choices and visual elements were also rated Very High (4.63), demonstrating that these components effectively supported the message and improved clarity. The character designs were perceived as appropriate and engaging (4.66), indicating that the characters contributed to maintaining viewer interest. Furthermore, the film's overall production quality received a very high rating (4.56), reflecting strong

appreciation for its craftsmanship and attention to detail. Lastly, the animation's visuals were noted to capture the viewers' attention and interest, with a mean score of 4.5, confirming the effectiveness of its aesthetic appeal.

Overall, the results show that the film's artistic and visual design significantly enhanced the audience's engagement and understanding of the message.

Table 9. Aesthetic Quality Use based on the Respondent's Response

Aesthetic Quality (AQ)	**Mean**	**SD**	**Interpretation**
The animation had visually appealing graphics and design.	4.46	0.62	High
The color choices and visual elements supported the message effectively.	4.63	0.66	Very High
The character designs were appropriate and engaging.	4.66	0.60	Very High
The overall production quality of the animation was impressive.	4.56	0.77	Very High
The animation's visuals captured my attention and interest.	4.5	0.77	Very High
Composite Mean	4.56	0.68	Very High

1 Very Low, 2 = Low, 3 = Moderate, 4 = Agree, 5 = Very High

Table 10 presents the respondents' evaluation of their perceived enjoyment while watching the animation. The results indicate High to Very High levels of agreement, showing that the animation was engaging and enjoyable despite its serious subject matter. Respondents reported that they enjoyed watching the animation (4.66), suggesting that the film-maintained viewer interest while still addressing a sensitive issue. The animation also successfully kept their attention throughout, as reflected in the mean score of 4.56, indicating that its pacing and presentation were effective. The highest

rating, 4.73, shows strong agreement that storytelling and pacing made the animation interesting to watch.

Additionally, the animation's ability to present the message in an engaging way (4.66) further highlights its effectiveness in balancing entertainment with meaningful content. Lastly, respondents rated 4.0 for feeling emotionally connected to the story and characters, which falls under "High," indicating that the animation was able to create some level of emotional resonance with viewers. Overall, the results demonstrate that the animation delivered an enjoyable and engaging viewing experience while still conveying its important message.

Table 10. Perceived Enjoyment based on the Respondent's Response

Perceived Enjoyment (PE)	**Mean**	**SD**	**Interpretation**
I enjoyed watching the animation despite its serious topic.	4.66	0.60	Very High
The animation successfully kept my attention throughout.	4.56	0.89	Very High
The storytelling and pacing made the animation interesting to watch.	4.73	0.52	Very High
The animation presented the message in an engaging way.	4.66	0.60	Very High
I felt emotionally connected to the story and characters in the animation.	4	1.14	High
Composite Mean	4.52	0.75	Very High

1 Very Low, 2 = Low, 3 = Moderate, 4 = Agree, 5 = Very High

Table 11 presents the respondents' evaluation of their attitude toward using the animation. The results indicate Very High levels of agreement across most statements, suggesting that the viewers had a positive and meaningful experience with the film. Respondents agreed that watching the animation was engaging and informative (4.63), showing that it effectively captured their interest while delivering important content. The highest rating,

4.66, reflects strong agreement that the animation made learning about online child exploitation more meaningful. This suggests that the film was able to simplify a complex issue and present it in a way that enhanced understanding.

Additionally, respondents rated 4.5 for the film's ability to capture and maintain their attention, as well as for its impact in making them reflect on the importance of child safety online. These results demonstrate that the animation was both engaging and thought-provoking. Lastly, the mean score of 4.46 for supporting the use of similar animations in educational campaigns classified as "High" shows that the viewers recognize the value of animations as effective learning and advocacy tools. Overall, the data highlights the animation's strong influence in shaping positive attitudes toward its use in educational settings.

Table 11. Attitude Toward Use based on the Respondent's Response

Attitude Toward Use (ATU)	**Mean**	**SD**	**Interpretation**
Watching the film was an engaging and informative experience.	4.63	0.55	Very High
The film made learning about online child exploitation more meaningful.	4.66	0.66	Very High
The film successfully captured and maintained my attention throughtout.	4.5	0.73	Very High
The animation made me reflect on the importance of child safety online.	4.5	0.77	Very High
I would support using similar animations for educational campaigns.	4.46	0.89	High
Composite Mean	4.55	0.72	Very High

1 Very Low, 2 = Low, 3 = Moderate, 4 = Agree, 5 = Very High

Table 12 presents the respondents' evaluation of their behavioral intention to use the animation. The results show consistently Very High levels of agreement, indicating strong positive intentions toward sharing and promoting the animation. Respondents expressed a high willingness to recommend the animation to parents, educators, and peers, as reflected in

the mean ratings ranging from 4.66 to 4.9. The animation also motivated viewers to take part in promoting online child protection, as shown by the mean score of 4.83. This suggests that the animation not only informed but also encouraged proactive involvement. Similarly, respondents indicated that they are willing to share the animation with friends or classmates (4.83), demonstrating its potential to reach wider audiences. Lastly, the rating of 4.7 for wanting to watch more educational animations like this further supports the animation's effectiveness in fostering continued interest and engagement.

Overall, the results highlight the animation's strong influence in encouraging positive behavioral intentions among its viewers.

Table 12. Behavioral Intention to Use based on the Respondent's Response

Behavioral Intention to Use (BIU)	**Mean**	**SD**	**Interpretation**
I would recommend this animation to parents or educators.	4.66	0.75	Very High
I would recommend this animation to parents or educators.	4.9	0.40	Very High
The animation motivated me to take part in promoting online child protection.	4.83	0.46	Very High
I am willing to share this animation with my friends or classmates.	4.83	0.46	Very High
I would like to watch more educational animations like this.	4.7	0.83	Very High
Composite Mean	4.78	0.58	Very High

1 Very Low, 2 = Low, 3 = Moderate, 4 = Agree, 5 = Very High

Aligned with ISO Child-Friendly Standards

The video followed ISO child-friendly and trauma-informed guidelines, supported by UNICEF. It avoided graphic or harmful content, used age-appropriate language, and emphasized empathy and safety. Respondents noted that the video was respectful, non-threatening, and suitable for children, fulfilling the objective of creating a safe and child-centered educational resource.

CHAPTER V

SUMMARY, CONCLUSIONS, AND RECOMMENDATIONS

This study presents a summary of the study, including the project's plans, methodologies, development, testing, and implementation. It also provides an interpretation of the findings and off emendations based on the results of the study.

Summary of Findings

In this chapter, the researchers summarize the key findings of the project, "Alingawgaw: A Campaign Awareness Video on Online Child Exploitation." The primary objective was to develop a campaign video focused on how predators manipulate children and how victims can overcome the resulting trauma. To complete the capstone project, the researchers used tools such as Procreate to create the characters and backgrounds, Procreate Dreams to animate the scenarios, and CapCut to combine the scenes altogether. (1) The findings revealed that the campaign video effectively raised awareness of online child exploitation by clearly illustrating grooming tactics, manipulation patterns, and the importance of timely reporting to prevent further harm. (2) Through the TAM evaluation, results showed that the video was perceived as useful, easy to understand, and engaging, indicating strong viewer acceptance and potential for educational impact. Additionally, (3) the content aligned well with ISO's child-friendly and multidisciplinary response standards, supported by UNICEF, as the video maintained a trauma-informed, child-centered approach and emphasized coordinated protective action among caregivers, communities, and authorities.

Conclusion

In summary, the capstone project “Alingawngaw: A Campaign Awareness Video on Online Child Exploitation” successfully achieved its objectives by producing an engaging and informative 2D animated video that raises awareness about online child exploitation, particularly the tactics of grooming used by predators, educates viewers on preventive measures, and presents the content in a safe, child-friendly manner.

1. Developed a 2D animated video that shows the strategies predators use to gain trust and manipulate children online.

This objective was achieved by creating a 2D animated campaign video that effectively depicted how predators gain trust and manipulate children online, using age-appropriate storytelling and visuals to raise awareness and help viewers recognize grooming behaviors.

2. Evaluated the campaign awareness video using the Technology Acceptance Model (TAM) to assess its efficiency and effectiveness in raising awareness, engaging viewers, and inspiring action.

The TAM evaluation showed that students found the video informative, engaging, and useful in understanding online risks, confirming its effectiveness as an awareness tool.

3. Aligned the 2D animated video with ISO 26000 child-rights principles and UNICEF child-friendly standards.

This was achieved by designing the video to be non-graphic, emotionally safe, and child-centered, ensuring the content remained appropriate and supportive for young audiences.

Recommendations

To enhance and expand the performance of the 2D animated video and raise awareness about Online Child Exploitation, the following recommendations have been made based on the study results and animation evaluation:

1. Institutional Integration and Capacity Building To fulfill the study's goal of supporting educators and guardians, it is recommended that local schools, nearby academic institutions, and community youth groups formally integrate the "Alingawngaw" animated video into their standard curricula. Specifically, it should be used as a core visual aid in digital literacy, ethics, and child-protection seminars. Providing teachers and parents with a supplementary discussion guide can further simplify the communication of sensitive topics, ensuring the video serves as a sustainable reference point for adult-led safety dialogues.

2. Strengthening Response and Reporting Mechanisms Aligning with the study's aim to empower youth with "actionable knowledge," the video's distribution should be paired with the active promotion of accessible reporting channels. Schools and local barangays should establish or highlight existing "Safe Spaces" or youth desks such as school guidance offices or digital hotlines where students can report concerns. Accompanying materials such as posters or digital flyers should clearly feature these contact details to ensure that the vigilance fostered by the video translates into immediate, real-world protection.

3. Longitudinal Assessment and Iterative Development To maintain the "educational efficacy" highlighted in the study, follow-up assessments should

be conducted with Grade 7 students at CDLB and other participating institutions. These longitudinal studies should evaluate how the animation influences long-term behavioral changes and attitudes toward online safety. By gathering continuous feedback from the target audience, future iterations of the campaign can be refined to address evolving digital threats, ensuring the project remains a relevant and effective tool in the national effort to combat online child exploitation.

APPENDIX A

Storyboard

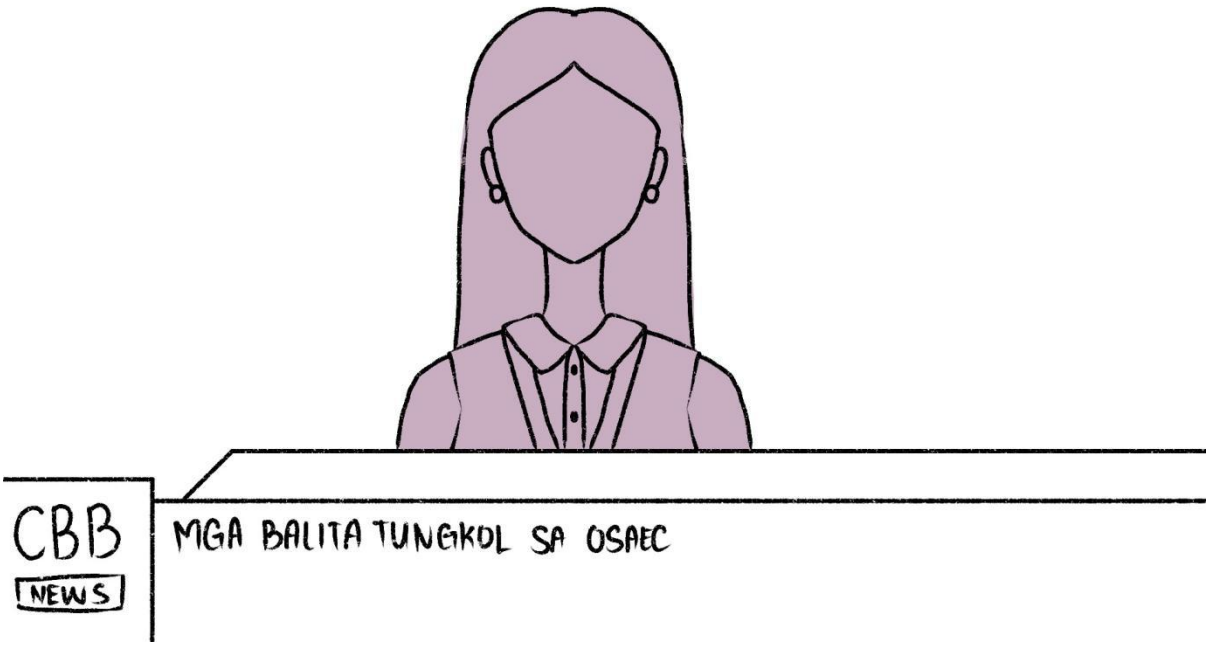

Scene 1

This scene depicts Leila sitting at a desk while drawing. The shot focuses on her hobby, with her friend appearing beside her. The characters are illustrated in soft monochromatic tones, emphasizing a calm and youthful environment.

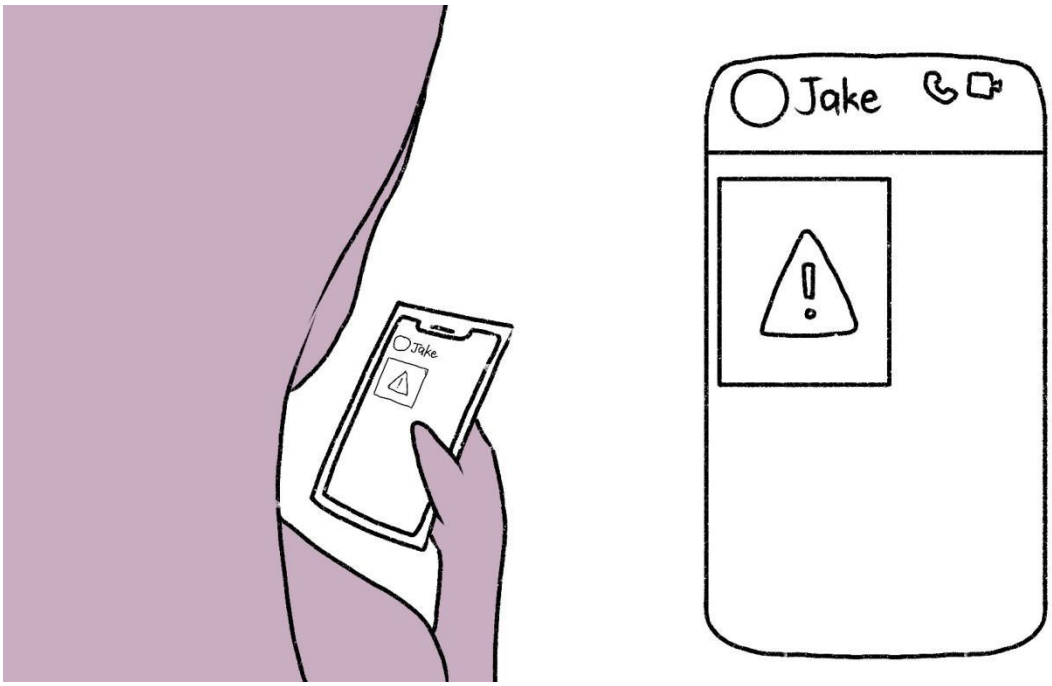

Scene 2

The scene shows a close-up view of a smartphone displaying a friend request notification, followed by a frame of Leila lying on her bed while using her phone. The visuals use muted colors to highlight the digital interaction as the main element.

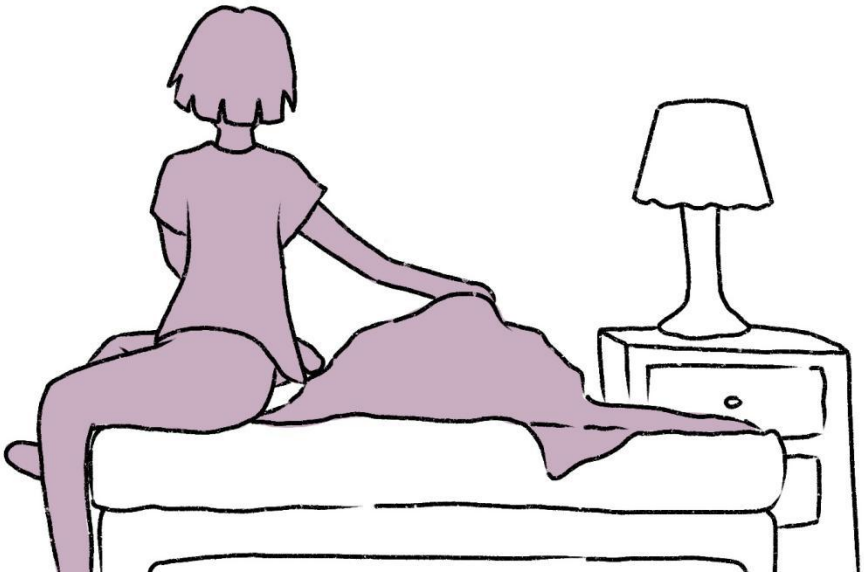

Scene 3

This frame features a news reporter in front of a TV news banner. The design uses clean lines and simplified backgrounds to direct attention to the reporter as the focal point.

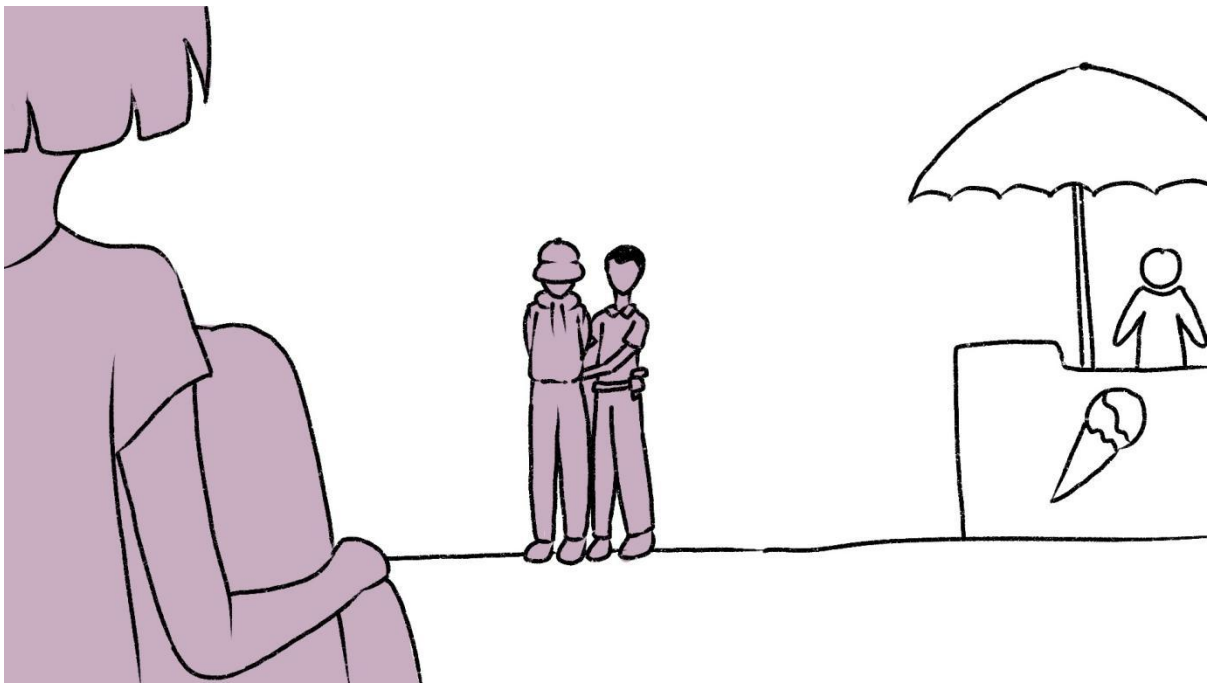

Scene 4

The scene shows Leila holding her phone, paired with another visual of a warning symbol on the screen. Minimalistic shading is used to emphasize tension and draw focus to the mobile screen content.

Scene 5

This scene displays Leila lying on her bed with her mother sitting next to her. The setting includes basic bedroom furniture, designed with simple shapes and neutral tones to maintain visual clarity.

Scene 6

The illustration features an outdoor setting with Leila observing police officers strategizing. The use of silhouettes and simplified environment elements helps portray anonymity and seriousness.

Scene 7

The scene shows a seminar setup. A speaker stands in front of a whiteboard, using light, neutral colors to represent an educational and supportive atmosphere.

Protektahan ang mga bata laban sa Online Child Exploitation

Kung may alam o narananasan na pang aabuso, mag sumbong agad sa mga awtoridad

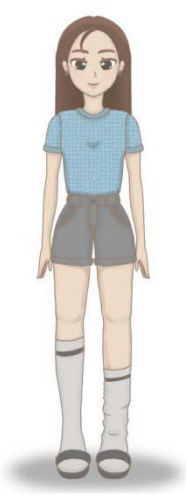

Hotline Numbers:
DSWD: 1343
PNP-WCPC: (02) 8410-3213
Bantay Bata: 163

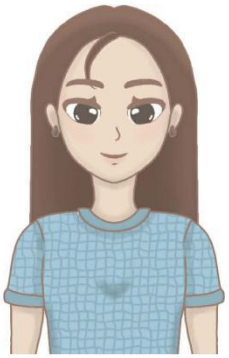

Scene 8 (Final Scene)

The final scene presents a plain background with hotline numbers and safety reminders displayed in text form. The design is intentionally simple to ensure readability and emphasis on the information.

APPENDIX B

Characters Design

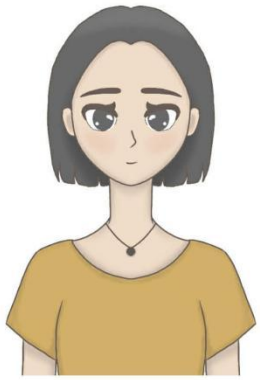

Character Leila

Leila was designed with light, soft colors a blue checkered top and muted gray shorts to reflect innocence and youth. Her long brown hair and round eyes emphasize a gentle and approachable look. The pastel tones help maintain a warm, non-threatening atmosphere while narrating her story.

Character Jena

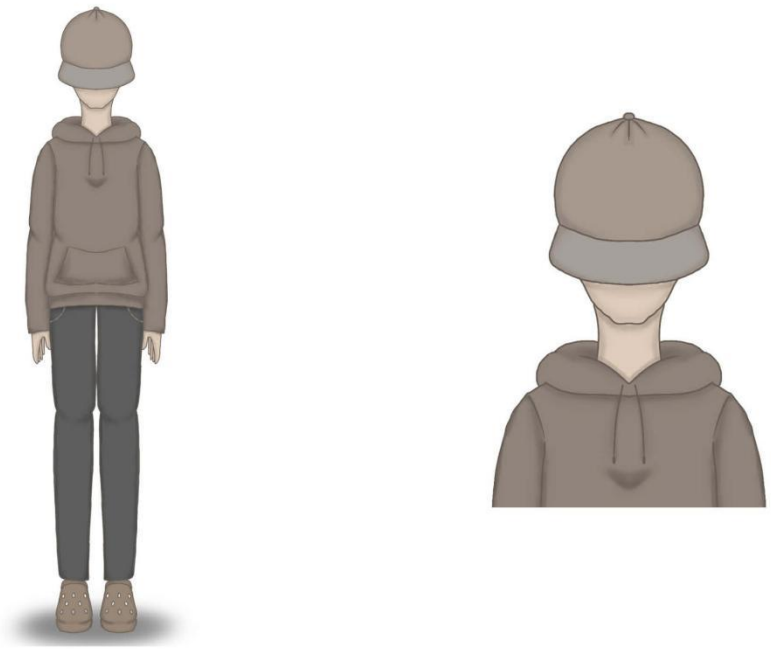

Jena’s design uses warm but muted earth tones, such as mustard yellow and dark gray pants. These colors are intentionally subdued to distinguish her from the younger characters and visually represent maturity without appearing strict or intimidating. Her simple hairstyle also reinforces a realistic, everyday-parent look.

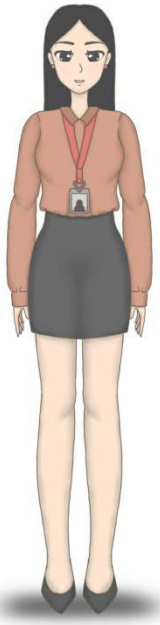

Character Yanna

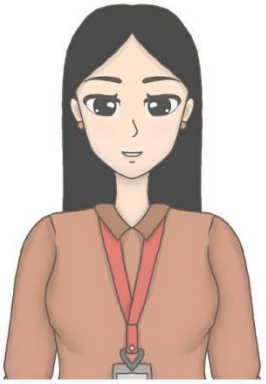

Yanna is designed with bright, playful colors, such as a yellow top and pastel blue striped shorts, to reflect her energetic and cheerful nature visually. The light, youthful palette also helps create a contrast with the more serious scenes later in the video, making her presence comforting and friendly.

Character Jake (Predator)

Jake is designed using dark, muted browns and grays, including a hoodie and cap, to visually convey secrecy and disguise. His character is shown from the back or with limited facial detail to avoid humanizing him and to maintain viewer safety only emphasizing the threat, not personal identity. The darker palette makes him visually stand out as the danger figure in the narrative.

Character Reporter

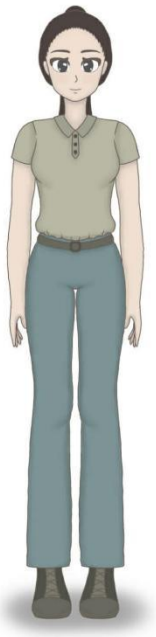

The Reporter is illustrated with a professional color scheme a muted red top paired with a black skirt to visually communicate authority and credibility. The ID lanyard and structured clothing design enhance her role as someone delivering factual information. The colors remain soft to match the overall aesthetic style of the animation.

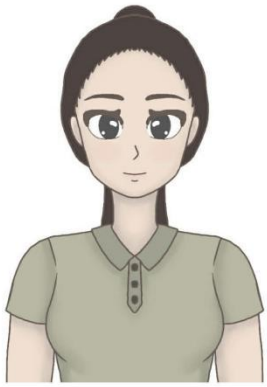

Character Police Officer

The Police Officer features a recognizable blue uniform with dark trousers, keeping the design accurate to real-life attire while still simplified for animation. The color blue symbolizes security and authority. The clean lines and straightforward design ensure the character is easy to identify even in brief scenes.

Character Social Worker

The Social Worker uses neutral, calm tones like sage green and muted teal. These colors are intentionally chosen to represent safety, guidance, and emotional support. Her simple and modest appearance contributes to a trustworthy and approachable character design.

APPENDIX C

Script

Habang ang mga bata ay nag lalaro ng takbuhan sa kalsada, si Leila ay tahimik at nakangiting nag dodrawing sa isang tabi.

Yanna:Hi, Leilaaa, tara sali ka saamin!

Leila: Pass muna me, tingnan mo o nag dodrawing ako di ba?

Yanna: bahala ka nga jan, hmp!

Natatawang bumalik si Leila sa pagdodrawing. At bumalik naman ang kaibigan niya sa paglalaro.

Kinagabihan habang nakahiga si Leila sa kama niya ay may nag add sa kanya na anime ang profile at ang pangalan nito ay Jake, binuksan niya ang profile ng nag add at namangha siya sa mga drawing nito. Maya maya pa ay tinanggap niya ito bilang friend sa fb. Wala pang ilang minuto ay nag chat agad ito sa kanya.

Jake: Hi

“Ang ganda ng mga drawing mo”

“Ako nga pala si Jake, 15 years old”

Leila: Hello

“Ang gaganda rin kaya ng drawing mo”

“Pareho tayo 15 years old din ako”

Jake: Pede ba tayo maging friends?

“Wala kasi akong friends”

“Pero secret lang natin ha, nahihiya kasi ako”

Leila: Hala

“Bat naman wala kang friends?”

“Sige na friends na tayo”

Jake: Mahiyain nga kasi ako hehe

Umaga na at nag aalmusal na si Leila pero nakatutok parin siya sa cellphone niya, habang ang Mama niya na si Jena ay nagkakape sa harap niya.

Jena: Anak, kumain ka muna bago mag cellphone, itatago ko yan sige.

Mabilis na tinago ni Leila ang cellphone niya at mabilis na kumain. Napatingin naman si Jena sa balita sa TV.

Reporter: “Patuloy ang pagtaas ng kaso ng online sexual exploitation ng mga bata sa bansa. Maraming insidente ang nagsisimula lamang sa simpleng pakikipag-chat sa internet, ngunit nauuwi sa mas malalang pang-aabuso.” “Ayon sa National Center for Missing & Exploited Children o NCMEC, nakatanggap sila ng mahigit pitong libong ulat sa loob lamang ng dalawang taon kaugnay ng maling paggamit ng Generative Artificial Intelligence o GAI. Sa pamamagitan ng teknolohiyang ito, nagagawa ng ilang indibidwal ang pekeng larawan at video ng mga bata na ginagamit para sa panlilinlang, pangha-harass, at pang-aabuso. Hindi lamang ito banta sa kaligtasan ng mga bata, kundi nagdudulot din ng matinding trauma at emosyonal na pinsala sa kanila at sa kanilang pamilya.”

“Dahil dito, nananawagan ang mga eksperto sa publiko na maging mapanuri at responsable sa paggamit ng internet. Huwag makisangkot, iwasan ang

pagbabahagi ng kahina-hinalang nilalaman, at agad i-report sa mga otoridad upang maprotektahan ang kabataan laban sa panganib ng maling paggamit ng teknolohiya.”

Jena: Ayan, kaya wag kang puro cellphone jan ha.

Hapon na at kausap agad ni Leila si Jake sa chat kahit kakauwi palang nya galing sa school.

Jake: Hi Good Morning.

Leila: Hello, good morning din

"May mga bago akong drawing"

"Pakita ko sayo mamaya"

Jake: Sige irerate ko

Leila: Dapat honest rate ha.

Jake: Alam mo masaya ka kausap.

"Ganito pala feeling ng may friend"

Leila: Haha.

"Ako madami akong friend"

"Gusto mo ipakilala kita sa kanila?"

Jake: Nako wag na

"Ok na sakin isang kaibigan"

"Pati di ba sabi ko sayo secret lang natin ito?"

Leila: Ikaw bahala

"Masaya pamandin pag madami kang friends"

Jake: "Ok na ako sa isang kabigan"

Jake: Kita kaya tayo minsan??

"tas drawing tayo?"

"Secret lang natin yun ha"

"sige ka magagalit ako pag sinabi mo sa iba"

Leila: baka magalit sakin si mama eh

Jake: Luh 15 ka na kaya, malaki ka na

Leila: Di pa naman kita pati ganon kakilala

"Next time nalang ha?"

Jake: Hmm

"Wait lang"

"May ipapakita ako sayo"

Sent a photo

Nanlaki ang mga mata ni Leila, wala siyang sinesend na picture kay Jake pero mahilig siya mag post ng picture niya sa facebook.

Jake: Wag mo sasabihin sa mama mo ha?

" Ipopost ko talaga to"

"Sige na kita na tayo"

"Friend naman na tayo eh"

"reply naman oh"

"pag di ka nag reply eedit pa kong marami"

"Leila kita na tayo pls..."

"Pumayag ka na pls..."

"Di talaga nag rereply, ipopost ko talaga to."

"Huy"

"Leila di ako nagbibiro"

"Bahala ka popost ko na to"

"Sige ka ikaw din."

Ibinaba niya ang cellphone niya sa kama at humagulgol. Ilang oras din umiyak si Leila hanggang sa tawagin siya ng Mama niya.

Jena: Anak kakain na

Sigaw ni Jena mula sa labas ng kwarto ni Leila ngunit nagtaka si Jena ng di sumagot si Leila. Kaya naisipan niyang pumasok sa loob ng kwarto. Naabutan niyang nakadapa si Leila sa kama at umiiyak.

Jena: Anak ko, bakit? May problema ba?

Hindi sumasagot si Leila at tuloy lang sa pag iyak. Napatingin si Jena sa cellphone ni Leila na tunog ng tunog kaya kinuha niya ito at binuksan.

Jena: Jusko anak ano ito.

Leila: Mama akala ko mabait siya huhuhuhu

Jena: Irereport natin ito anak, wag ka mag alala.

“Wag kang matakot sa kaniya”

“Andito lang ako nak”

Kinabukasan sa Police Station ay kinausap ni Jena ang isang pulis. At ipinakita ang pag uusap ni Leila at Jake.

Jena: Ayan po lahat ng mga sinabi niya sa anak ko at mga picture na inedit niya!

Pulis: Buti po ay nalaman niyo agad

“Ganito po may plano po ako, kung okay lang sa inyo Maam?”

Jena: Ano po ba ang plano niyo?

Pulis: Ichat niyo po siya gamit ang account ng anak niyo at kunware ay kayo po si Leila. Sabihin niyo na payag kayong makipag kita sa kaniya. Basta't wag niyang ikakalat ang mga litrato ni Leila na edited.

"Wag po kayong mag alala kasama niyo po ako, hindi po kayo mapapahamak sa plano na ito."

Sinunod ni Jena ang plano ng pulis at nag panggap siyang si Leila para mahuli ang mapang abusong kausap ng anak niya.

“slr”

“Sige na nga payag na ako, kita tayo bukas”

“Basta wag mo ipopost ang mga picture na yan”

Jake: Ayon

“Kala ko kinalimutan mo na ako eh”

Kinaumagahan.

Jake: Andito ako sa may nagtitinda ng ice cream.

"San ka?"

"Lilibre kita."

Napatingin sila sa Lalaking naka sumbrero at papunta ito sa nag titinda ng ice cream.

Leila: Mama baka magalit sya

Jena: Anak wag kang matakot makukulong na ang taong yan.

Maya maya pa ay nilapitan na ng mga pulis ang lalaki at confirmed na si Jake ito. Makalipas ang ilang araw. Simula nung mahuli ang nang abuso kay Leila ay madalas siyang na-attend sa seminar sa Barangay tungkol sa OSAEC.

Social Worker: “Mga kabataan, makinig kayo. Sa panahon ngayon, hindi lahat ng tao sa internet ay totoo sa sinasabi nila. Huwag basta-basta magtiwala, lalo na sa mga taong hindi niyo kilala. Kahit pa magpanggap silang mabait o parang kaibigan, tandaan puwedeng ginagamit lang nila ito para linlangin kayo at makuha ang inyong tiwala.”

“Kung may magpadala sa inyo ng mensaheng kahina-hinala, humihingi ng litrato o video, o nagpaparamdam ng hindi maganda agad na i-block at i-

report. Huwag ding i-share ang inyong personal na impormasyon gaya ng address, school,o contact number. Gamitin ang social media nang may pag-iingat: i-set sa private ang inyong account at piliin kung sino lang ang makakakita sa mga post ninyo.”

“At kung sakaling may magbanta, manakot, o gumamit ng inyong litrato o video para i-blackmail kayo huwag matakot at huwag itago sa sarili. Ang pinakamahalaga ay magsabi agad sa magulang, guro, o sa taong pinagkakatiwalaan ninyo. Tandaan ninyo: wala kayong kasalanan. Ang mali ay nasa taong nananakit at nang-aabuso.”

“May mga organisasyon na handang tumulong tulad ng PNP Women and Children Protection Center, DSWD, at mga NGO gaya ng SaferKidsPH at Child Rights Network. Maaari ring tumawag sa 1343 Actionline Against Human Trafficking o sa Bantay Bata 163 kung kailangan ninyo ng tulong.”

“Para naman sa mga nakaranas na ng ganitong pang-aabuso tandaan, may pag-asa at may mga taong handang makinig. Hindi madali ang paghilom, pero puwedeng magsimula sa paglapit sa counselor, social worker, o sa mga support group na tumutulong sa mga survivor ng OSAEC. Dahan-dahan, matutulungan kang bumalik ang tiwala sa sarili at maramdaman ulit ang kapayapaan.”

“Huwag kalilimutan: hindi kayo nag-iisa. May mga magulang, guro, social worker, at buong komunidad na handang kumampi at magprotekta sa inyo. Ang inyong kaligtasan at kinabukasan ay napakahalaga kaya maging maingat,

mapanuri, at laging tandaan na may karapatan kayong maging ligtas, marinig, at mapangalagaan.”

To: Teacher

Colegio De Los Baños
Lopez Avenue, Brgy. Batong Malake, Los Baños, Laguna

Subject: Request for Permission to Present Capstone Project Entitled "ALINGAWNGAW: A Campaign Awareness Video on Online Child Exploitation"

Dear Ma'am Mary Joy Pregonero,

Good day!

We, students from Laguna State Polytechnic University, are currently conducting our capstone project titled "ALINGAWNGAW: A Campaign Awareness Video on Online Child Exploitation." This 2D animated video aims to raise awareness and educate young audiences about the serious issue of online child exploitation and the importance of online safety.

In line with the objectives of our study, we would like to request your permission to present and show our animation to your high school students. After the viewing, we also intend to distribute a brief evaluation form that the students will answer. The gathered feedback will be used solely for academic purposes and will form part of our capstone manuscript and evaluation process.

We assure you that the video content is educational, age-appropriate, and created with the intention of promoting awareness and responsible digital behavior among students.

We sincerely hope for your kind approval of our request. Your support will greatly help us in completing our capstone study successfully.

Thank you very much for your time, understanding, and cooperation.

Respectfully yours,

Kathleen Angeles

Name (Optional): _____

ALINGAWNGAW: A CAMPAIGN AWARENESS VIDEO ON ONLINE CHILD EXPLOITATION

Part I. Respondent Profile *(Use for basic demographic info)*

1. Age: _____

2. Gender: ☐ Male ☐ Female ☐ Prefer not to say

1. Perceived Usefulness (PU)

Measures how relevant and impactful the animation is in educating and raising awareness about online child exploitation.

Criteria	Description / Indicators	1 – Very Low	2 – Low	3 – Moderate	4 – High	5 – Very High
Relevance of Message	How well the animation communicates the issue of online child exploitation.	Message is unclear and confusing.	Message is somewhat related but lacks focus.	Message is understandable but incomplete.	Message is clear and informative.	Message is very clear, relevant, and powerful.
Educational Impact	How much the animation increases awareness or knowledge.	No learning or awareness gained.	Minimal awareness improvement.	Moderate awareness gained.	Significant increase in knowledge.	Strong educational impact and understanding achieved.
Clarity of Information	How well the facts and content are presented.	Content is inaccurate or misleading.	Some unclear information.	Information is fairly clear but limited.	Clear and accurate presentation.	Highly accurate, clear, and easy to comprehend

	Questions:	5 Very High	4 High	3 Moderate	2 Low	1 Very Low
	1. Perceived Usefulness (PU) **This measures how relevant and impactful the animation is in raising awareness and educating viewers about online child exploitation.**					
1	Watching the film increased my awareness about online child exploitation.					

2	The film presented accurate and relevant information about how children are exploited online.					
3	The film effectively emphasized the importance of protecting children's digital safety.					
4	The film provided valuable knowledge that can help prevent online abuse.					
5	The film influenced my perspective on reporting and preventing online child exploitation.					

2. Perceived Ease of Use (PEOU)

Evaluates how easy it is for viewers to follow and understand the animation.

Criteria	Description / Indicators	1 – Very Low	2 – Low	3 – Moderate	4 – High	5 – Very High
Clarity of Narrative	Storyline and message flow.	Story is confusing and hard to follow.	Story is somewhat understandable.	Story has some clarity but inconsistent.	Storyline is clear and logical.	Storyline is very smooth and easy to follow.
Language and Accessibility	Simplicity of words and dialogue.	Hard to understand; too complex.	Some difficult terms used.	Language is average in clarity.	Language is easy to understand.	Very clear, simple, and accessible language.
Comprehension through Visuals	Effectiveness of visuals in supporting understanding.	Visuals cause confusion.	Visuals partly help understanding.	Visuals moderately aid comprehension.	Visuals clearly support the message.	Visuals make the message effortless to understand.

2. Perceived Ease of Use (PEOU) This focuses on how clear, accessible, and easy the animation is to understand and follow.		**5 Very High**	**4 High**	**3 Moderate**	**2 Low**	**1 Very Low**
1	The film played smoothy and was easy to watch across different devices (e.g., laptop, phone).					
2	The animation style pacing, and narration made the message easy to understand.					
3	The use of visuals and sound helped convey the seriousness of the issue clearly.					

4	The film was easy to access and required no complicated setup or registration.					
5	There were no technical issues encountered while watching the film.					

3. Aesthetic Quality (AQ)

Assesses the visual appeal, color, and overall design of the animation.

Criteria	Description / Indicators	1 – Very Low	2 – Low	3 – Moderate	4 – High	5 – Very High
Visual Appeal	Quality of graphics, colors, and style.	Unattractive and poor-quality visuals.	Below-average design appeal.	Average visuals, fairly appealing.	Attractive and good-quality design.	Excellent, eye-catching visuals.
Character and Scene Design	Appropriateness and creativity of characters and backgrounds.	Poorly designed and irrelevant.	Some designs are mismatched.	Moderately creative and relevant.	Well-designed and engaging.	Highly creative and appropriate designs.
Overall Production Quality	Smoothness and professionalism of animation.	Poor editing and low quality.	Some technical flaws.	Average quality with minor issues.	Smooth and professional.	Excellent quality and fully polished animation.

3. Aesthetic Quality (AQ) **This evaluates the visual appeal, design, and artistic quality of the animation.**		**5** **Very High**	**4** **High**	**3** **Moderate**	**2** **Low**	**1** **Very Low**
1	The animation had visually appealing graphics and design.					
2	The color choices and visual elements supported the message effectively.					
3	The character designs were appropriate and engaging.					
4	The overall production quality of the animation was impressive.					
5	The animation's visuals captured my attention and interest.					

4. Perceived Enjoyment (PE)

Measures how engaging and enjoyable the animation is despite the serious theme.

Criteria	Description / Indicators	1 – Very Low	2 – Low	3 – Moderate	4 – High	5 – Very High
Engagement Level	Ability to keep viewer attention.	Very boring; no engagement.	Somewhat dull and uninteresting.	Moderately engaging.	Holds attention effectively.	Highly engaging and captivating.
Emotional Impact	Connection and empathy evoked by the story.	No emotional impact.	Slight emotional response.	Some emotional engagement.	Strong emotional response.	Deep emotional impact and empathy.
Entertainment Value	Overall enjoyment while watching.	Not enjoyable at all.	Minimal enjoyment.	Fairly enjoyable.	Enjoyable and meaningful.	Very enjoyable and impactful experience.

4. Perceived Enjoyment (PE) **This measures the entertainment value and level of engagement experienced by viewers.**		**5 Very High**	**4 High**	**3 Moderate**	**2 Low**	**1 Very Low**
1	I enjoyed watching the animation despite its serious topic.					
2	The animation successfully kept my attention throughout.					
3	The storytelling and pacing made the animation interesting to watch.					
4	The animation presented the message in an engaging way.					
5	I felt emotionally connected to the story and characters in the animation.					

5. Attitude Toward Use (ATU)

Evaluates how viewers perceive and accept the use of animation as an educational tool.

Criteria	Description / Indicators	1 – Very Low	2 – Low	3 – Moderate	4 – High	5 – Very High
Perceived Relevance	Appropriateness of animation for awareness.	Animation feels irrelevant.	Slightly relevant.	Somewhat relevant.	Relevant and appropriate.	Highly appropriate and meaningful.
Acceptance of Medium	Willingness to accept animation for education.	Rejects use of animation.	Slight acceptance.	Neutral acceptance.	Accepts animation as effective.	Fully supports animation as educational tool.

Social Value	Belief that animation can benefit others.	No value seen.	Low perceived value.	Moderate value for others.	High value to educate others.	Very strong social and educational value.

5. Attitude Toward Use (ATU) **This examines the viewer's perception, acceptance, and overall attitude toward the animation as an educational material.**		**5 Very High**	**4 High**	**3 Moderate**	**2 Low**	**1 Very Low**
1	Watching the film was an engaging and informative experience.					
2	The film made learning about online child exploitation more meaningful.					
3	The film successfully captured and maintained my attention throughtout.					
4	The animation made me reflect on the importance of child safety online.					
5	I would support using similar animations for educational campaigns.					

6. Behavioral Intention (BI)

Measures the likelihood of recommending, sharing, or applying what was learned from the animation.

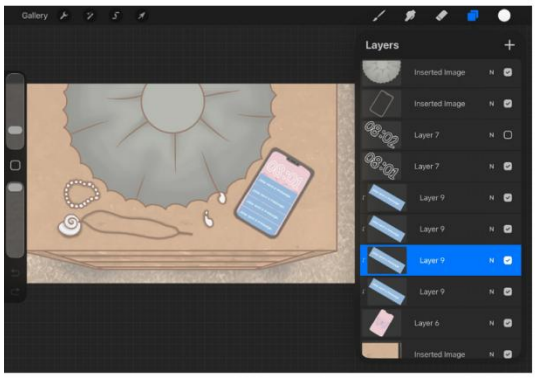

Criteria	**Description / Indicators**	**1 – Very Low**	**2 – Low**	**3 – Moderate**	**4 – High**	**5 – Very High**
Recommendation	Willingness to recommend to others.	Would not recommend.	Slightly willing to recommend.	May recommend occasionally.	Likely to recommend.	Definitely recommends to others.
Application of Learning	Intention to apply knowledge gained.	No intention to apply.	Little intention to apply.	May apply occasionally.	Will apply lessons learned.	Fully intends to apply and advocate learning.
Sharing and Advocacy	Intention to promote or share.	Will not share or advocate.	Low likelihood of sharing.	May share with few people.	Will share actively.	Highly motivated to share and advocate publicly.

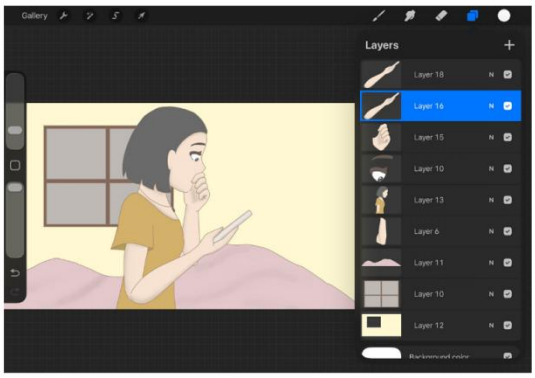

6. Behavioral Intention to Use (BIU)	**5 Very High**	**4 High**	**3 Moderate**	**2 Low**	**1 Very Low**

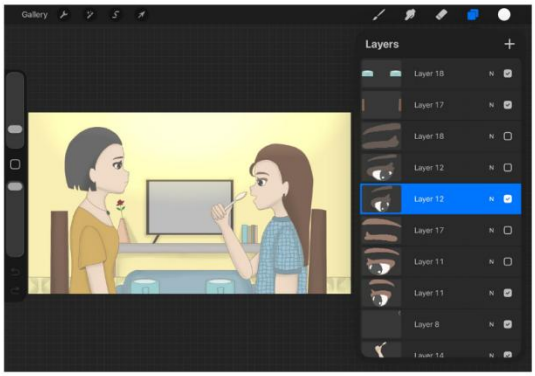

This measures the likelihood of viewers using, sharing, or recommending the animation to others.						
1	I would recommend this animation to parents or educators.					
2	I intend to use what I learned from the animation in real life.					
3	The animation motivated me to take part in promoting online child protection.					
4	I am willing to share this animation with my friends or classmates.					
5	I would like to watch more educational animations like this.					

APPENDIX F

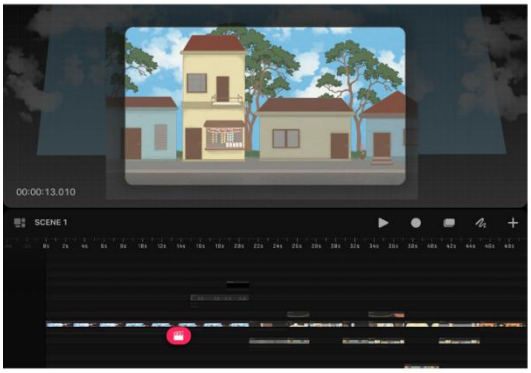

Animation Design

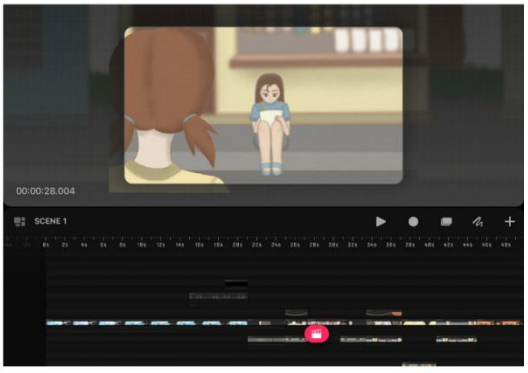

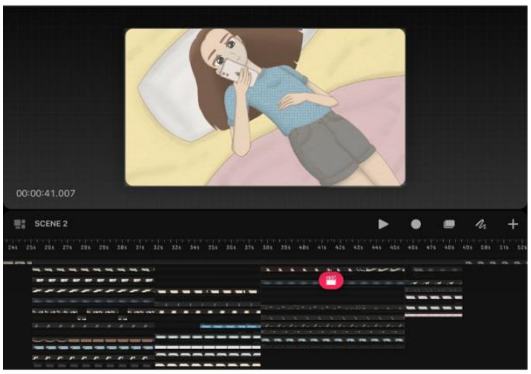

The process began in **Procreate**, where all characters, backgrounds, and key visual elements were created. Each drawing was organized into multiple layers based on movement for example, separate layers for the head, eyes, arms, or clothing. This layering technique made it easier to animate individual parts later without redrawing the entire character. Once the illustrations were finalized, the layered files were prepared for animation.

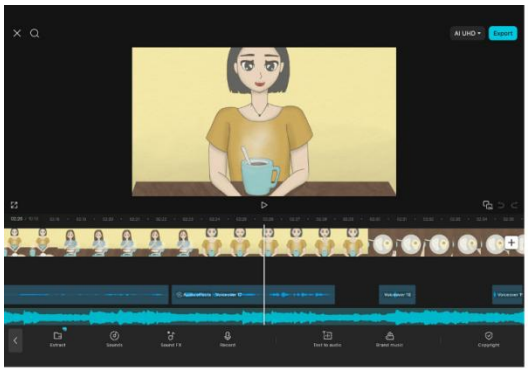

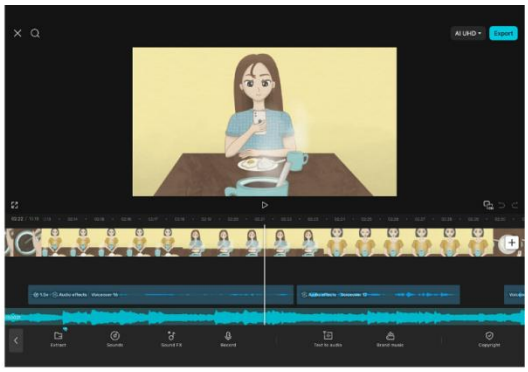

The layered Procreate files were then imported into Procreate Dreams. In this stage, the team animated the scenes by adjusting movement frame-by-frame or through timeline-based animation tools. Elements such as character expressions, body movements, and transitions were animated using the layers created in Procreate. This allowed for smooth, controlled motion and consistent visual storytelling across scenes.

After animating each scene, the clips were exported and assembled in CapCut. This stage involved arranging all animated sequences in their proper order, adding voiceovers from the script, inserting sound effects and background music, adjusting timing, and enhancing the overall flow of the video. CapCut served as the final editing software where the campaign video was polished and prepared for presentation.

ALINGAWNGAW: A CAMPAIGN AWARENESS VIDEO ON ONLINE CHILD EXPLOITATION

Ma. Kyla Ella L. Montalla, Kathleen N. Angeles, Mark M. Pascual
College of Computer Studies, Laguna State Polytechnic University, Los Baños, Laguna, Philippines

Article info:

Keywords:
Anti-Online Sexual Abuse and Exploitation of Children (OSAEC), Child Sexual Abuse or Exploitation Materials (CSAEM), Awareness, Animation and Motion Graphics, Technology Acceptance Model

ABSTRACT
The Philippines remains one of the countries most affected by Online Sexual Abuse and Exploitation of Children (OSAEC), with reports indicating widespread grooming, manipulation, and the use of advanced technologies in exploiting minors. In response to this growing concern, the project "Alingawngaw: A Campaign Awareness Video on Online Child Exploitation" aims to raise awareness among children and teenagers about the risks of online interactions, emphasizing how predators gain trust, manipulate victims, and cause long-term trauma. The study specifically sought to develop a 2D animated campaign video depicting online grooming, evaluate its effectiveness through the Technology Acceptance Model (TAM), and ensure that the content aligns with ISO and UNICEF child-friendly, trauma-informed standards.

The production followed pre-production, production, and post-production stages, using Procreate for illustrations, Procreate Dreams for animation, and CapCut for editing. The finished video was evaluated by Grade 7 students to determine its clarity, usefulness, and impact. Findings revealed that the video effectively increased awareness of grooming tactics, was rated engaging and easy to understand under TAM, and adhered to child-safe content guidelines. Overall, the project demonstrated the potential of 2D animation as an accessible educational tool to promote digital safety and empower young audiences against OSAEC.

1. PROJECT CONTEXT

The Philippines currently holds the alarming position of being the second highest in the world in terms of reported cases of online sexual abuse and exploitation of children (OSAEC). This troubling statistic, reported by the Cybercrime Investigation and Coordinating Center (2023), highlights the urgent need to address and combat the growing prevalence of OSAEC in the country.

Over 300 million children under the age of 18 have been affected by online child sexual exploitation and abuse in the past year a staggering figure that underscores the urgency of addressing this global crisis. This alarming estimate highlights the widespread nature of the threat and reinforces the importance of proactive education, awareness, and prevention efforts, especially through digital platforms like campaign videos. (Stanfield, 2024).

According to context from GMA News (2025), nearly 500,000 Filipino children were victimized by online sexual abuse in 2022, with many cases involving the use of advanced technology and AI to manipulate photos and videos. Additional concern is raised in a report from the Philippine News Agency (PNA, 2024), where Senator Hontiveros urged a deeper investigation into chat platforms commonly used for child grooming. Meanwhile, guidance from the Department of Justice (Politiko, 2025) emphasized that even AI-generated or digitally altered child exploitation content is considered illegal under Republic Act 11930. In support of these efforts, the private sector has strengthened its measures, as Philstar (2024) reported that Globe Telecom has begun blocking AI-generated child sexual abuse materials to help combat online child exploitation.

Online child exploitation has become a pressing issue in the digital age, with the Philippines emerging as a significant hotspot for such activities. The country has been identified as a central hub for the production of child sexual abuse materials, with alarming statistics highlighting the severity of the problem (Tarroja et al., 2019).

According to a study by the International Justice Mission (2025), it is estimated that 1 in every 100 Filipino children were trafficked to produce new child sexual exploitation material in 2022. Furthermore, data from the Department of Justice's Office of Cybercrime reveals a staggering increase in cyber tips related to child sexual abuse materials, rising from 579,006 in 2018 to over 1,000,000 in 2020 stated by SaferKidsPH. The digital landscape, while opening doors for communication and learning, has also created new avenues for perpetrators to target vulnerable children.

The impact of online sexual abuse and exploitation on children is profound, leading to severe physical, emotional, and psychological consequences. In one of the most alarming reports from IJM (2025). Filipino children as young as two years old were rescued from cybersex trafficking, a stark reminder of the terrifying reality many children face. This abuse often takes place in the child's own

home, facilitated by family members and livestreamed for paying offenders overseas.

Victim-survivors of child sexual abuse face a wide range of effects, including anxiety, depression, eating disorders, sleep disruptions, dissociation, PTSD, and personality disorders. Physically, survivors may experience chronic pain, gastrointestinal, gynecological, or reproductive health issues, as well as cardiopulmonary problems. The psychological toll extends to the child's development, affecting their sexual functioning, relationships, and ability to form secure attachments. Understanding these impacts requires a comprehensive view of the survivor's experiences, acknowledging the factors such as age, relationship to the abuser, and responses to disclosure (Vera-Gray, 2023).

Recognizing the urgency of the issue, the Department of Social Welfare and Development (DSWD) has partnered with organizations such as IJM to enhance protective mechanisms for children at risk. The Department of Justice (DOJ) has also reinforced its commitment through renewed collaboration with IJM, supporting victim rescue and case prosecutions. In a landmark case, the DOJ and the National Bureau of Investigation (NBI) secured a conviction in an OSAEC-related case, showcasing the government's increasing efforts to bring justice to victims and hold perpetrators accountable in 2024.

To strengthen the country's legal response, the Philippine government enacted Republic Act No. 11930, also known as the Anti-Online Sexual Abuse and Exploitation of Children (OSAEC) and Anti-Child Sexual Abuse or Exploitation Materials (CSAEM) Act. The law reinforces the legal framework against online exploitation, while the recent amendment raising the age of sexual consent from 12 to 16 demonstrates a commitment to greater child protection, though enforcement challenges remain (De Guzman, 2022).

Technological advancements and growing internet accessibility have further complicated the situation. Lower internet subscription fees and faster data transfer rates have contributed to rising online activity, which unfortunately includes illegal activities involving child abuse (UNICEF, 2021). According to the World Bank, South Asia's digital economy is expanding rapidly, with 43% of the population using the internet as of 2021 reaching 53% in the Philippines. As internet penetration increases, so too does the risk of online exploitation.

At the international level, the rights of children are protected under the United Nations Convention on the Rights of the Child (UNCRC), which obligates states to uphold these rights for all children within their jurisdiction, regardless of citizenship or legal status (Netkova & Mustafa, 2021).

The Sustainable Development Goals (SDGs), particularly SDG 8.7, have played a vital role in guiding global efforts to eliminate child trafficking and exploitation by calling for the eradication of forced labor, modern slavery, and human trafficking. However, societal norms continue to influence the local definition of acceptable child work. A study conducted in Sierra Leone offers insight into how communities differentiate between child work, labor, and trafficking distinctions that carry meaningful implications for creating culturally informed programs (Gleason & Cockayne, 2018). These findings are reflective of the broader shift in international focus since the early 2000s, from general child labor concerns toward targeted strategies combating trafficking and exploitation.

The emerging use of artificial intelligence (AI) in child sexual abuse and exploitation materials (CSAEM) presents a new and alarming challenge. While no cases have yet been reported in the Philippines, AI-generated CSAEM are already widespread in countries like the UK. These materials are created by tech-savvy perpetrators who exploit advanced software to generate abusive content without physically harming children. The Council for the Welfare of Children (CWC) has raised concerns over the use of AI in online exploitation and called for heightened awareness, responsible internet usage, and training for adults, including parents and educators, to safeguard children online.

The Philippines continues to combat online sexual abuse and exploitation of children (OSAEC). In 2022, nearly half a million Filipino children were trafficked via live streaming, often by their own relatives. The Philippine National Police (PNP) recorded over 17,600 child rights violations in 2023, with a significant portion involving online abuse. The government has enacted the OSAEC and CSAEM Act to strengthen legal protection against these crimes, including those involving AI-generated content. Additionally, efforts from companies like PLDT and Smart have led to the blocking of millions of harmful websites. On Safer Internet Day, global organizations like ChildFund Alliance highlighted the importance of protecting children online and ensuring they are educated as responsible digital citizens. This growing threat has led to stronger legal frameworks and increased efforts to safeguard children from online exploitation. The CWC urges continued vigilance and cooperation to protect children from these dangers. (PNS, 2024)

RESEARCH OBJECTIVES

Generally, this project aims to develop a campaign video on online child exploitation, focusing on online grooming. Specifically, this study aims to:

1. Developed a 2D animated video that shows the strategies predators use to gain trust and manipulate children online.

2. Evaluated the campaign awareness video using the Technology Acceptance Model (TAM) to assess its efficiency and effectiveness in raising awareness, engaging viewers, and inspiring action.
3. Aligned the 2D animated video with ISO 26000 child-rights principles and UNICEF child-friendly standards.

SIGNIFICANCE OF THE STUDY

The significance of this study lies in its proactive approach to addressing the critical issue of online child exploitation through the innovative and accessible medium of a child-friendly 2D animated video. By focusing on Grade 7 students, such as those at Colegio de Los Baños (CDLB), the research ensures that protective information is age-appropriate and resonates deeply with its primary audience. This direct engagement empowers children and teenagers to recognize the multifaceted risks of the digital world and grasp fundamental safety measures through an easily digestible, visually engaging format. Ultimately, "Alingawngaw" serves as a vital tool in preventing victimization by transforming complex safety protocols into actionable knowledge.
Beyond its direct impact on youth, the study highlights the efficacy of digital storytelling as an educational instrument. Traditional methods of instruction often fail to capture the attention of younger generations, but this animated campaign provides a compelling and memorable learning experience that raises awareness of evolving online threats. Furthermore, the video serves as an invaluable resource for educators, parents, and school personnel. By simplifying sensitive topics and providing a practical visual aid, "Alingawngaw" facilitates difficult but necessary dialogues about digital safety, strengthening the
capacity of guardians to protect children in an increasingly connected society.

On a broader scale, this research contributes significantly to national and international child protection efforts by advocating for a preventative model of digital literacy. By equipping young individuals with the tools for self-protection and fostering a culture of digital vigilance, the study strengthens the collective understanding of how creative media can be used to address pressing societal challenges. "Alingawngaw" is therefore more than a creative project; it is a critical educational intervention that leverages accessible technology to make a tangible contribution to the safety, well-being, and digital security of the youth.

2.THEORETICAL FRAMEWORK OF THE PROJECT

This project aims to align with several Sustainable Development Goals (SDGs), particularly those that promote child protection, education, gender equality, and social justice. This project seeks to support SDG 16: Peace, Justice, and Strong Institutions, specifically Target 16.2, which focuses on ending abuse, exploitation, trafficking, and all forms of violence against children. By raising awareness about online sexual abuse and exploitation of children (OSAEC) and Anti-Child Sexual Abuse or Exploitation Materials (CSAEM), the video intends to contribute to the prevention of digital crimes and the promotion of child safety.

The campaign also plans to support SDG 4: Quality Education by educating children and parents about online risks, children's rights, and protective strategies, thereby empowering them to make safer, more informed decisions in the digital space. In addition, it will address SDG 5: Gender Equality, particularly Target 5.2, by highlighting how girls are disproportionately affected by online exploitation and advocating for the elimination of gender-based violence and abuse.

Furthermore, the project aligns with SDG 9: Industry, Innovation, and Infrastructure by promoting the responsible and ethical use of digital platforms, encouraging social responsibility in the digital age. Lastly, the campaign will reflect the goals of SDG 1: No Poverty, recognizing poverty as a root cause of child exploitation and aiming to raise awareness about its impact on children's vulnerability (United Nations, n.d.).

Republic Act No. 11930, otherwise known as the Anti-Online Sexual Abuse and Exploitation of Children (OSAEC) Act of 2022, constitutes a significant advancement in Philippine legislation concerning child protection in the digital sphere. This law repealed specific provisions of the Cybercrime Prevention Act of 2012, particularly those related to the ambiguous definition of cybersex a matter that had been the focus of sustained critique and advocacy by the Foundation for Media Alternatives (2019). By narrowing the scope of criminal liability, the legislation ensures that the penalization of online sexual abuse is properly confined to exploitative acts involving children and does not encompass consensual sexual activity or expression between adults. This legal refinement upholds essential human rights principles, including privacy and freedom of expression, while strengthening safeguards against child exploitation online.

Online child exploitation remains a pressing issue in the Philippines, as emphasized by several studies and reports. (ECPAT International, 2022), in their study Disrupting Harm: Online Child Sexual Exploitation and Abuse in the Philippines, identified poverty, low digital literacy, and lack of adult supervision as major contributing factors. Their mixed-methods research underscores the crucial role of strong legal frameworks and education programs in protecting children online. Building on this (UNICEF, 2021), through a literature review titled The Role of Digital Technology in the Sexual Abuse

and Exploitation of Children, highlighted how technology can both facilitate and prevent abuse. The report calls for comprehensive online safety education and greater accountability from tech industries.

Complementing these findings from SaferKidsPH (2020), in their publication Keeping Filipino Children Safe Online, emphasized the importance of community and parental involvement in promoting online safety. Their campaign-based data support the use of multi-platform awareness strategies to encourage education and effective reporting mechanisms. To strengthen these initiatives, the Inter-Agency Council Against Trafficking (2021) developed the National Plan of Action Against Trafficking in Persons, a strategic policy review advocating for coordinated efforts among government bodies and NGOs. Collectively, these sources underline the multifaceted approach required through education, legislation, technology, and community collaboration to combat the online sexual abuse and exploitation of children in the Philippines.

Every child is a human being entitled to justice, freedom, and the opportunity to grow and develop, regardless of their nationality, race, religion, or skin color. These fundamental rights are upheld by the United Nations Universal Declaration of Human Rights. Children are often regarded as a nation's most valuable asset and, as such, deserve protection from all forms of harm. However, in reality, many children still fall victim to exploitation. One of the gravest forms of child exploitation is child marriage (Muhammad & Tummala, 2021).

The Philippines has made significant efforts to combat online sexual abuse and exploitation of children (OSAEC), with various campaigns, laws, and initiatives focused on raising awareness and providing support. One such initiative is the UNODC's "Beware the Share" campaign (2024), which aims to educate children, parents, and government agencies across Southeast Asia about the dangers of sharing sexualized content online, with a particular focus on the rise of OSAEC cases in countries like the Philippines. The campaign, funded by Canada and the Netherlands, utilizes interactive content to engage youth and educate them on legal consequences.

Similarly, the SaferKidsPH campaign, launched in 2019 by an Australian Government-led consortium, targets online sexual exploitation in the Philippines. Supported by UNICEF, Save the Children, and The Asia Foundation, this initiative promotes awareness, child-sensitive investigations, and strengthens child protection systems over the next six years. It also emphasizes the importance of cross-sector collaboration in preventing OSAEC. In addition, youth-led efforts are making an impact, such as in Davao, where student organizations like ACAD, organized by Save the Children Philippines, advocate for stronger laws, including the passage of the Anti-OSAEC-CSAEM Law (Republic Act 11930). This law aims to enhance child protection against online sexual abuse and exploitation and holds perpetrators accountable.

Save the Children (2024) also runs programs to raise awareness and create safer digital spaces for children.

The International Justice Mission (IJM) has partnered with platforms like TikTok to launch the #Report2Protect campaign (2023), which educates the public on reporting child trafficking for sexual exploitation. IJM's efforts have led to the rescue of over 1,000 victims and the conviction of hundreds of offenders. A troubling statistic revealed by a 2023 IJM-UN Rights Lab study showed that nearly half a million Filipino children were trafficked to produce child sexual exploitation materials (CSEM) in 2022. The study emphasized the urgent need for stronger global actions to prevent trafficking, with foreign demand driving much of the abuse. Additionally, a report highlighted the difficulties faced by authorities in effectively implementing laws due to inadequate resources and infrastructure (IJM, 2023). On a legal front, the Philippine government made advancements in 2023 by passing Republic Act 11930, which addresses online sexual abuse and exploitation and mandates stronger enforcement mechanisms.

However, the survey revealed that 20% of Filipino children aged 12–17 were victims of online sexual abuse and exploitation in the past year, underscoring the ongoing challenges in combating OSAEC. Despite existing frameworks, more resources, training, and attention are needed to effectively tackle this issue.

These campaigns, laws, and studies reflect the growing awareness of OSAEC in the Philippines and the need for continued vigilance, collaboration, and comprehensive action to protect children from online exploitation.

Social and Economic Context of Exploitation

The prevalence of Online Sexual Abuse and Exploitation of Children (OSAEC) has been increasing at an alarming rate in the Philippines in recent years. A Scale of Harm study conducted by the International Justice Mission (2022) estimated that nearly 500,000 children were trafficked for the production of new child sexual exploitation materials equivalent to approximately one in every 100 Filipino children. The onset of the COVID-19 pandemic further intensified children's vulnerability to various forms of abuse and exploitation, both nationally and globally. In 2021 alone, 20% of internet-using children aged 12 to 17 reported experiencing severe forms of online sexual abuse and exploitation. These included being coerced into sexual acts, having their sexual images shared without consent, or being forced to engage in sexual activities in exchange for money or material goods.

In proportion to the population, this represents an estimated two million children affected

by these forms of harm within a single year (ECPAT et al., 2022). Extensive literature has documented the profound and long-term impacts of childhood sexual victimization on survivors' physical health, mental well-being, social relationships, economic stability, and interpersonal functioning (Castelo-Branco et al., 2022; Henkhaus, 2022). Among these adverse consequences, trauma has been consistently identified as a central and enduring effect of sexual abuse and exploitation experienced during childhood (Amanda L. et al., 2022; Rohini et al., 2022).

During the first half of 2023, 22.4% of the population, or 25.24 million Filipinos, were estimated to be living below the poverty line, making poverty a persistent developmental issue in the country (Philippine Statistics Authority, 2023). The Philippines' high levels of poverty are caused by a soaring national debt, widespread corruption, and government waste, all of which are made worse by the nation's rapidly expanding population.

The COVID-19 pandemic has notably influenced the prevalence and victimization of children in online sexual exploitation in the Philippines. In response to the health crisis, the government implemented strict community quarantines and stay-at-home measures. These restrictions, coupled with increased emotional vulnerability, economic instability, and prolonged unsupervised online activity among children, contributed to a broader socio-economic crisis. This situation further intensified the pre-existing inequalities faced by vulnerable children, thereby heightening their exposure to risks such as online sexual exploitation, trafficking, abuse, and commercial sexual exploitation (UNICEF 2021).

Exploitation in Digital Age

The issue of child exploitation, both online and offline, is a serious concern, particularly in the context of children engaging in commercial activities, such as influencer marketing and criminal exploitation. Advances in information technology have led to the rise of "kid influencers" as part of influencer marketing, posing risks to children's development and rights. While children are legally unable to make fully informed decisions about their involvement in these commercial activities, the exploitation of their energy and labor can have detrimental effects on their emotional and physical well-being. To protect children's rights and ensure their well-being, it is crucial to adhere to legal frameworks such as the United Nations Convention on the Rights of the Child (CRC), ratified by Indonesia in 1990, which emphasizes the protection of children from violence and exploitation (Rafsanjani, 2022).

Several studies examine the risk factors and dynamics of child exploitation. For instance, a systematic review and meta-analysis by (Laird et al. 2020) identified key risk factors for child sexual exploitation, such as sexual risk behaviors, exposure to pornography, trauma, and childhood sexual abuse. These factors highlight the vulnerability of children to exploitation, emphasizing the need for targeted interventions. Similarly, (Barlow et al. 2022) argue that a more integrated approach to safeguarding, which combines perpetrator motivation and environmental factors, is necessary to address child criminal exploitation (CCE). In the case of children involved in both the child protection and youth justice systems, (Baidawi et al. 2020) found that placement instability and poor mental health contribute to increased vulnerability to exploitation, calling for stronger policies to address these issues.

Moreover, societal demand for child exploitation material is growing, with (Hunn et al. 2020) exploring the role of "opportunistic offenders" who may not fully grasp the criminality or harmfulness of viewing such material. These offenders' attitudes are crucial for understanding and preventing the onset of exploitation. A critical area of concern is early marriage, where children are often deprived of their rights by parents who are motivated by economic interests or religious beliefs. (Sopyan et al. 2023) highlight the trend of early marriages between children and foreign nationals in Indonesia, stressing the need for government intervention to protect children from this form of exploitation.

The CRC has been instrumental in advancing child protection globally; however, sexual abuse and exploitation remain persistent issues. (Simon et al. 2020) discuss the evolving nature of child sexual abuse and exploitation, particularly online, where children are at risk even when physically alone. Despite the adoption of the CRC, gaps remain in monitoring and reporting its implementation. In response to the growing challenges of trafficking and exploitation, (Chang et al. 2022) emphasize the need for pediatricians and healthcare professionals to understand the broader socio-political factors that contribute to vulnerability, such as capitalism, racism, and classism. They advocate for a more holistic approach to prevention, including better training for professionals and more effective interventions. To get an idea of the extent of the phenomenon, a simple search using the keyword porn will yield thousands of sites offering imagery of sexual nature (Elshenraki, 2020).

The Philippine National AI Roadmap seeks to position the country as an ASEAN-wide center of excellence for AI. For the Philippine government, technology Developments are the answer, not the problem according to OpenGov Asia (2021). Even so, there are only a few instances of AI-generated CSAM at the moment, but this number is anticipated. to expand rapidly and draw attention to fresh, intricate concerns regarding the sufficiency of current laws both domestically and internationally to prosecute these offenses (Ratner, 2021). In fact, the possibility of When that kind of crime is prosecuted, sensitive issues are raised regarding whether such

content is unlawful and what options victims may have for redress (Sullivan, 2024).

Forming friendships online has become common among young people today. However, building connections with strangers on the internet can expose them to the dangers of online grooming. This refers to a technology-driven method where an adult predator gains the trust of a young and vulnerable individual with the intent of sexually abusing or exploiting them. Unlike in the past, when such actions required close physical presence, the internet now enables predators to deeply involve themselves in a child's life by staying in constant contact across various digital platforms (Chiu & Quayle, 2022).

Child pornography as a term began to undergo critical reassessment following the initial wave of the Internet revolution in the early 2000s. In more recent years, there has been a marked shift toward the adoption of more precise and appropriate terminology, particularly within international and non-governmental reports as well as academic literature. The preferred terms now widely used include child sexual exploitation material (CSEM) and child sexual abuse material (CSAM). It is therefore considered unfortunate that a foundational document such as the United Nations Convention on the Rights of the Child (UNCRC) still employs the outdated term pornographic performances, as seen in Article 34. This discrepancy highlights the gap between contemporary understanding of the issue and the language used in a treaty drafted in 1989. Scholarly and institutional sources such as (Dąbrowska 2021) and (Gannon et al. 2023), which use the term CSAM, and (Drejer et al. 2024), which refers to CSEM reflect this evolution in terminology, with all examples dating from the 2020s and aligning with current standards in child protection discourse.

Artificial intelligence remains a rapidly advancing technology, yet public awareness of its potential dangers is still limited, particularly across different countries. At present, industrialized nations are at the forefront of AI development, resulting in the concentration of its use among a select few whether for legitimate innovation or illicit activities. In the Philippines, the Philippine National Police's Center for the Protection of Women and Children reported that, as of January 31, 2024, there have been no recorded cases involving AI-generated child sexual abuse material. However, with emerging reports suggesting the potential use of AI in child sexual exploitation in other countries, the Philippines is taking proactive steps to prepare for similar developments (Montemayor, 2024). As the technology continues to evolve, Philippine authorities are working to strengthen regulatory frameworks and enhance law enforcement training to address emerging threats. It is imperative for all stakeholders to remain vigilant and take preventive measures to ensure that AI is not misused, especially in safeguarding vulnerable populations from exploitation.

In conclusion, existing studies emphasize the urgent need for a strong and united response to online sexual abuse and exploitation of children (OSAEC) in the Philippines. Although there have been important steps forward through laws, awareness campaigns, and community programs, challenges such as weak enforcement, lack of education, and poverty continue to put children at risk. Addressing these issues requires ongoing collaboration between the government, organizations, communities, and families. Through this project, we aim to help raise awareness and promote safer online spaces for children, contributing to the broader fight against child exploitation.

2D Animation

In the evolving 21st-century knowledge economy, students are expected to grasp multifaceted ideas to develop intellectual competence. (Wickramasinghe 2020) emphasizes that 2D animation enhances the learning experience by simplifying complex academic content and delivering it in a visually engaging manner. Through an experimental study involving 180 business management undergraduates, the research compared traditional slide-based teaching with animated instructional videos. Thematic analysis revealed that students taught with 2D animations showed increased engagement and better comprehension, highlighting the tool's effectiveness in online learning settings.

Similarly, (Rahman 2023) explored the use of animated storytelling to educate the public on the environmental damage caused by textile waste. The study developed 2D animated short films detailing the life cycle of textiles and the resulting ecological harm. Evaluations through surveys and focus groups revealed a significant improvement in viewers' understanding and inclination toward more sustainable consumption habits. This suggests that animation can serve as an impactful medium for environmental education and behavioral change.

(Nazley et al. 2024) focused on the psychological and developmental impact of social media on adolescents. Their project combined qualitative data from interviews and surveys with the development of a 2D animated narrative illustrating common issues teens face, such as sleep deprivation and low self-esteem. The animation aimed to raise awareness of these effects and promote healthier digital habits. Findings suggested that animated campaigns could effectively communicate serious topics to younger audiences.

Further supported the role of animation in awareness-building by examining its use in environmental advocacy. The research highlighted how various animation forms like 2D, 3D, and stop-motion implify complex messages, create emotional engagement, and improve knowledge retention. When paired with gamification techniques, these

tools were shown to motivate audience participation and foster sustainable behavior, indicating their potential as educational and advocacy instruments (Karmakar et al. 2024).

Lastly, El-Aasy 2022) examined the effectiveness of 2D animated advertisements on Facebook using Adobe Animate. The study tackled the lack of compelling animated content on social media platforms, especially those that go beyond survivor stories to present innovative awareness messages. Through an experimental model and statistical analysis via questionnaires, the study found that 2D animated ads significantly influenced public awareness and behavior. It concluded that such advertisements can play a vital role in public education and social responsibility when implemented creatively and strategically

SYNTHESIS AND RELEVANCE OF THE STUDY

Child exploitation continues to be a significant global issue, particularly in the context of the digital era, where the prevalence of Online Sexual Abuse and Exploitation of Children (OSAEC) and Child Sexual Abuse and Exploitation Materials (CSAEM) has increased dramatically. Data collected from a local social worker in Barangay Anos, Los Baños Laguna in conjunction with findings from international literature and reports, illuminates the multifaceted causes and pervasive nature of online child exploitation.

In addition to qualitative data derived from interviews, the researchers engaged in a thematic analysis of several documentaries and video content centered on online child exploitation. The thematic analysis revealed recurring patterns, with a notable emphasis on the involvement of family members, including relatives of the victims, as perpetrators of online exploitation. These critical insights contributed to the formulation of the storyboard and script for the campaign video, which was under development at the time of the study.

A central theme emerging from both the interview and documentary analysis is the widespread lack of awareness among children and their guardians regarding the risks associated with digital exploitation. The local social worker highlighted the troubling fact that many children do not recognize their own exploitation, particularly when innocuous-seeming activities, such as dancing or singing, are recorded and shared online without proper understanding or consent. This observation is consistent with global findings from organizations such as UNICEF and ECLT (2025), which emphasize that limited educational initiatives and inadequate comprehension of children's rights and online risks are key factors contributing to children’s susceptibility to exploitation.

Moreover, poverty emerged as a principal determinant in the proliferation of child exploitation. The interviewee and global sources (ILO, 2011; UNICEF, 2020) corroborated that families facing economic hardship may, often unknowingly, involve their children in exploitative online activities as a means of financial survival. These findings are further supported by international studies, which assert that financial distress often forces families to rely on the income generated by their children, thereby perpetuating cycles of exploitation and abuse. These issues are particularly exacerbated in disaster-affected or conflict zones, where displacement and the lack of stable educational or legal frameworks place children at heightened risk of exploitation (BCN, 2023).

The recurring theme across broader reports is the systemic and deeply rooted crisis of online child sexual exploitation (OCSE) in the Philippines, fueled by poverty, technological misuse, and familial betrayal. At the core of the problem is economic desperation: poverty drives families sometimes even the children's own parents to commodify their children by selling explicit content online to foreign buyers. Financial need overpowers familial bonds, leading to a heartbreaking reality where 74% of perpetrators are relatives or close acquaintances. Technology, while offering connection and opportunity, has also been weaponized; platforms like Facebook and Telegram are increasingly used for trafficking activities, often unregulated and unchecked. The rise of artificial intelligence (AI) further complicates detection efforts by enabling the creation of fake but disturbingly realistic child abuse material. The COVID-19 pandemic and subsequent lockdowns exacerbated these problems, increasing internet usage and leaving vulnerable families with even fewer resources, thus amplifying exploitation.

As a result, the Philippines now ranks second globally in reported cases of OCSE, according to the International Justice Mission (IJM) and the Department of Information and Communications Technology (DICT). Despite some successful rescue operations and international collaborations, the overwhelming scale of the issue highlights the urgent need for stronger policies, better enforcement, technological safeguards, and global cooperation. Ultimately, this crisis is not merely a law enforcement issue it is a humanitarian, economic, and moral emergency that demands deep, systemic change.

The psychological and emotional consequences of online exploitation were another critical aspect raised in the interview. The social worker noted that involvement in online exploitative activities can profoundly damage a child’s mental health and sense of self-worth. Common outcomes of such exploitation include trauma, anxiety, and depression, alongside a pervasive fear of judgment, which often leads to children concealing their

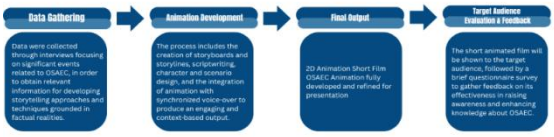

experiences from their caregivers. This aligns with existing literature, which indicates that children engaged in labor or online abuse often suffer from long-term psychological distress that extends into adulthood (UNICEF; BONYAN, 2024). Furthermore, children in these circumstances are also at risk of physical and verbal abuse, particularly when exploitation occurs in unsafe or concealed environments.

In terms of local interventions, the interviewee outlined several community-based strategies, including the distribution of educational materials, direct interventions, and the promotion of child-centered activities designed to mitigate excessive screen time and raise awareness. These grassroots efforts resonate with global literature, which advocates for multi-sectoral collaboration, enhanced community education, and the strengthening of government programs as essential components of a comprehensive response to child exploitation (ECLT, 2025; BONYAN, 2024). However, it is acknowledged that current programs, particularly those at the local level, remain in the early stages of development and have yet to reach a broad scope of effectiveness.

Finally, both the interview data and the academic literature underscore the urgent need to enhance public awareness of children's rights and the available support systems. The local social worker stressed the importance of educating both children and their parents on their rights and the resources available to them, a sentiment echoed in global reports. These reports suggest that widespread awareness campaigns, improved access to education, stricter law enforcement, and the development of robust family support systems are critical in addressing and ultimately eradicating child exploitation.

CONCEPTUAL FRAMEWORK

The figure below presents the conceptual framework that will guide the development of the digital awareness campaign, Alingawngaw, focused on online child exploitation specifically grooming. The process begins with gathering information through interview, online news and documentaries, and scholarly articles obtained from the internet, which serve as credible sources for developing storytelling strategies and techniques. It then progresses to the creative phase, involving the design of storylines, script drafting, character and scenario development, and the integration of visual sequences with synchronized voice-over to produce a cohesive and engaging material. The result of these efforts is a completed 2D short film on OSAEC, thoroughly refined and made ready for viewing. This framework supports the project's goal of raising awareness, educating children and parents, and encouraging community action to prevent online child exploitation.

1. The Conceptual Framework

3. METHODOLOGY

This chapter presents the research methodologies used in the study. It includes the project design, sampling design, population of the study, data gathering, instrument used, and the data analysis technique. The study aims to collect information about online child exploitation to guide the development of a proposed campaign awareness video.

Research Design

The creation of an animated film about Online Child Exploitation begins with gathering relevant articles, documentaries, and videos to ensure that the content is accurate and aligned with real cases. Using these references, the researchers developed a clear storyline and a linear narrative featuring seven characters. Visual designs, character illustrations, and storyboards were created using Procreate, while the animation was produced in Procreate Dreams. Finally, CapCut was used to edit, arrange, and finalize the animated scenes into a complete campaign film.

Animation Development Model

This figure illustrates the Animation Development Model used for creating a 2D animated short film. It outlines the step-by-step process, starting from gathering information, drawing characters, and writing the story (Pre-Production), followed by animation and layout work (Production), and finally voice recording, sound editing, and publishing (Post-Production). This model provides a clear and organized workflow for producing an animated short film.

Figure 2. Animation Development Model

Data Collection Instrument

The study used two instruments to gather data. First, an interview guide with open-ended questions was conducted to collect in-depth information on OSAEC and CSAEM, including victimization patterns, challenges in addressing the issue, and existing programs by the DSWD. Second, a TAM-based questionnaire was administered to

Grade 7 students after viewing the 2D animated campaign video. This instrument measured Perceived Usefulness, Perceived Ease of Use, Aesthetic Quality, and Behavioral Intention to Use, providing data on the video's effectiveness, clarity, engagement, and educational impact.

Table 1. Likert Scale

Scale	Range of Scores	Verbal Interpretation
Very High	4.50 - 5.00	Very High
High	3.50 - 4.49	High
Moderate	2.50 - 3.49	Moderate
Low	1.50 - 2.49	Low
Very Low	1.00 - 1.49	Very Low

The Likert scale was used to measure the TAM constructs in this study, such as perceived usefulness, ease of use, attitude, and intention to use. Each item was rated from 1 (Very Low) to 5 (Very High). After getting the mean score for each TAM variable, the values were interpreted using the score ranges in the table. Higher mean scores indicate a higher level of acceptance of the campaign video or animation based on TAM. This helps determine whether the material is effective, easy to understand, and likely to influence behavior or intention.

Draw Characters

Character creation is then carried out with careful attention to detail. Figures are deliberately designed to embody themes of safety, vulnerability, and empowerment while avoiding harmful stereotypes. Visual attributes such as clothing, gestures, and expressions are chosen to reflect the intended message and to connect meaningfully with the target audience, whether they are children, parents, or educators.

Story Writing

A structured storyline conveys both the risks of online child exploitation and the importance of preventive measures. This stage balances clarity and emotional engagement, ensuring that the message is strong yet appropriate for diverse audiences. The narrative functions not only as a medium of information but also as a tool for building empathy and encouraging proactive responses.

Animation

Animation production transforms static designs into dynamic visuals. Motion, timing, and visual emphasis are used strategically to create impact and sustain audience attention. Through animation, complex and abstract concepts surrounding online exploitation are communicated in a way that is both accessible and memorable.

Voice Recording

Enriches the project by adding tone, emotion, and relatability to the content. Appropriate delivery helps reinforce the seriousness of the topic while making the material engaging and understandable. This is complemented by sound editing and synchronization, where music, dialogue, and sound effects are refined to strengthen atmosphere and coherence. Proper sound design ensures that the auditory experience supports, rather than distracts from, the educational message.

Sound Editing & Sound Timing

This stage involves refining dialogue, narration, music, and sound effects to achieve clarity and coherence, ensuring that each auditory element aligns with the intended emotional tone. Careful synchronization between sound and visuals strengthens the audience's immersion, guiding their focus toward key moments in the narrative. Properly executed sound design not only heightens engagement but also reinforces the seriousness of the subject matter, allowing sensitive issues such as online child exploitation to be communicated with greater effectiveness and resonance.

U**ploading and Publishing**

Strategic distribution ensures that the animation reaches audiences most in need of awareness, including communities, schools, and advocacy networks. By making the material widely accessible, the project fulfills its goal of raising awareness, promoting vigilance, and contributing to collective action against online child exploitation.

Technology Acceptance Model

The Technology Acceptance Model (TAM) serves as a theoretical lens for analyzing how individuals respond to technological and media-based interventions. In this study, it is utilized to evaluate the effectiveness of an animated awareness campaign addressing the risks of online child exploitation. The model provides a comprehensive structure for assessing how participants interpret the material in terms of its clarity, relevance, and capacity to encourage behavioral change.

A total of thirty (30) respondents will participate in the evaluation. These participants, composed of students who actively use digital platforms. Their insights will be gathered through a structured survey designed to capture their perceptions of the animation's design, message delivery, and potential impact on awareness-building.

The assessment is organized around seven core dimensions of TAM: Perceived Usefulness, Perceived Ease of Use, Attitude, Behavioral Intention, Perceived Cost, Intention to Adopt, and Social Influence. Together, these categories provide a multidimensional understanding of how audiences engage with the material. For instance, the dimension of Perceived Usefulness reflects whether viewers believe the video increases their knowledge and equips them with strategies to safeguard children, while Social

Influence reveals how acceptance of the campaign may be shaped by peers, family, or community attitudes.

Responses will be measured using a 5-point Likert scale, allowing participants to indicate their level of agreement with carefully crafted statements related to the animation's quality, accessibility, and overall impact. This approach ensures that results are quantifiable and systematically comparable, strengthening the validity of the analysis.

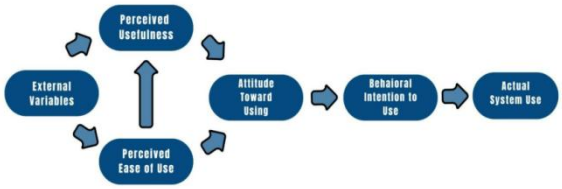

Figure 3. Technology Acceptance Model

Table 2.Cronbach's Alpha

VARIABLE	CRONBACH'S ALPHA	INTERPRETATION
Perceived Usefulness (PU)	0.719	High
Perceived Ease of Use (PEOU)	0.838	Very High
Aesthetic Quality (AQ)	0.830	Very High
Perceived Enjoyment (PE)	0.844	Very High
Attitude Toward Use (ATU)	0.871	Very High
Behavioral Intention to Use (BIU)	0.760	High
Overall Score	0.810	Very High

≥ 0.90 = Excellent, 0.80–0.89 = Very High, 0.70–0.79 = High, 0.60–0.69 = Moderate, < 0.60 = Poor

The reliability analysis using Cronbach's Alpha demonstrated that all constructs based on the Technology Acceptance Model (TAM) exhibited acceptable to excellent internal consistency. Perceived Usefulness (α = 0.719) and Behavioral Intention to Use (α = 0.760) showed high reliability, while Perceived Ease of Use (α = 0.838), Aesthetic Quality (α = 0.830), and Perceived Enjoyment (α = 0.844) demonstrated very high reliability. Attitude Toward Use recorded the highest score (α = 0.871), also indicating very high reliability based on the set scale. Since all alpha values exceeded the 0.70 threshold, the TAM-based questionnaire is considered highly reliable and appropriate for further statistical analyses within the study.

Sampling Design

This study used a purposive sampling design, selecting respondents who fit the criteria needed to evaluate the campaign video. Grade 7 students were chosen because they represent the age group most vulnerable to online risks and are the primary audience of the animated film. The sample was limited to one class or section, depending on availability, to gather focused and relevant feedback that would help assess the video's clarity, message delivery, and overall effectiveness in raising awareness about online child exploitation.

Population of the Study

The population of this study consists of Grade 7 students from a selected school in Los Baños, Laguna. They were chosen as the primary respondents because the campaign video is designed to raise awareness among young adolescents about online child exploitation, how predators approach children, and how these experiences can lead to trauma. Parents remain secondary beneficiaries, but the evaluation and feedback for the video will focus on Grade 7 students as the main audience.

Data Analysis

This study used a qualitative approach to analyze data gathered from an interview and several real-life documentaries and videos related to online child exploitation. Thematic analysis was used to identify recurring ideas, patterns, and insights from these materials. The results of this analysis helped the researchers develop a storyboard and script for the future campaign awareness video. These creative outputs aim to reflect real issues and promote awareness and prevention of online child exploitation.

Gathering Information and References

Information gathering is a vital component in the development of an effective advocacy campaign. References, which include articles, papers, documentaries and news reports, help ensure the accuracy of the data obtained from the interview used by the researchers. The goal of this study is to raise awareness among youth about the risks and realities of online child exploitation. It also aims to educate the public on available preventive measures, reporting mechanisms, and the importance of protecting youth in the digital world.

a. Materials

Refers to the collection of resources, tools, and references required in the animation workflow. These may include both tangible and digital

components that provide the technical and creative support necessary to carry out each stage of production efficiently.

b. Scriptwriting

Defined as the process of formulating the storyline of an animation, covering dialogue, narration, and scene directions. It functions as the narrative backbone that ensures consistency in plot development while guiding both the creative and technical aspects of production.

c. Sketches

Considered as initial visual studies that illustrate early concepts of characters, backgrounds, and key sequences. These drawings serve as planning instruments that allow experimentation and refinement before proceeding to full-scale animation.

d. Sound-Production

Encompasses the creation and integration of auditory elements such as voice recordings, sound effects, and music. By enhancing mood, rhythm, and emotion, this stage ensures that the animation resonates with its intended audience and complements the visual narrative.

e**. Post-Production**

Pertains to the finalization phase where all visual and audio components are merged into a polished whole. Editing, synchronization, compositing, and rendering are carried out to achieve a professional-quality animated output ready for presentation or distribution.

Script

Habang ang mga bata ay nag lalaro ng takbuhan sa kalsada, si Leila ay tahimik at nakangiting nag dodrawing sa isang tabi.
Yanna:Hi, Leilaaa, tara sali ka saamin!
Leila: Pass muna me, tingnan mo o nag dodrawing ako di ba?
Yanna: bahala ka nga jan, hmp!
Natatawang bumalik si Leila sa pagdodrawing. At bumalik naman ang kaibigan niya sa paglalaro.
Kinagabihan habang nakahiga si Leila sa kama niya ay may nag add sa kanya na anime ang profile at ang pangalan nito ay Jake, binuksan niya ang profile ng nag add at namangha siya sa mga drawing nito. Maya maya pa ay tinanggap niya ito bilang friend sa fb. Wala pang ilang minuto ay nag chat agad ito sa kanya.
Jake: Hi
“Ang ganda ng mga drawing mo”
“Ako nga pala si Jake, 15 years old”
Leila: Hello
“Ang gaganda rin kaya ng drawing mo”
“Pareho tayo 15 years old din ako”
Jake: Pede ba tayo maging friends?
“Wala kasi akong friends”
“Pero secret lang natin ha, nahihiya kasi ako”
Leila: Hala
“Bat naman wala kang friends?”
“Sige na friends na tayo”
Jake: Mahiyain nga kasi ako hehe
Umaga na at nag aalmusal na si Leila pero nakatutok parin siya sa cellphone niya, habang ang Mama niya na si Jena ay nagkakape sa harap niya.
Jena: Anak, kumain ka muna bago mag cellphone, itatago ko yan sige.
Mabilis na tinago ni Leila ang cellphone niya at mabilis na kumain. Napatingin naman si Jena sa balita sa TV.
Reporter: “Patuloy ang pagtaas ng kaso ng online sexual exploitation ng mga bata sa bansa. Maraming insidente ang nagsisimula lamang sa simpleng pakikipag-chat sa internet, ngunit nauuwi sa mas malalang pang-aabuso.” “Ayon sa National Center for Missing & Exploited Children o NCMEC, nakatanggap sila ng mahigit pitong libong ulat sa loob lamang ng dalawang taon kaugnay ng maling paggamit ng Generative Artificial Intelligence o GAI. Sa pamamagitan ng teknolohiyang ito, nagagawa ng ilang indibidwal ang pekeng larawan at video ng mga bata na ginagamit para sa panlilinlang, pangha-harass, at pang-aabuso. Hindi lamang ito banta sa kaligtasan ng mga bata, kundi nagdudulot din ng matinding trauma at emosyonal na pinsala sa kanila at sa kanilang pamilya.”
“Dahil dito, nananawagan ang mga eksperto sa publiko na maging mapanuri at responsable sa paggamit ng internet. Huwag makisangkot, iwasan ang pagbabahagi ng kahina-hinalang nilalaman, at agad i-report sa mga otoridad upang maprotektahan ang kabataan laban sa panganib ng maling paggamit ng teknolohiya.”
Jena: Ayan, kaya wag kang puro cellphone jan ha.
Hapon na at kausap agad ni Leila si Jake sa chat kahit kakauwi palang nya galing sa school.
Jake: Hi Good Morning.
Leila: Hello, good morning din
"May mga bago akong drawing"
"Pakita ko sayo mamaya"
Jake: Sige irerate ko
Leila: Dapat honest rate ha.
Jake: Alam mo masaya ka kausap.
"Ganito pala feeling ng may friend"
Leila: Haha.
"Ako madami akong friend"
"Gusto mo ipakilala kita sa kanila?"
Jake: Nako wag na
"Ok na sakin isang kaibigan"
"Pati di ba sabi ko sayo secret lang natin ito?"
Leila: Ikaw bahala
"Masaya pamandin pag madami kang friends"
Jake: "Ok na ako sa isang kabigan"

Jake: Kita kaya tayo minsan??
"tas drawing tayo?"
"Secret lang natin yun ha"
"sige ka magagalit ako pag sinabi mo sa iba"
Leila: baka magalit sakin si mama eh
Jake: Luh 15 ka na kaya, malaki ka na
Leila: Di pa naman kita pati ganon kakilala
"Next time nalang ha?"
Jake: Hmm
"Wait lang"
"May ipapakita ako sayo"
Sent a photo
Nanlaki ang mga mata ni Leila, wala siyang sinesend na picture kay Jake pero mahilig siya mag post ng picture niya sa facebook.
Jake: Wag mo sasabihin sa mama mo ha?
" Ipopost ko talaga to"
"Sige na kita na tayo"
"Friend naman na tayo eh"
"reply naman oh"
"pag di ka nag reply eedit pa kong marami"
"Leila kita na tayo pls..."
"Pumayag ka na pls..."
"Di talaga nag rereply, ipopost ko talaga to."
"Huy"
"Leila di ako nagbibiro"
"Bahala ka popost ko na to"
"Sige ka ikaw din."
Ibinaba niya ang cellphone niya sa kama at humagulgol. Ilang oras din umiyak si Leila hanggang sa tawagin siya ng Mama niya.
Jena: Anak kakain na
Sigaw ni Jena mula sa labas ng kwarto ni Leila ngunit nagtaka si Jena ng di sumagot si Leila. Kaya naisipan niyang pumasok sa loob ng kwarto. Naabutan niyang nakadapa si Leila sa kama at umiiyak.
Jena: Anak ko, bakit? May problema ba?
Hindi sumasagot si Leila at tuloy lang sa pag iyak. Napatingin si Jena sa cellphone ni Leila na tunog ng tunog kaya kinuha niya ito at binuksan.
Jena: Jusko anak ano ito.
Leila: Mama akala ko mabait siya huhuhuhu
Jena: Irereport natin ito anak, wag ka mag alala.
“Wag kang matakot sa kaniya”
“Andito lang ako nak”
Kinabukasan sa Police Station ay kinausap ni Jena ang isang pulis. At ipinakita ang pag uusap ni Leila at Jake.
Jena: Ayan po lahat ng mga sinabi niya sa anak ko at mga picture na inedit niya!
Pulis: Buti po ay nalaman niyo agad
“Ganito po may plano po ako, kung okay lang sa inyo Maam?”
Jena: Ano po ba ang plano niyo?
Pulis: Ichat niyo po siya gamit ang account ng anak niyo at kunware ay kayo po si Leila. Sabihin niyo na payag kayong makipag kita sa kaniya. Basta't wag niyang ikakalat ang mga litrato ni Leila na edited.
"Wag po kayong mag alala kasama niyo po ako, hindi po kayo mapapahamak sa plano na ito."
Sinunod ni Jena ang plano ng pulis at nag panggap siyang si Leila para mahuli ang mapang abusong kausap ng anak niya.
“slr”
“Sige na nga payag na ako, kita tayo bukas”
“Basta wag mo ipopost ang mga picture na yan”
Jake: Ayon
“Kala ko kinalimutan mo na ako eh”
Kinaumagahan.
Jake: Andito ako sa may nagtitinda ng ice cream.
"San ka?"
"Lilibre kita."
Napatingin sila sa Lalaking naka sumbrero at papunta ito sa nag titinda ng ice cream.
Leila: Mama baka magalit sya
Jena: Anak wag kang matakot makukulong na ang taong yan.
Maya maya pa ay nilapitan na ng mga pulis ang lalaki at confirmed na si Jake ito. Makalipas ang ilang araw. Simula nung mahuli ang nang abuso kay Leila ay madalas siyang na-attend sa seminar sa Barangay tungkol sa OSAEC.
Social Worker: “Mga kabataan, makinig kayo. Sa panahon ngayon, hindi lahat ng tao sa internet ay totoo sa sinasabi nila. Huwag basta-basta magtiwala, lalo na sa mga taong hindi niyo kilala. Kahit pa magpanggap silang mabait o parang kaibigan, tandaan puwedeng ginagamit lang nila ito para linlangin kayo at makuha ang inyong tiwala.”
“Kung may magpadala sa inyo ng mensaheng kahina-hinala, humihingi ng litrato o video, o nagpaparamdam ng hindi maganda agad na i-block at i-report. Huwag ding i-share ang inyong personal na impormasyon gaya ng address, school,o contact number. Gamitin ang social media nang may pag-iingat: i-set sa private ang inyong account at piliin kung sino lang ang makakakita sa mga post ninyo.”
“At kung sakaling may magbanta, manakot, o gumamit ng inyong litrato o video para i-blackmail kayo huwag matakot at huwag itago sa sarili. Ang pinakamahalaga ay magsabi agad sa magulang, guro, o sa taong pinagkakatiwalaan ninyo. Tandaan ninyo: wala kayong kasalanan. Ang mali ay nasa taong nananakit at nang-aabuso.”
“May mga organisasyon na handang tumulong tulad ng PNP Women and Children Protection Center, DSWD, at mga NGO gaya ng SaferKidsPH at Child Rights Network. Maaari ring tumawag sa 1343 Actionline Against Human Trafficking o sa Bantay Bata 163 kung kailangan ninyo ng tulong.”
“Para naman sa mga nakaranas na ng ganitong pang-aabuso tandaan, may pag-asa at may mga taong handang makinig. Hindi madali ang paghilom, pero puwedeng magsimula sa paglapit sa counselor, social worker, o sa mga support group na tumutulong sa mga survivor ng OSAEC. Dahan-dahan, matutulungan kang bumalik ang tiwala sa sarili at maramdaman ulit ang kapayapaan.”

“Huwag kalilimutan: hindi kayo nag-iisa. May mga magulang, guro, social worker, at buong komunidad na handang kumampi at magprotekta sa inyo. Ang inyong kaligtasan at kinabukasan ay napakahalaga kaya maging maingat, mapanuri, at laging tandaan na may karapatan kayong maging ligtas, marinig, at mapangalagaan.”
Text on screen:
“Protektahan ang mga bata laban sa Online Child Exploitation.”
“Kung may alam o naranasan na pang aabuso, mag sumbong agad sa mga awtoridad”

Characters Design

It is an artistic and systematic process that involves developing a figure’s appearance, personality, and identity to effectively communicate their role within a narrative or project. This process goes beyond simple illustration, requiring thoughtful consideration of physical traits, clothing, gestures, expressions, color palettes, and symbolic elements that reveal the character’s background, emotions, and motivations. Through this method, abstract ideas and written descriptions are transformed into concrete and relatable representations that audiences can easily understand. In studies addressing online child exploitation, such an approach becomes significant in portraying sensitive issues with clarity and responsibility, ensuring that visual outputs raise awareness without causing further harm or misrepresentation.

Figure 4. Character Leila

Leila is a shy, creative 15-year-old girl who loves drawing. She prefers spending time alone sketching rather than playing outside. Her innocence and active online presence on social media make her vulnerable to online grooming. In the story, she becomes a victim of manipulation and blackmail after unknowingly befriending an online predator, showing how easily minors can be targeted in digital spaces.

Figure 5. Character Leila (Leila’s Friend)

Yanna is Leila’s cheerful and outgoing friend. She represents normal teenage peer relationships and provides contrast to Leila's introverted personality. Through her interactions with Leila, the story shows that even children with friends and support systems can still fall victim to online manipulation. Yanna also symbolizes emotional recovery and normalcy in Leila’s life after the incident.

Figure 6. Character Jena (Leila’s Mother)

Jena is a caring and protective mother who maintains a close connection with her daughter. Her character highlights the challenges parents face in supervising their children’s online activities in today’s digital environment. In the story, she becomes the key figure who discovers the abuse, comforts Leila, and takes decisive action by reporting the incident to the authorities.

Figure 7. Character Jake (The Predator)

Jake is the antagonist who pretends to be a 15-year-old boy with similar interests as Leila. In reality, he is an adult predator using fake photos and edited images to manipulate minors. Through friendly conversations and emotional manipulation, he builds trust, isolates Leila, and eventually intimidates her through blackmail. His character clearly represents the common tactics used in online grooming and exploitation.

Figure 8. TV Reporter, Police Officer and Social Worker

The Reporter, Police Officer, and Social Worker collectively represent the institutional support system surrounding OSAEC cases in the story. The Reporter provides factual information that grounds the narrative in real-world issues, emphasizing the growing dangers of online exploitation. The Police Officer symbolizes law enforcement's protective role, assisting Jena in taking immediate and coordinated action against the predator. Meanwhile, the Social Worker offers guidance, education, and emotional reassurance, highlighting community support and the importance of responsible internet use and reporting. Together, these characters reinforce the message that OSAEC is a serious issue addressed by multiple sectors working to protect children.

Storyboard

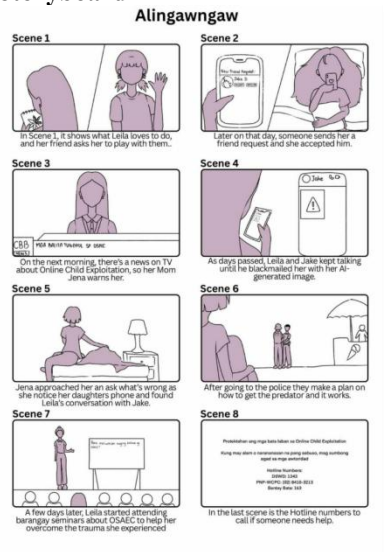

Figure 5. Storyboard

The storyboard of Alingawngaw visualizes a narrative that reflects the documented patterns of Online Sexual Abuse and Exploitation of Children (OSAEC) in the Philippines. As shown in various reports by IJM, UNICEF, and the PNP-WCPC, many OSAEC cases begin with online grooming through social media similar to how Leila is approached by a stranger in Scenes 2–4. The inclusion of AI-generated blackmail represents emerging digital risks highlighted in recent news articles, where manipulated images are increasingly used to coerce minors. Scenes 5 and 6 show the importance of parental involvement and immediate reporting, which aligns with studies emphasizing early intervention as a key protective factor. The depiction of police action mirrors real rescue operations carried out by the PNP-WCPC and DSWD in actual OSAEC cases. Finally, Scenes 7 and 8 highlight barangay-level awareness programs and support systems, consistent with recommendations from SaferKidsPH and UNICEF for community-based prevention and recovery. Overall, the storyboard aims to raise awareness by portraying a realistic, research-informed sequence of events surrounding OSAEC.

Software

A collection of digital programs and instructions that enables computers to execute processes necessary for animation, functioning as the primary platform through which creative concepts are designed, developed, and transformed into complete visual productions.

Procreate

A creative application for iOS and iPadOS that provides comprehensive tools for digital drawing, painting, and animation, widely utilized in visual arts and multimedia production for its efficiency, flexibility, and professional-quality output.

Procreate Dreams

Designed to support the entire creative workflow, offering integrated tools for drawing, motion graphics, visual effects, audio synchronization, and real-time editing, with the purpose of streamlining animation production from concept development to final output.

Capcut

Video editing application that provides tools for trimming, layering, transitions, effects, and audio synchronization. It is commonly used in multimedia and animation projects because of its accessibility and user-friendly interface.

Photoshop

A professional image editing and design software that also supports animation through frame-by-frame and timeline-based tools. It allows artists to create detailed visual elements, backgrounds, and character animations. Photoshop is widely used in animation production for enhancing graphics, compositing scenes, and adding visual effects,

making it an essential tool for digital artists and animators.

Character Animator

An animation software that brings 2D characters to life using motion capture and real-time facial tracking. It allows creators to animate characters quickly and naturally, making it ideal for interactive and live animation projects.

Texting Story

An application used to create chat-style videos that simulate text message conversations. It is often used in animation and storytelling projects to present dialogues creatively and engage viewers in a unique, conversational format.

Audacity

A free, open-source audio editing software used to record, edit, and mix sounds. It is commonly used in animation for voiceovers, sound effects, and background music production.

Hardware Specification

The specified hardware configuration demonstrates a well-rounded and efficient setup suitable for both productivity and everyday use. It comprises a performance-oriented laptop, a versatile pen tablet for creative tasks, and a dependable smartphone with expandable storage capabilities. This combination of devices provides the necessary functionality, flexibility, and mobility essential for handling various technical and creative tasks effectively.

Table 3. Device Specification

	DEVICE SPECIFICATIONS
IPadOS Version	26.0
Model Name	IPad (A16)
Capacity	128 GB

4. RESULTS AND CONCLUSION

This chapter presents the results of the study and summarizes the conclusions drawn from the evaluation of the project "Alingawngaw: A Campaign Awareness Video on Online Child Exploitation." The findings are organized according to the specific objectives of the study.

RESULTS BY OBJECTIVES

Raising Awareness on Online Child Exploitation

The animated video effectively raised awareness about online child exploitation by presenting a clear sequence of events that showed how grooming begins, escalates, and can be stopped through timely reporting. The story opens with Leila (a) enjoying her hobby of drawing, establishing her innocence and interests. This is followed by Jake sending a friend request (b) and quickly introducing himself (c), using friendliness and sympathy claiming he has no friends to gain Leila's trust (d). A TV report about online exploitation (e) appears early in the story as a warning sign, reinforcing the educational aspect of the video. As the grooming escalates, Jake pressures Leila to meet in person (f) and later blackmails her with edited photos (g), showing viewers how predators use manipulation and coercion.

The later scenes highlight the emotional and safety responses to online exploitation. Leila experiences fear and trauma (h), which raises awareness about the psychological impact on victims. Her mother discovers the situation (i), leading them to report the case to the police (j). Working together, her mother pretends to be Leila (k), resulting in the predator's arrest (l). Finally, Leila attends community seminars (m) to recover and learn more about protection. These scenes collectively demonstrate the full cycle of grooming from trust-building to manipulation, reporting, and healing thereby achieving the objective of educating viewers about online child exploitation and the importance of responding quickly and safely.

The characters of Alingawngaw each play an essential role in showing how OSAEC affects children and how families, authorities, and the community work together to protect them. The main character (a) is a quiet, artistic young girl who enjoys drawing and represents a typical, trusting child who can easily be targeted online. Her friend (c), Yanna, embodies healthy childhood relationships always cheerful, supportive, and present, providing Leila with genuine companionship that contrasts sharply with the false sense of friendship offered by the predator. Her mother (b) is a caring, observant parent who notices her daughter's unusual behavior constantly checking her phone, losing focus, and becoming emotionally withdrawn. This leads her to eventually discover the alarming messages and edited images sent by (g), the online predator who pretends to be a 15-year-old boy but is in reality a 43-year-old man using AI-generated photos to manipulate and blackmail minors like Leila.

When (b) realizes what her daughter is going through, she immediately reports the incident, prompting (f), the police officer, to assist them. He reviews the evidence, guides the mother on how to respond

safely, and creates a strategic entrapment plan that successfully leads to the predator's arrest. Earlier in the story, (d), a reporter, appears on television delivering news about the rising cases of OSAEC and the misuse of generative AI foreshadowing the danger that will soon affect Leila and emphasizing the urgency of online safety awareness. After the suspect is caught, (e), the social worker, plays a vital role in helping (a) recover from the emotional trauma. Through seminars, counseling, and community education, she teaches children about online grooming, responsible internet use, and the importance of seeking help when something feels wrong.

Together, these characters illustrate not only the emotional journey of a child victim but also the collective effort required to protect young people from online exploitation from the vigilance of parents and friends to the quick response of authorities, to the long-term support provided by social workers. Their interconnected roles emphasize that awareness, timely intervention, and community involvement are crucial in addressing and preventing OSAEC.

Evaluating the Video Using TAM

The Technology Acceptance Model (TAM) was used to measure the video's effectiveness in terms of clarity, usefulness, engagement, and enjoyment. Respondents rated the video positively, noting it was easy to understand, informative, and emotionally impactful. Open-ended feedback highlighted that the animation encouraged viewers to be cautious online and sparked discussions about safety with peers and family, confirming its effectiveness in achieving learning outcomes.

RESPONDENT'S RESPONSE

Table 4. Perceived Usefulness based on the Respondent's Response

Perceived Usefulness (PU)	Mean	SD	Interpretation
Watching the film increased my awareness about online child exploitation.	4.7	0.53	Very High
The film presented accurate and relevant information about how children are exploited online	4.6	0.56	Very High
The film effectively emphasized the importance of protecting children's digital safety.	4.86	0.34	Very High
The film provided valuable knowledge that can help prevent online abuse.	4.9	0.40	Very High
The film influenced my perspective on reporting and preventing online child exploitation.	4.7	0.65	Very High
Composite Mean	4.7	0.49	

Table 4 presents the respondents' evaluation of the perceived usefulness of the animation. The results show consistently Very High levels of agreement, indicating that the animation was highly effective in delivering informative and meaningful content related to online child exploitation. Respondents agreed that the film increased their awareness of the issue (4.7) and provided accurate and relevant information about how children are exploited online (4.6). These ratings highlight the animation's ability to communicate important facts clearly and effectively. The highest rating, 4.9, shows strong agreement that the film offered valuable knowledge that can help prevent online abuse, demonstrating its practical impact on viewers' understanding of child safety. Similarly, the film's strong emphasis on the importance of protecting children's digital safety received a rating of 4.86, reinforcing its effectiveness as an educational tool. Lastly, respondents rated 4.7 for how the film influenced their perspective on reporting and addressing online abuse, suggesting that it not only informed viewers but also encouraged proactive attitudes toward child protection. Overall, the data emphasizes the animation's strong usefulness in raising awareness, enhancing understanding, and promoting safety-related actions.

Table 5. Perceived Ease of Use based on the Respondent's Response

Perceived Ease of Use (PEOU)	Mean	SD	Interpretation
The film played smoothy and was easy to watch across different devices (e.g., laptop, phone).	4.5	0.62	Very High
The animation style pacing, and narration made the message easy to understand.	4.46	0.73	High
The use of visuals and sound helped convey the seriousness of the issue clearly.	4.6	0.67	Very High
The film was easy to access and required no complicated setup or registration.	4.63	0.55	Very High
There were no technical issues encountered while watching the film.	4.66	0.71	Very High
Composite Mean	4.57	0.65	

Table 5 presents the respondents' evaluation of the film's perceived ease of use. The results reveal overall High to Very High levels of agreement, indicating that the film was generally accessible, smooth to use, and easy to understand across different viewing conditions. Respondents agreed

that the film played smoothly and was easy to watch on various devices, as reflected in the mean score of 4.5. They also noted that the animation style, pacing, and narration contributed to the film's clarity, earning a mean of 4.46, which indicates that the presentation elements enhanced the viewing experience. The use of visuals and sound was also rated very highly (4.6), suggesting that these elements effectively communicated the seriousness of the issue. In addition, respondents found the film easy to access without requiring complicated setup or registration (4.63), emphasizing its convenience as an educational tool. Lastly, the high rating of 4.66 shows that viewers experienced no technical issues while watching the film. Overall, the results highlight that the film is user-friendly, accessible, and presented in a way that supports clear understanding of the topic.

Table 6. Aesthetic Quality Use based on the Respondent's Response

Aesthetic Quality (AQ)	Mean	SD	Interpretation
The animation had visually appealing graphics and design.	4.46	0.62	High
The color choices and visual elements supported the message effectively.	4.63	0.66	Very High
The character designs were appropriate and engaging.	4.66	0.60	Very High
The overall production quality of the animation was impressive.	4.56	0.77	Very High
The animation's visuals captured my attention and interest.	4.5	0.77	Very High
Composite Mean	4.56	0.68	

Table 6 presents the respondents' assessment of the film's aesthetic quality. The overall results reflect High to Very High levels of agreement, indicating that the visual and artistic elements of the film were well-received and contributed positively to the viewing experience. Respondents agreed that the animation featured visually appealing graphics and design, as shown by the mean score of 4.46, suggesting that the film's visual presentation enhanced its overall impact. The color choices and visual elements were also rated Very High (4.63), demonstrating that these components effectively supported the message and improved clarity. The character designs were perceived as appropriate and engaging (4.66), indicating that the characters contributed to maintaining viewer interest. Furthermore, the film's overall production quality received a very high rating (4.56), reflecting strong appreciation for its craftsmanship and attention to detail. Lastly, the animation's visuals were noted to capture the viewers' attention and interest, with a mean score of 4.5, confirming the effectiveness of its aesthetic appeal. Overall, the results show that the film's artistic and visual design significantly enhanced the audience's engagement and understanding of the message.

Table 7. Perceived Enjoyment based on the Respondent's Response

Perceived Enjoyment (PE)	Mean	SD	Interpretation
I enjoyed watching the animation despite its serious topic.	4.66	0.60	Very High
The animation successfully kept my attention throughout.	4.56	0.89	Very High
The storytelling and pacing made the animation interesting to watch.	4.73	0.52	Very High
The animation presented the message in an engaging way.	4.66	0.60	Very High
I felt emotionally connected to the story and characters in the animation.	4	1.14	High
Composite Mean	4.52	0.75	

Table 7 presents the respondents' evaluation of their perceived enjoyment while watching the animation. The results indicate High to Very High levels of agreement, showing that the animation was engaging and enjoyable despite its serious subject matter. Respondents reported that they enjoyed watching the animation (4.66), suggesting that the film-maintained viewer interest while still addressing a sensitive issue. The animation also successfully kept their attention throughout, as reflected in the mean score of 4.56, indicating that its pacing and presentation were effective. The highest rating, 4.73, shows strong agreement that storytelling and pacing made the animation interesting to watch. Additionally, the animation's ability to present the message in an engaging way (4.66) further highlights its effectiveness in balancing entertainment with meaningful content. Lastly, respondents rated 4.0 for feeling emotionally connected to the story and characters, which falls under "High," indicating that the animation was able to create some level of emotional resonance with viewers. Overall, the results demonstrate that the animation delivered an enjoyable and engaging viewing experience while still conveying its important message.

Table 8. Attitude Toward Use based on the Respondent's Response

Attitude Toward Use (ATU)	Mean	SD	Interpretation
Watching the film was an engaging and informative experience.	4.63	0.55	Very High
The film made learning about online child exploitation more meaningful.	4.66	0.66	Very High
The film successfully captured and maintained my attention throughtout.	4.5	0.73	Very High
The animation made me reflect on the importance of child safety online.	4.5	0.77	Very High
I would support using similar animations for educational campaigns.	4.46	0.89	High
Composite Mean	4.55	0.72	

Table 8 presents the respondents' evaluation of their attitude toward using the animation. The results indicate Very High levels of agreement across most statements, suggesting that the viewers had a positive and meaningful experience with the film. Respondents agreed that watching the animation was engaging and informative (4.63), showing that it effectively captured their interest while delivering important content. The highest rating, 4.66, reflects strong agreement that the animation made learning about online child exploitation more meaningful. This suggests that the film was able to simplify a complex issue and present it in a way that enhanced understanding. Additionally, respondents rated 4.5 for the film's ability to capture and maintain their attention, as well as for its impact in making them reflect on the importance of child safety online. These results demonstrate that the animation was both engaging and thought-provoking. Lastly, the mean score of 4.46 for supporting the use of similar animations in educational campaigns—classified as "High"—shows that the viewers recognize the value of animations as effective learning and advocacy tools. Overall, the data highlights the animation's strong influence in shaping positive attitudes toward its use in educational settings.

Table 9. Behavioral Intention to Use based on the Respondent's Response

Behavioral Intention to Use (BIU)	Mean	SD	Interpretation
I would recommend this animation to parents or educators.	4.66	0.75	Very High
I would recommend this animation to parents or educators.	4.9	0.40	Very High
The animation motivated me to take part in promoting online child protection.	4.83	0.46	Very High
I am willing to share this animation with my friends or classmates.	4.83	0.46	Very High
I would like to watch more educational animations like this.	4.7	0.83	Very High
Composite Mean	4.78	0.58	

Table 9 presents the respondents' evaluation of their behavioral intention to use the animation. The results show consistently Very High levels of agreement, indicating strong positive intentions toward sharing and promoting the animation. Respondents expressed a high willingness to recommend the animation to parents, educators, and peers, as reflected in the mean ratings ranging from 4.66 to 4.9. The animation also motivated viewers to take part in promoting online child protection, as shown by the mean score of 4.83. This suggests that the animation not only informed but also encouraged proactive involvement. Similarly, respondents indicated that they are willing to share the animation with friends or classmates (4.83), demonstrating its potential to reach wider audiences. Lastly, the rating of 4.7 for wanting to watch more educational animations like this further supports the animation's effectiveness in fostering continued interest and engagement. Overall, the results highlight the animation's strong influence in encouraging positive behavioral intentions among its viewers.

Aligning with ISO Child-Friendly Standards

The video followed ISO child-friendly and trauma-informed guidelines, supported by UNICEF. It avoided graphic or harmful content, used age-appropriate language, and emphasized empathy and safety. Respondents noted that the video was respectful, non-threatening, and suitable for children, fulfilling the objective of creating a safe and child-centered educational resource.

5. SUMMARY, CONCLUSIONS, AND RECOMMENDATIONS

This study presents a summary of the study, including the project's plans, methodologies, development, testing, and implementation. It also provides an interpretation of the findings and off emendations based on the results of the study.

Summary of Findings

In this chapter, the researchers summarize the key findings of the project, "Alingawgaw: A Campaign Awareness Video on Online Child Exploitation." The primary objective was to develop a campaign video focused on how predators manipulate children and how victims can overcome the resulting trauma. To complete the capstone project, the researchers used tools such as Procreate to create the characters and backgrounds, Procreate Dreams to animate the scenarios, and CapCut to combine the scenes altogether. (1) The findings revealed that the campaign video effectively raised awareness of online child exploitation by clearly illustrating grooming tactics, manipulation patterns, and the importance of timely reporting to prevent further harm. (2) Through the Technology Acceptance Model (TAM) evaluation, results showed that the video was perceived as useful, easy to understand, and engaging, indicating strong viewer acceptance and potential for educational impact. Additionally, (3) the content aligned well with ISO's child-friendly and multidisciplinary response standards, supported by UNICEF, as the video maintained a trauma-informed, child-centered approach and emphasized coordinated protective action among caregivers, communities, and authorities.

Conclusion

In summary, the capstone project "Alingawngaw: A Campaign Awareness Video on Online Child Exploitation" successfully achieved its objectives by producing an engaging and informative 2D animated video that raises awareness about online child exploitation, particularly the tactics of grooming used by predators, educates viewers on preventive measures, and presents the content in a **safe, child-friendly manner.**

1. Developed a 2D animated video that shows the strategies predators use to gain trust and manipulate children online.

This objective was achieved by creating a 2D animated campaign video that effectively depicted how predators gain trust and manipulate children online, using age-appropriate storytelling and visuals to raise awareness and help viewers recognize grooming behaviors.

2. Evaluated the campaign awareness video using the Technology Acceptance Model (TAM) to assess its efficiency and effectiveness in raising awareness, engaging viewers, and inspiring action.

The TAM evaluation showed that students found the video informative, engaging, and useful in understanding online risks, confirming its effectiveness as an awareness tool.

3. Aligned the 2D animated video with ISO 26000 child-rights principlesand UNICEF child-friendly standards.

This was achieved by designing the video to be non-graphic, emotionally safe, and child-centered, ensuring the content remained appropriate and supportive for young audiences.

Recommendations

To enhance and expand the performance of the 2D animated video and raise awareness about Online Child Exploitation, the following recommendations have been made based on the study results and animation evaluation:

1.Institutional Integration and Capacity Building To fulfill the study's goal of supporting educators and guardians, it is recommended that local schools, nearby academic institutions, and community youth groups formally integrate the "Alingawngaw" animated video into their standard curricula. Specifically, it should be used as a core visual aid in digital literacy, ethics, and child-protection seminars. Providing teachers and parents with a supplementary discussion guide can further simplify the communication of sensitive topics, ensuring the video serves as a sustainable reference point for adult-led safety dialogues.

2.Strengthening Response and Reporting Mechanisms Aligning with the study's aim to empower youth with "actionable knowledge," the video's distribution should be paired with the active promotion of accessible reporting channels. Schools and local barangays should establish or highlight existing "Safe Spaces" or youth desks such as school guidance offices or digital hotlines where students can report concerns. Accompanying materials such as posters or digital flyers should clearly feature these contact details to ensure that the vigilance fostered by the video translates into immediate, real-world protection.

3.Longitudinal Assessment and Iterative Development To maintain the "educational efficacy"

highlighted in the study, follow-up assessments should be conducted with Grade 7 students at CDLB and other participating institutions. These longitudinal studies should evaluate how the animation influences long-term behavioral changes and attitudes toward online safety. By gathering continuous feedback from the target audience, future iterations of the campaign can be refined to address evolving digital threats, ensuring the project remains a relevant and effective tool in the national effort to combat online child exploitation.
